Entered August 18, 1903, at Denton, as second-class matter under Act of
Congress of July 16, 1894.

"I believe normal schools to be a new instrumentality in the advancement of the race. I believe that without them free schools themselves would be shorn of their strength and their healing power, and would at length become mere charity schools and thus die out in fact and form. Neither the art of printing, nor the trial by jury, nor a free press, nor a free suffrage can long exist to any beneficial and salutary purpose without schools for the training of teachers; for, if the character and qualifications of teachers be allowed to degenerate, the free schools will become pauper schools and the pauper schools will produce pauper souls, and the free press will become a false and licentious press, and the ignorant voters will become venal voters, and through the medium and guise of republican forms an oligarchy of profligate and flagitious men will govern the land; nay, the universal diffusion and ultimate triumph of all-glorious Christianity itself must await the time when knowledge shall be diffused among men through the instrumentality of good schools. Coiled up in this institution as in a spring, there is a vigor whose uncoiling may whirl the spheres."—Horace Mann, at dedication of new building for Normal School at Bridgewater, August 19, 1846.

SESSION 1913-14.

Entrance examinations and classification by credentials Monday, Tuesday and Wednesday, September 15th, 16th and 17th.

Formation of classes and recitations Thursday, September 18, 1913.

Students coming for the first time should reach Denton Saturday, September 13th, and arrange for boarding places so as to be ready for the entrance examinations or for classification on Monday, September 15th.

Former students whose classifications are already determined need not report before Wednesday, September 17th.

It is important that students come at the times specified and thus avoid delay and dissatisfaction in classification.

Students entering at the beginning will be classified promptly. The entrance examinations cannot be extended indefinitely or repeated weekly.

TERMS.

The first term will begin September 17, 1913.

The second term will begin December 10, 1913.

The third term will begin March 4, 1914.

The third term will close May 26, 1914.

REGISTRAR AND STENOGRAPHER.

NORTH TEXAS STATE NORMAL COLLEGE.

HISTORICAL SKETCH.

The school was established by an act of the Twenty-sixth Legislature approved March 31, 1899

The first session began September 18, 1901. The control of the school was vested in the State Board of Education, consisting of the Governor, the Comptroller and the Secretary of State.

The course of study was planned to cover a period of three years, all students taking practically the same course; a choice, however, being permitted between Latin and certain branches of natural science, differentiating the work into two very slightly different courses, known as the "Latin Course" and the "English-Science Course."

This plan continued until the Thirty-first Legislature in 1909 created the Departments of Agriculture, Manual Training and Domestic Science, when a system of "electives" was adopted.

The elective system continued to the beginning of the twelfth session, when distinct courses or groups of subjects were offered, the choice of the student ending when he had selected his "course."

The Thirty-second Legislature, at its called session in 1911, created a State Normal School Board of Regents, consisting of the State Superintendent of Public Instruction and four other members to be appointed by the Governor.

The Board of Regents held its first meeting in Austin December 11, 1911, and formally assumed control of the four State Normal Schools in Texas.

Among the most important acts of the Board of Regents during its first year are:

1. The establishment of uniform entrance requirements for the Normal Schools and definitely fixing these requirements.
2. Extending the courses of study to cover four instead of three years, and making the courses uniform for the four schools.
3. The abolishing of the general course of study with a limited number of electives and requiring the student to choose one among several distinct groups of subjects, thus permitting specialization.

ATTENDANCE.

The enrollment for the successive years during the regular sessions of nine months in May of each year has been:

	Men.	Women.	Total.
Session 1901-02	191	320	511
Session 1902-03	212	335	547
Session 1903-04	228	350	578
Session 1904-05	195	366	561

	Men.	Women.	Total.
Session 1905-06	191	393	584

	<hr/> 2,515	<hr/> 1,905	<hr/> 1,195	<hr/> 5,615

BUILDINGS.

THE MAIN BUILDING.

In 1903 the main building, a brick, with basement and two stories, was constructed. This contains the administration offices, auditorium, and several recitation rooms. Its cost, including heating, electric wiring, plumbing, etc., was approximately \$60,000.

THE SCIENCE BUILDING.

In 1910 the science building was constructed. It is a fireproof brick and reinforced concrete structure of three floors. It contains several recitation rooms, a lecture room, the manual training shops, the laboratories for chemistry, physics, and domestic science, the power and light plant, store rooms, etc. Its cost, not including equipment, was \$35,000.

THE LIBRARY BUILDING.

In 1913 the library building was completed. It is a fireproof brick, reinforced concrete and steel structure. It contains the reading rooms, stack room, society rooms, several recitation rooms, gymnasiums, toilet rooms, etc. Its cost, without equipment, was \$55,000.

PRESIDENT'S RESIDENCE.

In 1907 the State Board of Education directed the President of each school to reside on the campus of the school. In 1909 the home for the President was built. It is a modern ten-room two-story building with all modern conveniences. Its cost, including some recent improvements, was \$5500.

EQUIPMENTS.

In addition to the usual and necessary supply of desks, blackboards, maps, etc., the school has chemical, physical, botanical, agricultural, and domestic science laboratories, workshops, lathes, circular and band saws, planing machine, etc., for manual training, gasoline engine for power and light, stereopticons, camera, pianos, and organs.

All buildings are electric lighted, steam heated, and connected with the city sewer. The main building is supplied with electric fans. The laboratories and the cooking room of the Home Economics Department are connected with the natural gas pipes that supply the city. The offices have telephone connection with two systems, both local and long distance.

WALKS.

During the last five years, concrete walks have been built around the campus, from all buildings to the streets, and on the campus connecting every building with each of the others.

ORNAMENTATION.

Donations by graduating classes, by the former Local Board and others of pictures, paintings, statuary, and sculpture have ornamented the auditorium and other rooms. Careful attention to the lawn, flower beds, etc., has contributed much to the esthetic appearance of the grounds and buildings.

COURSES OF STUDY.

The school offers seven distinct groups of subjects or courses of study, each covering a period of four years. The courses are equivalent as to amount of subject matter and as to the time requisite for their completion.

Each course comprehends two years of high school work and two years of strictly collegiate work, including the professional subjects recognized as necessary to the preparation of teachers.

First-year (Freshmen) students have practically the same course. Those who have completed the Freshman class in the school, or whose attainments enable them to enter a more advanced class upon matriculation, must choose one of the seven courses offered.

The student is not permitted to elect subjects or to plan a course different from any one offered. There are a few "alternatives" offered in each course, and in such case the student is allowed further manifestation of his preference.

The courses are:

- I. Agriculture.
- II. Home Economics.
- III. Manual Training.
- IV. Language.
- V. Science.
- VI. Primary and Art.
- VII. History-English.

PURPOSE OF THE COURSES.

Each course includes the fundamental subjects usually required in the grades of the public schools, and the completion of any one of the seven courses should equip the student for general public school work. Each course permits specialization, affording opportunity for preparation in a particular field.

1. The Agriculture course is intended to prepare teachers of agriculture in high schools, and principals of rural schools.

2. The Home Economics course is intended to prepare teachers of domestic science.

3. The Manual Training course is intended to prepare teachers of the different phases of manual training.

4. The Language course is intended for teachers of English and either Latin or German.

5. The Science course is planned for teachers of Mathematics, Physics and Chemistry.

6. The Primary and Art course is expected to equip the primary teacher and in addition to train a teacher of either drawing or music.

7. The History-English course is designed to prepare a teacher of History and English.

All three courses are offered in each of the four State Normal Schools of Texas.

The work is estimated in "units."

A unit is 5 recitations per week for a term of 12 weeks or 60 recitations of 45 minutes each.

The work of a session of nine months is 15 units.

The following table illustrates the scope of each course as to subject matter. The numerals denote the number of units required in each subject during the entire four years.

A Unit is 60 Recitations of 45 Minutes Each.	I	II	III	IV	V	VI	VII
	Agriculture.	Home Economics.	Manual Training.	Language.	Science.	Primary and Art.	History-English.
English.....	9	11	10	12	10	12	12

NOTE—This work of the fourth year will not be given in session 1913-14. At the end of the session diplomas will be awarded to those completing the former three year course.

MISS BLANTON, MISS CLARK, MISS PARKER.

This course consists of a thorough review of elementary grammar, including the classification of all the parts of speech and the study, in detail, of their inflections and constructions. Sentence analysis forms a part of the work of each week, and includes the analysis of all types of simple sentences, of compound sentences, and of complex sentences containing simple dependent clauses. Special drill is given on the correct forms and uses of all the parts of speech.

English 2. Elementary Composition. 1 unit.

This course has for its primary purpose to make correct form in writing habitual with the pupil. It includes the following: A detailed study of capitalization and punctuation; study of the paragraph, including the principles of paragraph construction and the different methods of paragraph development; study of letter writing, with drill on correct forms, and practice in writing business, social, and informal letters; simple compositions, including reproductions, paraphrasing, and easy exercises in narration and description.

In connection with the work in composition pupils are required to read certain classics, which they discuss with their instructor, and on which is based some of the work in composition writing. At least one composition per week is required in this course. Classics: Scott's "Ivanhoe," Irving's "Sketch Book," Hawthorne's "House of Seven Gables," Lowell's "Vision of Sir Launfal," any three of Poe's tales.

Text-books: Merkle and Ferguson's "Composition-Rhetoric" (chapters on Correctness, Clearness, Paragraphs, The Whole Composition, and Letters); Blanton's "Composition and Punctuation."

English 3. English Literature. 3 units.

This course consists of the history of English Literature from the Anglo-Saxon Period to the Victorian Age. A study is made of the representative writers belonging to each period, including their biographies, their style, and their representative writings. Representative poems are read and discussed by the class, and as much memory work is done as time permits. Two critical essays are to be written, based upon the supplementary reading.

Supplementary reading: First term—"Merchant of Venice," "Pilgrim's
Supplementary reading: First term—"Merchant of Venice," "Pilgrim's

Progress" (Part I), "Cranford," Macaulay's "Lays of Ancient Rome," "The Book of Ruth." Second term—"Julius Caesar," "Rape of the Lock," "David Copperfield," "The Princess" and "Sesame and Lilies."

Text-books: Long's "English Literature," Pancoast's "Standard English Poems."

English 4. American Literature. 1 unit.

This course consists of the history of American Literature from the Colonial Period to the present time. A study is made of the representative writers belonging to each period, including their biographies, their style, and their representative writings.

Selected pieces of literature are read and discussed by the class, and as much memory work is done as time permits. One critical essay is to be written, based upon the supplementary reading.

Supplementary reading: "The Deerslayer," Henry Grady's Essays, Southern Poets, "Franklin's Autobiography," and "Walden."

Text-book: Halleck's "History of American Literature."

English 5. Advanced Grammar. 1 unit.

This course is planned to give special preparation to teachers of grammar. It includes the following: A review of the classifications and constructions of the parts of speech and of the analysis of all types of the simple sentence; study, in detail, of the dependent clause; analysis of very difficult compound and complex sentences; study, in detail, of the verbal, including all constructions of the infinitive, the participle and the gerund; study of disputed points in grammar, with reference to various authorities assigned for reading; discussion of methods of teaching grammar.

Supplementary reading: "The Teaching of English," by Carpenter, Bacon and Scott.

Text-books: Kimball's "English Sentence," and Blanton's "Grammar Outline."

English 6. Advanced Composition. 2 units.

(a) Description and Narration. This course consists principally of a practical study of narration and description, including the principles of composition and the forms of each. In connection with the composition writing, the following will receive careful attention: Construction of outlines in theme-writing; sentence construction, including the principles of clearness, unity, coherence, and emphasis; a review of paragraph construction, including the principles, and the methods of development; and a review of correct grammatical usage, as relates to nouns, pronouns, and adjectives. The class reviews capitalization and punctuation, including end-punctuation and the uses of quotation marks, of the apostrophe, the hyphen, and the comma.

In addition, the course includes the study of versification, with practice in verse writing. Methods of teaching composition are discussed in connection with the various parts of the course. At least one composition per week is required. As supplementary reading the class is required to read the following classics, which are discussed in the class room, and

from which are taken some of the subjects for theme writing: "A Tale of Two Cities," "Silas Marner," and DeQuincey's "Joan of Arc."

(b) Exposition and Argument. This course will consist principally of a practical study of exposition and argument, including the principles of composition and the forms of each. In connection with the theme writing, the class will study the following: Construction of outlines in theme-writing. Diction, including the proper meanings and uses of words frequently misused; and Figures of Speech.

A review will be taken of letter writing, of correct grammatical usage as relates to verbs, adverbs, prepositions, and conjunctions, and of punctuation, including the uses of the semicolon, the colon, and the dash. Methods of teaching composition will be discussed in connection with the various parts of the course. At least one composition per week will be required.

Supplementary reading: "Lorna Doone," "Burke's Speech on the Conciliation," "Elegy in a Country Churchyard."

Text-books for Courses A and B: Newcomer and Seward's "Rhetoric in Practice," Blanton's "Composition and Punctuation," and Woolley's "Handbook of Composition."

English 7. Literary Masterpieces. 1 unit.

In this course a critical study is made of the English Ballad, Selections from Books I and II of Spenser's "Faerie Queene," "The Elizabethan Lyric," Milton's "L'Allegro" and "Il Penseroso," Pope's "Rape of the Lock," selected poems from Blake and Chatterton, Burns' "Tam O'Shanter," "To a Mouse," "To a Daisy," and Lyrics, Wordsworth's "Ode on Immortality," "Ode to Duty," and Sonnets, Coleridge's "Ancient Mariner," selections from Byron's "Childe Harold" and "Don Juan," Shelley's Odes and Keats' Odes. A critical essay will be written, based upon the supplementary reading, and as much memory work is done as the time permits.

Supplementary Reading: Chaucer's "Knight's Tale," Selections from the "Iliad" and the "Odyssey," Selected books from "Paradise Lost," Thackeray's "English Humorists," and Browning's "Pippa Passes."

Text-book: Pancoast's "Standard English Poems."

English 8. Shakspeare. 1 unit.

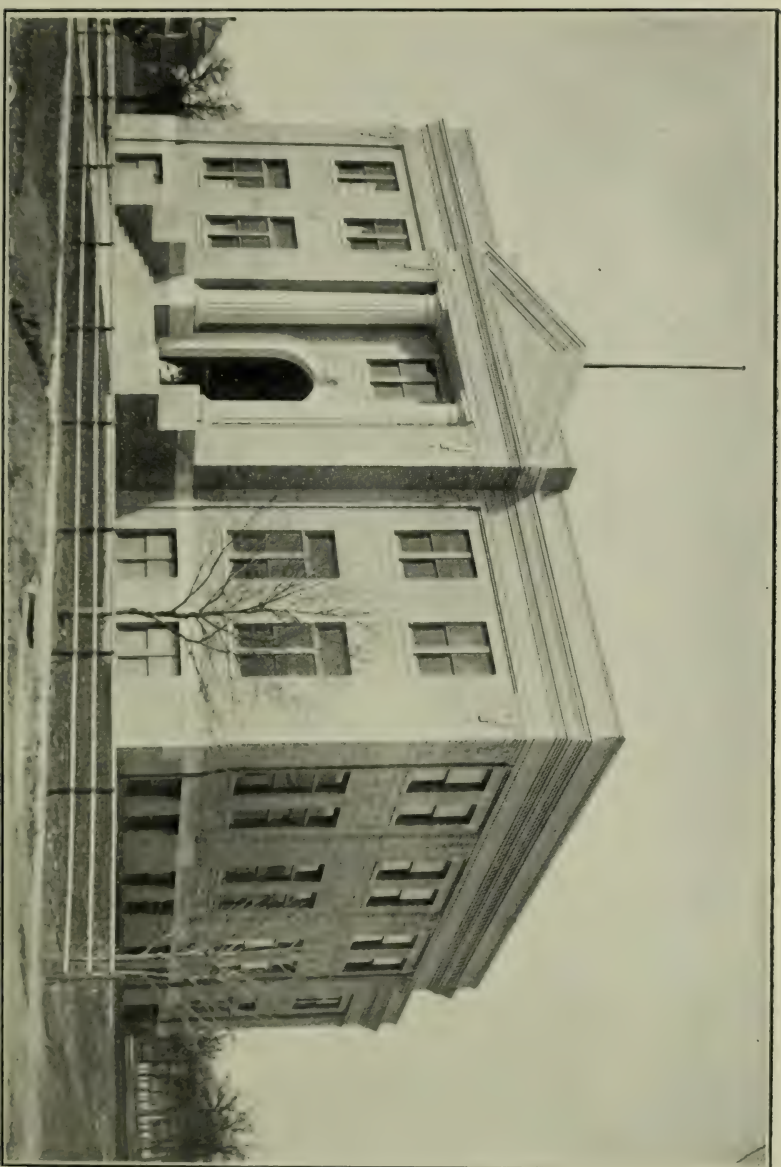

In this course a brief study is made of the development of the English drama, including the Elizabethan theater and the manner of presentation of the plays. This is followed by a study of the Elizabethan Age and the Life of Shakspeare. Two plays are studied critically, and an essay written, based upon the supplementary reading.

Supplementary Readings: "As You Like It," "Cymbeline," "Tempest," "Winter's Tale," "Comedy of Errors," and "Richard III."

Text-book: Any standard edition of Shakspeare's plays.

English 9. The Victorian Age 1 unit.

In this course a study will be made first of the period and then of the representative writers belonging to the period, including their biog-

LIBRARY BUILDING

LIBRARY
OF THE
MUSEUM OF
NATURAL HISTORY

raphies, their style, and selected writings. The authors studied will be Carlyle and Ruskin as representative essayists; Dickens, Thackeray, and George Eliot as representative novelists; and Tennyson and Browning as representative poets.

Critical studies will be made in the class, of Carlyle's "Essay on Burns" and Tennyson's "Idyls of the Kings." A representative novel will be read from each of the three novelists, and a critical essay will be required, based upon the reading done.

Text-books: Long's "English Literature"; any standard edition of the classics. Novels required to be read may be obtained from the Library.

DEPARTMENT OF EDUCATION.

PROF. SWENSON, MISS MOORE.

Education 1. School Management. 1 unit.

This course, counting one unit of study, is given each of three terms of the year to different groups of Freshmen. Sutton and Horn's "School-Room Essentials" is used as text to give a general presentation of educational problems in both theory and practice.

Special attention is given to the consideration of the teacher's work in a country school.

Education 2. Elementary Method. 1 unit.

The course in Elementary Method is an introductory course in General Method. It includes a study of the foundation principles and the fundamental laws of teaching; the rules and purposes of the recitation; the use of drills and reviews; the making of lesson plans.

The course is based upon Roark's "Method in Education."

Education 3. Advanced Management. 1 unit.

This course deals with Management differentiated from Method and involves the various phases and processes of education except that of instruction. The class room is taken as the unit of management, and the point of view is that of the individual teacher in charge of a room. Bagley's "Class Room Management" is used as text, supplemented by library work.

Education 4. Special Method. 1 unit.

This course is planned to furnish special training in the Intermediate and Grammar grades of the public school course. It will consist of discussions of principles which underlie and determine the selection of subjects of study and the methods of presenting subject matter to children in the various grades of the intermediate department.

The course will be based upon Compayre's "Practical Pedagogy."

Education 5. General Psychology. 1 unit.

The course will consider

1. The Psychophysical organism;
2. Sensation;
3. Perception;
4. Consciousness and attention;
5. Perception, memory, thought;
6. Feeling and emotion;
7. Will.

The fundamental laws of mental growth will be discussed and their pedagogical application considered.

The text used is Angell's "Psychology."

Education 6. Child Psychology. 1 unit.

This course includes a study of the problems which are concerned with the development of the child, mental and physical. A study is made of the problems of heredity, instinct, etc., and how to direct play, imitation, collective and constructive instinct. The division of the life of a child into distinct periods with the individual characteristics of each is considered.

The course is based on Kirkpatrick's "Fundamentals of Child Study."

Education 7. Primary Method. 1 unit.

The course in Primary Method includes a study of the special Methods in the work of the first four years of the public school course. Special methods in the teaching of reading, number work, language, story-telling, dramatization, constructive work, etc., is considered; the making of lesson plans and the observation and use of concrete material emphasized.

The course will be based upon "General Outlines for Primary Method" by M. Anne Moore.

Education 8. General Method. 1 unit.

The course in General Method provides for a thorough study of the formal steps of the recitation, the problems of how to study and teaching how to study; the factors determining the selection and arrangement of subject matter.

The methods of securing interest; individual attention; the elements of skill in drill; development; and appreciation is considered.

The course is based upon McMurry's "Method of the Recitation" and "How to Study and Teaching How to Study."

Education 9. History of Education. 1 unit.

This subject will be treated as a phase of General History, being a study of the continued focal point where one generation transmits to the next its institutions and the results of its experience. The systems of the various epochs and of the great reformers will be analyzed for

the lessons they can teach the modern teacher, the study thus subserving both cultural and practical ends.

Monroe's "Brief Course in the History of Education" will be used as a text, supplemented by a brief comparative study of the public school system evolved by the United States and the leading European nations from current educational documents.

Education 10. School Administration. 1 unit.

This course deals with the problems of education from the point of view of the citizen, the board-member, and the superintendent rather than that of the teacher. The social and ethical basis of education is emphasized rather than the psychological and philosophical.

Dewey's "Ethical Principles Underlying Education" is studied to establish the point of view. A syllabus of the course is used to outline the details of the subsequent work.

Education 11. Principles of Education. 1 unit.

In this course the growth of educational principles in history is traced briefly. But the emphasis is upon the methods of research by which educational principles are now laid bare in much the same way as principles are discovered in any other science. Then the application of these principles to modern educational problems is pointed out, though the student need expect few definite prescriptions.

Ruediger's "Principles of Education" is used as text, supplemented by certain chapters in Thorndike's "Educational Psychology."

Education 12. Practice. 1 unit.

It is the intention of the authorities governing the school to equip, as soon as legislative appropriation will permit, a model practice school in which students of the Normal will acquire, under expert supervision and direction, training and experience in actual school work.

The details of this work for session 1913-14 must await the action of the Legislature.

DEPARTMENT OF HISTORY AND CIVICS.

PROF. CRIDDLE, MISS MITCHELL, MISS WILSON.

History 1. Ancient History. 2 units.

It is the purpose of this course to give a general idea of the character and growth of the civilization of Greece and Rome. As a background for this there will be a brief introductory survey of the progress made by the Oriental peoples before the time of the Greeks. The historical significance of the Greeks will then be brought out by a careful study of the growth among them of political liberty and intellectual and esthetic culture and the blending of the East and the West through the achievements of Alexander.

The second term's work will be the history of the Roman people and

will emphasize those facts and events, illustrating their character and Rome's development as a world power through conquest.

The failure of Rome, after combining the Latin West and the Greek East into a Graeco-Roman Empire to resist the invasion of the Teutons and the establishment of their kingdoms within the limits of the Empire, will complete the story of the ancient world.

Text: Myers' "Ancient History."

History 2. Mediæval History. 1 unit.

This course will cover a period of about a thousand years from the downfall of the Roman Empire to the close of the fifteenth century.

Attention will first be directed to how, through the organizing force of the Christian Church and the Frankish Empire, Western Europe began gradually to recover from the disorders of the barbarian invasions and to fuse together the old and new elements which were to produce modern civilization. Then, after a study of the peculiar institutions which grew up to meet the needs of the time, the evolution of society as a result of the new intellectual, commercial, and political impulses stirring Europe from 1100 to 1500 will be traced.

There will be a constant use of source books for illustrative material.

Text: Myers' "Mediæval and Modern History."

History 3. Modern History. 2 units.

The first work of this course will be a consideration of the religious revolutions which swept over Europe in the sixteenth century, and the political consequences of the resulting division of Christendom.

The age of absolute monarchy will be studied as a prelude to that great democratic revolution which, starting in France and spreading over Europe, brought some measure of political and social emancipation to the people of every nation of the continent.

The work of the text-book will be supplemented by references to source material and larger histories.

Text: Myers' "Mediæval and Modern History."

History 4. English History. 1½ units.

It is the aim of this course to give a rapid survey of the people and institutions of England. Particular emphasis will be given to constitutional development as an outgrowth of the religious, intellectual, and industrial progress of the nation. The expansion of the little island kingdom into the great British Empire of today will be traced and attention will be given to her solution of the difficult problem of governing remote dependencies.

Library work will be required and the preparation of papers on assigned topics.

Text: Andrews' "History of England."

History 5. European History of the Nineteenth Century. 1 unit.

It is the object of this course to give an insight into present-day political, industrial, and intellectual interests of Europe. There will be

a careful study of the revolutionary changes effected in France during the nineteenth century, of the rise of Russia as a world power, of Prussia's assumption of leadership in German affairs, of the formation of the German Empire, and of the unification of Italy. Stress will also be laid on the industrial revolution and its effects on the life of the masses.

Reports based on extensive library work will be required of all students taking this course.

History 6. American History. 2 units.

In this course the history of the United States will be taken up in its broad outlines with the purpose of making clear the development of ideas and institutions from epoch to epoch.

Therefore, special consideration will be given to the underlying causes for the foundation of the colonies, the formation of the Union, the expansion of the nation, the growth of sectionalism, its termination in civil war followed by reconstruction and the establishment of a new Union.

Members of the class will be required to do a definite amount of assigned reading and to prepare papers on special topics.

History 7. American History. 1 unit.

Intensive work on some phase of American history.

Civics 1. 1½ units.

Civics is the most generalized branch of the subject of Political Science. It is a general study of the phenomena and laws of democracy. The relation it bears to the subject of History is that of a cross-section to a longitudinal section. Practically, it is an introduction to the social and political problems of the day and the main lines upon which the citizenship of the country is seeking their solution.

The first part of the course treats of the theories and forms of government that led up to democracy and of the prerequisite and concomitant institutions that make democracy possible. This lays the foundation for a detailed study of local, county and city government and of the three co-ordinate branches of State government.

Then follows a study of taxation and other duties and rights of citizens, and of the relation of the State to the special classes, the defective, the dependent and the delinquent, and the artificial person, the corporation.

The second part deals with some of the problems of personal finance, especially in insurance and investment, both of which have lately come into public notice as important factors in personal welfare and social prosperity.

The third part of the course considers the organization of the national government and its present problems. Particular attention is given to the work of the various departments of the executive branch. The great interests of the country, such as international relations involving peace or war, money, tariff and revenue, army and navy, conservation, agricultural improvement, labor and industries, immigration, corporation control, etc., are treated as they come up in connection with the study

of these departments, and so avoid the pedagogical blunder of the isolated fact.

The course includes lectures and note-book work, reading of current events and contemporary political discussion, book reviews, and one formal essay involving intensive library work on some special live topic selected by the student.

The text-book adopted by the State will be used, supplemented by syllabi on the different parts prepared by the instructor.

DEPARTMENT OF MATHEMATICS.

PROF. BUTLER, PROF. PETERS, PROF. SMITH.

Mathematics 1. Elementary Algebra. 2 units.

Wentworth's New School Algebra during first two terms. A rapid review of factoring, multiples, fractions and linear systems. A thorough study of roots, radicals, exponents, quadratic equations and systems solvable by quadratic methods.

Mathematics 2. Plane Geometry. 1 unit.

Careful attention to the plan of presenting the subject to beginners. Drill and tests in the fundamental concepts of geometry. The use of the ruler and compass. Original exercises and problems. Wentworth and Smith's Plane Geometry, Book I.

Mathematics 3. Plane Geometry. 2 units.

Books II, III, IV, V of Wentworth and Smith's Plane Geometry during the first two terms.

Mathematics 4. Algebra. 1 unit.

Hawkes-Luby-Touton's Second Book in Algebra during third term. Short review of radicals, exponents, and quadratic equations. Followed by a thorough study of progressions, logarithms, ratio, proportion, variation, imaginary quantities, theory of quadratic equations, and the Binomial Theorem.

Mathematics 5. Higher Arithmetic. 1 unit.

Smith's Advanced Arithmetic during first term. A general review of arithmetic presented from the teacher's point of view.

Mathematics 6. Trigonometry. 1½ units.

This course is a close study of the triangle, trigonometrical functions, formulas, their derivation, etc., solutions of problems and the practical application of the subject.

Wentworth's Plane Trigonometry.

Mathematics 7. Solid Geometry. 1½ units.

Wentworth and Smith's.

Mathematics 8. Surveying. 1½ units.

Wentworth's Plane Surveying.

The use of the compass. The use of tables, calculation of areas, platting, interpretation of field notes, practical field work.

Mathematics 9. Shop Mathematics. 1 unit.

This course is designed to correlate Manual Training and Mathematics. The work is given as presented in Breckenridge, Mersereau and Moore's "Shop Mathematics."

Mathematics 10. Analytics. 2 units.

Careful presentation of the work as presented in Smith and Gale's "Introduction to Analytic Geometry."

Mathematics 11. The Teaching of Mathematics. 1 unit.

A professional course for teachers of mathematics.

Text: Young's Teaching of Mathematics.

In all the work in Mathematics three ends will be kept constantly in view:

First. To prepare teachers of the subject.

Second. To secure mental discipline and culture.

Third. To make mathematics a ready and useful instrument.

DEPARTMENT OF AGRICULTURE.

PROF. DAVIS, PROF. LEGETT.

Agriculture 1. Elementary Agriculture. 1 unit.

A twelve weeks course in the rudiments of the subject. The subjects covered will be those considered in Ferguson and Lewis' "Elements of Agriculture."

Agriculture 2. Zoology. 2 units.

Several members of each phyla will be studied in laboratory and then in the text.

The frog, the lizard, the pigeon, the fish and the rabbit will be dissected in laboratory.

Agriculture 3. Economic Entomology. 1 unit.

Destructive insects and their method of control, including such insects as the boll worm, boll weevil, the grasshopper, army worm, and the San Jose scale.

The text for 2 and 3 will be Linville & Kelly's "Outlines of Zoology"; for 4, Chittenden's "Insects"; 3 laboratory and 2 recitations all year.

Agriculture 4. Agronomy. 1 unit.

The soil, how made, composition, texture, water holding capacity, tillage, humus and its function, soil inoculation, conservation of soil water. Irrigation and drainage will be treated briefly. Fertilizers: elements used by plants as food, giving special attention to nitrogen, phosphorus, and potash. The function of each of the last three, commercial forms, method and time of application; analysis and value of barnyard manure: legumes of the State. Laboratory work in grain judging, germination methods, value of seed selection, principles of plant improvement; a study of the cotton plant from planting to maturity, including cotton grading and the products made from cotton seed and fiber.

Agriculture 5. Animal Husbandry. 1 unit.

Feeds and feeding: composition and nutritive value of common feeds, methods of determining value of different feeds, balanced rations for different classes of livestock. Breeds of livestock are studied from lantern slides and then on the neighboring farms. History of breeds is studied in class. Animal diseases as Texas fever, hog cholera and tuberculosis will be considered.

The dairy breeds, methods of producing clean milk, churning temperature, butter making, testing milk and its products for fats and for preservatives: laboratory practice in setting up centrifugal separators.

Agriculture 6. Horticulture. 1 unit.

Plant propagation by seedage, layering, cuttings, budding, and grafting. Technique of crossing varieties is practiced.

A microscopic study of fungus growths, as cotton root rot, peach brown rot, wheat rust, carnation rust, with methods of treatment.

Practice in school gardening.

Text used will be Warren's "Agriculture" supplemented by bulletins and reference books; 2 laboratory and 3 recitations all year.

Agriculture 7. Agricultural Bacteriology. 1 unit.

The course will include a study of nitrifying bacteria, legume bacteria, bacteria concerned in souring of milk, in silage, in sewage purification, in canning and animal diseases. Bacteria in barnyard manure and control, bacteria in bread making, in preservation of foods, vinegar making, and in many industrial processes.

Agriculture 8. Experimental Breeding. 1 unit.

Methods of improving and fixing animal types. A study of Mendel's law: this work will be carried out in the school garden. Eugenics will be touched on; lectures on subjects of current interest in this work.

Text: Conn's "Agricultural Bacteriology." Two laboratory hours all year.

Agriculture 9. Agricultural Economics. 1 unit.

The course will cover, so far as possible, the subjects of rural credits, the organization of buying and selling concerns, of creameries, elevators, etc.; the marketing problem, and the tenant system of this and other countries.

DEPARTMENT OF DRAWING.

MISS HILLYAR.

GENERAL DRAWING COURSE.

A student entering any of the four year courses must select, as a part of his work, either drawing or music. After having made this selection he will continue this same line of work throughout each of the four years of his Normal Course.

The aims of this course are as follows:

1. It should develop the ability to draw easily and well Freehand Perspective Sketches on either blackboard or paper. It should develop drawing as a language to be used in the teaching of any school subject, a language which never fails to hold attention and to awaken delighted interest.

2. It will teach the student to understand and to apply the general principles of Mechanical Perspective Drawing. This will include instruction in freehand and mechanical lettering.

3. It should develop the elementary principles of design and their application.

4. It should also develop the power better to observe and appreciate the natural forms.

Instruction will be given as to the methods of teaching this work in the grades.

PRIMARY AND ARTS COURSE.

The aim of this course is to make teachers and supervisors of public school drawing and art work.

Drawing 1. 1 unit.

This is the first year's work in any course. It includes the following:

1. Freehand drawing and sketching with charcoal, crayon and pencil.
2. Painting—hue, value, and chroma.

General course. This includes the following:

1. Blackboard and paper sketching;
2. Drawing from memory in a limited time;
3. Elementary principles in design;
4. Scales of dark and light—massing in two or three values;
5. Original work in borders, book covers, etc.

Drawing 2. 2 units.

Primary and Arts Course. This course includes:

1. Principles of design and their application;
2. Perspective;
3. Freehand and mechanical drawing;
4. Lettering;
5. Painting;
6. Clay modeling;
7. Blackboard sketching from memory in a limited time.

Drawing 3. 3 units.

Primary and Arts Course. This course includes the following:

1. Advanced work in the Principles of design;
2. Picture study;
3. Composition—life pose;
4. Pottery—hand-built forms;
5. Appreciation—History of Art;
6. Application of perspective drawing and painting—pottery designs.

Drawing 4. 3 units.

Primary and Arts Course. This course consists of the following:

1. Advanced work in design and composition;
2. Outdoor perspective sketching;
3. The history of art;
4. Methods of teaching and equipment for work as supervisors in public schools;
5. Advanced pottery and light cement forms.

Drawing 5. 1 unit.

This course includes:

1. Rapid blackboard sketching from memory;
2. Advanced application of design;
3. Color and its application;
4. Picture study and natural forms.

Drawing 6. 1 unit.

General course. This course includes:

1. The principles of mechanical perspective and their application;
2. Methods of teaching and equipment for public school work;
3. Rapid sketching from memory;
4. Picture study and a brief study of the historical development of painting, architecture, and sculpture.

DEPARTMENT OF MUSIC.

PROF. SNOW.

PRIMARY AND ART COURSE (FOR MUSIC TEACHERS AND SUPERVISORS).

FIRST YEAR.

Music 1. 1 unit.

Sight reading and ear training. Scale relation method.
New Normal Music Course, Book I.

SECOND YEAR.

Music 2. 2 units.

More advanced work.
New Normal Music Course, Book 2.

THIRD YEAR.

Music 3. 3 units.

Sight reading and ear training. Interval method.
New Normal Music Course, Book 3.

FOURTH YEAR.

Music 4. 1 unit.

A short course in Harmony.

Music 5. 1 unit.

A short course in Theory.

Music 6. 1 unit.

Public School Methods.

Throughout the course much time will be devoted to chorus work.

OTHER COURSES.

*Music 7. 1 unit.**Music 8. 1 unit.*

In all other courses than the Primary and Art no attempt will be made to train students especially for music teachers and supervisors, but there will be thorough work in sight reading and chorus singing, such as will prepare students for the work usually expected of grade teachers.

DEPARTMENT OF HOME ECONOMICS.

MISS SHAEFFER.

Home Economics 1. Food Preparation and Food Products. 1½ units.

The aim of this course is to teach the elementary principles of cookery and develop skill in handling apparatus and materials. The preparation of various staple foods from raw state to finished product in marketable form, and the cost of such materials will be discussed in this course.

Home Economics 2. Textiles and Garment Making. 1½ units.

The study of the production and manufacture of linen, silk, cotton, and wool as well as the manufacturing conditions which affect the hygienic, economic, and esthetic value of materials. Making of all fundamental stitches, drafting and use of the pattern, hand and machine sewing applied to simple garments, the use of the sewing machine and its attachments.

Home Economics 3. Food Preparation. 1 unit.

This course gives the opportunity for practice in home cookery. It will include the planning, cooking and serving of meals. Care of food in the home, marketing and cost of materials will be emphasized. Some experimental cooking will also be given.

Home Economics 4. Laundry and Millinery. 1 unit.

The first half of this course is devoted to laundry. The processes of laundering; sorting, soaking, removal of stains; methods of handling cotton, linen, wool, and silk; rinsing, bluing, starching, and ironing; care of fine work, laces and embroidery; precautions with colored materials; care and cost of equipment.

The last half of this course gives instruction in designing and drafting patterns for hats, constructing and covering frames, making and placing trimming.

Home Economics 5. Dressmaking. 1 unit.

Shirtwaists and skirts and simple dresses are made in this course. The use of the drafted pattern, cutting and fitting are included.

Home Economics 6. The House. 1 unit.

The location, structure, furnishings, and decorations of the house are considered here as well as the care, cleaning, and management of the house. The principles of physics as applied to the house will be given in the last part of this course.

Home Economics 7. Dietetics. 1 unit.

This course deals with the chemistry and physiology of digestion; the nutritive functions of proteins, fats and carbohydrates; dietary standards and their application to practical problems. Dietaries for families of different incomes, and for infants and children will be given.

Home Economics 8. Methods in Home Economics. 1 unit.

This course deals with the organization of the course of study in Home Economics in the different grades of the elementary and secondary schools; selection of topics and their adaptation to the different grades; the method of the recitation, equipment and illustrative materials.

DEPARTMENT OF MANUAL TRAINING.

PROF. VITZ.

Manual Training 1. Mechanical Drawing. 1 unit.

The work in this course includes the following: Lettering, Straight and Curve Line Shop Problems, Planes of Projection, Revolution of Solids, Development of Surfaces, Intersections, Working Drawings of the exercises to be made in the shop the following term. Tests on practical problems covering the work.

Manual Training 2. Bench Work and Wood Turning. 2 units.

Bench Work: Analysis of tool processes, the construction of simple models adapted to seventh and eighth grade work. Their purpose is to teach planing, gauging, scoring, sawing, chiseling, boring, etc. Nailing, screwing, and lapjointing will be the method of fastening. Construction of principal joints, the application of each joint in medium sized pieces of furniture. Lectures will be given on sharpening, glues, sanding, scraping, staining, filling, finishing, etc.

Wood Turning: Exercises teaching all the cuts in spindle turning, face plate work, chuck work and mandrel turning. Attention will be given to the correct handling of tools, accuracy, speed, etc.

Manual Training 3. Machine Drafting. 1 unit.

Lettering, elements of machine drafting consisting of: Study of Practical Drafting Room Practice, Types of Screw Threads, Proportions of Standard Bolts and Nuts, Types of Fastenings, Drawing of Machine Parts from Life. Machine parts using Standardized Proportions.

All drawings will be made on detail paper, traced on imperial cloth. Each student must learn to make good blue prints, using his own tracings.

Manual Training 4. Pattern Making. 1 unit.

This course will consist of Bench Work and Turned Patterns. The principal types of patterns will be studied and made. Students will make their own calculations for draft, shrinkage, rap, etc. Lectures will be given covering the work, these being accompanied by demonstrations in moulding.

Manual Training 5. Vocational Wood Work. 1 unit.

In this course the attempt is made to adhere as closely as possible to factory methods as used in the industries. The factory method of piece-work is followed. The student is given sufficient time in which to become proficient in one type of work, after which the work is changed. To insure a large variety of work several jobs are worked upon at a time. Before starting upon a new machine, the student must pass an examination covering its construction, its operation and method of setting up for different kinds of work. Cost cards are used to keep accurate data as to

cost of materials, time, power, etc. An attempt will be made to consider "overhead" expenses.

Manual Training 6. Advanced Machine Drafting. 1 unit.

This course includes the study of gears, cams, parallel motions, etc., assembly and detail drawings of some large machines. If time permits isometric and cavalier projections are studied.

Manual Training 7. Architectural Drafting. 1 unit.

This course consists of architectural lettering, study of types of buildings and roofs, study and drawing in detail of frame construction, individual planning of bungalow, isometric and cavalier projection.

Manual Training 8. Foundry Work. 1 unit.

Students mold their own patterns made in the pattern shop. Suitable time is given to the molding of larger and more complex patterns. Castings are run once a week throughout the course. Different sets of students have charge of cupola each week. Lectures cover: Sands, making and baking of cores, principal metals, iron ore, melting, points, etc.

Manual Training 9. Method of Manual Training. 1 unit.

Historical review of the theories and practices of educational reformers, such as Pestalozzi, Froebel, and others. A review of the work that has been done in this country, work that is now being done; study of present indications as to the probable future status of manual training in its relation with vocational training and the work of the trade schools.

The laws on the subject in this State as well as those of the most important States in the United States.

Method of teaching, planning of courses of study for manual training in grades and high schools, study of equipments, proper installation of power machinery and their relative location for greatest efficiency, etc.

The work will be covered by text, lectures, lantern slides, and theses by the students:

DEPARTMENT OF LATIN.

PROF. McDONALD.

Latin 1. First Year Latin. 3 units.

First term: First thirty lessons.

Second term: Lessons 31 to 60.

Third term: Book completed and reviewed.

Text: Gunnison and Harley's.

Latin 2. Caesar. 3 units.

Caesar's Gallic War, 5 books.

Latin 3. Cicero. 1 unit.

Cicero, three orations against Catiline. Composition based on text read. Grammar used for reference. Study of Roman government.

Latin 4. Cicero. 1 unit.

Cicero, oration on the Manilian Law and on citizenship of Archias. Selections from other works of Cicero for sight reading. Roman life and customs.

Latin 5. Vergil. 1 unit.

Vergil's Aeneid, Books I and II. Prosody; Roman and Grecian mythology.

Latin 6. Vergil. 1 unit.

Vergil's Aeneid, Books IV, V, VI.

Latin 7. Livy. 1 unit.

Books XXI and XXII.

Latin 8. Horace. 1 unit.

DEPARTMENT OF GERMAN.

PROF. ANDERSON.

German 1. Beginner's German. 3 units.

Elementary German. Oral practice. Dictation. Reading easy prose. Memorizing German poems. All of the work of the class is in German.

German 2. 3 units.

Conversation. Dictation. Memorizing classical selections from German Literature. Grammar, Translation from German into English. Composition during the last quarter; daily themes and three long papers.

German 3. 1 unit.

Study of German poetry with special attention to historical development, form and metre. Nollen's "German Poetry," Klenze's "Deutsche Gedichte," "Heine's Poems" (Eggert); Mueller's "Deutsche Gedichte."

German 4. 1 unit.

History of the German language. Papers in German on authors and periods. Victor's "Kleine Phonetik."

German 5. 1 unit.

German prose. History of German literature. Papers in German on authors and periods. Berhardt's "Deutsche Litteratur-geschichte."

German 6. 1 unit.

German Drama. Close study of Schiller's "Wilhelm Tell." Rapid reading of several of Schiller's dramas.

German 7. 1 unit.

German Drama. Close study of Goethe's "Faust." Rapid reading of several of Goethe's dramas.

German 8. The Teaching of German. 1 unit.

The teaching of German. Basic principles of modern language instruction with special reference to elementary and high school courses in German. Lectures; discussions; papers.

DEPARTMENT OF READING.

MISS PRICE.

Reading 1. 1 unit.

The aim of this course is to help the student to an appreciation of good literature and the interpretation thereof; to give drill in articulation, pronunciation, and the elements of speech; to improve the quality of the voice; to establish a natural ease of manner in speaking and reading; to secure the development, culture, and control of mind and for the expression of thought, will, and feeling.

Instruction is given in story-telling and reading from memory.

Text: Emerson's "Evolution of Expression," Vol. I.

Reading 2. 1 unit.

The work of Course 1 is continued. Instruction is given in methods of teaching primary reading, story-telling, and the use and place of phonics.

Extemporaneous speaking.

Text: Emerson's "Evolution of Expression," Vol. II.

Reading 3. 1 unit.

The work of Course 2 is continued.

Extemporaneous speaking and dramatic reading.

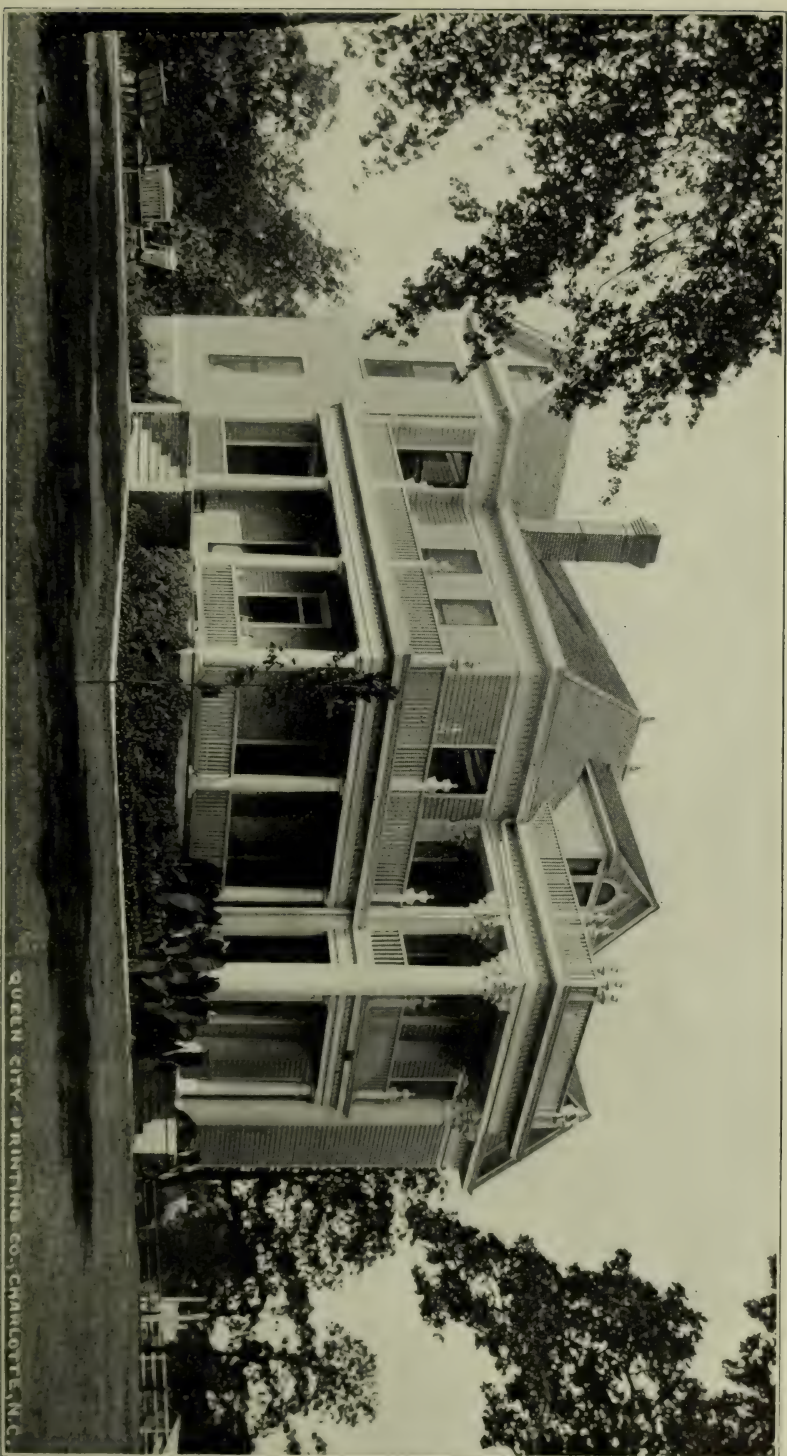

Organization of debating clubs.

Text: King's "Practice of Speech."

Reading 4. 1 unit.

Dramatic reading of Shakespearcan plays, extemporaneous speaking, readings from standard authors.

Text: King's "Practice of Speech."

PRESIDENT'S RESIDENCE

QUEEN CITY PRINTING CO., CHARLOTTE, N.C.

DEPARTMENT OF SCIENCE.

PROF. BORDEN, PROF. MASTERS, PROF. LEGETT.

Science 1. Physical Geography. 1 unit.

Science 2. Physiology. 1 unit.

Science 3. Botany. 2 units.

The first twelve weeks will be devoted to the physiology of plants and the phenomena of growth. In the laboratory, the pupil will study the individual cell first and go from that to the plant as a whole, noting the reasons for plant action.

In the second twelve weeks, enough time will be devoted to the morphology of the flowering plants to make pollination and fertilization intelligible to the pupil, but the major portion of the time will be given to a study of plant members, seeds and fruits. As soon as living plants are available in the spring, all of the laboratory work will be given to the collection and classification of plants. The pupil will become familiar with the principal families and gain a thorough working knowledge of the key to the groups and families of plants.

(Three recitations and two laboratory periods per week.)

Science 4. Physics. 1 unit.

Elementary Physics: Properties of Matter; Molecular Motion and Forces; Mechanics of Fluids and Solids; Motion; Mechanical Work and Energy.

Lectures and demonstrations three hours per week; laboratory two hours per week.

Science 5. Physics. 1 unit.

Magnetism and Electricity.

Lectures and demonstrations, three hours per week; laboratory, two hours per week.

Science 6. Physics. 1 unit.

Heat, Sound, and Light.

Lectures and demonstrations, three hours per week; laboratory, two hours per week.

Science 7. Chemistry. 1 unit.

Oxygen, Hydrogen, and Nitrogen, together with some of their compounds will be studied. The laws of Boyle and Charles, the atomic theory and the theory of electrolytic dissociation, solutions, chemical equations, valence, reversible reactions, chemical equilibrium, acids, bases, and salts will be considered.

The time will be about equally divided between the laboratory and the recitation.

Science 8. Chemistry. 1 unit.

The Chlorine family, the Phosphorus family, Sulphur, Carbon, Silicon, Boron and some of their compounds will be studied, and some of the rare non-metallic elements will receive brief attention. The Periodic law, molecular and atomic weights and the chemistry of the flame will be included in this course.

Science 9. Chemistry. 1 unit.

In this will be included the study of the metallic elements, their more important compounds and the methods of reducing their ores, and in addition some time will be given to simple organic compounds.

Science 10. Botany. 2 units.

The first term of work will be given to physiology of plants. Emphasis will be placed upon the theories that explain the phenomena of growth as well as growth and plant action itself. A well-equipped laboratory will make it possible for the pupil to observe the effects of germination, respiration, photosynthesis, tropism, etc.

In the last twelve weeks, the general morphology of plants will be studied, showing the development of plant members and the development and differentiation of sex. The compound microscope will be freely used by individual pupils to make the subject clear. Freehand drawings of all microscopical work will be required, together with notes on all laboratory work.

Three recitations and two laboratory periods per week.

Science 11. Agricultural Chemistry. 1 unit.

This is a course in Agricultural Chemistry and will consist of the study of foods and fertilizers and soil analysis.

Science 12. Household Chemistry. 1 unit.

The chemical composition of the type foods; the chemistry of digestion and assimilation of these foods; the chemistry of fuels and the simple tests for textile fibers are here given.

Science 13. Industrial Physics. 1 unit.

Study of gas engines, electric generators and motors, electric lighting and wiring; storage batteries; switchboards and power installation.

Science 14. Growth and Structure of Timber. 1 unit.

This course will consist of the treatment of the kinds and distributions of forests, kinds of timbers, structure and adaptability. Properties, such as shrinkage, warping, durability, etc., will receive principal attention. Brief consideration will be given to seasoning by different methods, treatment of woods, logging and milling, and the preservation of forests.

The work will be covered by text, lectures, lantern slides, and papers prepared by the student.

Science 15. Advanced Physics. 1½ units.

Plane Trigonometry a prerequisite.

This course will devote particular attention to mechanics and electricity with the purpose of giving the student mastery of the machinery and electrical motive power used in modern laboratories.

Science 16. Advanced Chemistry. 1½ units.

This is a course in Qualitative Analysis and will consist of laboratory work and lectures on the methods of analysis and on the laws of theories of chemical action.

Science 17. Bacteriology. 1 unit.

The nature and conditions affecting the growth of bacteria, yeasts, and molds; and the application of these facts to household sanitation.

DEPARTMENT OF PHYSICAL EDUCATION.

MISS PRICE.

The course in Physical Education aims to maintain and promote the health of the students and to furnish them with the principles underlying this training; to give them practical knowledge of a system of educational gymnastics, and to adapt their work to the varying conditions with which they may meet.

Systematic instruction is given concerning the means for keeping the body in health, for maintaining normal, progressive growth and development, for securing grace in posture, carriage, and action, and for developing a disposition to enter, with pleasure and profit, the various recreations so necessary in any phase of a successful life.

Free and unrestricted action of the body is essential to good mental and physical development. Accordingly, our young ladies are urged to wear hygienic clothing at all times. In the gymnasium, all students are expected to wear their gymnasium suits.

Physical Education 1. 1 unit.

Instruction and practice in fundamental activities, such as breathing, sitting, standing, walking, running. Personal hygiene.

Graded physical culture, relaxing exercises, rhythmic movements, marching.

Physical Education 2. 1 unit.

Fundamental Swedish gymnastics. Simple apparatus work, such as exercises upon stall bars, ladders, ropes.

Drill in leading squads and criticisms upon the observation of this drill. Rhythmic work and fancy steps. Use of clubs, wands, balls, etc.

Outdoor athletics; field and track work, tennis, baseball, basket ball, and volley ball.

Physical Education 3. 1 unit.

Advanced Swedish gymnastics. Theory of physical training with practical applications. Methods of teaching children. Games and folk dances for first five grades.

Outdoor athletics.

Physical Education 4. 1 unit.

Exercises with and without hand apparatus. Games for upper grades. Play—its place in education.

Coaching basket ball and other games. Fencing.

Lectures and reference work on the History of Teaching of Physical Culture.

Text—"Medical Gymnastics," Posse.

ENTRANCE REQUIREMENTS.

1. ENTRANCE BY EXAMINATION.

Applicants for entrance to the various classes must be examined as indicated below:

For First Year or Freshman Class: Grammar, Composition, Algebra to quadratics, Arithmetic, and United States History.

For Second Year or Sophomore Class: All subjects of the Freshman year.

For Third Year or Junior Class: All subjects of the Sophomore Class of the same course.

For Fourth Year or Senior Class: All subjects of the Junior Class of the same course.

Time examinations must be taken:

Applicants for the Freshman Class must take examination in all required subjects on entrance.

Applicants for entrance to the Sophomore Class must be examined on entrance in Grammar, Composition, Ancient History, Algebra through quadratics, Geometry, Book I, Physical Geography and Physiology. The examinations in the other required subjects may be deferred, if desired, until the end of the first half session.

Applicants for entrance to each of the other classes will take the required examinations in English, History, Mathematics, and Science on entrance, and the examinations in other subjects may be deferred till the end of the first half session.

2. ENTRANCE ON TEACHERS' CERTIFICATES.

A second grade State certificate exempts the holder from examination for entrance to the Freshman class in Arithmetic, Grammar, and United States History; from entrance examinations to the Sophomore class in School Management, Agriculture, Reading and Physiology.

A first grade State certificate exempts the holder from all examinations for entrance to the Sophomore class; from entrance examinations

in Geometry, Algebra, Sophomore History, and Civics for the third year (Junior) class.

A permanent primary certificate exempts the holder from all examinations for entrance to the second year or Sophomore class of the Primary and Art Course; from examination in Arithmetic, United States History, School Management and Grammar in other courses.

A permanent certificate exempts the holder from all entrance examinations.

Admission on diplomas and certificates of promotion from accredited high schools.

High schools affiliated with the University of Texas, Baylor University, Southwestern University, Trinity University, Austin College, and Texas Christian University are called "affiliated" schools.

High schools classified by the State Superintendent of Education as high schools of the first class, second class or third class are called "approved" schools.

A student holding a diploma from an affiliated high school is exempt from examination for entrance to the third year class on the subjects in which high school is affiliated and which subjects were included in his high school course, provided that graduates of high schools having 12 units of affiliated credits shall be exempt from all examinations for entrance to the third year class.

A student having completed the ninth grade of an affiliated high school will be admitted without examination to the First Year (Freshman) class and one having completed the tenth grade of an affiliated high school to the second year (Sophomore) class.

A student who has completed two years of high school work in a high school approved as first class, or as second class, or who graduated from a high school of the third class is admitted without examination to the first year or Freshman class.

A student who has graduated from a high school approved as second class or who has completed three years of the work of a high school of the first class is admitted to the second year or Sophomore class conditioned on making up such subjects of the Freshman year as were not included in his high school course.

A student who has graduated from a high school approved as first class is admitted to the third year class conditioned on making up such subjects of the Sophomore class as were not included in the high school course completed by him.

For granting admission or exemptions from examination on diplomas or certificates of promotion from high schools, official statements signed by the authorities of the high school must be presented, and such statements must certify to completed work of specific grades. Work in a grade partially completed is not subject to consideration.

RECOGNITION OF THE OTHER TEXAS STATE NORMAL SCHOOLS.

All work done in any one of the State Normal Schools is recognized. Students who have completed the work of any class in any one of the other State Normal Schools is admitted without examination into the next higher class.

RESIDENCE REQUIRED.

No certificate is granted on less residence attendance than two terms, and no diploma or permanent certificate for shorter attendance than three terms.

Of the fifteen units required for a second grade or a first grade certificate at least five must be made in the Normal School issuing the certificate, provided also that the other ten units must have been made in one of the Texas State Normal Schools.

The entire fifteen units of the senior class, upon which a permanent certificate and diploma are awarded, must be made in the Normal School that grants the diploma.

ALTERNATIVES.

In the language course the student has a choice between Latin and German, and in all courses there is a choice between Drawing and Music.

Because many students enter prepared for the third year class in the Agriculture, Home Economics, or Manual Training Course, except in the special subjects pertaining exclusively to one of such courses, either in the three year or four year course, a student of the third year class may be permitted to "double" on one of these subjects; that is to take agriculture, home economics, or manual training as given to the second year class in addition to the work in such subject given in the third year class, and thus be enabled to complete the course.

The student thus taking additional work in any subject must make the fifteen units required in the third year in addition to work of the second year permitted.

Any student enrolling in either the Agriculture or the Science course may be permitted to substitute not more than three units in either home economics or manual training for three units in other subject or subjects required in such courses, such substitution being with the permission of the President of the school.

THE CLOSING UP OF THE THREE YEAR COURSE.

The following table shows the course given the Second Year Class in session 1912-13. It is not given in session 1913-14, but is inserted here to indicate the requirements for entrance by examination to the Third Year Class of 1913-14, after which time diplomas will not be granted upon completion of the three year course.

To enter the Third Year Class in September, 1913, the student is required to pass examination in the work of the Second Year Class of session 1912-13 for the appropriate course. These examinations are subject to the same exemptions on account of teachers' certificates, diplomas from accredited high schools that are noted elsewhere.

COURSES OF STUDY, SESSION 1912-13.

Note.—The figures denote the number of units given to each subject. A unit is 5 recitations per week for 12 weeks; 60 recitations.

Following is the course of study for the Third Year Class for the session 1913-1914. All students entering the Third Year Class will take this course whether they enroll in the three year or the new four year course.

Students completing this course before August 31, 1914, will receive a permanent certificate and diploma. After August 31, 1914, diplomas and permanent certificates are granted only on completion of the fourth year class described elsewhere.

Entrance to this class is by examination on the work of the second year of session 1913-14 for appropriate course, subject to exemptions on account of teachers' certificates or work done in accredited schools noted elsewhere.

THIRD YEAR CLASS FOR SESSION 1913-14.

AGRICULTURE COURSE.

English: "Pancoast's Introduction to English Literature"; selected poems; Shakespeare, 3.

Education: History of Education, $1\frac{1}{2}$; Method, $1\frac{1}{2}$.

History: Civics, $1\frac{1}{2}$; English History, $1\frac{1}{2}$.

Agriculture: Agricultural Botany; Experimental Breeding; Bacteriology, 3.

Science: Chemistry, 3.

HOME ECONOMICS COURSE.

English: "Pancoast's Introduction to English Literature"; selected poems; Shakespeare, 3.

Education: Principles of Education, 1.

History: English History, $1\frac{1}{2}$; Civics, $1\frac{1}{2}$.

Art: Drawing or Music, 1.

Industrial Arts: Garment Making and Textiles, $1\frac{1}{2}$; Food Preparation and Dietetics, $1\frac{1}{2}$.

Science: Chemistry, 3.

Physical Education: Educational Gymnastics and Playground Work, 1.

MANUAL TRAINING COURSE.

English: "Pancoast's Introduction to English Literature"; selected poems; Shakespeare, 3.

Education: Principles of Education, 1.

History: English History, $1\frac{1}{2}$; Civics, 1.

Mathematics: Plane Trigonometry, $1\frac{1}{2}$; Solid Geometry, $1\frac{1}{2}$.

Art: Drawing or Music, 1.

Industrial Arts: Mechanical Drawing, $1\frac{1}{2}$; Wood Turning and Pattern Making, 1.

Physical Education: Educational Gymnastics and Playground Work, 1.

LANGUAGE COURSE.

English: "Pancoast's Introduction to English Literature"; selected poems; Shakespeare, 3.

Education: History of Education, $1\frac{1}{2}$; Method, $1\frac{1}{2}$.

History: Civics, $1\frac{1}{2}$; History, $1\frac{1}{2}$.

Art: Drawing or Music, 1.

Latin: Cicero, $1\frac{1}{2}$; Vergil, $1\frac{1}{2}$; or

German: Classics and Composition, 3.

Reading: Extemporaneous Speaking and Dramatic Reading, 1.

Physical Education: Educational Gymnastics and Playground Work, 1.

SCIENCE COURSE.

English: "Pancoast's Introduction to English Literature"; selected poems; Shakespeare, 3.

Education: Principles of Education, 1.

History: English History, $1\frac{1}{2}$; Civics, $1\frac{1}{2}$.

Mathematics: Plane Trigonometry, $1\frac{1}{2}$; Solid Geometry, $1\frac{1}{2}$.

Art: Drawing or Music, 1.

Science: Chemistry, 3.

Physical Education: Educational Gymnastics and Playground Work, 1.

PRIMARY AND ARTS COURSE.

English: "Pancoast's Introduction to English Literature"; selected poems; Shakespeare, 3.

Education: History of Education, $1\frac{1}{2}$; Method, $1\frac{1}{2}$.

History: Civics, $1\frac{1}{2}$; English History, $1\frac{1}{2}$.

Art: Drawing or Music, 3.

Science: Systematic Botany, 2.

Physical Education: Educational Gymnastics and Playground Work, 1.

HISTORY-ENGLISH COURSE.

English: "Pancoast's Introduction to English Literature"; selected poems; Shakespeare, 3.

Education: History of Education, $1\frac{1}{2}$; Method, $1\frac{1}{2}$.

History: English History, $1\frac{1}{2}$; Civics, $1\frac{1}{2}$.

Art: Drawing or Music, 1.

Science: Chemistry, 3.

Reading: Extemporaneous Speaking and Dramatic Reading, 1.

Physical education: Educational Gymnastics and Playground Work, 1.

(NOTE.—The History-English Course was added to the six courses advertised in the catalogue for session 1913-14, in order to meet the demand for teachers of English and History on the part of students not wishing to take the full four years in Latin or German. Entrance to the third year class of this course in September, 1913, requires the same examination as entrance to the third year of the Language course.)

DIRECTIONS TO STUDENTS APPLYING FOR ADMISSION.

Students should note the requirements for entrance, and understand that the school has no authority to admit them without implicit compliance with the directions of the Board of Regents. Students should

not write asking that in their cases these requirements be not enforced on account of their age, experience, or other reason, for no such request can receive consideration.

Students should remember that the requirements for entrance and for certificates are the same in all the Texas State Normal Schools.

Credentials, certificates of promotion, etc., upon which entrance examinations are sought to be absolved must be documents signed officially by the proper authority.

Credentials, statements, certificates of promotion, to receive consideration must be from—

(a) High schools affiliated with colleges or Universities previously named.

(b) High schools approved by the State Department of Education.

Students desiring to enter on examination, on certificate, diploma or promotion card from accredited high schools should report at the beginning of the session, and avoid trouble and delay in classification.

Credits are given only for full terms' work. Students entering late in the term find difficulty in being classified promptly and making up the work already done by the class.

A term is twelve weeks.

Students should not request exemptions not mentioned in the bulletin, as the school is without authority to grant such requests.

Diplomas, promotion cards, statements, etc., from schools not duly accredited should not be urged as exemptions from examination. This school has no authority to affiliate, accredit or approve schools of any kind.

The certificates granted by a State Normal School should not be confused with certificates obtained from Summer Normal Institutes and county boards of examination.

Certificates granted by State Normal Schools may be built upon for higher certificates, but the Normal Schools do not grant certificates to applicants by simply "taking the additional subjects" for higher certificates.

CITY OF DENTON.

Denton is a city of churches, schools, and beautiful homes.

It is on the Texas & Pacific and the Missouri, Kansas & Texas railroads, thirty-five miles from Fort Worth and thirty-seven miles from Dallas. Fourteen daily passenger trains render Denton accessible from all sections of the State.

Denton has an efficient system of public schools, three wards schools and a high school building. Two State educational institutions are located here.

Denton has a population of more than six thousand. It has free mail delivery, two telephone exchanges, and a system of electric street cars. The city owns and maintains an electric light and power plant, water works, and sewer system. Natural gas for light and fuel has recently been added to the list of conveniences, so that now Denton, with its railroads, telegraph and telephone connections, street cars, ice manufactory,

fire department, water works, local telephones, sewerage and natural gas, lacks none of the public utilities enjoyed by much larger cities.

KINDS OF CERTIFICATES GRANTED BY TEXAS STATE NORMAL SCHOOLS.

1. The student completing the work of the First Year Class receives a State Second Grade Certificate valid for six years.
2. The student completing the work of the Second Year Class receives a State First Grade Certificate valid for six years.
3. The student completing the work of the Third Year Class receives a State First Grade Certificate valid for seven years.
4. The student completing the work of the Fourth Year Class receives a State Permanent Certificate and the diploma of the school.

There will not be a fourth year class until September, 1914.

NOTE.--At the close of session 1913-14 diplomas will be awarded to those completing the third year class.

FEEES.

Each student enrolling in the school during the regular nine months' session shall pay an incidental fee of \$15.00 upon entrance, and no other fees or charges shall be levied against or collected from any student, and each student is entitled to the free use of text-books furnished by the school, which books, if returned in satisfactory condition at a time designated by the President, shall entitle the student to a refund of \$2.00.

The payment of this fee of \$15.00 is to be made by the student upon entrance to the school. It is the only fee paid during the session of nine months. There are no additional fees for library, books, laboratory, Manual Training, Domestic Science, etc.

The fee is \$15.00 whether the student enters at the beginning of the session or near the close of the session, whether the student continues in school for the entire session or only a few days of the year. No part of the fee is refunded, except \$2.00 upon prompt return of books. In order to be entitled to the refund of \$2.00, the student must return the books used by him at the time designated for their return.

No one should ask exemption from or modification of the fee or its conditions. Neither discretion nor authority is given the President of the school to alter the terms or conditions of its payment.

BOARDING PLACES AND RATES.

The school has no dormitory. More than sixty good boarding houses are in proximity of the Normal. Good board can be obtained at \$15, \$16, and \$18 per calendar month, owing to nearness to the school and conveniences afforded.

Students are permitted to select, from approved lists of boarding houses furnished, their own boarding places. Frequent changes for trivial causes are discouraged, and students are expected to change boarding places only with the consent of Prof. W. D. Butler of the Faculty, who has charge of all matters pertaining to board.

Men and women students have separate boarding homes.

An approved boarding house is one that co-operates with the school in enforcing the regulations concerning conduct of students, exerts a good influence over the student, treats the student kindly, and offers good board with sanitary conditions.

A list of approved boarding houses is printed and furnished the student upon arrival.

Whenever it is found that proprietors of boarding houses do not co-operate with the school in enforcing its regulations, the students will be removed from such houses.

Upon reaching Denton, students should report at once to the office of the school, where such lists are kept and where the locations of the different boarding houses may be ascertained. No attention should be given to those who wish students at the depot to engage board before reporting to the office.

Electric street cars run from the railroad station to the Normal College.

DISCIPLINE.

It is expected that those entering a school with the intention of preparing for the profession of the teacher are sufficiently mature in character and in judgment to render espionage unnecessary. By far the greater number of students who come to the Normal are eager, earnest, and industrious young people, but experience has demonstrated the necessity of having certain well-defined regulations for the guidance of those who, on account of immaturity of judgment, still need the direction of proper authority.

The discipline of the school is intended to appeal to the reason of the students. They are expected to be self-reliant and able to exercise self-restraint whenever necessary, and whenever a student proves unable or unwilling to do this, and the efforts of the Faculty to assist him in his character building have been disregarded, his guardian is requested to recall him from the school.

The purposes of the school is to train teachers for the young children of the State, and it should not send forth, with license to teach, those whose habits, morals, or influence would be unwholesome to children entrusted to their instruction.

GENERAL REGULATIONS.

1. Before leaving the city at any time during the session the student must file with the President a "Leave of Absence" card, stating the reason for such absence, the date of leaving and the proposed date of return. If this card is approved, a duplicate of it is sent to the

proprietor of the boarding place of the student. Upon the student's return he must report at once to the office of the President and have his return properly recorded.

2. Upon withdrawal from the school for any cause the student must file with the President a "Withdrawal Card" stating the date and cause of withdrawal. A student leaving without this notice forfeits all his credits and rights as a student.

3. Tuesday to Saturday, inclusive, of each week are "school days." All students, unless excused for sufficient cause, are required to report promptly to all classes on those days. The student who without excuse and proper notice absents himself from a class, by that act severs his connection with the school.

4. During the evenings of all school days except Saturdays students are expected to remain at their respective boarding places, to prepare their recitations for the following day, and not to interfere by visiting or noisy conduct with the work of other students.

5. During the evenings of Saturdays and Sundays students may make and receive social visits, attend church or entertainments not later than 10:30 p. m., *provided always that young lady students must at all times inform the proprietor of their boarding houses where they may be found when away from their boarding places at any time after night.* Students are not allowed to visit each other during the study nights of the week, even ostensibly to help each other or to prepare their lessons. Young lady students are not allowed to receive visits or attentions from young men not students of the Normal except by permission of the President for each separate time, which permission will not be given until the parents or guardians of such young lady students have written to the President requesting that such privileges be granted. Young ladies receiving social visits from young men, either students of the Normal or others, must dismiss such visitors at 10 p. m. Young men of the Normal or others protracting their visits beyond the regulation hour, 10 p. m., will afterwards be denied the privilege of calling on young lady students, and young lady students permitting this violation will not be allowed to receive further attention of young men, either Normal students or others, during the remainder of the session.

6. Buggy riding at night is forbidden to all students.

7. An evening bell will be rung each school day to mark the time ten minutes after which students are required to be at their boarding places for the night.

8. 10:30 p. m. is the hour for retiring, and no housekeeper is expected or PERMITTED to furnish lights after 11 p. m.

9. To be informed at all times as to the boarding places of students is the province of the President. Students are allowed to select their boarding places from an approved list of houses, and are expected to remain here for the session. Each student is given ten days after his matriculation to select a permanent boarding place. During these ten days he may change his boarding place without permission, but not without notice. After the expiration of this time, when a change of boarding place is desired the student must file a written statement, giving his reasons for change, with Prof. Butler of the faculty and his approval obtained before and not after the change is made.

10. The telephone of the boarding house must be under the control

of the proprietor. Students use it only by permission, and then only for the transaction of necessary business. They must not use it for idle conversation, making or accepting social engagements. Young lady students are not allowed to communicate with young men or young men with young ladies over the telephone. Whenever it is necessary for one to send a message to the other, such message must be communicated to the proprietor of the boarding house, who will deliver the message and return the answer.

11. Students are expected to be orderly at all times, both at school and at their boarding houses, to avoid noisy sports during study hours, to refrain from singing or playing upon musical instruments during study hours at their boarding houses.

12. During the periods of recitation at school, students who are off duty must devote the time to the preparation of their lessons. They must not assemble in the corridors and halls, and otherwise disturb those on recitation.

13. Social visits between the young men and young ladies of the Normal School are limited to Sundays, Sunday evenings and Saturday evenings. At those times young ladies are expected to receive their callers in the parlor and not to entertain them in promenading streets or on the porches or the lawns of the boarding premises. Neither are young men supposed to give attention to young ladies or young ladies to receive attention from young men in the library, reading room, class room, halls, corridors or on campus during the school days. These days must be devoted to work, and not to society.

STUDENT PUBLICATIONS.

THE NORMAL JOURNAL, monthly, and the YUCCA, an annual, are edited and published by the students. These publications afford excellent opportunities for exercises in composition, invention, and in decorative art.

STUDENT ORGANIZATIONS.

There are four literary societies in the Normal: two for young men, the Robert E. Lee and the Reagan, and two for young women, the Mary Arden and the Current Literature Club. The purpose of these societies is to advance the social and literary attainments of their members. Parliamentary drills help to equip the boys for the duties of citizenship. Debating contests inspire self-confidence and sharpen all the faculties.

Several musical organizations, the Glee Club for young men, the Treble Clef Club for young women, the "Band" and the "Orchestra" are valuable activities of the school.

SUMMER SESSION.

The Summer Session of the Normal begins each year about June 1st and closes during the last week of July. The Bulletin of the summer

work will be issued in February of each year. The purpose of the Summer Session is to meet demands which can not be met during the regular session. There are in all parts of the country many men and women who, despite limited preparation, are doing good service in the cause of education. These teachers, barred by circumstances, it may be, from the advantages of college or training schools, desire, nevertheless, to broaden their scholarship from time to time, and thereby increase their efficiency in school work. It is to this class the Summer Session largely appeals. During these eight weeks of careful, well-directed labor, much can be done to correct errors, to broaden the perspective and add to the teaching powers of the earnest teacher.

All the courses of the regular session are continued during the Summer Session. The student may take such work in the summer as he finds he can do under certain regulations, and such work is entered to his credit towards a certificate or diploma of the school.

At the close of the Summer Session examinations are conducted for "State Summer Normal Certificates," for credits on the regular courses of the school, and for entrance to the various classes of the regular session.

NOTICE TO ALUMNI.

The number of graduates is now too large (1195) to be published in each annual catalogue. We hope to issue in October next an Alumni Bulletin which we wish to make a valuable contribution to the history of the institution.

Will not each of you kindly give the school at your earliest convenience the following data concerning yourself:

1. Name.
2. Date of graduation.
3. Present address and position.
4. Statement of your work since graduation.
5. If married, date of marriage and name of person to whom married.

We request that each graduate of the school write us annually so that we may be continually informed of your whereabouts in order that the various bulletins of the school and other matter of interest to you may be sent you.

CALENDAR FOR 1914-15.

Entrance examinations and classification upon credentials Monday, Tuesday, and Wednesday, September 14, 15, and 16, 1914.

Formation of classes and beginning of recitations, Thursday, September 17, 1914.

Students coming for the first time should reach Denton on or before Saturday, September 12, and arrange for boarding places, in order to be ready for examination or classification on Monday, September 14.

Former students whose classification is already determined need not report before Wednesday, September 16.

It is important that students come at the times specified and thus avoid delay and dissatisfaction in classification.

Students entering at the beginning will be classified promptly.

TERMS.

The first term will begin September 14, 1914. The second term will begin December 9, 1914. The third term will begin March 3, 1915.

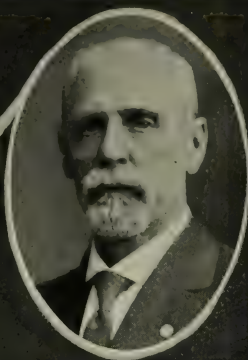

Session 1914-15 will close Tuesday, May 25, 1915.

STATE NORMAL SCHOOL BOARD OF REGENTS.

Hon. Sam Sparks, President, Austin.....	Term expires 1917
Hon. A. C. Goeth, Vice-President, Austin.....	Term expires 1919

FACULTY FOR 1913-14.

W. H. BRUCE, *President*.

A. B., Alabama Polytechnic Institute; A. M., Baylor University; Ph. D., Mercer University. Superintendent of Schools, Blanco, Texas, 1884-93; Marble Falls, 1893-96; Athens, 1896-99; President John Tarleton College, Stephenville, 1899-1900; Professor of Mathematics, North Texas State Normal College, 1901-06. Conductor and teacher summer normal institutes, San Marcos, 1892-94; San Antonio, 1895-96, 1901; Port Lavaca, 1901. Teacher of Mathematics, summer session University of Texas, 1897, 1898, 1900. Chairman Texas State Board of Examiners, 1905-10. President Texas State Teachers' Association, 1905. Fellow Texas Academy of Science. Co-author Sutton and Bruce's Arithmetics; Bruce and Cody's Geometries. Present position since October, 1906.

W. D. BUTLER, *Mathematics*.

A. B. and A. M., Bethel (Kentucky) College. Graduate student one year Johns Hopkins University. Student Chicago University, summer sessions 1898 and 1910. Principal high school, Palestine, Texas, 1891-95; Principal high school, Mexia, 1895-1902. Superintendent of Schools, Hillsboro, 1902-06. Conductor summer normal institutes, Tehuacana, Groesbeck, Hillsboro, four terms. Teacher summer session North Texas State Normal College, 1903-06. Present position since October, 1906.

L. D. BORDEN, *Physics*.

B. S., Southwestern University; A. B., University of Nashville; L. I., Peabody Normal College. Student summer session Chicago University, 1899 and 1910. Teacher in public schools, Galveston, 1902-1900; Waco, 1901. Teacher in summer normal institutes, Gonzales, Galveston, and Dallas, four terms. Present position since September, 1901.

T. E. PETERS, *Mathematics*.

A. B. and A. M., Greenville (Kentucky) College. President Collegiate Institute, Shelbyna, Mo., 1891-93; Superintendent of Schools, Perry, Mo., 1893. President McFerrin College, Martin, Tenn., 1893-95. President Franklin College, Pilot Point, Texas, 1896-1901. Principal high school, Oak Cliff, 1901-1908. Present position since January, 1908.

W. N. MASTERS, *Chemistry*.

B. S. and A. B., National Normal University, Lebanon, Ohio. Principal high school, Denton, Texas, 1899-1908. Teacher of Latin and Science, high school, Oak Cliff, 1908-10. Teacher in summer normal institutes, Mount Pleasant, 1893; Sulphur Springs, 1894; Denton, 1896; Vernon, 1898.

J. R. SWENSON, *Education*.

A. B., Denver University; A. M., University of Texas. Graduate student, Columbia University, 1905-06 and 1906-07. Teacher in public schools of Iowa, Utah, Colorado, and Texas, eight years. Teacher in Department of Education, University of Texas, 1903-04 and summer sessions 1904, 1905, and 1907. Present position since September, 1907.

P. E. McDONALD, *Latin*.

A. B., University of Nashville; L. I., Peabody Normal College. Superintendent of Schools, Bells, Tennessee, three years. Principal high school, Honey Grove, Texas, four years. Superintendent of Schools, Ladonia, one year; Honey Grove, five years. Teacher in summer normal institutes, Bonham, 1906 and 1909. Present position since November, 1909.

E. D. CRIDDLE, *History*.

B. Lit., University of Texas. Teacher Waxahachie Academy, 1896-97. Teacher Texas College, Waxahachie, 1897-1900. County Superintendent of Schools, Ellis County, Texas, 1900-1904. Principal high school, Waxahachie, 1905-06. Present position since November, 1909.

C. L. DAVIS, *Agriculture*.

B. S., University of Tennessee. Graduate student Iowa State College, Ames, Iowa, and University of Wisconsin. Teacher in Southwestern Academy, Magnolia, Arkansas, 1906-07. Teacher of Agriculture in State Agricultural School, Madison, Georgia, 1907-08, and State Agricultural School, Douglas, Georgia, 1908-09. Present position since September, 1909.

J. W. SMITH, *Secretary, Mathematics*.

Student University of Texas. Principal high school, Waelder, 1892-94; Port Lavaca, 1894-1901; Corsicana, 1901-04; Superintendent of Schools, Caldwell, 1904-09. Teacher in summer normal institutes, Port Lavaca, 1901; Corsicana, 1903, San Antonio, 1904-05, 1907-09; Caldwell, 1906. Present position since September, 1909.

E. L. ANDERSON, *German*.

A. B., University of West Virginia, 1905. Student Leland Stanford University, 1901-02, 1902-03. Student Marburg University, Germany, summer, 1905. Student Columbia University, 1908-09. Teacher in preparatory department University of West Virginia, 1905-07. Principal Reynolds Academy, Albany, Texas, 1908-10. Teacher of German, high school, Abilene, 1910-12. Present position since September, 1912.

MISS ANNIE WEBB BLANTON, *English*.

B. Lit., University of Texas. Student University of Chicago, summer sessions 1901-02; student summer session University of Texas, 1910. Formerly teacher of English in high school, Austin, Texas. Author of Outlines of English Grammar and Outlines of Composition. Present position since September, 1901.

MISS M. ANNE MOORE, *Education*.

M. L., Southwestern University; A. B., University of Chicago. Teacher Alexander Collegiate Institute, Jacksonville, Texas, two years. Present position since September, 1901.

MISS EMMA MITCHELL, *History*.

Aiken Institute, Paris, Texas. Student University of Chicago nine quarters. Formerly teacher in Paris (Texas) Institute; Mary Connor College; Paris High School. Present position since September, 1901.

MISS EDITH LANIER CLARK, *English*.

A. B. and A. M., University of Texas. Student University of Chicago, summer session, 1906. Teacher in high school, Corpus Christi, 1895-97; in high school, San Antonio, 1901-02. Present position since September, 1902.

MISS ELIZABETH ALGER HILLYAR, *Drawing*.

Woman's Art School of New York. Student Columbia University, summer sessions 1911-13, and entire session 1912-13. Present position since September, 1906. On leave of absence session 1912-13.

J. H. LEGETT, *Agriculture*.

Graduate North Texas State Normal College, 1905. Student University of Chicago, summer session, 1907. Present position since November, 1905.

MISS CORA BELLE WILSON, *History*.

A. B., University of Nashville; L. I., Peabody Normal College; A. M., Columbia University. Teacher in public schools, Monticello, Arkansas, 1902-03, 1903-04; Henderson College, Arkadelphia, Arkansas, 1904-1911; Ward Seminary, Nashville, Tennessee, 1911-12. Present position since September, 1912.

HUGO J. P. VITZ, *Manual Training*.

B. S., Purdue University. Teacher of Manual Training, Lee's Collegiate Institute, Jackson, Kentucky, 1905-06. Teacher of Manual Training in public schools, Grand Rapids, Michigan, 1907-08; in public schools, Bloomington, Illinois, 1910-11, 1911-12. Present position since September, 1912.

MISS BLANCHE E. SHAFFER, *Home Economics*.

B. S., Columbia University. Graduate State Normal School, Oneonto, New York. Teacher high school, Palenville, New York, 1903-06. Assistant in Home Economics, Columbia University, 1911-12. Present position since September, 1912.

MISS CLARA M. PARKER, *English*.

A. B., University of Texas. Student Chicago University, summer 1911. Teacher in public schools of Lewisville, and Graham, Texas, five years. Teacher in high school, Wichita Falls, Texas, five years. Teacher of Latin, University of Texas, summer session, 1912. Present position since June, 1913.

H. M. SNOW, *Music*.

Graduate New England Conservatory of Music, Boston, 1909. Supervisor of Music in public schools, Raleigh, North Carolina, 1909-1911. Present position since November, 1912.

MISS MARGARET W. PRICE, *Reading and Physical Education*.

Student four years and graduate Rogersville (Tennessee) Synodical College. Graduate King's School of Oratory, Pittsburg, Pennsylvania. Student two summers, University of Tennessee. Present position since September, 1912.

MISS LILLIAN D. HALL, *English*.

A. B., Southwestern University. Student Chicago University, summer 1904. Student Columbia University, summer 1906. Student University of California, summer 1911. Teacher public schools, Georgetown, Texas, two years; Uvalde, one year; Hargrove College, Ardmore, Oklahoma, two years; teacher of English, high school, Marshall, and high school, Abilene, three years. Present position since September, 1913.

J. P. DOWNER, *Mathematics*.

A. B., Cumberland University. Student Chicago University. Teacher several years in public schools of Kentucky and Alabama. Principal private school for boys, Paris, Texas, 1891-1900. Teacher of Mathematics, Mary Connor College, Paris, 1903-06. Principal high school, Paris, 1906-12. Teacher of Mathematics, summer school University of Texas, 1912-13. Present position since September, 1913.

J. W. PENDER, *Civics*.

A. B., Grayson College. Teacher Commercial School, Denison, Texas, 1897-1901. Teacher high school, Denison, 1901-03. Teacher in high school, and principal ward school, Paris, Texas, 1904-12. Teacher summer normal school, Bonham, 1906. Teacher summer session North Texas State Normal College, 1912, 1913. Present position since September, 1913.

MISS ROSALIE V. RATHBONE, *Home Economics*.

Graduate College of Industrial Arts, 1911. Teacher of Domestic Science in high school, Conroe, Texas, 1911-12, 1912-13. Present position since September, 1913.

MRS. ALICE B. TRAVER, *Assistant in English*.

Graduate North Texas State Normal College. Teacher in Training School, Edmond, Oklahoma, State Normal, 1911-12. Present position since October, 1913.

MRS. PEARL CARDEN MCCracken, *Librarian*.

Graduate Normal School, Glasgow, Kentucky. Student Bowling Green (Kentucky) Business College; Bryant and Stratton's Business College, Louisville, Kentucky. Teacher in public schools of Kentucky and Mississippi, 1885-89. Teacher in public schools, Honey Grove, Texas, 1890-96; Ennis, 1901-02. Present position since February, 1903.

A. C. MCGINNIS, *Registrar*.

Student Arlington (Texas) College, 1901-02; North Texas State Normal College, 1902-04. Graduate Draughon's Business College, Dallas, 1905. Graduate Toby's Business College, Waco, 1906. Teacher in Draughon's Business College, 1907-09. Teacher commercial department high school, Frederick, Oklahoma, 1910-12. Present position since September, 1913.

MISS MAUD L. FIERO, *Director of Training School*.

B. S., Columbia University. Graduate State Normal School, New Platz, New York. Teacher in public schools, Hudson, New York, three years. Teacher of Literature in public schools, Mount Vernon, New York. Supervisor Training School of Plattsburg (New York) State Normal School, 1912. Present position since January, 1914.

MRS. CORA M. MARTIN, *Teacher in Training School*.

Graduate North Texas State Normal College. Teacher in public schools, Munday and Wellington, Texas, five years; in Fort Worth public schools, 1910; in Paducah, 1911-13. Present position since January, 1914.

MISS CORINNE TRIPPET, *Teacher in Training School*.

Graduate North Texas State Normal College. Student in summer sessions, Trinity University, one term; Chicago University, one term. Teacher in public schools, Waxahachie, Texas, four years. Present position since January, 1914.

MISS LETA BROOKS, *Teacher in Training School*.

Graduate high school, Waco, Texas. Student Baylor University summer session, five terms. Student Senior Class, North Texas

State Normal College. Teacher rural schools, two years; Valley Mills, two years; Fort Worth, five years. Present position since January, 1914.

MISS WILLIE M. FLOYD, *Teacher in Training School.*

Graduate high school, Ardmore, Oklahoma. Student summer session Polytechnic College, 1907; summer session University of Texas, 1909; North Texas State Normal College, 1911. Teacher in public schools, Ardmore, Oklahoma, 1906-07; Tarrant County, Texas, 1907-08; Baird, Texas, 1909-10; Abilene, 1910-13. Present position since January, 1914.

FACULTY COMMITTEES, SESSION 1913-14.

Athletics—Anderson, Pender, Price, Vitz, Snow.

Boarding Houses—Butler.

Chapel—Hillyar.

Chapel Exercises—Criddle, Clark, Pender.

Classification—Criddle, Smith, Downer, Shaffer, Peters.

Commencement—Clark, Price, Snow.

Course of Study—Swenson, Downer, Blanton, Moore, Wilson.

Discipline—Butler, McDonald, Smith, Moore, Mitchell, Blanton.

Emergency Fund—Legett, Mitchell, Rathbone.

Entertainments—Parker, Clark, Borden.

Intercollegiate Debates—Price, Swenson, Blanton.

Literary Societies—Clark, Moore, Hall, Pender.

Lyceum—Borden, Price, Downer.

Musical Organizations—Snow.

Ornamentation—Hillyar, Rathbone, McCracken.

Publicity—Blanton, Anderson, Davis, Parker, Hall.

Recommendation of Teachers—McDonald, Smith, Butler, Masters, Criddle, Shaffer.

Rules and Regulations—Peters, Parker, Legett, Davis.

Schedule of Recitations—Hall, Parker, Blanton, Moore.

Sick Students—Mitchell, McCracken, Hillyar, Legett.

Student Publications—Moore, Masters, Hall, Wilson.

Summer Schools—McDonald, Butler, Smith, Borden, Peters, Masters, Vitz.

Time—Vitz.

THE PURPOSE OF THE INSTITUTION.

Wherever a system of education is maintained inefficiency of the teaching force is expensive from a strictly financial viewpoint. Inefficiency is always extravagant and wasteful. State normal schools have been the natural outgrowth of the policy of public education.

The purpose of a normal school is to educate teachers, to increase the skill and efficiency of this class of public servants. By properly training those to whom the education of the children of the public schools is to be entrusted not only is the investment of the public school fund made more profitable, but the business of teaching is made more professional and respectable in all its aspects, retaining in its ranks for a longer time a greater number of the intellectually strong and capable. The unskilled and untrained seldom love their vocation; they lack enthusiasm and inspiration; they fail to acquire power or influence and to feel consecration; and they soon abandon their work for one of less responsibility.

It is the province of the normal school to prepare men and women, not only to teach subject matter, but to inspire and stimulate the pupil from within, to exemplify the character and the culture whose roots sink deep into the source springs of thought and feeling. The normal school must have its students comprehend the responsibilities of leadership, the principles of mind development, the laws that correlate and harmonize the physical, the mental, and the spiritual.

The normal school exists primarily not for the benefit of its own students, but for that of all the pupils of the public schools and the whole people. It justifies its existence as an institution to be supported by legislative appropriation in proportion to its fidelity in meeting its obligations to the State.

To fulfil its mission in the fullest sense the normal school is more than the high school, the college, the industrial school, or the technical training school. It must combine the qualities of all these. It must afford academic instruction; it must develop culture and scholarship; it must train for the practical every day problems of society, the home, and the State.

The courses of study, the regulations governing the school, and the methods of instruction used in the classroom, the laboratory, and the playground, keep constantly in view the mission of the school: the instruction, the training, the inspiration, and the development of the character of the future teachers, directors, leaders, and exemplars of the young; the careful supervision and sympathetic direction of the student life and work in the school, on the campus, and in the boarding home, so as to induce those habits of thought that make intelligent and reliable workmen and citizens. The personal influence of the teacher is by far the greatest factor in the education of children, therefore the normal

school must strive to incite those feelings and to inspire those thoughts and ideals that lead to right conduct through life.

In selecting a faculty for the school the utmost care is always exercised. Character, personal influence for good, scholarship, ability, willingness to work, and successful experience are always carefully considered. The Normal School faculty is no place for a teacher weak in any one of these particulars. The student in a Normal School should never come under the influence of a weak, insipid, inefficient, or indifferent teacher.

NORTH TEXAS STATE NORMAL COLLEGE.

HISTORICAL SKETCH.

The school was established by an act of the Twenty-sixth Legislature approved March 31, 1899.

The first session began September 18, 1901. The control of the school was vested in the State Board of Education, consisting of the Governor, the Comptroller and the Secretary of State.

The course of study was planned to cover a period of three years, all students taking practically the same course; a choice, however, being permitted between Latin and certain branches of natural science, differentiating the work into two very slightly different courses, known as the "Latin Course" and the "English-Science Course."

This plan continued until the Thirty-first Legislature in 1909 created the Departments of Agriculture, Manual Training and Domestic Science, when a system of "electives" was adopted.

The elective system continued to the beginning of the twelfth session, when distinct courses or groups of subjects were offered, the choice of the student ending when he had selected his "course."

The Thirty-second Legislature, at its called session in 1911, created a State Normal School Board of Regents, consisting of the State Superintendent of Public Instruction and four other members to be appointed by the Governor.

In compliance with the recent law governing the appointment of Boards of Regents of the State institutions (General Laws Thirty-third Legislature, Chapter 103, Section 3), the Normal School Board of Regents is made to consist of six members, all appointed by the Governor.

The Board of Regents held its first meeting in Austin December 11, 1911, and formally assumed control of the four State Normal Schools in Texas.

Among the most important acts of the Board of Regents during its first year are:

1. The establishing of uniform entrance requirements for the Normal Schools and definitely fixing these requirements.
2. Extending the courses of study to cover four instead of three years, and making the courses uniform for the four schools.
3. The abolishing of the general course of study with a limited number of electives and requiring the student to choose one among several distinct groups of subjects, thus permitting specialization.

ATTENDANCE.

The enrollment for the successive years during the regular sessions of nine months in May of each year has been:

	Men.	Women.	Total.
Session 1901-02	191	320	511

Total	\$233,682

BUILDINGS.

THE MAIN BUILDING.

In 1903 the main building, a brick, with basement and two stories, was constructed. This contains the administration offices, auditorium, and several recitation rooms. Its cost, including heating, electric wiring, plumbing, etc., was approximately \$60,000.

THE SCIENCE BUILDING.

In 1910 the science building was constructed. It is a fireproof brick and reinforced concrete structure of three floors. It contains several recitation rooms, a lecture room, the manual training shops, the laboratories for chemistry, physics, and domestic science, the power and light plant, store rooms, etc. Its cost, not including equipment, was \$35,000,

THE LIBRARY BUILDING.

In 1913 the library building was completed. It is a fireproof brick, reinforced concrete and steel structure. It contains the reading rooms, stack room, society rooms, several recitation rooms, gymnasiums, toilet rooms, etc. Its cost, without equipment, was \$55,000.

THE PRESIDENT'S RESIDENCE.

In 1907 the State Board of Education directed the President of each school to reside on the campus of the school. In 1909 the home for the President was built. It is a modern ten-room two-story building with all modern conveniences. Its cost, including some recent improvements, was \$5500.

THE MANUAL ARTS BUILDING.

The contractor began in January, 1914, the construction of a three-story, fireproof, reinforced concrete and steel building for the better accommodation of the departments of Manual Training and Home Economics. An appropriation of \$50,000 was made for this building.

THE TRAINING SCHOOL BUILDING.

In January, 1914, on a block of land recently acquired, a substantial seven-room frame building was completed for the model training school. Whenever funds for a permanent building are secured, the present building will, it is expected, be used for gymnasiums.

GROUNDS.

The campus proper consists of a ten-acre tract upon which are the main building, the science building, the library, the manual arts building, and the President's residence, janitor's house, tennis courts, basketball courts, etc.

One block removed from the campus the school has a block of four acres, which is being prepared for general athletic sports. On this is located also the temporary building for the Training School.

Removed by only a street from the last mentioned block the school owns a plot of two acres which is used for baseball and other games.

EQUIPMENTS.

In addition to the usual and necessary supply of desks, blackboards, maps, etc., the school has chemical, physical, botanical, agricultural, and domestic science laboratories, workshops, lathes, circular and band saws, planing machine, etc., for manual training, engine for power and light, stereopticons, camera, pianos, and organs.

All buildings are electric lighted, steam heated, and connected with the city sewer. The main building is supplied with electric fans. The laboratories and the cooking room of the Home Economics Department are connected with the natural gas pipes that supply the city. The offices have telephone connection with two systems, both local and long distance.

ENTRANCE REQUIREMENTS TO TEXAS STATE
NORMAL SCHOOLS.

1. *Uniform Requirements.*—The requirements for entrance to the various classes in the four State Normal Schools of Texas are uniform as directed by the State Board of Normal School Regents.

2. *Age.*—Any person who is sixteen years of age on or before January 1 of the school year may enter a State Normal School at the beginning of the fall term, or at any suitable time during the school year.

3. *First Year (Freshman) Class.*—Applicants for entrance to the first year (freshman) class must be examined in algebra to quadratics,

arithmetic, composition, grammar, and United States history. A second grade state certificate exempts the holder from examination in all the subjects mentioned except algebra and composition; the completion of the *ninth grade* of an affiliated or approved high school exempts from examinations for entrance to this class.

4. *The Second Year (Sophomore) Class.*—Applicants for entrance to the second year (sophomore) class must be examined in all the work of the freshman class for the appropriate courses with the following exceptions: A first grade State certificate exempts from all examinations for entrance to this class; a permanent primary certificate exempts from examinations in all subjects required for entrance to the second year (sophomore) class, except in algebra and geometry of the first year; a second grade State certificate exempts from all examinations for entrance in agriculture, physiology, reading, and school management; the completion of the *tenth grade* of an affiliated or approved high school exempts from all examinations for entrance to the sophomore class.

5. *The Third Year (Junior) Class.*—Applicants for entrance to the third year (junior) class must be examined in all the work of the second year (sophomore) class for the appropriate courses, with the following exceptions: A first grade State certificate exempts the holder from examination in second year history, civics, and three books in geometry for entrance to the third year (junior) class; graduation from affiliated high schools exempts from examinations in all those subjects in which the high school is affiliated, and which subjects were included in high school course of the applicant for admission to this class; graduation from approved high schools of the first class exempts from examination in subjects aggregating not more than ten units of work required of the second year (sophomore) class.

6. *The Fourth Year (Senior) Class.*—Applicants for entrance to the fourth year (senior) class must be examined in all the work of the third year (junior) class for the appropriate course. A permanent State certificate exempts from examination in third year English, history, physics, solid geometry, and trigonometry; the completion of one year's work in a recognized college or university exempts from examination to the fourth year (senior) class.

7. *Time of Examination.*—Applicants for admission to the first year (freshman) class must be examined upon entrance in all required subjects; applicants for admission to other classes must be examined upon entrance in the required English, history, mathematics, and science, and may if they desire, defer examinations in other subjects to the middle of the session. These regulations must be construed to apply to students from affiliated or accredited schools whose credentials exempt such students from only a part of the entrance examinations.

8. *Credits from Other Institutions.*—Entrance credits for work done in any college or university are determined by the President of the

Normal School. Work completed satisfactorily in any one of the Texas State Normal Schools is fully recognized by the others. Those completing the work of the first year in one Normal School are admitted to the second year class in any State Normal School in Texas, and similarly to each of the other classes; provided that of the fifteen units required for a certificate, at least five must be made in the Normal School that issues the certificate, and provided also that the entire fifteen units required for the fourth year (senior) class must be made in the Normal School that issues the diploma. Only "entrance credits" are given for work done in schools other than the Texas State Normal Schools.

9. *Amount of Work.*—Fifteen units of five recitations daily for twelve weeks, such recitations to be forty-five minutes each, constitute a year's work.

10. *Residence Requirements.*—The work of each class requires three terms of twelve weeks each, the work of a term being one unit in each of five subjects. The Normal Schools may, by reducing the number of subjects taken by a student during a summer term, require in each subject the same amount of work required in a term of the regular session. Residence for two terms or twenty-four weeks is necessary for the issuance of a second or first grade certificate; a residence of at least thirty-two weeks is necessary for the issuance of a diploma or permanent certificate.

11. *Credentials.*—Credentials entitling the holder to exemption from examination must be official statements signed by proper authorities. Promotion cards and diplomas from high schools and colleges must be accompanied by official statements of the work completed by the students, and signed by the superintendent, principal or President. Work in a grade partially completed is not subject to consideration for entrance or credit.

12. *Recognized Colleges.*—The University of Texas, Baylor University, Southwestern University, Texas Christian University, Trinity University, and Austin College are recognized colleges and universities, affiliation or correlation with which is approved.

13. *High Schools.*—"Approved" high schools are those accredited by the State Department of Education; "affiliated" high schools are those accredited by the University of Texas or other institutions, as specified in section 12.

14. *Electives.*—There are no "free electives." Each student before entering must elect one of the seven courses offered. In all courses there is an option between music and drawing. In the Language and History-English courses there is an option between Latin and German. In the Agriculture and Science courses three units in either manual training or home economics may be, by permission of the President, substituted for the same number of units in other subject or subjects.

FEES.

Each student enrolling in the school during the regular nine months' session shall pay an incidental fee of \$15.00 upon entrance, and no other fees or charges shall be levied against or collected from any student, and each student is entitled to the free use of text-books furnished by the school, which books, if returned in satisfactory condition at a time designated by the President, shall entitle the student to a refund of \$2.00.

The payment of this fee of \$15.00 is to be made by the student upon entrance to the school. It is the only fee paid during the session of nine months. There are no additional fees for library, books, laboratory, Manual Training, Domestic Science, etc.

The fee is \$15.00 whether the student enters at the beginning of the session or near the close of the session, whether the student continues in school for the entire session or only a few days of the year. No part of the fee is refunded, except \$2.00 upon prompt return of books. In order to be entitled to the refund of \$2.00, the student must return the books issued by him at the time designated for their return.

No one should ask exemption from or modification of the fee or its conditions. Neither discretion nor authority is given the President of the school to alter the terms or conditions of its payment.

COURSES OF STUDY.

The school offers seven distinct groups of subjects or courses of study, each covering a period of four years. The courses are equivalent as to amount of subject matter and as to the time requisite for their completion. Each course comprehends two years of high school work and two years of strictly collegiate work, including the professional subjects recognized as necessary for the preparation of teachers.

First-year (Freshman) students have practically the same course. Those who have completed the Freshman class in the school, or whose attainments enable them to enter a more advanced class upon matriculation, must choose one of the seven courses offered.

The student is not permitted to elect subjects or to plan a course different from any one offered. There are a few "alternatives" offered in each course, and in such case the student is allowed further manifestation of his preference.

The courses are:

- I. Agriculture.
- II. Home Economics.
- III. Manual Training.
- IV. Language.
- V. Science.
- VI. Primary and Art.
- VII. History-English.

PURPOSE OF THE COURSES.

Each course includes the fundamental subjects usually required in the grades of the public schools, and the completion of any one of the seven courses should equip the student for general public school work. Each course permits specialization, affording opportunity for preparation in a particular field.

1. The Agriculture course is intended to prepare teachers of agriculture in high schools, and principals of rural schools.

2. The Home Economics course is intended to prepare teachers of domestic science.

3. The Manual Training course is intended to prepare teachers of the different phases of manual training.

4. The Language course is intended for teachers of English and either Latin or German.

5. The Science course is planned for teachers of Mathematics, Physics and Chemistry.

6. The Primary and Art course is expected to equip the primary teacher and in addition to train a teacher of either drawing or music.

7. The History-English course is designed to prepare a teacher of history and English.

All these courses are offered in each of the four State Normal Schools of Texas.

The work is estimated in "units."

A unit is 5 recitations per week for a term of 12 weeks or 60 recitations of 45 minutes each.

The work of a session of nine months is 15 units.

The following table illustrates the scope of each course as to subject matter. The numerals denote the number of units required in each subject during the entire four years.

A Unit is 60 Recitations of 45 Minutes Each.	I	II	III	IV	V	VI	VII
	Agriculture.	Home Economics.	Manual Training.	Language.	Science.	Primary and Art.	History-English.

THE NEW FOUR-YEAR COURSES.

For the session beginning in September, 1913, and thereafter, the Texas State Normal Schools adopted uniform entrance requirements and uniform requirements for certificates and diplomas. Qualifications for admission to the first year or Freshman Class were made equivalent to the completion of the ninth grade of a standard high school, and a four-year course for graduation was agreed upon.

Students who had before this time matriculated in one of the Normal Schools and others who could by examination join the classes of such students were permitted to complete the former three-year course and graduate, provided the entire work of the former course shall have been finished before September, 1914. No "three-year" diploma will be issued after September 1st, 1914.

Beginning with the session in September, 1914, every student will be registered in some class of the new four-year course.

Adjustment of Former Students.—Certificates issued by the State Normal Schools prior to the adoption of the new courses will be recognized as follows: The second grade State Normal School certificate admits to the Sophomore (second year) Class; the first grade to the Junior (third year) Class; the permanent to the Senior (fourth year) Class, to that one of the seven courses for which the previous work of the student has prepared him.

Choice of Course Necessary.—There are no "free electives" in any one of the Texas State Normal Schools. The student must elect one of the seven distinctive courses offered and he must take every subject of the course elected. Completion of a year's work in one course does not admit the student to the next higher class of a different course.

Alternatives.—In all courses there is a choice between Drawing and Music. In the Language and the History-English courses there is a choice between Latin and German. In the Agriculture and the Science courses not more than three units in Home Economics or Manual Training may be substituted for the same number of units in other subjects; such substitution to be made only with the permission of the President.

Extra Work.—A student of the Junior (third year) Class in the Agriculture, Home Economics, or Manual Training Course may, with the permission of the President, take "double work" in Agriculture, Home Economics, or Manual Training, in order to compensate for lack of previous opportunity for meeting the requirements for entrance to the Junior Class in those courses.

Recognition of the Work of the State Normal Schools by the Colleges and Universities.—The fixing of definite entrance requirements and the addition of one full year's work to that of the former courses of the Normal Schools have raised these schools from the rank of high schools to that of full Junior Colleges, the courses covering two years of high school and two years of strictly college work. Graduates of the four-year

course may, under certain conditions, enter the University of Texas and other higher institutions with ten college credits, which, with some restrictions, is admission to the Junior Class of the University.

The following report on the present status of the Normal Schools has been received from the University of Texas as the action of the Committee on Admission from Other Colleges:

"Students completing the Second Year of the Normal Schools will be given 12 units required for admission to the Freshman Class.

"Students completing the Third Year of the Normal Schools will be given 12 admission units and in addition credit for 5 college courses, provided the student completed the second and third years at the Normal, or was admitted to the Normal by reason of graduation from a school affiliated with the University of Texas in at least 12 units, or was admitted by examination.

"Students completing the Fourth Year of the Normal Schools will be given 12 admission units and in addition thereto, 10 college courses, provided the student completed the second and third years at the Normal, or was admitted to the Normal by reason of graduation from a school affiliated with the University of Texas in at least 12 units, or was admitted by examination.

"The number of admission units and also the number of college units granted a student on the completion of the third and fourth years of the Normal Schools, who entered such school without examination and without graduation from a school affiliated with the University of Texas in as many as 12 units, will be determined by the amount and character of the work he has done. . . . In case they [students] have in their Normal course previously taken as much as three years in some foreign language, they will be given 14 entrance units."

Significance of the New Courses.—The diploma of a Texas State Normal School will hereafter have a larger significance. It will represent two years of strictly college work, and will have recognition by the colleges and universities of Texas and of other States. The standardizing of the Normal Schools, the increase in the entrance requirements, and the addition of one year's work to the courses can be a hardship to no one. Those completing the three years' work will be as well equipped as heretofore; their work will be recognized by the universities, by school boards and superintendents; and their services as teachers will command as large salary.

The new regime will operate to bring the Normal Schools and the University in closer relation and sympathy, and will bring the University within the reach of a greater number. Students may pass from the Junior Class to the University with more credits than were granted the graduates heretofore. Graduates in the four-year course in the Normals will be required to spend only two additional years in the University for graduation, instead of four years as formerly. The cost of one additional year at the Normal School and two years at the University will be much less than that of four years at the University.

Neither can the increased requirements for entrance be a hardship

to any student. Wherever adequate instruction in the customary nine grades can be had at home it is uneconomical and unwise to send the student away for the work. The purpose of the Normal School is to train teachers. Greater efficiency is now demanded of the teacher of the common schools. The number of schools now doing acceptable work through all the intermediate grades is much greater than a few years ago. When such instruction cannot be secured at home, as is the case still in many rural districts, the student unprepared to enter profitably the work of the Freshman Class of the Normal School may enter the "Model Training School" now conducted in connection with the Normal proper, in which nine full grades are under competent instruction and favorable conditions.

DEPARTMENT OF AGRICULTURE.

PROF. DAVIS, PROF. LEGETT.

Agriculture 1. Elementary Agriculture. 1 unit.

A twelve weeks course in the rudiments of the subject. The subjects covered will be those considered in Ferguson and Lewis' "Elements of Agriculture."

Agriculture 2. Zoology. 2 units.

Several selected representatives of easily recognized relationship are studied in the laboratory and then in the text until the need of a group name is felt. The characteristics of the order are then brought out. The relationship between allied orders is treated in like manner.

About twenty insects, the crayfish, the frog, the cat, and the rabbit will be used in the laboratory.

Text-book: Linville and Kelley's "Outlines of Zoology."

Agriculture 3. Economic Entomology. 1 unit.

Destructive insects and their method of control, including such as the boll worm, the boll weevil, the grasshopper, the army worm, and the San Jose scale. Two laboratory and three recitation periods.

Text-book: Chittenden's "Insects."

Agriculture 4. Agronomy. 1 unit.

The soil, how made, composition, texture, water holding capacity, tillage, humus and its function, soil inoculation, conservation of soil water. Irrigation and drainage will be treated briefly. Fertilizers: elements used by plants as food, giving special attention to nitrogen, phosphorus, and potash. The function of each of the last three, commercial forms, method and time of application; analysis and value of barnyard manure; legumes of the State. Laboratory work in grain judging, germination methods, value of seed selection, principles of plant improvement; a study of the cotton plant from planting to maturity, including cotton grading and the products made from cotton seed and fiber.

Agriculture 5. Animal Husbandry. 1 unit.

Feeds and feeding; composition and nutritive value of common feeds, methods of determining value of different feeds, balanced rations for different classes of livestock. Breeds of livestock are studied from lantern slides and then on the neighboring farms. History of breeds is studied in class. Animal diseases, as Texas fever, hog cholera and tuberculosis, will be considered.

The dairy breeds, methods of producing clean milk, churning temperature, butter making, testing milk and its products for fats and for preservatives; laboratory practice in setting up centrifugal separators.

Agriculture 6. Horticulture. 1 unit.

Plant propagation by seedage, layering, cuttings, budding, and grafting. Technique of crossing varieties is practiced.

A microscopic study of fungus growths, as cotton root rot, peach brown rot, wheat rust, carnation rust, with methods of treatment.

Practice in school gardening.

Two laboratory and three recitation periods per week.

Text-book: Warren's "Agriculture," for Agriculture 4, 5, and 6.

Agriculture 7. Agricultural Bacteriology. 1 unit.

The course will include a study of nitrifying bacteria, legume bacteria, bacteria concerned in souring of milk, in silage, in sewage purification, in canning and animal diseases. Bacteria in barnyard manure and control, bacteria in bread making, in preservation of foods, vinegar making, and in many industrial processes.

Text-book: "Agricultural Bacteriology," Conn.

Agriculture 8. Experimental Plant Breeding. 1 unit.

Methods of improving and fixing types. A study of Mendel's Law. This work will be carried out in the school garden. Eugenics will be treated; lectures on topics of current interest in the work.

Text-book: Walter's "Genetics."

Agriculture 9. Agricultural Economics. 1 unit.

This course will cover, as far as possible, the subject of rural credits, the organization of buying and selling concerns, of creameries, elevators, etc., the marketing problem, the tenant system of this and of other countries.

Text-book: Carver's "Principles of Rural Economics."

DEPARTMENT OF CIVICS.

PROF. PENDER.

Civics 1. 1 unit.

This course is elementary and is based upon the State adopted text. The origin and principles of government. Careful study of National Constitution, the State Constitution, city charters. Application of government in nation, State and municipality. Prominent political questions of the day.

Text-book: Triplett and Hauslein's "Civics: Texas and Federal."

Civics 2. 2 units.

The first part of this course treats of the origin of government, the theories and conditions that led to democracy, and the institutions that

make democracy possible. This is followed by study of the origin, growth, and nature of constitutions and their application to national, State and city government. The natural division into political parties and the growth of parties. A last division treats of investment, the fundamental principles of fire and life insurance, and the practical application of insurance in all its phases.

In addition to the regular texts, students are required to read books treating of different phases of the subject, and opportunity for free discussion is frequently afforded in the recitation.

Text-books: Hinsdale's "American Government"; Swenson's "Syllabus of a Course in Civics."

DEPARTMENT OF DRAWING.

MISS HILLYAR.

In all the seven courses the student must elect, as a part of his work, either Drawing or Music. After having once made his selection between the two he must continue his line of work throughout the course.

The aims of the courses in drawing are as follows: (1) To develop the ability to draw easily and well, to prepare the teacher to use drawing as a language in the teaching of any subject, a language, when skilfully used, which never fails to awaken interest and to hold attention.

(2) To teach the student to understand and to apply the general principles of perspective, of mechanical drawing, and the elementary principles of design, and their application. This will include the study of lettering.

(3) To develop the power of observation and to cultivate an appreciation of the forms and elements of nature and the world of Art.

Only those who elect the Primary and Art course are required to take an extensive course in either Drawing or Music.

The aim of this course in Drawing includes that of the other courses and is especially designed to prepare teachers of drawing for the public schools.

Drawing 1. 1 unit.

1. Freehand drawing. 2. Elementary principles of design. 3. Simple applications of design. 4. Scales of dark and light and color. 5. Lettering. 6. Construction. 7. Picture study.

Drawing 2. 2 units.

1. Principles of design. 2. Applied design, original borders, surfaces. 3. Perspective. 4. Freehand drawing, still life. 5. Representation, nature forms. 6. Color technique. 7. Working drawings. 8. Picture study.

Drawing 3. 3 units.

1. Design, stencils, wood blocks, etc. 2. Freehand drawing, still life. 3. Perspective. 4. Mechanical drawing. 5. Water color. 6. Composition. 7. Art history.

Text: Apollo, Reinach.

Drawing 4. 3 units.

1. Advanced design. 2. Composition. 3. Pose drawing, life. 4. Outdoor sketching. 5. History of art. 6. Methods of teaching art in the grades.

Drawing 5. 1 unit.

1. Freehand drawing, still life. 2. Design. 3. Application, borders, surface patterns, etc. 5. Plant forms. 6. Water color. 7. Masterpieces of art.

Drawing 6. 1 unit.

1. Freehand drawing, still life. 2. Applied design, stencils, wood blocks. 3. Perspective. 4. Mechanical drawing. 5. Water color. 6. Modern painters.

Drawing 7. 1 unit.

1. Freehand drawing. 2. Composition. 3. Design. 4. Mechanical perspective. 5. Methods of teaching drawing in the grades. 6. A brief study of the historical development of architecture, sculpture, and painting.

DEPARTMENT OF EDUCATION.

PROF. SWENSON, MISS MOORE, MISS FIERO.

Education 1. School Management. 1 unit.

This course, counting one unit of study, is given each of three terms of the year to different groups of Freshmen. Sutton and Horn's "School-Room Essentials" is used as text to give a general presentation of educational problems in both theory and practice.

Special attention is given to the consideration of the teacher's work in a country school.

Education 2. Elementary Method. 1 unit.

The course in Elementary Method is an introductory course in General Method. It includes a study of the foundation principles and the fundamental laws of teaching; the rules and purposes of the recitation; the use of drills and reviews; the making of lesson plans.

The course is based upon Roark's "Method in Education."

Education 3. Advanced Management. 1 unit.

This course deals with Management differentiated from Method and involves the various phases and processes of education except that of instruction. The class room is taken as the unit of management, and the point of view is that of the individual teacher in charge of a room. Bagley's "Class Room Management" is used as text, supplemented by library work.

Education 4. Special Method. 1 unit.

This course is planned to furnish special training in the Intermediate and Grammar grades of the public school course. It will consist of discussions of principles which underlie and determine the selection of subjects of study and the methods of presenting subject matter to children in the various grades of the intermediate department.

The course will be based upon Compayre's "Practical Pedagogy."

Education 5. General Psychology. 1 unit.

The course will consider

1. The Psychophysical organism;
2. Sensation;
3. Perception;
4. Consciousness and attention;
5. Perception, memory, thought;
6. Feeling and emotion;
7. Will.

The fundamental laws of mental growth will be discussed and their pedagogical application considered.

The text used is Angell's "Psychology."

Education 6. Child Psychology. 1 unit.

This course includes a study of the problems which are concerned with the development of the child, mental and physical. A study is made of the problems of heredity, instinct, etc., and how to direct play, imitation, collective and constructive instinct. The division of the life of a child into distinct periods with the individual characteristics of each is considered.

The course is based on Kirkpatrick's "Fundamentals of Child Study."

Education 7. Primary Method. 1 unit.

The course in Primary Method includes a study of the special Methods in the work of the first four years of the public school course. Special methods in the teaching of reading, number work, language, story-telling, dramatization, constructive work, etc., is considered; the making of lesson plans and the observation and use of concrete material emphasized.

The course will be based upon "General Outlines for Primary Method" by M. Anne Moore.

Education 8. General Method. 1 unit.

The course in General Method provides for a thorough study of the formal steps of the recitation, the problems of how to study and teaching how to study; the factors determining the selection and arrangement of subject matter.

The methods of securing interest; individual attention; the elements of skill in drill; development; and appreciation.

The course is based upon McMurry's "Method of the Recitation," and "How to Study and Teaching How to Study."

Education 9. History of Education. 1 unit.

This subject will be treated as a phase of General History, being a study of the continued focal point where one generation transmits to the next its institutions and the results of its experience. The systems of the various epochs and of the great reformers will be analyzed for the lessons they can teach the modern teacher, the study thus subserving both cultural and practical ends.

Monroe's "Brief Course in the History of Education" will be used as a text, supplemented by a brief comparative study of the public school system evolved by the United States and the leading European nations from current educational documents.

Education 10. School Administration. 1 unit.

This course deals with the problems of education from the point of view of the citizen, the board-member, and the superintendent rather than that of the teacher. The social and ethical basis of education is emphasized rather the psychological and philosophical.

Dewey's "Ethical Principles Underlying Education" is studied to establish the point of view. A syllabus of the course is used to outline the details of the subsequent work.

Education 11. Principles of Education. 1 unit.

In this course the growth of educational principles in history is traced briefly. But the emphasis is upon the methods of research by which educational principles are now laid bare in much the same way as principles are discovered in any other science. Then the application of these principles to modern educational problems is pointed out, though the student need expect few definite prescriptions.

Ruediger's "Principles of Education" is used as text, supplemented by certain chapters in Thorndike's "Educational Psychology."

Education 12. Practice Teaching and Observation Work in the Training School. 1 unit.

The Training Department consists of a school of seven grades, limited to sixteen pupils to a grade. The Training School was opened January 15, 1914, with five teachers and one hundred pupils. Beginning next September a school of nine grades will be maintained.

Until a more commodious building and a greater number of teachers can be provided by appropriation, each teacher, except that of the first grade, will have charge of two grades. All these are experienced and trained teachers. A technically trained and experienced director is in charge of the entire instruction.

The Training School is designed to give the students of the Normal College careful training in the art of teaching in the grades. Each student in the Normal School department is required to teach at least one term before graduation, under the supervision and instruction of the director and the training teachers.

The different members of the Normal School faculty and the teachers in the Training School give "model" recitations with criticisms and discussions of the work in the different subjects.

In some cases the daily observation and criticism of classes followed by oral or written discussion, or both, may be substituted for a term of teaching by the student.

While actual teaching in the Training School is required only of members of the Senior class, members of the other classes are required to do observation work, prepare lesson plans, etc. Each student teacher is required to prepare lesson plans a week in advance of the work, which plans are examined, criticised, and, when necessary, revised by the director or training teachers. The conduct of recitations by the student teacher is observed by the training teacher and helpful criticisms given in private.

Students of the Normal School department are also appointed to superintend the playground of the Training School during recess periods.

A second purpose of the Training School is the preparation of students for entrance to the Normal School. Pupils completing the ninth grade will be admitted without examination to the Freshman class of the Normal. Students from a distance failing on the required entrance examinations to the Normal will find an opportunity in the Training School of preparing for entrance to the Freshman class.

Admission to the Training School.—Pupils from any section of Texas may be admitted to the Training School until the limit, sixteen to a grade, is reached.

The Training School is closely correlated with the public schools of Denton. There is cordial co-operation with the School Board, the Superintendent and the corps of teachers of the public schools.

At the beginning of the session pupils will be admitted on promotion cards from the public schools, or classified by examination, but after the school year begins all transfers from the public schools are discouraged, and pupils suspended from other schools and those who leave school on account of having been disciplined are not desired.

Tuition in the Training School is free, nor is there any incidental or other fee. The "per capita" apportionment by the State is not transferred to the school, its expenses being met by regular appropriations, hence we reserve the right to refuse or to dismiss pupils who, from

irregular attendance, habits, persistent misconduct, or inability, prove burdensome to the class.

Course of Study in the Training School.—During the session of 1913-14 the course of study of the Denton public schools is adopted. The course of study for session 1914-15 will be published in detail in the July (1914) number of the Normal Bulletin.

DEPARTMENT OF ENGLISH.

MISS BLANTON, MISS CLARK, MISS PARKER, MISS HALL, MRS. TRAVER.

English 1. Elementary Grammar. 1 unit.

This course begins with a review of the parts of speech, followed by a brief study of the phrase, the clause, the verb, and the verbal, as a preparation for sentence analysis. Sentence analysis, including the study of all types of the simple sentence, of compound sentences, and of complex sentences containing relative clauses, forms a part of the work of each week. The course also includes a study, in detail, of the noun and the pronoun; their classification, inflections and constructions. Drill is given on correct forms and uses of nouns and pronouns.

English 2. Elementary Grammar. 1 unit.

This course is a continuation of English 1, and includes the study, in detail, of the adjective, the verb, the adverb, the preposition, and the conjunction—their classification, inflections and constructions. Sentence analysis is continued and includes the study of complex sentences containing the various types of simple dependent clauses. Drill is given on the correct forms and uses of all the parts of speech.

Text-books for English 1 and 2: Smith's "Our Language Grammar" and Blanton's "Grammar Outlines."

English 3. Elementary Composition. 1 unit.

This course has for its primary purpose to make correct form in writing habitual with the student. It includes the following: A detailed study of capitalization and punctuation; a study of the paragraph, including the principles of paragraph construction and the different methods of paragraph development; a study of letter writing, with drill on correct forms, and practice in writing business, social, and informal letters; simple compositions, including reproductions, paraphrasing, and easy exercises in narration and description. In connection with the work in composition students are required to read certain classics, which they discuss with the instructor, and on which is based some of the work in composition writing. At least one composition per week is required in this course.

Supplementary reading: Scott's "Ivanhoe," Irving's "Sketch Book,"

Hawthorne's "House of Seven Gables," Lowell's "Vision of Sir Launfal," any three of Poe's tales.

Text-books: Merkle and Ferguson's "Composition-Rhetoric" (chapters on Correctness, Clearness, Paragraphs, The Whole Composition, and Letters); Blanton's "Composition and Punctuation."

English 4. English Literature. 1 unit.

This course consists of the History of English Literature from the Anglo-Saxon Period to the Classical Age (Long, Chapters I to IX). A study is made of the representative writers belonging to each period, including their biographies, their style, and their representative writings. Representative poems are read and discussed by the class, and as much memory work is done as time permits. A critical essay, based upon the reading, is required.

Supplementary reading: Gaskell's "Cranford," Shakespeare's "Merchant of Venice," Bunyan's "Pilgrim's Progress" (Part I), Macaulay's "Lays of Ancient Rome," "The Book of Ruth."

English 5. English Literature. 1 unit.

This course is a continuation of English 4, and includes the history of English Literature from the Classical Age to the Victorian Age (Long, Chapters IX to XI). As in English 4, a study is made of representative writers and their works. A critical essay, based upon the reading, is required.

Supplementary reading: Shakespeare's "Julius Cæsar," Pope's "Rape of the Lock," Dickens' "David Copperfield," Tennyson's "Princess," and Stevenson's "Treasure Island."

Text-book for English 4 and 5: Long's "English Literature."

English 6. American Literature. 1 unit.

This course consists of the history of American Literature from the Colonial Period to the present time. A study is made of the representative writers belonging to each period, including their biographies, their style, and their representative writings. Selected pieces of literature are read and discussed by the class, and as much memory work is done as time permits. One critical essay, based upon the reading, is required.

Supplementary reading: Cooper's "The Deerslayer," Henry Grady's "Essays," Southern Poets, Franklin's "Autobiography," and Page's "Red Rock."

Text-book: Halleck's "History of American Literature."

English 7. Advanced Grammar. 1 unit.

This course is planned to give special preparation to teachers of English grammar. It includes the following: A review of the classifications and constructions of the parts of speech, and of the analysis of all types of the simple sentence; a study, in detail, of all types of dependent clauses; analysis of very difficult compound and complex sen-

tences; a study, in detail, of the verbal, including all constructions of the infinitive, the participle, and the gerund; a study of disputed points in grammar, with reference to various authorities, assigned for reading; discussion of methods of teaching grammar.

Text-books: Kimball's "English Sentence" and Blanton's "Grammar Outlines."

English 8. Advanced Composition. 1 unit.

This course consists of a practical study of narration and description, including the principles of composition and forms of each. In connection with the composition writing, the following will receive careful attention: Construction of outlines in theme writing; sentence construction, including the principles of clearness, unity, coherence, and emphasis; a review of paragraph construction, including the principles and methods of development; and a review of correct grammatical usage as relates to nouns, pronouns, and adjectives. The review work includes capitalization and punctuation, including end-punctuation, and the uses of quotation marks, of the apostrophe, the hyphen and the comma. In addition, the course includes the study of versification, with practice in verse writing. Methods of teaching composition are discussed in connection with the various parts of the course. At least one composition per week is required. As supplementary reading the class is required to read certain classics, which are discussed in the classroom, and from which are taken some of the subjects for theme writing.

Supplementary reading: Three of the following: Dickens' "A Tale of Two Cities," Eliot's "Silas Marner," Blackmore's "Lorna Doone," Hale's "The Man Without a Country," and Warner's "A Hunting of the Deer and Other Essays."

English 9. Advanced Composition. 1 unit.

This course is a continuation of English 8. It consists principally of a practical study of exposition and argument, including the principles of composition and forms of each. In connection with the theme writing the class will study the following: Construction of outlines in theme writing; diction, including the proper meanings and uses of words frequently misused; figures of speech. In addition, a review will be given of letter writing, of correct grammatical usage as relates to verbs, adverbs, prepositions, and conjunctions, and of punctuation, including the uses of the semicolon, the colon, and the dash. Methods of teaching composition will be discussed in connection with the various parts of the course. At least one composition per week will be required.

Supplementary reading: Three of the following: De Quincy's "Joan of Arc," Carlyle's "Heroes and Hero Worshipers," Macaulay's "Essays on Lord Clive and Warren Hastings," Burke's "Speech on the Conciliation," and selections from Emerson's essays.

Text-books for English 8 and 9: Newcomer and Seward's "Rhetoric in Practice," Blanton's "Composition and Punctuation," and Woolley's "Handbook of Composition." Selected chapters of Carpenter, Bacon

and Scott's "The Teaching of English" will be used in English 7, 8, and 9.

English 10. Literary Masterpieces. 1 unit.

In this course a critical study is made of representative English poems belonging to the Elizabethan Age, the Puritan Period, the Classical Age, and the Romantic School. A critical essay is required, based upon the reading of the course, and as much memory work is done as time permits.

Supplementary reading: Goldsmith's "Vicar of Wakefield," Addison's "Sir Roger de Coverly Papers," Thackeray's "English Humorists," and Scott's "Kenilworth."

Text-books: Pancoast's "Introduction to English Literature" (used chiefly as a reference book), and Bronson's "English Poems."

English 11. Shakspeare. 1 unit.

In this course a brief study is made of the development of the English drama, including the Elizabethan theatre and the manner of presenting the plays. This is followed by a study of the Elizabethan Age and the life of Shakspeare. Two plays, which are selected each year by the teacher, are studied critically, and a critical essay is required in connection with the course.

Supplementary reading: Four of the following plays: "As You Like It," "Cymbeline," "The Tempest," "A Winter's Tale," "Comedy of Errors," "Midsummer Night's Dream," "Richard III."

Text-books: Pancoast's "English Literature"; any standard edition of Shakspeare's plays.

English 12. The Victorian Age. 1 unit.

In this course a study will be made, first, of the period, and then of the representative writers belonging to the period, including their biographies, their style, and selected writings. The authors studied will be Carlyle and Ruskin as representative essayists; Dickens, Thackeray, and George Eliot as representative novelists; and Tennyson and Browning as representative poets. Critical studies will be made in class of Carlyle's "Essay on Burns," Ruskin's "Sesame and Lilies," Tennyson's "Idylls of the King," and Browning's "Pippa Passes."

Text-books: Pancoast's "Introduction to English Literature" and Bronson's "English Poems."

DEPARTMENT OF GERMAN.

PROF. ANDERSON.

German 1. Beginner's German. 3 units.

Elementary German. Oral practice. Dictation. Reading easy prose. Memorizing German poems. All the work of the class is in German.

Text-book: Guerber's "Märchen und Erzählungen," vols. 1 and 2.

German 2. 3 units.

Conversation. Dictation. Memorizing classical selections from German literature. Grammar. Translation from German into English. Composition during last term. Daily themes and three papers.

Text-books: Vos' "Essentials of German"; Joynes and Wesselhoeft's "German Lesson Grammar."

German 3. 1 unit.

Study of German poetry, with special attention to historical development, form, and meter.

Text-books: Nollen's "German Poetry"; Klenze's "Deutsche Gedichte"; "Heine's Poems" (Eggert); Mueller's "Deutsche Gedichte."

German 4. 1 unit.

History of the German language. Papers on German authors and periods.

Text-book: Vietor's "Kleine Phonetik."

German 5. 1 unit.

History of German literature. Papers in German on authors and periods.

Text-book: Berhardt's "Deutsche Litteratur-Geschichte."

German 6. 1 unit.

German drama. Close study of Schiller's "William Tell." Rapid reading of several of Schiller's dramas.

German 7. 1 unit.

German drama. Close study of Goethe's "Faust." Rapid reading of several of Goethe's dramas.

German 8. The Teaching of German. 1 unit.

Basic principles of modern language instruction, with special reference to elementary high school courses. Lectures, discussions, papers.

DEPARTMENT OF HISTORY.

PROF. CRIDDLE, MISS MITCHELL, MISS WILSON.

History 1. Ancient History. 2 units.

It is the purpose of this course to give a general idea of the character and growth of the civilization of Greece and Rome. As a background for this there will be a brief introductory survey of the progress made by the Oriental peoples before the time of the Greeks. The historical

significance of the Greeks will then be brought out by a careful study of the growth among them of political liberty and intellectual and esthetic culture and the blending of the East and West through the achievements of Alexander.

The second term's work will be the history of the Roman people and will emphasize those facts and events, illustrating their character and Rome's development as a world power through conquest.

The failure of Rome, after combining the Latin West and the Greek East into a Græco-Roman Empire to resist the invasion of the Teutons and the establishment of their kingdoms within the limits of the Empire, will complete the story of the ancient world.

Text: Myers' "Ancient History"; Botsford's "Source-book of Ancient History."

History 2. Mediæval History. 1 unit.

This course will cover a period of about a thousand years from the downfall of the Roman Empire to the close of the fifteenth century.

Attention will first be directed to how, through the organizing force of the Christian Church and the Frankish Empire, Western Europe began gradually to recover from the disorders of the barbarian invasions and to fuse together the old and new elements which were to produce modern civilization. Then, after a study of the peculiar institutions which grew up to meet the needs of the time, the evolution of society as a result of the new intellectual, commercial, and political impulses stirring Europe from 1100 to 1500 will be traced.

There will be a constant use of source books for illustrative material.

Texts: Myers' "Mediæval and Modern History"; Ogg's "Source-book of Mediæval History."

History 3. Modern History. 2 units.

The first work of this course will be a consideration of the religious revolutions which swept over Europe in the sixteenth century, and the political consequences of the resulting division of Christendom.

The age of absolute monarchy will be studied as a prelude to that great democratic revolution which, starting in France and spreading over Europe, brought some measure of political and social emancipation to the people of every nation of the continent.

The work of the text-book will be supplemented by references to source material and larger histories.

Text: Myers' "Mediæval and Modern History."

History 4. English History. 1 unit.

It is the aim of this course to deal with the different phases of English history to the end of the reign of the Tudors. Special attention will be given to the development of parliament and to the relationship of church and state.

Text: Andrews' "History of England"; Lee's "Source Book of English History."

History 5. English History. 1 unit.

This course is the history of England from the Stuart kings to the present time. Emphasis will be given to the struggle between King and Parliament, to the colonial and commercial expansion of the eighteenth century and to the growing democracy of the nineteenth century.

Text: Andrew's "History of England"; Lee's "Source Book of English History."

History 6. Industrial History of the United States. 1 unit.

In this course a rapid survey will be made of those topics which have a bearing upon the social, economic, and industrial progress of the United States.

Text: Coman's "Industrial History of the United States."

History 7. American History. 2 units.

1. The early national period of American history. The object of this course is to show how, out of the scattered, inharmonious colonies occupying the country in 1750, the American Nation was formed.

2. American history since 1829. This course begins with the period of critical change ushered in by the election of Andrew Jackson to the Presidency and traces the expansion of the nation, the growth of sectionalism, the Civil War, reconstruction, and the development of the new Union. A definite amount of assigned reading will be required and also reports on special topics.

Texts: Hart's "Formation of the Union"; Wilson's "Division and Reunion"; MacDonald's "Documentary Source Book of American History."

History 8. European History of the Nineteenth Century. 1 unit.

It is the object of this course to give an insight into present-day political, industrial, and intellectual interests of Europe. There will be a careful study of the revolutionary changes effected in France during the nineteenth century, of the rise in Russia as a world power, of Prussia's assumption of leadership in German affairs, of the formation of the German Empire, and of the unification of Italy. Stress will also be laid on the industrial revolution and its effects on the life of the masses.

Reports based on extensive library work will be required of all students taking this course.

Text: Robinson and Beard's "Development of Modern Europe," Vol. II; "Readings in Modern European History," Vol. II.

DEPARTMENT OF HOME ECONOMICS.

MISS SHAEFER, MISS RATHBONE.

Home Economics 1. Food Products and Textiles. 1 unit.

The source, composition, cost, as well as the preparation, of the various staple foods from the raw state to the finished product in the marketable form will be treated in the first part of the course. In the second part the study of the production and manufacture of linen, silk, cotton, and wool, and the manufacturing conditions which affect the hygienic, economic, and esthetic value of materials.

Home Economics 2. Garment Making. 1 unit.

Making of all fundamental stitches, drafting, and the use of the pattern, hand and machine sewing applied to construction and repair of simple garments, and the attachments of the sewing machine.

Home Economics 3. Principles of Cookery. 1 unit.

The aim of this course is to teach the elementary principles of cookery; the effect of heat on type foods, proper methods of combining foods and the changes which take place. Skill in handling apparatus and materials will be emphasized.

Home Economics 4. Food Preparation. 1 unit.

This course gives the opportunity for practice in home cookery. It will include the planning, cooking, and serving of meals. Care of food in the home, marketing and cost of materials will be emphasized. Some experimental cooking will also be given.

Home Economics 5. Laundry and Millinery. 1 unit.

The first half of this course is devoted to laundry. The processes of laundering; sorting, soaking, removal of stains; methods of handling cotton, linen, wool, and silk; rinsing, bluing, starching, and ironing; care of fine work, laces and embroidery; precautions with colored materials; care and cost of equipment.

The last half of this course gives instruction in designing and drafting patterns for hats, constructing and covering frames, making and placing trimming.

Home Economics 6. Dressmaking. 1 unit.

Shirtwaists and skirts and simple dresses are made in this course. The use of the drafted pattern, cutting and fitting are included.

Home Economics 7. The House. 1 unit.

The location, structure, furnishings, and decorations of the house are considered here as well as the care, cleaning, and management of the

house. The principles of physics as applied to the house will be given in the last part of this course.

Home Economics 8. Dietetics. 1 unit.

This course deals with the chemistry and physiology of digestion; the nutritive functions of proteins, fats and carbohydrates; dietary standards and their application to practical problems. Dietaries for families of different incomes, and for infants and children will be given.

Text: Sherman's "Chemistry of Food and Nutrition."

Home Economics 9. Methods in Home Economics. 1 unit.

This course deals with the organization of the course of study in Home Economics in the different grades of the elementary and secondary schools; selection of topics and their adaptation to the different grades; the method of the recitation, equipment and illustrative materials.

DEPARTMENT OF LATIN.

PROF. McDONALD.

Latin 1. First Year Latin. 3 units.

First term: First thirty lessons.

Second term: Lessons 31 to 60.

Third term: Book completed and reviewed.

Text-book: Gunnison and Harley.

Latin 2. Caesar. 3 units.

Caesar's Gallic War, 5 books.

Text-book: Gunnison and Harley.

Latin 3. Cicero. 1 unit.

Cicero, three orations against Catiline. Composition based on text read. Grammar used for reference. Study of Roman government.

Text-book: Gunnison and Harley.

Latin 4. Cicero. 1 unit.

Cicero, oration on the Manilian Law and on citizenship of Archias. Selections from other works of Cicero for sight reading. Roman life and customs.

Latin 5. Vergil. 1 unit.

Vergil's Aeneid, Books I and II. Prosody; Roman and Grecian mythology.

Latin 6. Vergil. 1 unit.

Vergil's Aeneid, Books IV, V, VI.

Latin 7. Livy. 1 unit.

Books XXI and XXII.

Latin 8. Horace. 1 unit.

DEPARTMENT OF MANUAL TRAINING.

PROF. VITZ.

The course in Manual Training is designed to provide thorough instruction in the various phases of the subject for those preparing to teach and supervise Manual Training in the public schools of the State.

Provision is made for students enrolling in the Agriculture and Science courses to take a short course in Manual Training, substituting not more than three units in Manual Training for other work in the course elected. Such substitutions must have the approval and permission of the President.

The new fireproof Manual Arts building, now in course of construction, will, when equipped, as planned, enable the school to meet all reasonable demands for preparing teachers of Manual Training and Home Economics for the high schools of Texas.

Manual Training 1. Mechanical Drawing. 1 unit.

The work in this course includes the following: Lettering, Straight and Curve Line Shop Problems, Planes of Projection, Revolution of Solids, Development of Surfaces, Intersections, Working Drawings of the exercises to be made in the shop the following term. Tests on practical problems covering the work.

Text: Bennett's "Problems in Mechanics."

Manual Training 2. Bench Work and Wood Turning. 2 units.

Bench Work: Analysis of tool processes, the construction of simple models adapted to seventh and eighth grade work. Their purpose is to teach planing, gauging, scoring, sawing, chiseling, boring, etc. Nailing, screwing, and lapjointing will be the method of fastening. Construction of principal joints, the application of each joint in medium sized pieces of furniture. Lectures will be given on sharpening, glues, sanding, scraping, staining, filling, finishing, etc.

Wood Turning: Exercises teaching all the cuts in spindle turning, face plate work, chuck work and mandrel turning. Attention will be given to the correct handling of tools, accuracy, speed, etc.

Texts: Moore's "Manual Training Toys"; Noyes' "Handwork in Wood"; Crawshaw's "Problems in Wood Turning."

Manual Training 3. Machine Drafting. 1 unit.

Lettering, elements of machine drafting consisting of: Study of Practical Drafting Room Practice, Types of Screw Threads, Proportions of Standard Bolts and Nuts, Types of Fastenings, Drawing of Machine Parts from Life. Machine parts using Standardized Proportions.

All drawings will be made on detail paper, traced on imperial cloth. Each student must learn to make good blue prints, using his own tracings.

Text: Jameson's "Elements of Mechanical Drawing."

Manual Training 4. Pattern Making. 1 unit.

This course will consist of Bench Work and Turned Patterns. The principal types of patterns will be studied and made. Students will make their own calculations for draft, shrinkage, rap, etc. Lectures will be given covering the work, these being accompanied by demonstrations in moulding.

Text: Purfield's "Wood Pattern Making."

Manual Training 5. Vocational Wood Work. 1 unit.

In this course the attempt is made to adhere as closely as possible to factory methods as used in the industries. The factory method of piece-work is followed. The student is given sufficient time in which to become proficient in one type of work, after which the work is changed. To insure a large variety of work several jobs are worked upon at a time. Before starting upon a new machine, the student must pass an examination covering its construction, its operation and method of setting up for different kinds of work. Cost cards are used to keep accurate data as to cost of materials, time, power, etc. An attempt will be made to consider "overhead" expenses.

Manual Training 6. Advanced Machine Drafting. 1 unit.

This course includes the study of gears, cams, parallel motions, etc., assembly and detail drawings of some large machines. If time permits isometric and cavalier projections are studied.

Text: Mathewson's "Notes for Mechanical Drawing."

Manual Training 7. Architectural Drafting. 1 unit.

This course consists of architectural lettering, study of types of buildings and roofs, study and drawing in detail of frame construction, individual planning of bungalow, isometric and cavalier projection.

Manual Training 8. Foundry Work. 1 unit.

Students mold their own patterns made in the pattern shop. Suitable time is given to the molding of larger and more complex patterns. Castings are run once a week throughout the course. Different sets of students have charge of cupola each week. Lectures cover: Sands, making and baking of cores, principal metals, iron ore, melting, points, etc.

Manual Training 9. Method of Manual Training. 1 unit.

Historical review of the theories and practices of educational reformers, such as Pestalozzi, Froebel, and others. A review of the work that has been done in this country, work that is now being done; study of present indications as to the probable future status of manual training in its relation with vocational training and the work of the trade schools.

The laws on the subject in this State as well as those of the most important States in the United States.

Method of teaching, planning of courses of study for manual training in grades and high schools, study of equipments, proper installation of power machinery and their relative location for greatest efficiency, etc.

The work will be covered by text, lectures, lantern slides, and theses by the students.

Text: Rowe's "The Meaning of Manual Arts and Industries."

DEPARTMENT OF MATHEMATICS.

PROF. BUTLER, PROF. PETERS, PROF. SMITH, PROF. DOWNER.

Mathematics 1. Elementary Algebra. 2 units.

Wentworth's New School Algebra during first two terms. A rapid review of factoring, multiples, fractions and linear systems. A thorough study of roots, radicals, exponents, quadratic equations and systems solvable by quadratic methods.

Mathematics 2. Plane Geometry. 1 unit.

Careful attention to the plan of presenting the subject to beginners. Drill and tests in the fundamental concepts of geometry. The use of the ruler and compass. Original exercises and problems. Wentworth and Smith's Plane Geometry, Book I.

Mathematics 3. Plane Geometry. 2 units.

Books II, III, IV, V of Wentworth and Smith's Plane Geometry during the first two terms.

Mathematics 4. Algebra. 1 unit.

Hawkes-Luby-Touton's Second Book in Algebra during third term. Short review of radicals, exponents, and quadratic equations. Followed by a thorough study of progressions, logarithms, ratio, proportion, variation, imaginary quantities, theory of quadratic equations, and the Binomial Theorem.

Mathematics 5. Higher Arithmetic. 1 unit.

Smith's Advanced Arithmetic during first term. A general review of arithmetic presented from the teacher's point of view.

Mathematics 6. Trigonometry. 1 unit.

This course is a close study of the triangle, trigonometrical functions, formulas, their derivation, etc., solutions of problems and the practical application of the subject.

Wentworth's Plane Trigonometry.

Mathematics 7. Solid Geometry. 2 units.

Wentworth and Smith's.

Mathematics 8. Surveying. 2 units.

Text-book: Barton's Surveying.

The use of the compass. The use of tables, calculation of areas, platting, interpretation of field notes, practical field work.

Mathematics 9. Shop Mathematics. 1 unit.

This course is designed to correlate Manual Training and Mathematics. The work is given as presented in Breckenridge, Mersereau and Moore's "Shop Mathematics."

Mathematics 10. Analytics. 2 units.

Careful presentation of the work as presented in Smith and Gale's "Introduction to Analytic Geometry."

Mathematics 11. The Teaching of Mathematics. 1 unit.

A professional course for teachers of mathematics.

Text: Young's "Teaching of Mathematics."

In all the work in Mathematics three ends will be kept constantly in view:

First. To prepare teachers of the subject.

Second. To secure mental discipline and culture.

Third. To make mathematics a ready and useful instrument.

DEPARTMENT OF MUSIC.

PROF. SNOW.

PRIMARY AND ART COURSE (FOR MUSIC TEACHERS AND SUPERVISORS).

FIRST YEAR.

Music 1. 1 unit.

Sight reading and ear training. Scale relation method.

New Normal Music Course, Book I.

SECOND YEAR.

Music 2. 2 units.

More advanced work.

Book II.

THIRD YEAR.

Music 3. 3 units.

Sight reading and ear training. Interval method.
Books II and III.

FOURTH YEAR.

Music 4. 1 unit.

A short course in Harmony.

Music 5. 1 unit.

A short course in Theory.

Music 6. 1 unit.

Public School Methods.

Throughout the course much time will be devoted to chorus work.

OTHER COURSES.

Music 7. 1 unit.

Sight reading and chorus singing. Book II.

Music 8. 1 unit.

Same as Music 7, but more advanced. Book II.

In all other courses than the Primary and Art no attempt will be made to train students especially for music teachers and supervisors, but there will be thorough work in sight reading and chorus singing, such as will prepare students for the work usually expected of grade teachers.

DEPARTMENT OF PHYSICAL EDUCATION.

MISS PRICE.

The course in Physical Education aims to maintain and promote the health of the students and to furnish them with the principles underlying this training; to give them practical knowledge of a system of educational gymnastics, and to adapt their work to the varying conditions with which they may meet.

Systematic instruction is given concerning the means for keeping the body in health, for maintaining normal, progressive growth and development, for securing grace in posture, carriage, and action, and for developing a disposition to enter, with pleasure and profit, the various recreations so necessary in any phase of a successful life.

Free and unrestricted action of the body is essential to good mental and physical development. Accordingly, our young ladies are urged to wear hygienic clothing at all times. In the gymnasium, all students are expected to wear their gymnasiums suits.

Physical Education 1. 1 unit.

Instruction and practice in fundamental activities, such as breathing, sitting, standing, walking, running. Personal hygiene.

Graded physical culture, relaxing exercises, rhythmic movements, marching.

Physical Education 2. 1 unit.

Fundamental Swedish gymnastics. Simple apparatus work, such as exercises upon stall bars, ladders, ropes.

Drill in leading squads and criticisms upon the observation of this drill. Rhythmic work and fancy steps. Use of clubs, wands, balls, etc.

Outdoor athletics; field and track work, tennis, baseball, basket ball, and volley ball.

Physical Education 3. 1 unit.

Advanced Swedish gymnastics. Theory of physical training with practical applications. Methods of teaching children. Games and folk dances for first five grades.

Outdoor athletics.

Physical Education 4. 1 unit.

Exercises with and without hand apparatus. Games for upper grades. Play—its place in education.

Coaching basket ball and other games. Fencing.

Lectures and reference work on the History of Teaching of Physical Culture.

Text: "Medical Gymnastics," Posse.

DEPARTMENT OF READING.

MISS PRICE.

Reading 1. 1 unit.

Instruction in correct breathing. Voice culture, reading from memory and story telling.

Text: Emerson's "Evolution of Expression," vols. 1 and 2.

Reading 2. 1 unit.

The work of Reading 1 continued. Instruction in methods of teaching primary reading. Story telling. The use and place of phonics.

Texts: Briggs and Coffman's "How to Teach Reading in the Public Schools"; Emerson's "Evolution of Expression," vol. 3.

Reading 3. 1 unit.

Continuation of Reading 2. Extemporaneous speaking and dramatic reading. Instruction in the art of debating.

Texts: Briggs and Coffman's "How to Teach Reading in the Public Schools"; King's "Practice of Speech."

Reading 4. 1 unit.

Dramatic reading in Shakspearean plays. Extemporaneous speaking. Reading from memory and story telling.

DEPARTMENT OF SCIENCE.

PROF. BORDEN, PROF. MASTERS, PROF. PENDER, PROF. LEGETT.

Science 1. Physical Geography. 1 unit.

1. The study of the form of the earth and its relation to other members of the solar system. 2. The atmosphere; its temperature, pressure, and movements, weather changes, and climate. 3. The ocean; its activities and coastline. 4. The land; origin and development of its various forms. 5. Effect of man's environment upon his distribution, his habits, and his occupation.

Text-book: Tarr's "New Physical Geography."

Science 2. Physiology. 1 unit.

The State adopted text is made the basis of the work. Especial emphasis to the laws of health and sanitation. The course is planned to meet as far as possible the needs of every-day life, with full discussion of the physiological and hygienic problems of the day.

Text-book: Ritchie's "Human Physiology."

Science 3. Botany. 1 unit.

This is a course in the physiology of plants and the phenomena of plant growth. In the laboratory the student will study the individual cell and proceed from that to a study of the plant as a whole. In the field work methods of using plants in Nature Study is emphasized.

Text-book: Bergen's "Essentials of Botany," Chaps. I to XXII.

Science 4. Botany. 1 unit.

In this course enough time will be devoted to the morphology of the flowering plants to make pollination and fertilization intelligible to the pupil, but the major portion of the time will be given to a study of plant members, seeds and fruits. As soon as living plants are available in the spring, all of the laboratory work will be given to the collection and classification of plants. The pupil will become familiar with the principal families and gain a thorough working knowledge of the key to the groups and families of plants.

Text-book: Bergen's "Essentials of Botany," Chap. XXVIII to end of book.

Science 5. Physics. 1 unit.

Elementary Physics: Properties of Matter; Molecular Motion and Forces; Mechanics of Fluids and Solids; Motion; Mechanical Work and Energy.

Lectures and demonstrations three hours per week; laboratory two hours per week.

Science 6. Physics. 1 unit.

Magnetism and Electricity.

Lectures and demonstrations, three hours per week; laboratory, two hours per week.

Science 7. Physics. 1 unit.

Heat, Sound, and Light.

Lectures and demonstrations, three hours per week; laboratory, two hours per week.

Text-book for Science 5, 6, and 7: Black and Davis' "Practical Physics."

Science 8. Chemistry. 1 unit.

Oxygen, Hydrogen, and Nitrogen, together with some of their compounds, will be studied. The laws of Boyle and Charles, the atomic theory and the theory of electrolytic dissociation, solutions, chemical equations, valence, reversible reactions, chemical equilibrium, acids, bases, and salts will be considered.

The time will be about equally divided between the laboratory and the recitation.

Science 9. Chemistry. 1 unit.

The Chlorine family, the Phosphorus family, Sulphur, Carbon, Silicon, Boron and some of their compounds will be studied, and some of the rare non-metallic elements will receive brief attention. The Periodic law, molecular and atomic weights and the chemistry of the flame will be included in this course.

Science 10. Chemistry. 1 unit.

In this will be included the study of the metallic elements, their more important compounds and the methods of reducing their ores, and in addition some time will be given to simple organic compounds.

Text-book for Science 8, 9, and 10: McPherson and Henderson's "Course in General Chemistry."

Science 11. Botany. 1 unit.

This is a course in the physiology of plants. Emphasis placed on the theories that explain the phenomena of growth as growth and plant action, itself. About two weeks' work is devoted to the methods

of identifying plants of economic importance. A well equipped laboratory enables the students to observe the conditions and effects of germination, respiration, photosynthesis, tropism, etc.

Text-book: Bergen and Davis' "Principles of Botany," Part I.

Science 12. Botany. 1 unit.

In this course the general morphology of plants is studied, showing the development of plant members and the development of the differentiation of plant sex. The compound microscope is freely used by individual students. Freehand drawings of all microscopic work is required, together with notes on all laboratory work. Three recitations and two laboratory periods.

Text-book: Bergen and Davis' "Principles of Botany," Part II.

Science 13. Agricultural Chemistry. 1 unit.

This is a course in Agricultural Chemistry and will consist of the study of foods and fertilizers and soil analysis.

Text-book: Addyman's "Agricultural Analysis."

Science 14. Household Chemistry. 1 unit.

The chemical composition of the type foods; the chemistry of digestion and assimilation of these foods; the chemistry of fuels and the simple tests for textile fibers are here given.

Science 15. Industrial Physics. 1 unit.

Study of gas engines, electric generators and motors, electric lighting and wiring; storage batteries; switchboards and power installation.

Science 16. Growth and Structure of Timber. 1 unit.

This course will consist of the treatment of the kinds and distributions of forests, kinds of timbers, structure and adaptability. Properties, such as shrinkage, warping, durability, etc., will receive principal attention. Brief consideration will be given to seasoning by different methods, treatment of woods, logging and milling, and the preservation of forests.

The work will be covered by text, lectures, lantern slides, and papers prepared by the student.

Science 17. Advanced Physics. 1 unit.

Mechanics, including vector analysis. Force and torque, energy transformations, moment of inertia, machines, power, and the kinetic energy of rotating masses. Heat, including calorimetry, kinetic theory of gases, and thermodynamics.

Science 18. Advanced Physics. 1 unit.

Electricity and magnetism, including electrostatics, electro-magnetism, electrical measuring instruments, electro-magnetic waves, and alternating generators.

Science 19. Advanced Physics. 1 unit.

Sound and light, in which optical instruments, dispersion, color phenomena, and polarization of light will receive special emphasis.

Text-book for Science 17, 18, and 19: "A Text-book in Physics," Spinney.

Science 20. Advanced Chemistry. 1 unit.

This is a course in qualitative analysis and consists of two periods per week laboratory work on the metallic groups, I, II, and III, and three recitations per week, in which are studied those groups together with osmotic pressure and the theories of solution, ionization and chemical equilibrium.

Science 21. Advanced Chemistry. 1 unit.

This course is a continuation of Science 20 and the same time is given to the recitation and to the laboratory work as in that course. Metallic Groups IV and V are studied and systematic analysis of all common metallic ions are practiced. The hydrolysis of salts and the theory of complex ions are discussed in the class.

Science 22. Advanced Chemistry. 1 unit.

In this course the same time is devoted to class room and laboratory as in each of the last two courses. Oxidation and reduction are discussed and acids and salts are systematically analyzed.

Text-book for Science 20, 21, and 22: "The Elements of Qualitative Chemical Analysis," Vol. I, Julius Stieglitz.

Science 23. Bacteriology. 1 unit.

The nature and conditions affecting the growth of bacteria, yeasts, and molds. The application of these facts to household sanitation.

TEXT-BOOKS.

AGRICULTURE.

Elements of Agriculture, Ferguson and Davis.

Outlines of Zoology, Linville and Kelley.

Insects, Chittenden.

Agriculture, Warren.

CIVICS.

Civics: Texas and Federal, Triplett and Hauslein.

PHYSICAL TRAINING AND ATHLETICS.

It is the duty of every school to provide opportunity for physical as well as for mental and moral development. The full education of the individual requires careful attention to the physical side. The course in physical education and the inter-class and inter-school contests in athletic sports are aimed to increase the capacity of the student for mental effort and to cultivate and interest in physical development.

A knowledge of athletics and school games and the ability to direct these properly are valuable acquisitions for the teacher.

The school has recently acquired about seven acres of land and prepared it for base ball, basket ball, tennis, volley ball, and other games. The athletic interests are safeguarded by a Committee of the Faculty and an Association of the students, who keep the interest healthy, but sane and intelligent. Students are permitted to participate in inter-school contests only on condition that satisfactory work is done in their studies.

LITERARY SOCIETIES.

The students maintain during the regular session four literary societies, the R. E. Lee and the Reagan Societies for young men and The Current Literature Club and the Shakspeare Club for young women. These societies have large attractive rooms in the Library building and the work done by their members is a valuable supplementation to that of the classroom.

During the summer session the young men do similar work in the Henry Grady Literary Society.

MUSICAL ORGANIZATIONS.

The school maintains a Band of twenty to thirty pieces each year, in which expert instruction is had without cost. An orchestra of several pieces is also organized each session. The Glee Club for young men and the Treble Clef Club for young women are large special classes in vocal music. All these organizations not only serve to break the monotony of every-day work, but in each of them valuable instruction is given and useful experience acquired.

THE LYCEUM COURSE.

The fact that preparation for complete living and good citizenship involves development and training of the social and esthetic nature, as well as the intellectual, is fully recognized in this college.

As a potent factor in this direction the Normal has always maintained a strong course of lectures and entertainments, each year securing the

best available talent. Men and women of national reputation, famous as leaders in public life, noted artists, musicians, and writers have been secured, who have contributed much to the student's realization of the college purpose of helpfulness and spiritual uplift.

Prominent among those who have appeared before the students of the Normal are: Dr. Newell D. Hillis, Ex-Governor Joseph W. Folk, Hon. Champ Clark, Senator Frank J. Cannon, Senator T. P. Gore, Ben B. Lindsey, Frank Dixon, Lincoln McConnell, Chicago Symphony Orchestra, Oscar Seagle, Madam Yaw, Madam Maud Powell, Ben Greet Players, Victor's Venetian Band, Chicago Glee Club.

For the season 1914-15 the following list of famous lecturers and musicians will be presented: Schuman Quintette, Everlyn Seatny, Cathedral Choir, Lyric Glee Club, Lon Beauchamp, Frank Dixon, Ross Crane, Senator Robert La Follette.

STUDENT PUBLICATIONS.

The students of the school, through the various class organizations and societies, publish a monthly magazine, "The Normal Journal," the columns of which afford a fine opportunity for training in the different styles of composition and theme writing.

The year book, called "The Yucca," is issued in May of each year. It has become a distinct feature of the school. It is not only a valuable souvenir of school days for all students, but it presents an excellent opportunity for practice in composition, invention, and decorative art.

THE TEACHERS' RECOMMENDATION COMMITTEE.

A committee of the faculty, without fee or compensation of any kind, acts as a Teachers' Bureau for the purpose of aiding worthy students in finding employment upon leaving school and assisting school boards in finding competent teachers. This committee places every year several hundred teachers. Its services to school boards have proved satisfactory and it receives applications from school officials every week in the year.

Any communication concerning the work addressed to the President or the Secretary of the school or to the Chairman of the Committee on Recommendations will receive prompt attention.

DISCIPLINE.

Those entering a Normal School are expected to be of sufficient maturity and to have come with a purpose so serious and definite that espionage is unnecessary. By far the greater number of students who come here are eager, earnest, and industrious young men and women, who cheerfully comply with all regulations. But experience has dem-

onstrated the necessity of having well defined regulations concerning the conduct at school and at the boarding places, for the guidance of those whose inclination or whose judgment renders proper direction necessary.

Upon matriculation the student is given a printed copy of the regulations concerning the conduct of students and he is requested not to register if unwilling to conform to the requirements. Whenever a student wilfully violates the regulations, ignores the efforts of the faculty to assist him in his character building, manifests a spirit of insubordination to authority, or shows himself out of harmony with the school and its ideals, he is advised that he is not in the right school and is requested to withdraw.

Continuance in school depends upon punctual class attendance and obedience to regulations. Students who must continually be admonished, restrained, reprimanded, or denied the usual privileges, are undesirable and they will not be retained in the school.

The purpose of the school is to train teachers for the public schools of Texas, and it should not inflict upon the children of the State as teachers those whose character, habits of thought, or low ideals unfit them for directors and exemplars of the young.

To all those who are seeking opportunity to work under wholesome influences, favorable conditions, competent and sympathetic direction, is extended a hearty welcome. Those who are merely seeking diversion, change of environment, or increased social advantages, and those incapable or unwilling to lead the life of a student are advised—urged—to go elsewhere.

TERM REPORTS.

At the end of each term of twelve weeks a report of the work of the student for that term will be sent the parent or guardian.

BOARDING PLACES AND RATES.

The school has no dormitory. In proximity to the school there are between one hundred and fifty and two hundred good boarding and rooming houses. Every year the number of boarding houses is increased and the conveniences improved. Nearly all these houses have electric lights, sewerage, hot and cold water appliances, and are screened, while many have natural gas for cooking, heating, and lighting.

Students are permitted to select from an *approved* list their own boarding places. Frequent changes for trivial causes are discouraged and students, after the first ten days, may change their places of residence only with the consent of Prof. W. D. Butler of the faculty, who has charge of all matters pertaining to board.

Men and women students must have separate boarding and separate rooming houses.

A list of *approved* houses is furnished each student upon arrival at the school. No student is permitted to engage board at a house not on this list. Such list can not be furnished the student in advance of arrival, because (1) frequent changes and additions made in houses near the beginning of the session render it impracticable to make a complete list. (2) Such list would convey no useful information to one unacquainted with the topography of the town, and (3) it is not necessary for students to engage board in advance, there being always ample accommodations regardless of the number of students. Reports have at times become current that all boarding places have been filled before the beginning of the session or very soon thereafter. No student has, in the history of the school, been forced to leave for lack of board, and such report in future, if heard, should be promptly discredited.

Board and rooms can not always be secured in the same house. More than half the students secure rooms at one place and meals at another. Because numerous houses make special provision for furnishing meals to large numbers, frequently more satisfactory conditions can be found by not insisting on having meals and rooms at the same place.

Approved Houses.—An approved boarding house is one that cooperates with the school, enforces the regulations concerning the conduct of students, exerts a good influence over the students, treats them kindly, but firmly, and affords good board with sanitary conditions.

Whenever it is found that the proprietor of a boarding house does not meet the requirements of an "approved house," fails or refuses to enforce the regulations and to report violations, the students are removed from such house.

All persons desiring to take Normal students as boarders must apply to the school in writing, stating the number of boarders desired, whether men or women, stating whether they offer rooms or meals, or both, giving rates in each case, and specifying the conveniences offered.

If upon application a boarding house is approved, it is placed on the approved list and the proprietor is furnished a printed copy of the regulations of the school.

Rates.—Rates of board (including rooms, meals, fuel, light, and bathing facilities) vary from fifteen to eighteen dollars per calendar month, owing to proximity to the school, and conveniences offered. A few houses charge somewhat more than the rates above quoted, but there are ample facilities at these rates.

Upon reaching Denton students should report at once to the office of the school where a list of boarding houses will be furnished and their locations ascertained. No attention should be given those who advise the student to engage board before coming to the office.

Electric cars run from the railroad station to the Normal College.

THE SUMMER SESSION.

The summer session of the North Texas State Normal begins about June 1st and closes about August 1st of each year. Two distinct schools

are maintained, the "Summer School" and the "Summer Normal." Students of the different schools are taught in separate classes and do different classes of work. Students of the Summer School are applying for "credit" towards certificates or diplomas of the institution. Students of the Summer Normal review the subjects for examination for certificates issued by the State Superintendent of Public Instruction.

The general purpose of the summer session is to meet the demands and to reach the students that can not be met during the regular session. There are in all sections of the State many teachers who, despite limited preparation, are doing good work in the cause of education. These teachers, barred by circumstances often from the advantages of college or normal schools, desire to broaden their scholarship, and increase their efficiency in school work. It is to this class that the summer session appeals. To these are offered the advantages of a large and competent faculty of specialists, the library, laboratories, apparatus, and equipments of the Normal College.

The Summer School Section.—The student registering in the summer school section does "credit work" towards a certificate or diploma of the school. The work of a summer term corresponds practically to that of a term of the regular session. The first summer the student attends he takes the work as outlined for the first term of the regular session in the course he elects, and similarly for each subsequent term.

The work of the Senior (fourth year), the Junior (third year), and the Sophomore (second year), in all seven courses is planned regularly as in the regular session. The work of the Freshman (first year) class may be taken with the summer normal section and in classes organized for "conditioned" students so as to prepare for entrance to the Sophomore class.

At the close of the summer session examinations are given for entrance to all the classes of the regular session.

The Summer Normal Section.—For those who register in the Summer Normal section is offered a review of subjects required for the different grades of State certificates. The work of this section is conducted in compliance with the directions of the State Superintendent of Public Instruction, and the summer normal examinations for certificates conducted at such times as he designates.

The advantages offered teachers during the summer have been realized and appreciated, as evidenced by the increased attendance from year to year. The summer session of last season (1913) enrolled 957 students.

DIRECTIONS TO STUDENTS APPLYING FOR ADMISSION.

Students should note the requirements for entrance, and understand that the school has no authority to admit them without implicit compliance with the directions of the Board of Regents. Students should not write asking that in their cases these requirements be not enforced on account of their age, experience, or other reason, for no such request can receive consideration.

Students should remember that the requirements for entrance and for certificates are the same in all the Texas State Normal Schools.

Credentials, certificates of promotion, etc., upon which entrance examinations are sought to be absolved must be documents signed officially by the proper authority.

Credentials, statements, certificates of promotion, to receive consideration must be from—

(a) High schools affiliated with colleges or universities previously named.

(b) High schools approved by the State Department of Education. Students desiring to enter on examination, on certificate, diploma or promotion card from accredited high schools should report at the beginning of the session, and avoid trouble and delay in classification.

Credits are given only for full terms' work. Students entering late in the term find difficulty in being classified promptly and making up the work already done by the class.

A term is twelve weeks.

Students should not request exemptions not mentioned in the bulletin, as the school is without authority to grant such requests.

Diplomas, promotion cards, statements, etc., from schools not duly accredited should not be urged as exemptions from examination. This school has no authority to affiliate, accredit or approve schools of any kind.

The certificates granted by a State Normal School should not be confused with certificates obtained from Summer Normal Institutes and county boards of examination.

Certificates granted by State Normal Schools may be built upon for higher certificates, but the Normal Schools do not grant certificates to applicants by simply "taking the additional subjects" for higher certificates.

CITY OF DENTON.

Denton is a city of churches, schools, and beautiful homes.

It is on the Texas & Pacific and the Missouri, Kansas & Texas railroads, thirty-five miles from Fort Worth and thirty-seven miles from Dallas and accessible from all sections of the State.

Denton has an efficient system of public schools, three ward schools and a high school building. Two State educational institutions are located here.

Denton has a population of more than six thousand. It has free mail delivery, two telephone exchanges, and a system of electric street cars. The city owns and maintains an electric light and power plant, water works, and sewer system. It has natural gas for light and fuel. So Denton, with its railroads, telegraph and telephone connections, street cars, ice manufactory, fire department, water works, local telephones, sewerage and natural gas, lacks none of the public utilities enjoyed by much larger cities.

CALENDAR FOR 1915-16.

Entrance examinations and classification upon credentials Monday, Tuesday, and Wednesday, September 13, 14, and 15, 1915.

Formation of classes and beginning of recitations, Thursday, September 16, 1915.

Students coming for the first time should reach Denton on or before Saturday, September 11, and arrange for boarding places, in order to be ready for examination or classification on Monday, September 13.

Former students, whose classification is already determined, need not report before Wednesday, September 15.

It is important that students come at the times above specified and thus avoid delay in classification.

TERMS OF SESSION 1915-16.

The first term will begin September 13, 1915.

The second term will begin December 8, 1915.

The third term will begin March 2, 1916.

Session 1915-16 will close Tuesday, May 24, 1916.

Graduate North Texas State Normal College. Teacher in public schools, Childress, Texas.

L. P. FLOYD, *Principal of Training School*.

Graduate North Texas State Normal College. Teacher of Science in Denton High School, 1913-14, 1914-15. Present position since September, 1914.

W. E. JAMES, *Teacher in Training School.*

Graduate North Texas State Normal College. Teacher three years in public schools of Van Zandt county, Texas. Present position since September, 1914.

MISS WILLIE M. FLOYD, *Teacher in Training School.*

Graduate high school, Ardmore, Oklahoma. Student summer session Polytechnic College, 1907; summer session University of Texas, 1909; North Texas State Normal College, 1911. Teacher in public schools, Ardmore, Oklahoma, 1906-07; Tarrant county, Texas, 1907-08; Baird, Texas, 1909-10; Abilene, 1910-13. Present position since January, 1914.

MISS LETA BROOKS, *Teacher in Training School.*

Graduate North Texas State Normal College. Teacher in rural schools, two years; teacher at Valley Mills, two years; teacher in Fort Worth public schools, five years. Present position since January, 1914.

MISS EULA GOSE, *Teacher in Training School.*

Graduate North Texas State Normal College; teacher in public schools, Caldwell, Texas. Present position since January, 1915.

MRS. CORA M. MARTIN, *Teacher in Training School.*

Graduate North Texas State Normal College. Teacher in public schools, Munday and Wellington, Texas, five years; in Fort Worth public schools, 1910; in Paducah, 1911-13. Present position since January, 1914.

NORTH TEXAS STATE NORMAL COLLEGE.

THE PURPOSE OF THE INSTITUTION.

Wherever a system of education is maintained, inefficiency of the teaching force is expensive from a strictly financial viewpoint. Inefficiency is always extravagant and wasteful. State normal schools have been the natural outgrowth of the policy of public education.

The purpose of a normal school is to educate teachers, to increase the skill and efficiency of this class of public servants. By properly training those to whom the education of the children of the public schools is to be entrusted not only is the investment of the public school fund made more profitable, but the business of teaching is made more professional and respectable in all its aspects, retaining in its ranks for a longer time a greater number of the intellectually strong and capable. The unskilled and untrained seldom love their vocation; they lack enthusiasm and inspiration; they fail to acquire power or influence and to feel consecration; and they soon abandon their work for one of less responsibility.

It is the province of the normal school to prepare men and women, not only to teach subject matter, but to inspire and stimulate the pupil from within, to exemplify the character and the culture whose roots sink deep into the source springs of thought and feeling. The normal school must have its students comprehend the responsibilities of leadership, the principles of mind development, the laws that correlate and harmonize the physical, the mental, and the spiritual.

The normal school exists primarily not for the benefit of its own students, but for that of all the pupils of the public schools and the whole people. It justifies its existence as an institution to be supported by legislative appropriation in proportion to its fidelity in meeting its obligations to the State.

To fulfill its mission in the fullest sense the normal school is more than the high school, the college, the industrial school, or the technical training school. It must combine the qualities of all these. It must afford academic instruction; it must develop culture and scholarship; it must train for the practical every day problems of society, the home, and the State.

The courses of study, the regulations governing the school, and the methods of instruction used in the classroom, the laboratory, and the playground, keep constantly in view the mission of the school: the instruction, the training, the inspiration, and the development of the character of the future teachers, directors, leaders, and exemplars of the young; the careful supervision and sympathetic direction of the student life and work in the school, on the campus, and in the boarding home, so as to induce those habits of thought that make intelligent and reliable

workmen and citizens. The personal influence of the teacher is by far the greatest factor in the education of children, therefore the normal school must strive to incite those feelings and to inspire those thoughts and ideals that lead to right conduct through life.

In selecting a faculty for the school the utmost care is always exercised. Character, personal influence for good, scholarship, ability, willingness to work, and successful experience are always carefully considered. The Normal School faculty is no place for a teacher weak in any one of these particulars. The student in a Normal School should never come under the influence of a weak, insipid, inefficient, or indifferent teacher.

BUILDINGS.

THE MAIN BUILDING.

In 1903 the main building, a brick, with basement and two stories, was constructed. This contains the administration offices, auditorium, and several recitation rooms. Its cost, including heating, electric wiring, plumbing, etc., was approximately \$60,000.

THE SCIENCE BUILDING.

In 1910 the science building was constructed. It is a fireproof brick and reinforced concrete structure of three floors. It contains several recitation rooms, a lecture room, the manual training shops, the laboratories for chemistry, physics, and domestic science, the power and light plant, store rooms, etc. Its cost, not including equipment, was \$35,000.

THE LIBRARY BUILDING.

In 1913 the library building was completed. It is a fireproof brick, reinforced concrete and steel structure. It contains the reading rooms, stack room, society rooms, several recitation rooms, gymnasiums, toilet rooms, etc. Its cost, without equipment, was \$55,000.

The Legislature has just appropriated \$10,000 to complete the equipment of the library building. Soon it will be furnished with modern shelving, reading tables, and all else necessary for making it entirely suitable and adequate for its purposes.

THE MANUAL ARTS BUILDING.

A commodious fire proof building has just been completed for the Manual Training and Home Economics Departments. Appropriations available September 1st, next, will complete its equipment and give the school one of the best houses for its purpose in the whole country. The cost with equipment will be \$65,000.

THE TRAINING SCHOOL BUILDING.

In January, 1914, on a block of land recently acquired, a substantial seven-room frame building was completed for the model training school.

Whenever funds for a permanent building are secured, the present building will, it is expected, be used for gymnasiums.

GROUNDS.

The campus proper consists of a ten-acre tract upon which are the main building, the science building, the library, the manual arts building, and the President's residence, tennis courts, basket ball courts, etc.

One block removed from the campus the school has a block of four acres, which is being prepared for general athletic sports. On this is located also the temporary building for the Training School.

Removed by only a street from the last mentioned block the school owns a plot of two acres which is used for baseball and other games.

EQUIPMENTS.

In addition to the usual and necessary supply of desks, blackboards, maps, etc., the school has chemical, physical, botanical, agricultural, and domestic science laboratories, workshops, lathes, circular and band saws, planing machine, etc., for manual training, engine for power and light, stereopticons, camera, pianos, and organs.

All buildings are electric lighted, steam heated, and connected with the city sewer. The main building is supplied with electric fans. The laboratories and the cooking room of the Home Economics Department are connected with the natural gas pipes that supply the city. The offices have telephone connection with two systems, both local and long distance.

ENTRANCE REQUIREMENTS TO TEXAS STATE NORMAL SCHOOLS.

1. *Uniform Requirements.*—The requirements for entrance to the various classes of the four State Normal Schools of Texas are uniform, as directed by the State Board of Normal Regents.

2. *Age.*—Any person who is sixteen years of age on or before January 1st of the school year may enter a State Normal School at the beginning of the fall term, or at any suitable time during the school year.

3. *First Year (Freshman) Class.*—Applicants for entrance to the first year (freshman) class must be examined in algebra to quadratics, arithmetic, composition, grammar, and United States history. A second grade State certificate exempts the holder from examination in all the subjects mentioned except algebra and composition; the completion of the ninth grade of an affiliated or approved high school exempts from examination for entrance to this class.

4. *The Second Year (Sophomore) Class.*—Applicants for entrance to the second year (sophomore) class must be examined in all the

work of the freshman class for the appropriate courses with the following exceptions: a first grade State certificate exempts from all examinations for entrance to this class; a permanent primary certificate exempts from examination in all subjects required for entrance to the second year (sophomore) class, except in algebra and geometry of the first year; a second grade State certificate exempts from all examinations for entrance in agriculture, physiology, reading and school management; the completion of the tenth grade of an affiliated or approved high school exempts from all examinations for entrance to the sophomore class.

5. *The Third Year (Junior) Class.*—Applicants for entrance to the third year (junior) class must be examined in all work of the second year (sophomore) class for the appropriate courses, with the following exceptions: Applicants for entrance to the junior class, holding a first grade State certificate, will receive entrance credit for ten units; a permanent certificate exempts from all examinations to the third year (junior) class. Graduation from a high school affiliated with the University of Texas admits to the junior class without examination, provided the student presents, on the Uniform Entrance Certificate, a statement of his work from the superintendent or principal, showing the completion of not less than fourteen (14) standard admission units in which the school is affiliated. If the number of units to which the statement entitles the holder is less than fourteen units, the deficiency must be made up by examination. Graduation from an approved high school of the first class exempts from examinations in subjects aggregating not more than ten units of sophomore work.

6. *The Fourth Year (Senior) Class.*—Applicants for entrance to the fourth year (senior) class must be examined in all the work of the second (sophomore) year and the third (junior) year class for the appropriate course. The completion of one year's work in a recognized college or university exempts from entrance examinations to the fourth year (senior) class.

7. *Time of Examination.*—Applicants for the first year (freshman) class must be examined upon entrance in all required subjects; applicants for admission to the other classes must be examined upon entrance in the required English, History, Mathematics, and Science and may defer examinations in other subjects to the middle of the session. These regulations apply to students from affiliated or accredited high schools, who may be admitted partly by examination as well as to students who enter by examinations solely.

8. *Credits From Other Institutions.*—Entrance credits for work done in any college or university are determined by the President of the Normal School. Work completed satisfactorily in any one of the Texas State Normal Schools is fully recognized by the others. Those completing the work of the first year in one normal school are admitted to the second year class in any State Normal School in Texas and similarly to other classes; provided, that of the fifteen units

quired for a certificate, at least five must be made in the normal school that issues the certificate, and provided also that the entire fifteen units required for the fourth year (senior) class must be made in the normal school that issues the diploma. Only "entrance credits" are given for work done in schools other than the Texas State Normal Schools.

9. *The Unit of Work.*—The unit of work shall be four recitations per week in a subject—or forty-eight recitations per term.

10. *The Term's Work.*—The work of a term shall be five units, or four recitations per week in each of five subjects, and in addition thereto two recitations per week in physical education. The work in physical education as just defined shall be reckoned as one unit and a year's work. It is also understood that two recitations per week for thirty weeks, counted as a unit in physical education, may be reduced to make the total number of physical education to be forty-eight recitations when the work is based upon the theoretical study of the subject.

11. *Credentials.*—Credentials entitling the holder to exemption from examinations must be official statements signed by proper authorities. Promotion cards and diplomas from high schools and colleges must be accompanied by official statements of the work completed by the students, and signed by the superintendent, principal, or president. Work in a grade partially completed is not considered for entrance or credit.

12. *Recognized Colleges.*—The University of Texas, Baylor University, Southwestern University, Texas Christian University, Trinity University, Rice Institute, and Austin College are recognized colleges and universities, affiliation with which is approved.

13. *High Schools.*—"Approved" high schools are those accredited by the State Department of Education; "affiliated" high schools are those accredited by the University of Texas or other "recognized" institutions.

14. *Electives.*—There are no "free electives." Each student on entering must elect one of the seven courses offered. In all courses there is an option between music and drawing. In the Language and the History-English courses there is an option among Latin, German and Spanish. In all courses three units in either manual training or home economics may be, or a sufficient number of foreign language units to satisfy university entrance requirements, by permission of the President, substituted for the same number of units of other subjects.

RECOGNITION OF THE NORMAL SCHOOLS BY THE COLLEGES AND UNIVERSITIES.

The following report on the present status of the Normal Schools has been received from the University of Texas as the action of the Committee on Admission from Other Colleges:

"ADMISSION OF STUDENTS FROM THE FOUR STATE NORMALS.

"Students desiring admission from one of the State normal schools must fulfill the same requirements as students from other colleges, except that normal students are allowed to count for admission some subjects not specified as admission units by the University of Texas.

"Students who graduated from the State Normal Schools before 1914 will be given full admission, and, in addition, one unspecified course toward a degree.

"Students attending the State Normal schools during and after the session of 1913-14 will receive credit as follows:

"Credit will be given only for full years of work.

"On completion of the second year, students will be given fourteen admission units, provided three units in one foreign language or two in each of two foreign languages (other than Latin) are included. If foreign language units are not included, only twelve admission units will be allowed.

"On completion of the third year, students will be given fourteen admission units as provided for at the end of the second year; and, in addition, five college courses, provided (1) the student completed the entire second and third year at the normal schools, or (2) was admitted to the normal school with at least fourteen units' credit as a graduate of a school affiliated with the University of Texas, or (3) was admitted by examination covering either the second year's entire course of study in the normal school or fourteen admission units accepted by the University of Texas. In case students were admitted to the third year class with credit for only twelve admission units, they will receive only twelve admission units and five college courses by reason of their completion of the third year normal course.

"On completion of the fourth year, students will be given fourteen admission units as provided for at the end of the second year, and, in addition, ten college courses, provided the student (1) completed the third year at the normal school, subject to the above mentioned conditions for admission to the third year; or (2) was admitted to the fourth year by examination covering the entire course of study of the second and third years, or covering the required admission units to the University of Texas and the entire course of study of the third year; or (3) was admitted to the fourth year by reason of having creditably completed an entire year of work in a recognized college; and, in addition, presented the equivalent of full admission to the University of Texas. In case students present only twelve admission units on entering the fourth year, they will be allowed only twelve admission units and ten college courses on completing the fourth year.

"Students, however, who were admitted to the fourth year by reason of graduation from a State Normal School prior to 1914 will be credited with only six college courses in addition to the fourteen admission units as provided for at the end of the second year.

"It is to be noted that the course credits offered cannot be specified as to subjects in advance. They can be specified only after examination of the work done in each individual case. Unspecified credits will count towards University degrees as elective courses, but will not satisfy specific degree requirements. It may result from this that a student from a normal school admitted to the University with five college courses' credit will find it necessary to complete more than fifteen additional courses in order to secure the bachelor's degree; a student admitted with ten courses, to complete more than ten additional courses.

"As in the case of students from other colleges, all credits given to students from the normal schools are conditional and may be reduced after the student matriculates in the University of Texas."

COURSES OF STUDY.

The school offers seven distinct groups of subjects or courses of study, each covering a period of four years. The courses are equivalent as to amount of subject matter and as to the time requisite for their completion.

Each course comprehends two years of high school work and two years of strictly collegiate work, including the professional subjects recognized as necessary for the preparation of teachers.

First-year (Freshman) students have practically the same course. Those who have completed the Freshman class in the school, or whose attainments enable them to enter a more advanced class upon matriculation, must choose one of the seven courses offered.

The student is not permitted to elect subjects or to plan a course different from any one offered. There are a few "alternatives" offered in each course, and in such case the student is allowed further manifestation of his preference.

The courses are:

- I. Agriculture.
 - II. Home Economics.
 - III. Manual Training.
 - IV. Language.
 - V. Science.
 - VI. Primary and Art.
 - VII. History-English.
-

PURPOSE OF THE COURSES.

Each course includes the fundamental subjects usually required in the grades of the public schools, and the completion of any one of the seven courses should equip the student for general public school work. Each course permits specialization, affording opportunity for preparation in a particular field.

1. The Agriculture course is intended to prepare teachers of agriculture in high schools, and principals of rural schools.
2. The Home Economics course is intended to prepare teachers of domestic science.
3. The Manual Training course is intended to prepare teachers of the different phases of manual training.
4. The Language course is intended to prepare teachers of English and Latin, German, or Spanish.
5. The Science course is planned for teachers of Physics, Chemistry and Mathematics.
6. The Primary and Art course is expected to equip the primary teacher and in addition to train a teacher of either drawing or music.
7. The History-English course is designed to prepare a teacher of history and English.

All these courses are offered in each of the four State Normal Schools of Texas.

The work is estimated in "units."

A unit is 4 recitations per week for a term of 12 weeks or 48 recitations of 45 minutes each.

The work of a session of nine months is 15 units.

THE NEW FOUR-YEAR COURSES.

For the session beginning in September, 1913, and thereafter, the Texas State Normal Schools adopted uniform entrance requirements and uniform requirements for certificates and diplomas. Qualifications for admission to the first year or Freshman Class were made equivalent to the completion of the ninth grade of a standard high school, and a four-year course for graduation was agreed upon.

Students who had before this time matriculated in one of the Normal Schools and others who could by examination join the classes of such students were permitted to complete the former three-year course and graduate, provided the entire work of the former course shall have been finished before September, 1914.

Beginning with the session in September, 1914, every student will be registered in some one class of the new four-year courses.

Adjustment of Former Students.—Certificates issued by the State Normal Schools prior to the adoption of the new courses will be recognized as follows: The second grade State Normal School certificate admits to the Sophomore (second year) Class; the first grade to the Junior (third year) Class; the permanent to the Senior (fourth year) Class, to that one of the seven courses for which the previous work of the student has prepared him. But it should be noted that students admitted to the Fourth Year (Senior) Class by reason of graduation in the school prior to 1914 are not admitted to the universities with ten college credits as are regular graduates under the new regime. Graduates under the former three-year curriculum are advised, therefore, to enter the new senior class by examination.

Choice of Course Necessary.—There are no "free electives" in any one of the Texas State Normal Schools. The student must elect one of the seven distinct courses offered and he must take every subject of the course elected. Completion of a year's work in one course does not admit the student to the next higher class of a different course.

Alternatives.—In the Language and the History-English courses there is a choice among Latin, German and Spanish. In all courses the student may, with the permission of the President, substitute not more than three units in Manual Training or Home Economics for the same amount of work in other subjects. In all courses the student may elect enough of foreign language (Latin, German, or Spanish) to satisfy the entrance requirements to the universities.

SYNOPSIS OF THE COURSES OF STUDY.

I. AGRICULTURE COURSE.

FRESHMAN CLASS (FIRST YEAR)

First Term.	Second Term.	Third Term.

DEPARTMENT OF AGRICULTURE.

PROF. DAVIS, PROF. LEGETT.

Agriculture 1. Elementary Agriculture. 1 unit.

A twelve weeks' course in the rudiments of the subject. The subjects covered will be those considered in Ferguson and Lewis' "Elements of Agriculture."

Agriculture 2. Zoology. 2 units.

Several selected representatives of easily recognized relationship are studied in the laboratory and then in the text until the need of a group name is felt. The characteristics of the order are then brought out. The relationship between allied orders is treated in like manner.

About ten insects of different kinds, the crayfish, and the frog.
Text-book: Linville and Kelley's "General Zoology."

Agriculture 3. Economic Entomology. 1 unit.

Destructive insects and their method of control, including the boll worm, the boll weevil, the grasshopper, the army worm, and the San Jose scale.

Practice in mixing and applying the standard spray materials.

Text-book: Sanderson's "Insect Pests of Farm, Garden, and Orchard."

Agriculture 4. Agronomy. 1 unit.

The soil, how made, composition, texture, water holding capacity, tillage, humus and its function, soil inoculation, conservation of soil water. Irrigation and drainage will be treated briefly. Fertilizers: elements used by plants as food, giving special attention to nitrogen, phosphorus, and potash. The function of each of the last three, commercial forms, method and time of application; analysis and value of barnyard manure; legumes of the State. Laboratory work in grain judging, germination methods, value of seed selection, principles of plant improvement; a study of the cotton plant from planting to maturity, including cotton grading.

Text-books: Livingston's "Field Crop Production" and Voorhees' "Fertilizers."

Agriculture 5. Animal Husbandry. 1 unit.

Feeds and feeding; composition and nutritive value of common feeds, methods of determining value of different feeds, balanced rations for different classes of livestock. Breeds of livestock are studied from lantern slides and then on the neighboring farms. History of breeds is studied in class. Animal diseases, as Texas fever, hog cholera and tuberculosis, will be considered.

The dairy breeds, methods of producing clean milk, churning temperature, butter making, testing milk and its products for fats and for preservatives; laboratory practice in setting up centrifugal separators.

Text-books: Plumb's "Types and Breeds of Farm Animals," and Miller's "American Cotton System."

Agriculture 6. Horticulture. 1 unit.

The principles of fruit growing are studied under the following topics: location, climate, tillage, fertilization; plants and planting; laying out orchards, pruning, thinning of fruit, protection against frost. renovation of old orchards; microscopic study of troublesome fungi.

Practice in school gardening.

Text-book: Bailey's "Principles of Fruit Growing."

Agriculture 7. Agricultural Bacteriology. 1 unit.

The course will include a study of nitrifying bacteria, legume bacteria, bacteria concerned in souring of milk, in silage, in sewage purification, in canning and animal diseases. Bacteria in barnyard manure and control, bacteria in bread making, in preservation of foods, vinegar making, and in many industrial processes.

Text-book: "Agricultural Bacteriology," Conn.

Agriculture 8. Experimental Plant Breeding. 1 unit.

Methods of improving and fixing types. A study of Mendel's Law. This work will be carried out in the school garden. Eugenics will be treated; lectures on topics of current interest in the work.

Text-book: Walter's "Genetics."

Agriculture 9. Agricultural Economics. 1 unit.

This course will cover, as far as possible, the subject of rural credits, the organization of buying and selling concerns, of creameries, elevators, etc., the marketing problem, the tenant system of this and of other countries.

Text-book: Carver's "Principles of Rural Economics."

 DEPARTMENT OF CIVICS.

PROF. PENDER.

Civics 1. 1 unit.

This course is abridged, but fundamental. It begins with a few lessons in "The Science of Politics." Then follows a review of the subject in three divisions: "The Making of the American Government," "The National Government," and "The State Government." The subject is enlivened by free class discussion of our present-day governments, municipal, State, and national, and of the problems confronting each of them. Students are required to use reference books, and to read at least one book treating some phase of governmental reform.

Text: Hinsdale's "The American Government."

Civics 2. 2 units.

This course differs from Civics 1 mainly in that it is more extensive, treats of a greater number of subjects, and gives more time for a freer and fuller discussion of the questions of the day. Among the topics treated are: "Some Elements of Politics"; "The Historical Development of Government"; the practical workings of government in Nation, State, and Municipality; "Policies and Problems"; with chapters on "Trade and Industry," "Foreign Affairs," "Money," "The Duties of Citizenship," etc. It closes with a few lessons on Insurance and Investment. The use of reference books is required, as is the

reading of some book pertaining to governmental activity or reform, with a book review or theme.

Text: Ashley's "The American Federal State."

DEPARTMENT OF DRAWING.

MISS HILLYAR.

In all the seven courses the student must elect, as a part of his work, either Drawing or Music. After having once made his selection between the two he must continue his line of work throughout the course.

The aims of the courses in drawing are as follows: (1) To develop the ability to draw easily and well, to prepare the teacher to use drawing as a language in the teaching of any subject, a language, when skilfully used, which never fails to awaken interest and to hold attention.

(2) To teach the student to understand and to apply the general principles of perspective, of mechanical drawing, and the elementary principles of design, and their application. This will include the study of lettering.

(3) To develop the power of observation and to cultivate an appreciation of the forms and elements of nature and the world of Art.

Only those who elect the Primary and Art course are required to take an extensive course in either Drawing or Music.

The aim of this course in Drawing includes that of the other courses and is especially designed to prepare teachers of drawing for the public schools.

The details of the work in Drawing and Music will be advertised at the beginning of the session. Some changes in the courses, etc., render it inadvisable to make definite announcement at the present time concerning the work of these departments.

DEPARTMENT OF EDUCATION.

PROF. SWENSON, MISS MOORE, MISS FIERO.

Education 1. School Management. 1 unit.

This course, counting one unit of study, is given each of three terms of the year to different groups of Freshmen. Sutton and Horn's "School-Room Essentials" is used as text to give a general presentation of educational problems in both theory and practice.

Special attention is given to the consideration of the teacher's work in a country school.

Education 2. Elementary Method. 1 unit.

The course in Elementary Method is an introductory course in General Method. It includes a study of the foundation principles and the

fundamental laws of teaching; the rules and purposes of the recitation; the use of drills and reviews; the making of lesson plans.

The course is based upon Roark's "Method in Education."

Education 3. Advanced Management. 1 unit.

This course deals with Management differentiated from Method and involves the various phases and processes of education except that of instruction. The class room is taken as the unit of management, and the point of view is that of the individual teacher in charge of a room. Bagley's "Class Room Management" is used as text, supplemented by library work.

Education 4. Special Method. 1 unit.

This course is planned to furnish special training in the Intermediate and Grammar grades of the public school course. It will consist of discussions of principles which underlie and determine the selection of subjects of study and the methods of presenting subject matter to children in the various grades of the intermediate department.

The course will be based upon Compayre's "Practical Pedagogy."

Education 5. General Psychology. 2 units.

The course will consider:

1. The psychological Organism.
2. Sensation.
3. Perception.
4. Attention and Interest.
5. Memory, Imagination, Thought.
6. Feeling and Emotion.
7. Will.

This work will be followed by a study of pedagogical application of the fundamental laws of mental growth. The formal steps of the recitation and the development of each: the organization of subject matter and the making of lesson plans will constitute an important feature of the course.

Laboratory work, observation and criticism of classes in the Normal Training School followed by oral and written discussion is a requirement for the completion of this course.

Text-books: Angell's Psychology, McMurry's "Method of the Recitation" and Dewey's "School and Society."

Education 6. Child Psychology. 1 unit.

This course includes a study of the problems which are concerned with the development of the child, mental and physical. A study is made of the problems of heredity, instinct, etc., and how to direct play, imitation, collective and constructive instinct. The division of the life of a child into distinct periods with the individual characteristics of each is considered.

The course is based on Kirkpatrick's "Fundamentals of Child Study."

Education 7. Primary Method. 1 unit.

The course in Primary Method includes a study of the special Methods in the work of the first four years of the public school course. Special methods in the teaching of reading, number work, language, story-telling, dramatization, constructive work, etc., is considered; the making of lesson plans and the observation and use of concrete material emphasized.

The course will be based upon "General Outlines for Primary Method" by M. Anne Moore.

Education 8. General Method. 1 unit.

The course in General Method provides for a thorough study of the formal steps of the recitation, the problems of how to study and teaching how to study; the factors determining the selection and arrangement of subject matter.

The methods of securing interest; individual attention; the elements of skill in drill; development; and appreciation.

Text-books: McMurry's "How to Study and Teaching How to Study," Thorndyke's "Principles of Teaching."

Education 9. History of Education. 1 unit.

This subject will be treated as a phase of General History, being a study of the continued focal point where one generation transmits to the next its institutions and the results of its experience. The systems of the various epochs and of the great reformers will be analyzed for the lessons they can teach the modern teacher, the study thus subserving both cultural and practical ends.

Monroe's "Brief Course in the History of Education" will be used as a text, supplemented by a brief comparative study of the public school system evolved by the United States and the leading European nations from current educational documents.

Education 10. School Administration. 1 unit.

This course considers a series of problems especially valuable to the prospective principal or superintendent, or any one that expects to lead public educational opinion in his field of work. Some of these problems are school finances, construction and equipment of buildings, preparation and selection of teachers, the course of study, the program, the side activities and the social interrelations of the school, the work of supervision, and the problem of special schools. The student will be guided by a syllabus, but the class work will consist largely of lectures and discussions, followed by library work, the study of national, State, city, and county reports, etc., essays and individual solution of assigned problems.

Education 11. Principles and Problems of Education. 1 unit.

This course will necessarily be identical from year to year, but will consider the current problems that the trend of educational interest

may point out as of paramount importance at the time. During the ensuing session the social and practical trend of education will be noticed.

Texts: Dewey's Ethical Principles Underlying Education; Reports of Educational Surveys by different universities; bulletins of the United States Bureau of Education and State Departments of Education.

Education 12. Practice Teaching in the Training School. 1 unit.

DEPARTMENT OF ENGLISH.

MISS BLANTON. MISS CLARK. MISS PARKER. MISS SWEET
MISS ATTWELL.

English 1. Elementary Grammar. 1 unit.

This course begins with a review of the parts of speech, followed by a brief study of the phrase, the clause, the verb, and the verbal, as a preparation for sentence analysis. Sentence analysis, including the study of all types of the simple sentence, and of compound sentences forms a part of the work of each week. The course also includes a study, in detail, of the noun and the pronoun; their classification, inflections and constructions. Drill is given on correct forms and uses of nouns and pronouns.

English 2. Elementary Grammar. 1 unit.

This course is a continuation of English 1, and includes the study, in detail, of the adjective, the verb, the adverb, and the preposition—their classification, inflections and constructions. Sentence analysis is continued and includes the study of complex sentences containing the most common types of simple and dependent clauses. Drill is given on the correct forms and uses of all the parts of speech.

Text-books for English 1 and 2: Smith's "Our Language Grammar" and Blanton's "Grammar Outline."

English 3. Elementary Composition. 1 unit.

This course has for its primary purpose to make correct form in writing habitual with the student. It includes the following: A detailed study of capitalization and punctuation; a study of the paragraph, including the principles of paragraph construction and the different methods of paragraph development; a study of letter writing, with drill on correct forms, and practice in writing business, social, and informal letters; simple compositions, including reproductions, paraphrasing, and easy exercises in narration and description. In connection with the work in composition, students are required to read certain classics, which they discuss with the instructor, and on which is based some of the work in composition writing. At least one composition per week is required in this course.

Supplementary reading, three of the following: Scott's "Ivanhoe,"

Irving's "Sketch Book," Hawthorne's "House of the Seven Gables," Lowell's "Vision of Sir Launfal," any three of Poe's tales.

Text-books: Merkley and Ferguson's "Composition-Rhetoric" (selections from chapters on Correctness, Clearness, Paragraphs, The Whole Composition, and Letters); Blanton's "Composition and Punctuation."

English 4. English Literature. 1 unit.

This course consists of the History of English Literature from the Anglo-Saxon Period to the Classical Age (Long, Chapters I to IX). A study is made of the representative writers belonging to each period, including their biographies, their style, and their representative writings. Representative poems are read and discussed by the class, and as much memory work is done as time permits. A critical essay, based upon the reading, is required.

Supplementary reading, four of the following: Gaskill's "Cranford," Shakespeare's "Julius Caesar," "Merchant of Venice," Bunyan's "Pilgrim's Progress" (Part I), "The Book of Ruth."

English 5. English Literature. 1 unit.

This course is a continuation of English 4, and includes the history of English Literature from the Classical Age to the Victorian Age (Long, Chapters IX to XI). As in English 4, a study is made of representative writers and their works. A critical essay, based upon the reading, is required.

Supplementary reading, four of the following: Shakespeare's "Julius Caesar," Pope's "Rape of the Lock," Dickens' "David Copperfield," Tennyson's "Princess," and Stevenson's "Treasure Island."

Text-books for English 4 and 5: Long's "English Literature," Macaulay's "Lays of Ancient Rome," Pancoast's "Standard English Poems."

English 6. American Literature. 1 unit.

This course consists of the history of American Literature from the Colonial Period to the present time. A study is made of the representative writers belonging to each period, including their biographies, their style, and their representative writings. Selected pieces of literature are read and discussed by the class, and as much memory work is done as time permits. One critical essay, based upon the reading, is required.

Supplementary reading, four of the following: Cooper's "The Deerslayer," Henry Grady's "Essays," Southern Poets, Franklin's "Autobiography," and Page's "Red Rock."

Text-book: Halleck's "History of American Literature."

English 7. Advanced Grammar. 1 unit.

This is primarily a course in sentence analysis; it includes a review of the classifications and constructions of the parts of speech and of the principles of correct grammatical usage; a study, in detail, of the

types of the dependent clauses and regular practice in sentence analysis, which forms part of the work of each week.

Text-books: "Kimball's English Sentence," Buchler's "English Grammar," Blanton's "Grammar Outline."

English 8. Advanced Composition. 1 unit.

This course consists of a practical study of narration and description, including the principles of composition and forms of each. In connection with the composition writing, the following will receive careful attention: Construction of outlines in theme writing; sentence construction, including the principles of clearness, unity, coherence, and emphasis; a review of paragraph construction, including the principles and methods of development. The review work includes capitalization and punctuation, including end-punctuation, and the uses of quotation marks, of the apostrophe, the hyphen and the comma. In addition, the course includes the study of versification, with practice in verse writing. At least one composition per week is required. As supplementary reading the class is required to read certain classics, which are discussed in the classroom, and from which are taken some of the subjects for theme writing.

Supplementary reading: Three of the following: Dickens' "A Tale of Two Cities," Eliot's "Silas Marner," Blackmore's "Lorna Doone," Hale's "The Man Without a Country," and Warner's "A Hunting of the Deer and Other Essays," Scott's "Kenilworth."

English 9. Advanced Composition. 1 unit.

This course is a continuation of English 8. It consists principally of a practical study of exposition and argument, including the principles of composition and forms of each. In connection with the theme writing the class will study the following: Construction of outlines in theme writing; diction, including the proper meanings and uses of words frequently misused; figures of speech. In addition, a review will be given of letter writing, and of punctuation, including the uses of the semicolon, the colon, and the dash. Methods of teaching composition will be discussed in connection with the various parts of the course. At least one composition per week will be required.

Supplementary reading: Three of the following: De Quincy's "Joan of Arc," Carlyle's "Heroes and Hero Worship," Macaulay's "Essays on Lord Clive and Warren Hastings," Burke's "Speech on the Conciliation," and selections from Emerson's essays.

Text-books for English 8 and 9: Newcomer and Seward's "Rhetoric in Practice," Blanton's "Composition and Punctuation," and Woolley's "Handbook of Composition." Selected chapters of Carpenter, Baker and Scott.

English 10. Literary Masterpieces. 1 unit.

In this course a critical study is made of representative English poems belonging to the Elizabethan Age, the Puritan Period, the Classical Age, and the Romantic School. A critical essay is required, based upon the

reading of the course, and as much memory work is done as time permits.

Supplementary reading: Goldsmith's "Vicar of Wakefield," Addison's "Sir Roger de Coverley's Papers," Thackeray's "English Humorists," and Scott's "Kenilworth."

Text-books: Pancoast's "Introduction to English Literature" (used chiefly as a reference book), and Bronson's "English Poems."

English 11. Shakespeare. 1 unit.

In this course a brief study is made of the development of the English drama, including the Elizabethan theatre and the manner of presenting the plays. This is followed by a study of the Elizabethan Age and the life of Shakespeare. Two plays, which are selected each year by the teacher, are studied critically, and a critical essay is required in connection with the course.

Supplementary reading: Four of the following plays: "As You Like It," "Cymbeline," "The Tempest," "A Winter's Tale," "Comedy of Errors," "Midsummer Night's Dream," "Richard III."

Text-books: Pancoast's "English Literature"; any standard edition of Shakespeare's plays.

English 12. The Victorian Age. 1 unit.

In this course a study will be made, first, of the period, and then of the representative writers belonging to the period, including their biographies, their style, and selected writings. The authors studied will be Carlyle and Ruskin as representative essayists; Dickens, Thackeray, and George Eliot as representative novelists; and Tennyson and Browning as representative poets. Critical studies will be made in class of Carlyle's "Essay on Burns," Ruskin's "Sesame and Lilies," Tennyson's "Idylls of the King," and Browning's "Pippa Passes."

Text-books: Pancoast's "Introduction to English Literature" and Bronson's "English Poems."

English 13. Advanced Grammar. 1 unit.

This course is an extension of English 7. It is planned to give special preparation to teachers of English grammar. The course begins with a review of the various constructions of the sentence, followed by analysis, including that of the most difficult types of compound and complex sentences. Special study is made of elliptical constructions, of the verbal, including the participle, the infinitive, and the gerund; and of disputed points. Methods of teaching will be discussed and applied.

Text-books: Kimball's "English Sentence," Buchler's "English Grammar," Blanton's "Grammar Outline," selected chapters from Carpenter, Baker and Scott's "The Teaching of English."

DEPARTMENT OF GERMAN AND SPANISH.

PROF. ANDERSON.

GERMAN.

German 1. Beginner's German. 3 units.

Elementary German. Oral practice. Dictation. Reading easy prose. All of the work of the class is in German.

Text-books: Prokosch's "Introduction to German," Guerber's "Märchen und Erzählungen," Vols. 1 and 2. Bacon's "Vorwaerts."

German 2. Sophomore German. 3 units.

Composition. Reading. Grammar. Themes and papers on various topics of German life, manners and institutions.

Text-books: Prokosch's "Lese und Übungsbuch," Kutner's "Commercial German," Holzwarth's "Gruss aus Deutschland," Scherer and Dirks' "Deutsche Lieder," Decker and Markisch's "Deutschland und die Deutschen," Joynes and Wesselhoeft's "German Lesson Grammar."

German 3. 1 unit.

Outline of German Literature. Lectures. Reading of selected texts. Themes.

Text-books: Wenckeback's "Deutsche Litteraturgeschichte," Keller's "Bilder aus der Deutschen Litteratur."

German 4. 1 unit.

Study of German poetry, with special attention to historical development, form, and meter.

Text-books: Nollen's "German Poetry," Klenze's "Deutsche Gedichte."

German 5. 1 unit.

Study of German prose. Reading of representative prose writers.

Text-books: Wildenbruch's "Das edle Blut," Hauff's "Die Karavanne," Chamisso's "Peter Schlemihl," Eichendorff's "Aus dem Leben eines Taugenichts."

German 6. 1 unit.

German drama. Close study of Schiller's "Wilhelm Tell." Rapid reading of several of Schiller's works.

German 7. 1 unit.

German drama. Close study of Goethe's "Faust." Rapid reading of several of Goethe's works.

German 8. The Teaching of German. 1 unit.

Basic principles of modern language instruction, with special reference to elementary high school courses. Lectures, discussions, papers, practice, teaching.

Text-book: Leopold Bahlsen's "The Teaching of Modern Languages."

German 9. Beginner's German. 3 units.

This course is designed for Juniors and Seniors who have had little or no German. Oral practice. Dictation. Reading easy prose. Inductive instruction in the elements of grammar.

Text-books: Prokosch's "Introduction to German," Guerber's "Märchen und Erzählungen," Vols. 1 and 2, Bacon's "Vorwaerts," Scherer and Dirks' "Deutsche Lieder," Prokosch's "Lese und Übungsbuch."

German 10. Contemporary German Literature. 3 units.

Reading of representative modern German novels, dramas, and poems. Collateral reading will be given. Outline of German literature. This course is a continuation of Course 9.

Text-books: Keller's "Bilder aus der Deutschen Litteratur," Chamisso's "Peter Schlemihl," Eichendorff's "Aus dem Leben eines Taugenichts," Wildenbruch's "Das edle Blut," Hauff's "Die Karavanne," Nollen's "German Poetry," Kutner's "Commercial German," Decker and Märkisch's "Deutschland und die Deutschen."

SPANISH.

Spanish 1. Beginner's Spanish. 3 units.

Conversation. Dictation. Reading easy prose. Grammar. Oral and written reproduction. Letter writing. All of the work of the class is in Spanish.

Text-books: Dowling's "Reading, Writing and Speaking Spanish," Hall's "All Spanish Method" (First Book). Marion y Des Garennes "Introducción a la lingua castellana," Harrison's "Elementary Spanish Reader," Ramsey's "Elementary Spanish Reader."

Spanish 2. Grammar. Reading. Composition. 3 units.

Themes and papers on various topics of the life, manners and institutions in Spanish-speaking countries. Survey of Spanish literature. Conversation based on reading matter from the Latin-American Republics.

Text-books: Hall's "All Spanish Method," Harrison's "A Spanish Commercial Reader," Downer and Elias' "Lecturas Modernas," Fitzmaurice Kelly's "Historia de la literatura Española."

Spanish I. may be taken instead of German I. or Latin I., and Spanish II. may be taken instead of German II. or Latin II.

DEPARTMENT OF HISTORY.

PROF. CRIDDLE. MISS MITCHELL. MISS WILSON.

History 1. Ancient History. 3 units.

It is the purpose of this course to give a general idea of the character and growth of the civilization of Greece and Rome. As a background for this there will be a brief introductory survey of the progress made by the Oriental peoples before the time of the Greeks. The historical significance of the Greeks will then be brought out by a careful study of the growth among them of political liberty and intellectual and esthetic culture and the blending of the East and West through the achievements of Alexander.

In the history of the Roman people the problem of government will be emphasized.

Text: Myers' "Ancient History"; Botsford's "Source-book of Ancient History."

History 2. Mediæval History. 1 unit.

This course will cover a period of about a thousand years from the downfall of the Roman Empire to the close of the fifteenth century.

Attention will first be directed to how, through the organizing force of the Christian Church and the Frankish Empire, Western Europe began gradually to recover from the disorders of the barbarian invasions and to fuse together the old and new elements which were to produce modern civilization. Then, after a study of the peculiar institutions which grew up to meet the needs of the time, the evolution of society as a result of the new intellectual, commercial, and political impulses stirring Europe from 1100 to 1500 will be traced.

There will be a constant use of source books for illustrative material.

Texts: Myers' "Mediæval and Modern History"; Ogg's "Source-book of Mediæval History."

History 3. Modern History. 2 units.

The first work of this course will be a consideration of the religious revolutions which swept over Europe in the sixteenth century, and the political consequences of the resulting division of Christendom.

The age of absolute monarchy will be studied as a prelude to that great democratic revolution which, starting in France and spreading over Europe, brought some measure of political and social emancipation to the people of every nation of the continent.

The work of the text-book will be supplemented by references to source material and larger histories.

Text: Myers' "Mediæval and Modern History."

History 4. English History. 1 unit.

It is the aim of this course to deal with the different phases of English history to the end of the reign of the Tudors. Special atten-

tion will be given to the development of parliament and to the relationship of church and state.

Text: Andrews' "History of England"; Lee's "Source Book of English History."

History 5. English History. 1 unit.

This course is the history of England from the Stuart kings to the present time. Emphasis will be given to the struggle between King and Parliament, to the colonial and commercial expansion of the eighteenth century and to the growing democracy of the nineteenth century.

Text: Andrews' "History of England"; Lee's "Source Book of English History."

History 6. Industrial History of the United States. 1 unit.

In this course a rapid survey will be made of those topics which have a bearing upon the social, economic, and industrial progress of the United States.

Text: Coman's "Industrial History of the United States."

History 7. American History. 2 units.

The early national period of American history. The object of this course is to show how, out of the scattered, inharmonious colonies occupying the country in 1750, the American nation was formed.

American history since 1829. This course begins with the period of critical change ushered in by the election of Andrew Jackson to the Presidency and traces the expansion of the nation, the growth of sectionalism, the Civil War, reconstruction, and the development of the new Union. A definite amount of assigned reading will be required and also reports on special topics.

Texts: Hart's "Formation of the Union"; Wilson's "Division and Reunion"; MacDonald's "Documentary Source Book of American History."

History 8. European History of the Nineteenth Century. 1 unit.

It is the object of this course to give an insight into present-day political, industrial, and intellectual interests of Europe. There will be a careful study of the revolutionary changes effected in France during the nineteenth century, of the rise in Russia as a world power, of Prussia's assumption of leadership of German affairs, of the formation of the German Empire, and of the unification of Italy. Stress will also be laid on the industrial revolution and its effects on the life of the masses.

Reports based on extensive library work will be required of all students taking this course.

Text: Robinson and Beard's "Development of Modern Europe," Vol. II; "Readings in Modern European History," Vol. II.

DEPARTMENT OF HOME ECONOMICS.

MISS SHAFFER, MISS RATHBONE.

Home Economics 1. Food Products and Textiles. 1 unit.

The source, composition, cost, as well as the preparation, of the various staple foods from the raw state to the finished product in the marketable form will be treated in the first part of the course. In the second part the study of the production and manufacture of linen, silk, cotton, and wool, and the manufacturing conditions which affect the hygienic, economic, and esthetic value of materials.

Text-books: Sherman's "Food Products," Wolman's "Textiles."

Home Economics 2. Elementary Garment Making. 1 unit.

Making of all fundamental stitches, drafting, and the use of the pattern, hand and machine sewing applied to construction and repair of simple garments, and the attachments of the sewing machine.

Home Economics 3. Advanced Garment Making. 1 unit.

The construction of more difficult garments with application of embroidery and other decoration. The last half of this course gives instruction in designing and drafting patterns for hats, constructing and covering frames, making and placing trimming.

Home Economics 4. Principles of Cookery. 1 unit.

The aim of this course is to teach the elementary principles of cookery; the effect of heat on type foods, proper methods of combining foods and the changes which take place. Skill in handling apparatus and materials will be emphasized.

Home Economics 5. Food Preparation. 1 unit.

This course gives the opportunity for practice in home cookery. It will include the planning, cooking, and serving of meals. Care of food in the home, marketing and cost of materials will be emphasized. Some experimental cooking will also be given.

Home Economics 6. Dressmaking. 1 unit.

Shirtwaists and skirts and simple dresses are made in this course. The use of the drafted pattern, cutting and fitting are included.

Home Economics 7. The House. 1 unit.

The location, structure, furnishings, and decorations of the house are considered here as well as the care, cleaning, and management of the house.

Home Economics 8. Dietetics. 2 units.

The nutritive functions of proteins, fats, carbohydrates and minerals, with dietary standards and their application to practical prob-

lems in both health and disease. Dietaries of families of different incomes and for infants and children.

Text-book: Sherman's "Chemistry of Food and Nutrition."

Home Economics 9. Methods of Home Economics. 1 unit.

This course deals with the organization of the course of study in Home Economics in the different grades of elementary and secondary schools; selection of topics and their adaptation to the different grades; the method of the recitation; equipment and illustrative materials; observation and practice in the Training School.

DEPARTMENT OF LATIN.

PROF. McDONALD.

Latin 1. First Year Latin. 3 units.

First term: First thirty lessons.

Second term: Lessons 31 to 60.

Third term: Book completed and reviewed.

Text-book: Gunnison and Harley.

Latin 2. Caesar. 3 units.

Caesar's Gallic War, 5 books.

Text-book: Gunnison and Harley.

Latin 3. Cicero. 1 unit.

Cicero, three orations against Catiline. Composition based on text read. Grammar used for reference. Study of Roman government.

Text-book: Gunnison and Harley.

Latin 4. Cicero. 1 unit.

Cicero, oration on the Manilian Law and on citizenship of Archias. Selections from other works of Cicero for sight reading. Roman life and customs.

Latin 5. Vergil. 1 unit.

Vergil's Aeneid, Books I and II. Prosody; Roman and Grecian mythology.

Latin 6. Vergil. 1 unit.

Vergil's Aeneid, Books, IV, V, VI.

Latin 7. Livy. 1 unit.

Books XXI and XXII.

Latin 8. Horace. 1 unit.

DEPARTMENT OF MANUAL TRAINING.

PROF. VITZ.

The course in Manual Training is designed to provide thorough instruction in the various phases of the subject for those preparing to teach and supervise Manual Training in the public schools of the State.

Provision is made for students enrolling in any course to take a short course in Manual Training, substituting not more than three units in Manual Training for other work in the course elected. Such substitution must have the approval and permission of the President.

Students making such substitutions will be permitted to choose either Manual Training 1 and 2 (particularly adapted to city schools) or Manual Training 11, 8 and 12 (a short course especially designed to meet the needs of rural schools). Since the subject of manual training is given such importance in modern education, all who can are urged to take advantage of these substitutions.

The new fireproof Manual Arts building will enable the school to meet all reasonable demands for preparing teachers of Manual Training and Home Economics for the high schools of Texas.

Manual Training 1. Mechanical Drawing. 1 unit.

The work in this course includes the following: Lettering, Straight and Curve Line Shop Problems, Planes of Projections, Revolution of Solids, Development of Surfaces, Intersections, Working Drawings of the exercises to be made in the shop the following term. Tests on practical problems covering the work.

Text: Bennett's "Problems in Mechanical Drawing."

Manual Training 2. Bench Work, Wood Turning, and Machine Work. 2 units.

Bench Work: Analysis of tool processes, the construction of simple models adapted to seventh and eighth grade work. Their purpose is to teach planing, gauging, scoring, sawing, chiseling, boring, etc. Nailing, screwing and lap-jointing will be the method of fastening. Construction of principal joints, the application of each joint in medium-sized pieces of furniture. Lectures will be given on sharpening, glues, sanding, scraping, staining, filling, finishing, etc.

Wood Turning: Exercises teaching all the cuts in spindle turning, face-plate work, chuck work and mandrel turning. Attention will be given to the correct handling of tools, accuracy, speed, etc.

Machine Work: After proficiency has been gained in the use of hand tools, larger pieces are constructed with the use of power machinery. The student is given adequate instruction in the use and construction of the various machines before actual operation is begun.

Texts: Moore's "Manual Training Toys"; Noyes' "Handiwork in Wood"; Crawshaw's "Problems in Wood Turning."

Manual Training 3. Machine Drafting. 1 unit.

Lettering, elements of machine drafting consists of: Study of Practical Drafting Room Practice, Types of Screw Threads, Proportions of Standard Bolts and Nuts, Types of Fastenings, Drawing of Machine Parts from Life. Machine parts using Standardized Proportions.

All drawings will be made on detail paper, traced on imperial cloth. Each student must learn to make good blue-prints, using his own tracings.

Text: Jameson's "Elements of Mechanical Drawing."

Manual Training 4. Pattern Making. 1 unit.

This course will consist of Bench Work and Turned Patterns. The principal types of patterns will be studied and made. Students will make their own calculations for draft, shrinkage, rap, etc. Lectures will be given covering the work, these being accompanied by demonstrations in moulding.

Text: Purfield's "Wood Pattern-Making."

Manual Training 5. Foundry Work. 1 unit.

The molding and casting of simple castings. The use of the more complex patterns. Core making. Types of molds are covered by operations in the shop, by lectures, and by lantern slides. Management of the cupola furnace, such as charging, pouring, and its care.

Manual Training 6. Advance Machine Drafting. 1 unit.

This course includes the study of gears, cams, parallel motions, etc.; assembly and detail drawings of some large machines. If time permits, isometric and cavalier projections are studied.

Text: Mathewson's "Notes for Mechanical Drawing."

Manual Training 7. Architectural Drafting. 1 unit.

This course consists of architectural lettering, study of types of buildings and roofs, study and drawing in detail of frame construction, individual planning of bungalow, isometric and cavalier projection.

Manual Training 8. Forge Work. 1 unit.

Management of the forge, the making of fires, exercises in twisting, bending, lengthening, up setting, welding, tool forging, tempering, annealing, and case hardening. Heat treatment of metals. Practical applications.

Text: Bacon's "Hand Forging."

Manual Training 9. Method of Manual Training. 1 unit.

Historical review of the theories and practices of educational reformers, such as Pestalozzi, Froebel, and others. A review of the work

that has been done in this country, work that is now being done; study of present indications as to the probable future status of manual training in its relation with vocational training and the work of the trade schools.

The laws on the subject in this State as well as those of the most important States in the United States.

Method of teaching, planning of courses of study for manual training in grades and high school, study of equipments, proper installation of power machinery and their relative location for greatest efficiency, etc.

The work will be covered by text, lectures, lantern slides, and theses by the students.

Text: Rowe's "The Meaning of Manual Arts and Industries."

Manual Training 10. Mechanical Drawing. 1 unit.

Principles of mechanical and architectural drawing. The use of drawing instruments. Applications to farm problems. Working drawings are made of barns, silos, chicken houses and other problems in rural life.

Bulletins U. S. Department of Agriculture—Notes.

Manual Training 11. House and Cement Construction. 1 unit.

Frame house construction, roof construction, construction of models of buildings and problems designed in the drafting room.

Construction of concrete and cement forms. Discussions on the use of cement on the farm. Practical applications will be made by the construction of various forms as may be needed by the college.

Text: King's "Constructive Carpentry."

Manual Training 12. House and Cement Construction. 1 unit.

This course is a continuation of Manual Training 11. The work is similar to that already given, but the problems undertaken are more complicated and difficult.

DEPARTMENT OF MATHEMATICS.

PROF. BUTLER. PROF. PETERS. PROF. SMITH. PROF. DOWNER.

Mathematics 1. Elementary Algebra. 2 units.

Wentworth's New School Algebra during first two terms. A rapid review of factoring, multiples, fractions and linear systems. A thorough study of roots, radicals, exponents, quadratic equations and systems solvable by quadratic methods.

Mathematics 2. Plane Geometry. 1 unit.

Careful attention to the plan of presenting the subject to beginners. Drill and tests in the fundamental concepts of geometry. The use of the ruler and compass. Original exercises and problems. Wentworth and Smith's Plane Geometry, Book I.

Mathematics 3. Plane Geometry. 2 units.

Books II, III, IV, V of Wentworth and Smith's Plane Geometry during the first two terms.

Mathematics 4. Algebra. 1 unit.

Hawkes-Luby-Touton's Second Book in Algebra during third term. Short review of radicals, exponents, and quadratic equations. Followed by a thorough study of progressions, logarithms, ratio, proportion, variations, imaginary quantities, theory of quadratic equations, and the Binomial Theorem.

Mathematics 5. Higher Arithmetic. 1 unit.

Smith's Advanced Arithmetic during first term. A general review of arithmetic presented from the teacher's point of view.

Mathematics 6. Trigonometry. 2 units.

This course is a close study of the triangle, trigonometrical functions, formulas, their derivation, etc., solutions of problems and the practical application of the subject.

Wentworth's Plane Trigonometry.

Mathematics 7. Solid Geometry. 1 unit.

Wentworth and Smith's.

Mathematics 8. Surveying. 2 units.

Text-book: Barton's "Surveying."

The use of the compass. The use of tables, calculation of areas, platting, interpretation of field notes, practical field work.

Mathematics 9. Shop Mathematics. 1 unit.

This course is designed to correlate Manual Training and Mathematics. The work is given as presented in Breckenridge, Mersereau and Moore's "Shop Mathematics."

Mathematics 10. Analytics. 2 units.

Careful presentation of the work as presented in Smith and Gale's "Introduction to Analytic Geometry."

Mathematics 11. The Teaching of Mathematics. 1 unit.

A professional course for teachers of mathematics.

Text: Young's "Teaching of Mathematics."

In all the work in Mathematics three ends will be kept constantly in view:

First. To prepare teachers of the subject.

Second. To secure mental discipline and culture.

Third. To make mathematics a ready and useful instrument.

DEPARTMENT OF MUSIC.

The details of the work in Drawing and Music will be advertised at the beginning of the session. Some changes in the courses, etc., render it inadvisable to make definite announcement at the present time concerning the work of these departments.

DEPARTMENT OF PHYSICAL EDUCATION.

MISS HARRISS, PROF. ST. CLAIR.

The course in Physical Education aims to maintain and promote the health of the students and to furnish them with the principles underlying this training; to give them practical knowledge of a system of educational gymnastics, and to adapt their work to the varying conditions with which they may meet.

Systematic instruction is given concerning the means for keeping the body in health, for maintaining normal, progressive growth and development, for securing grace in posture, carriage, and action, and for developing a disposition to enter, with pleasure and profit, the various recreations so necessary in any phase of a successful life.

Free and unrestricted action of the body is essential to good mental and physical development. Accordingly, our young ladies are urged to wear hygienic clothing at all times. In the gymnasium, all students are expected to wear their gymnasium suits.

Physical Education 1. 1 unit.

Swedish Gymnastics. Floor work without apparatus.
Apparatus work on the "horse," buck and balance beams.
Folk dances.

Physical Education 2. 1 unit.

German Gymnastics. Floor work consisting of marching, breathing, movements for developing all parts of the body.

Apparatus work with dumb bells and Indian clubs, stall bars and rings. Folk dances.

Physical Education 3. 1 unit.

Lectures. Theory of play and playground supervision. Practice in playground supervision.

Physical Education 4. 1 unit.

Advanced Swedish Gymnastics both in floor and apparatus work.
Coaching of athletics. Folk dances.

All athletic sports are open to all students registered in the college. First term, foot ball and tennis. Second term, basket ball and tennis. Third term, base ball, tennis and track sports.

The requirements are the same in number of units for men and women, though the kind of exercises and sports differ.

Physical education is required of all classes and in all courses. Classes meet twice per week, when the work consists of exercises, sports, etc., and once a week, when the work consists of recitation, lecture, etc.

DEPARTMENT OF READING AND PUBLIC SPEAKING.

MISS PRICE.

Reading 1. 1 unit.

Instruction in correct breathing, correct pronunciation, reading from memory, and story telling.

Texts: King's "Elocutionary Reading and Graded Recitations," Ashmore's "Manual of Pronunciation."

Reading 2. 1 unit.

The work of Reading 1 continued. Instruction in the method of teaching primary reading. The use and place of phonics. Reading from memory and story telling.

Reading 3. 1 unit.

Continuation of Reading 2. Reading from memory.

Texts: Briggs and Coffman's "Reading in the Public Schools," King's "Practice of Speech."

Reading 4. 1 unit.

Correct breathing and voice culture continued. Extemporaneous speaking. Reading from memory.

Text: King's "Practice of Speech."

DEPARTMENT OF SCIENCE.

PROF. BORDEN. PROF. MASTERS. PROF. PENDER. PROF. LEGETT.

Science 1. Physical Geography. 1 unit.

1. The form of the earth and the outline of continents, with their relation to the industries and development of man. 2. The atmosphere; its temperature, pressure, movements, weather changes, weather maps, and climate. 3. The ocean; its importance, activities, and coast line. 4. The land; origin and development of its various forms, with their influence upon man. 5. Effect of man's environment upon his distribution, his habits, and his occupation.

Text: Tarr's "New Physical Geography."

Science 2. Physiology. 1 unit.

Physiology as the "Science of the Laws of Health" and "Sanitation" are the chief divisions of this course. A discussion of the subject rather than the text is required. Special emphasis is placed upon exercise, cleanliness, and proper eating as requisites of good health; upon the prevention and spread of disease; the use of narcotics; repair of injuries; and public hygiene and sanitation.

Text: Overton's "Applied Physiology: Advanced."

Science 3. Botany. 1 unit.

This is a course in the physiology of plants and the phenomena of plant growth. In the laboratory the student will begin with a study of seed germination and follow the development of the plant to its maturity and the fruitage period.

Science 4. Botany. 1 unit.

In this course enough time will be devoted to the morphology of the flowering plants to make pollination and fertilization intelligible to the pupil, but the major portion of the time will be given to a study of plant members, seeds and fruits. As soon as living plants are available in the spring, all of the laboratory work will be given to the collection and classification of plants. The pupil will become familiar with the principal families and gain a thorough working knowledge of the key to the groups and families of plants.

Text-book: Bergen's "Essentials of Botany," Chap. XXVIII to end of book.

Science 5. Physics. 1 unit.

Elementary Physics, Simple Machines, Mechanics of Liquids and Gases, Action of Forces, Elasticity and Strength of Materials, Accelerated Motion.

Lectures and demonstrations three hours per week; laboratory two hours per week.

Science 6. Physics. 1 unit.

Energy and Momentum, Heat, Heat Engines, Magnetism, Beginnings of Electricity, Electric Measurements and Measuring Instruments.

Lectures and demonstrations three hours per week; laboratory two hours per week.

Science 7. Physics. 1 unit.

Induced Currents, Dynamos, Motors, and Alternating Current Machines, Sound, and Light.

Lectures and demonstrations three hours per week; laboratory two hours per week.

Text-book: Black and Davis' "Practical Physics."

Science 8. Chemistry. 1 unit.

Oxygen, Hydrogen, and Nitrogen, together with some of their compounds, are studied. The laws of Boyle and Charles, the atomic theory and the theory of electrolytic dissociation, the laws of chemical combination, solutions, chemical equations, neutralization, and valence will be considered.

The time is equally divided between the laboratory and the recitation.

Science 9. Chemistry. 1 unit.

The Chlorine family, the Phosphorus family, Sulphur, Carbon, Silicon, Boron and some of their compounds are studied, and some of the rare non-metallic elements receive brief attention. Equilibrium, the Periodic law, molecular and atomic weights and the chemistry of the flame are included in this course.

Science 10. Chemistry. 1 unit.

In this will be included the study of the metallic elements, their more important compounds and the methods of reducing their ores, and, in addition, some time is given to identifying metallic and acid ions.

Text-book for Science 8, 9, and 10: McPherson and Henderson's "A Course in General Chemistry."

Science 11. Botany. 1 unit.

This is a course in the physiology of plants. Emphasis placed on the theories that explain the phenomena of growth as growth and plant action, itself. About two weeks' work is devoted to the methods of identifying plants of economic importance. A well equipped laboratory enables the students to observe the conditions and effects of germination, respiration, photosynthesis, tropism, etc.

Text-book: Bergen and Davis' "Principles of Botany," Part I.

Science 12. Botany. 1 unit.

In this course the general morphology of plants is studied, showing the development of plant members and the development of the differentiation of plant sex. The compound microscope is freely used by individual students. Freehand drawings of all microscopic work is required, together with notes on all laboratory work. Three recitations and two laboratory periods.

Text-book: Bergen and Davis' "Principles of Botany," Part II.

Science 13. Agricultural Chemistry. 2 units.

This course consists of the quantitative analysis of feed stuffs, fertilizers, soils, etc. The time allotted to this course is devoted chiefly to laboratory work.

Science 14. Household Chemistry. 1 unit.

The chemical composition of type foods, water, fats, proteins, minerals and carbohydrates. Chemistry of fuels and tests for textile fibres. Organic chemistry is given in explanation of the composition of compounds.

Text-book: Vult's "Laboratory Manual."

Science 15. Industrial Physics. 1 unit.

Study of gas engines, electric generators and motors, electric lighting and wiring; storage batteries; switchboards and power installation.

Science 16. Growth and Structure of Timber. 1 unit.

This course will consist of the treatment of the kinds and distributions of forests, kinds of timbers, structure and adaptability. Properties, such as shrinkage, warping, durability, etc., will receive principal attention. Brief consideration will be given to seasoning by different methods, treatment of woods, logging and milling, and the preservation of forests.

The work will be covered by text, lectures, lantern slides, and papers prepared by the student.

Science 17. Advanced Physics. 1 unit.

Mechanics, including vector analysis. Force and torque, energy transformations, moment of inertia, machines, power, and the kinetic energy of rotating masses. Heat, including calorimetry, kinetic theory of gases, and thermodynamics.

Science 18. Advanced Physics. 1 unit.

Electricity and magnetism, including electrostatics, electro-magnetism, electrical measuring instruments, electro-magnetic waves, and alternating generators.

Science 19. Advanced Physics. 1 unit.

Sound and light, in which optical instruments, dispersion, color phenomena, and polarization of light will receive special emphasis.

Text-book for Science 17, 18, and 19: "A Text-book in Physics." Spinney.

Science 20. Advanced Chemistry. 1 unit.

This is a course in qualitative chemical analysis and consists of four hours' laboratory work per week in preliminary reactions and analysis of the Alkali, Alkaline Earth, Aluminum and Zinc Groups, and two recitations per week, in which are studied these metallic groups, together with osmotic pressure and the theories of solution, ionization and equilibrium.

Science 21. Advanced Chemistry. 1 unit.

This course is a continuation of Science 20, and the same time is given to the recitation and the laboratory work as in that course. The Silver, Copper, and Arsenic Groups are studied, as are the metallic groups in Science 20, and, in addition, the reactions of the acid ions. The hydrolysis of salts and the theory of complex ions are discussed.

Science 22. Advanced Chemistry. 1 unit.

In this course greater time is given to laboratory work. Systematic analysis of the ions studied in the two preceding courses is practiced, and oxidation and reductions are discussed.

Text-book for Science 20, 21, and 22: "The Elements of Qualitative Chemical Analysis," Vols. I and II, Julius Stieglitz.

Science 23. Bacteriology. 1 unit.

The nature and conditions affecting the growth of bacteria, yeasts, and molds. The application of these facts to household sanitation.

Science 24. Biological Chemistry. 1 unit.

The composition and nutrition of the unit, i. e., the cell. The processes of fermentation; respiration; salivary, gastric, pancreatic, and intestinal digestion; absorption and excretion will be studied.

Science 25. Household Physics. 1 unit.

This course gives the principles of physics as applied in the home.

Text-book: Lynde's "Household Physics."

Science 26. Biology. 1 unit.

Introductory Study. Principles of Biology illustrated by Plants. The subject is considered under the following heads: biology the science of life; characteristics of living things; structure and life of a plant; comparison of animal and plant biology; forests and their conservation; classification of animals and plants.

Science 27. Biology. 1 unit.

Principles of Biology as illustrated by types of animals. Protozoa; worm-like animals; starfish; insects and allies; shell animals; introduction to the vertebrates.

Science 28. Biology. 1 unit.

Principles of biology applied to human structure and life. Human biology and classification of man; human physiology and activities; civic biology.

Two laboratory and three recitations throughout the year.

Text to be selected.

Science 29. Botany. 1 unit.

This is a course in plant ecology in which the economic phases of the subject are considered. The factors influencing vegetation types, the vegetation types and societies and their relation to the distribution and progress of man will be studied. Part of the time will be devoted to the study of representative families of the Angiosperms, and the pupil will become familiar with the methods of identifying and classifying plants.

Text-books: Atkinson's "College Botany," Parts IV and V; Coulter's "Botany of Western Texas."

TEXT-BOOKS.

PHYSICAL TRAINING AND ATHLETICS.

It is the duty of every school to provide opportunity for physical as well as for mental and moral development. The full education of the individual requires careful attention to the physical side. The course in physical education and the inter-class and inter-school contests in athletic sports are aimed to increase the capacity of the student for mental effort and to cultivate an interest in physical development.

A knowledge of athletics and school games and the ability to direct these properly are valuable acquisitions for the teacher.

The school has recently acquired about seven acres of land and prepared it for baseball, basketball, tennis, volley ball, and other games. The athletic interests are safeguarded by a Committee of the Faculty and an Association of the students, who keep the interest healthy, but sane and intelligent. Students are permitted to participate in inter-school contests only on condition that satisfactory work is done in their studies.

Beginning with the session of 1914-15 the Department of Physical Education was placed under the direction of Miss Harriss, a graduate of the University of Nebraska, who took a special course qualifying her for this phase of college work. The step taken in this matter a year ago has proved eminently satisfactory and now Mr. St. Clair has been chosen as the director of this work for the men attending the school, and have during the ensuing and subsequent sessions two divisions, the men and the women being instructed in separate classes.

KINDS OF CERTIFICATES GRANTED ON WORK DONE IN THE TEXAS STATE NORMAL SCHOOLS.

1. The student completing the work of the Freshman (first year) class receives a second grade certificate valid for six years.

2. The student completing the work of the Sophomore (second year) class receives a first grade certificate valid for six years.

3. The student completing the work of the Junior (third year) class receives a first grade certificate, stating which of the seven courses pursued and valid for six years.

4. The student completing the work of the Senior (fourth year) class receives a permanent certificate, stating the course pursued, which is valid during good behavior.

All certificates are issued by the State Department of Education. They bear the seal of the department and are signed by the State Superintendent of Public Instruction.

The student completing the work of the Senior class is awarded the diploma of the College. The diploma states the special course completed. It bears the seal of the College and is signed by the President.

DISCIPLINE.

Those entering a Normal School are expected to be of sufficient maturity and to have come with a purpose so serious and definite that espionage is unnecessary. By far the greater number of students who come here are eager, earnest, and industrious young men and women, who cheerfully comply with all regulations. But experience has demonstrated the necessity of having well defined regulations concerning the conduct at school and at the boarding places, for the guidance of those whose inclination or whose judgment renders proper direction necessary.

Upon matriculation the student is given a printed copy of the regulations concerning the conduct of students and he is requested not to register if unwilling to conform to the requirements. Whenever a student wilfully violates the regulations, ignores the efforts of the faculty to assist him in his character building, manifests a spirit of insubordination to authority, or shows himself out of harmony with the school and its ideals, he is advised that he is not in the right school and is requested to withdraw.

Continuance in school depends upon punctual class attendance and obedience to regulations. Students who must continually be admonished, restrained, reprimanded, or denied the usual privileges, are undesirable, and they will not be retained in the school.

The purpose of the school is to train teachers for the public schools of Texas, and it should not inflict upon the children of the State as teachers those whose character, habits of thought, or low ideals unfit them for directors and exemplars of the young.

To all those who are seeking opportunity to work under wholesome influences, favorable conditions, competent and sympathetic direction, is extended a hearty welcome. Those who are merely seeking diversion, change of environment, or increased social advantages, and those incapable or unwilling to lead the life of a student are advised—urged—to go elsewhere.

TERM REPORTS.

At the end of each term of twelve weeks a report of the work of the student for that term will be sent the parent or guardian.

EXPENSES.

Tuition is free.

Each student enrolling in the school during the regular nine months' session shall pay an incidental fee of \$15.00 upon entrance, and no other fees or charges shall be levied against or collected from any student, and each student is entitled to the free use of text-books furnished by the school, which books, if returned in satisfactory condition at a time designated by the President, shall entitle the student to a refund of \$2.00.

The payment of this fee of \$15.00 is to be made by the student upon entrance to the school. It is the only fee paid during the session of nine months. There are no additional fees for library, books, laboratory, Manual Training, Domestic Science, etc.

The fee is \$15.00 whether the student enters at the beginning of the session or near the close of the session, whether the student continues in school for the entire session or only a few days of the year. No part of the fee is refunded, except \$2.00 upon prompt return of books. In order to be entitled to the refund of \$2.00, the student must return the books used by him at the time designated for their return.

No one should ask exemption from or modification of the fee or its conditions. Neither discretion nor authority is given the President of the school to alter the terms or conditions of its payment.

BOARDING PLACES AND RATES.

The school has no dormitory. In proximity to the school there are between one hundred and fifty and two hundred good boarding and rooming houses. Every year the number of boarding houses is increased and the conveniences improved. Nearly all these houses have electric lights, sewerage, hot and cold water appliances, and are screened, while many have natural gas for cooking, heating, and lighting.

Students are permitted to select from an *approved* list their own boarding places. Frequent changes for trivial causes are discouraged and students, after the first ten days, may change their places of residence only with the consent of Prof. W. D. Butler of the faculty, who has charge of all matters pertaining to board.

Men and women student must have separate boarding and separate rooming houses.

A list of *approved* houses is furnished each student upon arrival at the school. No student is permitted to engage board at a house not on this list. Such list cannot be furnished the student in advance of

arrival, because (1) frequent changes and additions made in houses near the beginning of the session render it impracticable to make a complete list. (2) Such list would convey no useful information to one unacquainted with the topography of the town, and (3) it is not necessary for students to engage board in advance: there being always ample accommodations regardless of the number of students. Reports have at times become current that all boarding places have been filled before the beginning of the session or very soon thereafter. No student has, in the history of the school, been forced to leave for lack of board, and such report in future, if heard, should be promptly discredited.

Board and rooms cannot always be secured in the same house. More than half the students secure rooms at one place and meals at another. Because numerous houses make special provision for furnishing meals to large numbers, frequently more satisfactory conditions can be found by not insisting on having meals and rooms at the same place.

Approved Houses.—An approved boarding house is one that co-operates with the school, enforces the regulations concerning the conduct of students, exerts a good influence over the students, treats them kindly, but firmly, and affords good board with sanitary conditions.

Whenever it is found that the proprietor of a boarding house does not meet the requirements of an "approved house," fails or refuses to enforce the regulations and to report violations, the students are removed from such house.

All persons desiring to take Normal students as boarders must apply to the school in writing, stating the number of boarders desired, whether men or women, stating whether they offer rooms or meals, or both, giving rates in each case, and specifying the conveniences offered.

If upon application a boarding house is approved, it is placed on the approved list and the proprietor is furnished a printed copy of the regulations of the school.

Rates.—Rates of board (including rooms, meals, fuel, light, and bathing facilities) vary from fifteen to eighteen dollars per calendar month, owing to proximity to the school, and conveniences offered. A few houses charge somewhat more than the rates above quoted, but there are ample facilities at these rates.

Upon reaching Denton students should report at once to the office of the school, where a list of boarding houses will be furnished and their locations ascertained. No attention should be given those who advise the student to engage board before coming to the office.

Electric cars run from the railroad station to the Normal College.

STUDENT ORGANIZATIONS.

The work of the students during the session is rendered more effective and more pleasant by the vitalizing influence of those activities organized and maintained by the students themselves.

The young men have two literary societies, the R. E. Lee and the Reagan. The young ladies have the Mary Arden Club and the Current Literature Club.

During the summer session the young men conduct their Henry Grady Literary Society.

These clubs and societies have large attractive rooms for their meetings.

During each session are maintained an orchestra of several members and a band of thirty or more pieces. The Glee Club and the Treble Clef Club are popular and helpful musical clubs of the men and the women, respectively.

Other strong factors in the life of the students while here are the Young Men's Christian Association and the Young Women's Christian Association.

There are various clubs whose chief aim is the physical development of the students, as tennis, basketball, baseball clubs, etc.

The Oratorical Association is composed of representatives of all the literary societies, and the Athletic Association of representatives of all the physical culture societies of the school.

MUSICAL ORGANIZATIONS.

The school maintains a Band of twenty to thirty pieces each year, in which expert instruction is had without cost. An orchestra of several pieces is also organized each session. The Glee Club for young men and the Treble Clef Club for young women are large special classes in vocal music. All these organizations not only serve to break the monotony of every-day work, but in each of them valuable instruction is given and useful experience acquired.

STUDENT PUBLICATIONS.

The students of the school, through the various class organizations and societies, publish a monthly magazine, "The Normal Journal," the columns of which afford a fine opportunity for training in the different styles of composition and theme writing.

The year-book, called "The Yucca," is issued in May of each year. It has become a distinct feature of the school. It is not only a valuable souvenir of school days for all students, but it presents an excellent opportunity for practice in composition, invention, and decorative art.

THE LYCEUM COURSE.

The fact that preparation for complete living and good citizenship involves development and training of the social and esthetic nature, as well as the intellectual, is fully recognized in this college.

As a potent factor in this direction the Normal has always maintained a strong course of lectures and entertainments, each year secur-

ing the best available talent. Men and women of national reputation, famous as leaders in public life, noted artists, musicians, and writers have been secured, who have contributed much to the student's realization of the college purpose of helpfulness and spiritual uplift.

THE TEACHERS' RECOMMENDATION COMMITTEE.

A committee of the faculty, without fee or compensation of any kind, acts as a Teachers' Bureau for the purpose of aiding worthy students in finding employment upon leaving school and assisting school boards in finding competent teachers. This committee places every year several hundred teachers. Its service to school boards have proved satisfactory, and it receives applications from school officials every week in the year.

Any communication concerning the work addressed to the President or the Secretary of the school or to the Chairman of the Committee on Recommendations will receive prompt attention.

THE SUMMER SESSION.

The summer session of the North Texas State Normal begins about June 1st and closes about August 1st of each year. Two distinct schools are maintained, "The Summer School" and the "Summer Normal." Students of the different schools are taught in separate classes and do different classes of work. Students of the Summer School are applying for "credit" towards certificates or diplomas of the institution. Students of the Summer Normal review the subjects for examination for certificates issued by the State Superintendent of Public Instruction.

The general purpose of the summer session is to meet the demands and to reach the students that cannot be met during the regular session. There are in all sections of the State many teachers who, despite limited preparation, are doing good work in the cause of education. These teachers, barred by circumstances often from the advantages of college or normal schools, desire to broaden their scholarship, and increase their efficiency in school work. It is to this class that the summer session appeals. To these are offered the advantages of a large and competent faculty of specialists, the library, laboratories, apparatus, and equipments of the Normal College.

The Summer School Section.—The student registering in the summer school section does "credit work" towards a certificate or diploma of the school. The work of a summer term corresponds practically to that of a term of the regular session. The first summer the student attends he takes the work as outlined for the first term of the regular session in the course he elects, and similarly for each subsequent term. The work of the Senior (fourth year), the Junior (third year), and

the Sophomore (second year), in all seven courses is planned regularly as in the regular session. The work of the Freshman (first year) class may be taken with the summer normal section and in classes organized for "conditioned" students so as to prepare for entrance to the Sophomore class.

At the close of the summer session examinations are given for entrance to all classes of the regular session.

The Summer Normal Section.—For those who register in the Summer Normal section is offered a review of subjects required for the different grades of State certificates. The work of this section is conducted in compliance with the directions of the State Superintendent of Public Instruction, and the summer normal examinations for certificates conducted at such times as he designates.

The advantages offered teachers during the summer have been realized and appreciated, as evidenced by the increased attendance from year to year. The summer session of last season (1914) enrolled 1027 students.

DIRECTIONS TO STUDENTS APPLYING FOR ADMISSION.

Students should note the requirements for entrance, and understand that the school has no authority to admit them without implicit compliance with the directions of the Board of Regents. Students should not write asking that in their cases these requirements be not enforced on account of their age, experience, or other reason, for no such request can receive consideration.

Students should remember that the requirements for entrance and for certificates are the same in all the Texas State Normal Schools.

Credentials, certificates of promotion, etc., upon which entrance examinations are sought to be absolved must be documents signed officially by the proper authority.

Credentials, statements, certificates of promotion, to receive consideration must be from—

(a) High schools affiliated with colleges or universities previously named.

(b) High schools approved by the State Department of Education.

Students desiring to enter on examination, on certificate, diploma or promotion card from accredited high schools should report at the beginning of the session, and avoid trouble and delay in classification.

Credits are given only for full terms' work. Students entering late in the term find difficulty in being classified promptly and making up the work already done by the class.

A term is twelve weeks.

Students should not request exemptions not mentioned in the bulletin, as the school is without authority to grant such requests.

Diplomas, promotion cards, statements, etc., from schools not duly accredited should not be urged as exemptions from examination. This school has no authority to affiliate, accredit or approve schools of any kind.

The certificates granted by a State Normal School should not be confused with certificates obtained from Summer Normal Institutes and county boards of examination.

Certificates granted by State Normal Schools may be built upon for higher certificates, but the Normal Schools do not grant certificates to applicants by simply "taking the additional subjects" for higher certificates.

CITY OF DENTON.

Denton is a city of churches, schools, and beautiful homes.

It is on the Texas & Pacific and the Missouri, Kansas & Texas Railroads, thirty-five miles from Fort Worth and thirty-seven miles from Dallas and accessible from all sections of the State.

Denton has an efficient system of public schools, three ward schools and a high school building. Two State educational institutions are located here.

Denton has a population of more than six thousand. It has free mail delivery, two telephone exchanges, and a system of electric street cars. The city owns and maintains an electric light and power plant, waterworks, and sewer system. It has natural gas for light and fuel. So Denton, with its railroads, telegraph and telephone connections, street cars, ice manufactory, fire department, waterworks, local telephones, sewerage and natural gas, lacks none of the public utilities enjoyed by much larger cities.

THE TRAINING SCHOOL.

In connection with the Normal School proper is conducted a school of nine grades. The purpose of this school is to afford the Normal students the opportunity of observing the organization, conduct, control, instruction, and other details of a model public school, and to give students actual practice and experience in teaching under expert direction.

The experience thus acquired is far more helpful and valuable to the teacher than that gained in the usual haphazard method upon which the young teacher depends when he starts out for himself either in the grades or in the rural schools.

The completion of the work of the ninth grade in the Training School admits the students to the Freshman class of the College without examination.

Until a more commodious building and a greater number of teachers can be provided by appropriation, each teacher, except that of the first grade, will have charge of two grades. All these are experienced and trained teachers. A technically trained and experienced director is in charge of the entire instruction.

The Training School is designed to give the students of the Normal College careful training in the art of teaching in the grades. Each

student in the Normal School department is required to teach at least one term before graduation, under the supervision and instruction of the director and the training teachers.

The different members of the Normal School faculty and the teachers in the Training School give "model" recitations with criticisms and discussions of the work in the different subjects.

In some cases the daily observation and criticism of classes followed by oral or written discussion, or both, may be substituted for a term of teaching by the student.

While actual teaching in the Training School is required only of members of the Senior class, members of the other classes are required to do observation work, prepare lesson plans, etc. Each student teacher is required to prepare lesson plans a week in advance of the work, which plans are examined, criticised, and, when necessary, revised by the director or training teachers. The conduct of recitations by the student teacher is observed by the training teacher, and helpful criticisms given in private.

Students of the Normal School department are also appointed to superintend the playground of the Training School during recess periods.

Admission to the Training School.—Pupils from any section of Texas may be admitted to the Training School until the limit, sixteen to a grade, is reached.

The Training School is closely correlated with the public schools of Denton. There is cordial co-operation with the School Board, the Superintendent and the corps of teachers of the public schools.

At the beginning of the session pupils will be admitted on promotion cards from the public schools, or classified by examination, but after the school year begins all transfers from the public schools are discouraged, and pupils suspended from other schools and those who leave school on account of having been disciplined are not desired.

Tuition in the Training School is free, nor is there any incidental or other fee. The "per capita" apportionment by the State is not transferred to the school, its expenses being met by regular appropriations, hence we reserve the right to refuse or to dismiss pupils who, from irregular attendance, habits, persistent misconduct, or inability, prove burdensome to the class.

COURSE OF STUDY IN THE TRAINING SCHOOL.

GRADE I.

English: 1. Reading. 2. Spelling. 3. Phonics. 4. Language.

Number Work: 1. Counting. 2. Addition to 10. 3. Subtraction. 4. Simple measures.

Social and Industrial Life: 1. The home and community. 2. Industrial and fine arts. 3. Plant and animal life.

Music: 1. Rhythm. 2. Tone. 3. Scale. 4. Musical games.

GRADE II.

English: 1. Reading and literature. 2. Language. 3. Spelling and phonics.

Arithmetic: 1. Counting. 2. Forty-five combinations. 3. Multiplication through the 5's. 4. Division as inverse of multiplication. 5. Measurements. 6. Simple fractional parts. 7. Analysis.

Social and Industrial Life: 1. Industrial and fine arts. 2. Nature study, birds, trees, insects. 3. Home and community. 4. Pre-historic life.

Music: 1. Rhythm. 2. Tone. 3. Key quality. 4. Appreciation.

GRADE III.

English: 1. Reading and literature. 2. Language. 3. Spelling. 4. Phonics.

Arithmetic: 1. Counting. 2. Addition and subtraction. 3. Multiplication and division. 4. Measurements. 5. Simple fractional forms. 6. Problems.

Texas Geography.

Hebrew History Stories.

Industrial and Fine Arts.

Music, including appreciation.

GRADE IV.

English: 1. Reading and literature. 2. Language and composition. 3. Spelling.

Arithmetic: 1. Counting. 2. The four fundamental operations. 3. Roman notation to 500. 4. Measures. 5. Fractions. 6. Practical problems.

Geography: 1. Home geography. 2. The world as a whole. 3. United States—type studies.

History: Greek and early Roman life.

Studies in Universal Life: 1. Stars and planets. 2. Mother earth—soil—air—water—interdependence of life.

Industrial and Fine Arts.

Music.

GRADE V.

English: 1. Reading and literature. 2. Language and composition. 3. Spelling.

Arithmetic: 1. The four fundamental operations. 2. Fractions—common and decimal. 3. Problems.

Geography: 1. Europe. 2. Australia. 3. Certain phases of United States. 4. Simple presentation of latitude and longitude.

History: Late Roman, Mediæval, and English life to 1492.

Studies in Universal Life: 1. Common wayside things. 2. Man's dominion. 3. Our wonderful bodies. 4. The dwelling place of man's spirit.

Industrial and Fine Arts.

Music.

GRADE VI.

English: 1. Appreciative reading and literature. 2. Composition and grammar.

Arithmetic: 1. Constant review of fundamental operations. 2. Counting by aliquot parts. 3. Denominate numbers. 4. Percentage. 5. Problems.

Geography: 1. Asia. 2. Africa. 3. South America.

History: 1. Texas (half year). 2. United States, to Revolution (half year).

Physiology.

Industrial and Fine Arts.

Music.

GRADE VII.

English: 1. Appreciative reading and literature. 2. Composition. 3. Grammar.

Arithmetic: 1. Percentage as used in business. 2. Ratio and proportion. 3. Mensuration. 4. Problems.

Geography: 1. North America (in detail). 2. Europe (in detail). Emphasis on immigration problems.

History: United States (industrial side emphasized). Civics.

Elementary Agriculture.

Industrial and Fine Arts.

Music.

GRADE VIII.

English: 1. Literature. 2. Composition. 3. Grammar.

Mathematics: 1. Algebra through fractions. 2. Mensuration. 3. Problems.

Ancient History.

First Year Science.

Industrial and Fine Arts or Latin.

Music.

GRADE IX.

English: 1. Literature. 2. Composition. 3. Grammar.

Algebra.

Biology: 1. Plants. 2. Animals. 3. Man.

Mediæval History.

Industrial or Fine Arts or Latin.

Music.

STUDENTS ENROLLED IN TRAINING SCHOOL.

SESSION 1914-1915.

FIRST GRADE

Barrow, Cassie May
Bates, Louise
Caddell, Marion
Clayton, Ella Margaret
Mahan, Francis
Martin, Mary
Myers, Maries

Orr, Thelma
Poole, Lawrence
Preston, Harry
Raines, R. K., Jr.
Rayzor, Eva Katherine
Shepard, Harwell
Skaggs, Winnie

Smith, Dorothy
Stout, Myron
Sullivan, Eunice
Tabor, Eldredge
Taliaferro, Evelyn
Yerby, Weldon

SECOND GRADE

Blair, Lora
Davis, Lloyd
Edwards, William
Floyd, Dora
Goldsberry, Doris
Hennen, Urbane

Jones, Owsley
Lomax, Robert
Loury, Lois
Marriott, Rhea
Pettit, Nell
Phinizy, John Allen

Simmons, Gregg
Smith, Bonnie
Smith, Margaret
Underwood, Frederick
Willis, Helen

THIRD GRADE

Bailey, Helen
Blair, Nina
Bradshaw, Ella
Christal, Nancy
Conely, Margaret

Crawford, Jack
Mahan, Hazel
Myers, Robert
Ponder, James
Preston, Terry
Schweer, Frederick

Smith, Ruth
Smoot, Elaine
Sullivan, Law
Williams, Julia
Woodward, Frances

FOURTH GRADE

Bates, Richard
Borden, L. D.
Caddell, Harry
Crawford, Ruth
Davis, Thomas

Fulton, Richard
Jones, Arthur
Lomax, Elizabeth
Long, Frances Mae
Overall, Auburn
Peters, Cassa

Reynolds, Mary
Simmons, James
Sims, Ben O.
Smith, Willis
Taylor, Corless

FIFTH GRADE

Bradley, Mayme Jack
Burgoon, Buford
Edwards, Virginia
Fullingim, Vala
Myers, De Witt

McBride, Gertrude

CALENDAR FOR 1916-17.

First Term.

Faculty meeting, Saturday, September 16, 1916, at 9 a. m.

Registration of new pupils begins Saturday, September 16, at 1:30 p. m.

Registration of new pupils, entrance and condition examinations, and classification of students upon credentials, Monday, Tuesday and Wednesday, September 18, 19, and 20.

Registration of former students, Wednesday, September 20.

All assemble in Auditorium Thursday, September 21, at 10 a. m.

Formation of classes and beginning of recitations Thursday, September 21, at 1:30 p. m.

Entrance and condition examinations Friday and Saturday, December 1 and 2.

Thanksgiving holiday Thursday, November 30.

First term ends Saturday, December 9, 1916.

Second Term.

Second term begins Tuesday, December 12, 1916.

School dismissed for Christmas holidays, Friday, December 22, 1916.

School reassembles Tuesday, January 2, 1917.

Entrance and condition examinations Thursday, Friday and Saturday, February 22, 23, and 24, 1917.

Second term ends Saturday, March 3, 1917.

Third Term.

Third term begins Tuesday, March 6, 1917.

San Jacinto holiday, Thursday, April 21, 1917.

Entrance and condition examinations, Thursday, Friday and Saturday, May 10, 11, and 12, 1917.

Session 1916-17 closes Tuesday, May 29, 1917.

NOTICE TO STUDENTS.

When students arrive in Denton, they should take the street car and come at once to the Normal College office, where a Faculty Committee will assist them in securing suitable boarding places.

Students coming for the first time, and also former students who have conditions to be removed, should reach Denton not later than Saturday, September 16, in order to be ready for examinations and classification on Monday, September 18.

Former students already classified and without conditions should report for registration Wednesday, September 20.

It is important that students come at the times above specified, and thus avoid delay in classification.

FACULTY FOR 1916-17.

W. H. BRUCE, *President*.

A. B., Alabama Polytechnic Institute; A. M., Baylor University;
Ph D., Mercer University. Present position since October, 1906.

L. D. BORDEN, *Physics*.

B. S., Southwestern University; A. B., University of Nashville.
Present position since September, 1901.

MISS ANNIE WEBB BLANTON, *English*.

B. Lit., University of Texas. Present position since September,
1901.

MISS M. ANNE MOORE, *Education*.

M. L., Southwestern University; A. B., University of Chicago.
Present position since September, 1901.

MISS EMMA MITCHELL, *History*.

Aiken Institute, Paris, Texas. Student University of Chicago.
Present position since September, 1901.

MISS EDITH LANIER CLARK, Dean of Women, *English*.

B. Lit. and A. M., University of Texas. Present position since
September, 1902.

J. H. LEGETT, *Agriculture*.

Graduate North Texas State Normal College, 1905. Present
position since November, 1905.

MISS ELIZABETH ALGER HILLYAR, *Drawing*.

Woman's Art School of New York, 1904. Diploma Columbia
University, 1915. Present position since 1906.

N. D. BUTLER, Dean, *Mathematics*.

A. B. and A. M., Bethel (Kentucky) College. Graduate student
one year Johns Hopkins University. Present position since Octo-
ber, 1906.

R. SWENSON, *Education*.

A. B., University of Denver; A. M., University of Texas. Grad-
uate student, Columbia University, 1905-06 and 1906-07. Present
position since September, 1907.

T. E. PETERS, *Mathematics*.

A. B. and A. M., Greenville (Kentucky) College. Present position since January, 1908.

C. L. DAVIS, *Agriculture*.

B. S., University of Tennessee; M. S., University of Wisconsin. Present position since September, 1909.

J. W. SMITH, Treasurer, *Mathematics*.

Student University of Texas. Present position since September, 1909.

P. E. McDONALD, Associate Dean, *Latin*.

A. B., University of Nashville; L. I., Peabody Normal College. Present position since November, 1909.

E. D. CRIDDLE, *History*.

B. Lit., University of Texas. Present position since November 1909.

W. N. MASTERS, *Chemistry*.

B. S. and A. B., National Normal University, Lebanon, Ohio. Present position since September, 1910.

E. L. ANDERSON, *German*.

A. B., University of West Virginia, 1905. Student Leland Stanford University, 1901-02, 1902-03. Student Marburg University, Germany, summer 1905. Student Columbia University, 1908-09. Present position since September, 1912.

MISS CORA BELLE WILSON, *History*.

A. B., University of Nashville; L. I., Peabody Normal College. A. M., Columbia University. Present position since September 1912.

HUGO J. P. VITZ, *Manual Training*.

B. S., Purdue University. Present position since September 1912.

MISS BLANCHE E. SHAFFER, *Home Economics*.

B. S., Columbia University. Graduate State Normal School Oneonto, New York. Present position since September, 1912.

MISS MARGARET W. PRICE, *Reading*.

Graduate Rogersville (Tennessee) Synodical College. Graduate King's School of Oratory, Pittsburg, Pennsylvania. Present position since September, 1912.

MISS CLARA M. PARKER, Associate Dean of Women, *English*.

A. B., University of Texas. Present position since June, 1912.

J. P. DOWNER, *Mathematics*.

A. B., Cumberland University. Present position since September, 1913.

J. W. PENDER, *Civics*.

A. B., Grayson College. Present position since September, 1913.

MISS ROSALIE V. RATHBONE, *Home Economics*.

Graduate College of Industrial Arts, 1911. Present position since September, 1913.

MISS MAUDE L. FIERO, *Education, Director of Training School*.

B. S., Columbia University, Graduate State Normal School, New Platz, New York. Present position since January, 1914.

MISS BEULAH A. HARRISS, *Physical Education*.

A. B., University of Nebraska. Graduate State Normal School, Peru, Nebraska. Present position since September, 1914.

MISS MARY C. SWEET, *English*.

A. B., Daniel Baker College; A. B., University of Texas. Present position since November, 1914.

MISS BURTIE J. ATTWELL, *English*.

A. B., University of Texas. Student University of Cambridge, England, and Sorbonne University, Paris, France. Present position since September, 1915.

MISS LILLIAN M. PARRILL, *Music*.

Graduate American Institute of Normal Methods, Northwestern University. Pupil Oscar Saenger, New York City. Pupil Chas. C. Washburne, Nashville, Tennessee. Present position since September, 1915.

J. W. ST. CLAIR, *Physical Education and Director of Athletics*.

A. B., Baylor University. Present position since September, 1915.

B. B. HARRIS, *Biology*.

B. S., Clemson A. and M. College of South Carolina. Present position since June, 1916.

S. S. MCKAY, *History and Athletics*.

A. B., University of Texas. Present position since June, 1916.

A. E. CHRISLIP, *Education*.

A. B., University of Nashville; L. I., Peabody Normal College; A. M., Columbia University; Master's Diploma in Education, Teachers' College; Graduate Student in Columbia University, 1910-13. Present position begins September, 1916.

MISS FLORA WILKIN, *Drawing*.

Student University of Chicago. Present position begins September, 1916.

MISS BETTIE HUNT, *Home Economics*.

A. B., University of Tennessee. Graduate student Columbia University. Present position begins September, 1916.

MISS MARY ANDERSON, *Music*.

B. Mus., Baylor University. Student two years conservatory Leipsig.

TEACHERS OF TRAINING SCHOOL.

L. P. FLOYD, *Principal of Training School and Ninth Grade*.

Graduate North Texas State Normal College. Present position since September, 1914.

W. E. JAMES, *Eighth Grade*.

Graduate North Texas State Normal College. Present position since September, 1914.

MISS WILLIE M. FLOYD, *Sixth and Seventh Grades*.

Graduate High School, Ardmore, Oklahoma. Present position since January, 1914.

MISS LETA BROOKS, *Fourth and Fifth Grades*.

Graduate North Texas State Normal College. Present position since January, 1914.

MISS GLADYS LINSDAY, *Second and Third Grades*.

Graduate North Texas State Normal College.

MRS. CORA M. MARTIN, *First Grade*.

Graduate North Texas State Normal College. Present position since January, 1914.

MRS. PEARL CARDEN MCCracken, *Librarian*.

Graduate Normal School, Glasgow, Kentucky. Present position since February, 1903.

MISS HIXIE PITTMAN, *Assistant Librarian*.

Graduate North Texas State Normal College. Present position since September, 1915.

A. C. MCGINNIS, *Registrar*.

Graduate Draughon's Business College, Dallas; Graduate Toby Business College, Waco. Present position since September, 1915.

MISS GERTRUDE WEAR, *Office Assistant*.

Graduate Selvidge Business College, Ardmore, Oklahoma. Present position since February, 1915.

J. E. HUDSPETH, *Secretary and Bookkeeper*.

Graduate Metropolitan Business College, Dallas, Texas. Present position begins September, 1916.

NORTH TEXAS STATE NORMAL COLLEGE.

THE PURPOSE OF THE INSTITUTION.

Wherever a system of education is maintained, inefficiency of the teaching force is expensive from a strictly financial viewpoint. Inefficiency is always extravagant and wasteful. State normal schools have been the natural outgrowth of the policy of public education.

The purpose of a normal school is to educate teachers, to increase the skill and efficiency of this class of public servants. By properly training those to whom the education of the children of the public schools is to be entrusted not only is the investment of the public school fund made more profitable, but the business of teaching is made more professional and respectable in all its aspects, retaining in its ranks for a longer time a greater number of the intellectually strong and capable. The unskilled and untrained seldom love their vocation; they lack enthusiasm and inspiration; they fail to acquire power or influence and to feel consecration; and they soon abandon their work for one of less responsibility.

It is the province of the normal school to prepare men and women, not only to teach subject matter, but to inspire and stimulate the pupil from within, to exemplify the character and the culture whose roots sink deep into the source springs of thought and feeling. The normal school must have its students comprehend the responsibilities of leadership, the principles of mind development, the laws that correlate and harmonize the physical, the mental, and the spiritual.

The normal school exists primarily not for the benefit of its own students, but for that of all the pupils of the public schools and the whole people. It justifies its existence as an institution to be supported by legislative appropriation in proportion to its fidelity in meeting its obligations to the State.

To fulfill its mission in the fullest sense the normal school is more than the high school, the college, the industrial school, or the technical training school. It must combine the qualities of all these. It must afford academic instruction; it must develop culture and scholarship; it must train for the practical everyday problems of society, the home, and the State.

The courses of study, the regulations governing the school, and the methods of instruction used in the classroom, the laboratory, and the playground, keep constantly in view the mission of the school: the instruction, the training, the inspiration, and the development of the character of the future teachers, directors, leaders, and exemplars of the young; the careful supervision and sympathetic direction of the student life and work in the school, on the campus, and in the boarding home, so as to induce those habits of thought that make intelligent and reliable

workmen and citizens. The personal influence of the teacher is by far the greatest factor in the education of children, therefore the normal school must strive to incite those feelings and to inspire those thoughts and ideals that lead to right conduct through life.

In selecting a faculty for the school the utmost care is always exercised. Character, personal influence for good, scholarship, ability, willingness to work, and successful experience are always carefully considered. The normal school faculty is no place for a teacher weak in any one of these particulars. The student in a normal school should never come under the influence of a weak, insipid, inefficient or indifferent teacher.

BUILDINGS.

ADMINISTRATION BUILDING.

In 1903 this building was constructed at a cost of approximately \$60,000, including plumbing, electric wiring, etc. It is a brick building, with basement and two stories. It contains the administration offices, auditorium, and several recitation rooms.

SCIENCE BUILDING.

In 1910 the Science Building was constructed at a cost, not including equipment, of \$35,000. It is a fireproof brick and reinforced concrete structure of three floors. It contains a teachers' office, lecture room, recitation rooms, biological and agricultural laboratory, two physics laboratories, two chemical laboratories, storerooms, etc.

LIBRARY BUILDING.

In 1913 the Library Building was completed. It is a fireproof brick, reinforced concrete and steel structure, erected at a cost of \$55,000. Recently it has been equipped at a cost of \$10,000, with modern shelving of steel, and reading tables, chairs, and Librarian's desk of antique oak. In addition to the stack room and a reading room for men and one for women, it contains several recitation rooms, teachers' office, etc.

MANUAL ARTS BUILDING.

In 1914 a commodious fireproof building was completed for the Departments of Manual Training and Home Economics. It has recently been equipped with the most modern appliances for teaching all phases of Domestic Science and Art and Manual Training. The cost of the building and equipment was \$65,000.

TRAINING SCHOOL BUILDING.

In January, 1914, on a part of a tract of land acquired for athletic grounds, a seven-room frame building was completed for temporary quarters for the Training School.

CENTRAL HEATING PLANT.

In 1915 a central heating plant was constructed at a cost of \$35,000. It supplies heat to the Administration, Science, Library, and Manual Arts Buildings. These buildings are provided with Johnson's automatic heat regulation service.

GROUNDS.

The Campus proper consists of a ten-acre tract, upon which are the Administration, the Science, the Library, and the Manual Arts Buildings, and the Central Heating Plant and President's residence.

One block removed from the Campus the school has a plot of four acres, which is used for basketball and tennis. On this is located also the temporary building for the Training School.

Across the street from the last mentioned grounds is the athletic park of two acres, which is provided with a grandstand of one thousand seating capacity.

The school also owns two and one-half acres of land which is used as a school garden, where pupils in Agriculture are taught the breeding and cultivation of plants, the proper preparation of soils, methods of applying fertilizers, etc.

EQUIPMENTS.

In addition to the usual and necessary supply of desks, blackboards, maps, etc., the school has chemical, physical, botanical, agricultural, and domestic science laboratories, workshops, lathes, circular and band saws, planing machine, etc., for manual training, engine for power and light, stereopticons, camera, pianos, and organs.

All buildings are electric lighted, steam heated, and connected with the city sewer. The main building is supplied with electric fans. The laboratories and the cooking room of the Home Economics Department are connected with the natural gas pipes that supply the city. The offices have telephone connection with two systems, both local and long distance.

ENTRANCE REQUIREMENTS TO TEXAS STATE NORMAL SCHOOLS.

1. *Uniform Requirements.*—The requirements for entrance to the various classes of the four State Normal Schools of Texas are uniform, as directed by the State Normal School Board of Regents.

2. *Age.*—Any person who is sixteen years of age on or before January 1st of the school year may enter a State Normal School at the beginning of the fall term, or at any suitable time during the school year.

3. *First Year (Freshman) Class.*—Applicants for entrance to the first year (freshman) class must be examined in algebra to quadratics, arithmetic, composition, grammar, and United States history. A second

grade State certificate exempts the holder from examination in all the subjects mentioned except algebra and composition; the completion of the *ninth grade* of an affiliated or approved high school exempts from examination for entrance to this class.

4. *The Second Year (Sophomore) Class.*—Applicants for entrance to the second year (sophomore) class must be examined in all the work of the freshman class for the appropriate courses with the following exceptions: A first grade State certificate exempts from all examinations for entrance to this class; a permanent primary certificate exempts from examination in all subjects required for entrance to the second year (sophomore) class, except in algebra and geometry of the first year; a second grade State certificate exempts from all examinations for entrance in agriculture, physiology, reading and school management; the completion of the *tenth grade* of an affiliated or approved high school exempts from all examinations for entrance to the sophomore class.

5. *The Third Year (Junior) Class.*—Applicants for entrance to the third year (junior) class must be examined in all the work of the second year (sophomore) class for the appropriate courses, with the following exceptions: Applicants for entrance to the junior class, holding a first grade State certificate, will receive entrance credit for ten units; a permanent certificate exempts from all examinations to the third year (junior) class. Graduation from a high school affiliated with the University of Texas admits to the junior class without examination, provided the student presents, on the Uniform Entrance Certificate, a statement of his work from the superintendent or principal, showing the completion of not less than fourteen (14) standard admission units in which the school is affiliated. If the number of units to which the statement entitles the holder is less than fourteen units, the deficiency must be made up by examination. Graduation from an approved high school of the first class exempts from examinations in subjects aggregating not more than ten units of sophomore work.

6. *The Fourth Year (Senior) Class.*—Applicants for entrance to the fourth year (senior) class must be examined in all the work of the sophomore (second) year and the third (junior) year class for the appropriate course. The completion of one year's work in a recognized college or university exempts from entrance examinations to the fourth year (senior) class.

7. *Time of Examination.*—Applicants for the first year (freshman) class must be examined upon entrance in all required subjects; applicants for admission to the other classes must be examined upon entrance in the required English, history, mathematics, and science, and may defer examinations in other subjects to the middle of the session. These regulations apply to students from affiliated or accredited high schools who may be admitted partly by examination as well as to students who enter by examinations solely.

8. *Credits from Other Institutions.*—Entrance credits for work done in any college or university are determined by the President of the Normal School. Work completed satisfactorily in any one of the Texas State Normal Schools is fully recognized by the others. Those completing the work of the first year in one normal school are admitted to the second year class in any State Normal School in Texas, and similarly to other classes; provided, that of the fifteen units required for a certificate, at least five must be made in the normal school that issues the certificate, and provided also that the entire fifteen units required for the fourth year (senior) class must be made in the normal school that issues the diploma. Only "entrance credits" are given for work done in schools other than the Texas State Normal Schools.

9. *The Unit of Work.*—The unit of work is forty-eight recitations.

10. *The Term's Work.*—The work of a term shall be five units, or four recitations per week in each of five subjects, and in addition thereto two recitations per week in physical education.

11. *The Session's Work.*—The work of a session is sixteen units, one unit of which is in physical education.

12. *Credentials.*—Credentials entitling the holder to exemption from examinations must be official statements signed by proper authorities. Promotion cards and diplomas from high schools and colleges must be accompanied by official statements of the work completed by the student, and signed by the superintendent, principal, or president. Work in a grade partially completed is not considered for entrance or credit.

13. *Recognized Colleges.*—The University of Texas, Baylor University, Southwestern University, Texas Christian University, Trinity University, Rice Institute, and Austin College, and those recognized by them as standard colleges, are recognized colleges and universities, affiliation with which is approved.

14. *High Schools.*—"Approved" high schools are those accredited by the State Department of Education; "affiliated" high schools are those accredited by the University of Texas or other "recognized" institutions.

15. *Electives.*—There are no "free electives." Each student on entering must elect one of the seven courses offered. In all courses there is an option between music and drawing. In the Language and the History-English courses there is an option among Latin, German and Spanish. In all courses three units in either manual training or home economics may be substituted or a sufficient number of foreign language units to satisfy university entrance requirements, by permission of the President, may be substituted for the same number of units of other subjects.

All electives or substitutions must be made upon entering the school.

RECOGNITION OF THE NORMAL SCHOOLS BY THE COLLEGES AND UNIVERSITIES.

The following report on the present status of the Normal Schools has been received from the University of Texas as the action of the Committee on Admission from Other Colleges:

"ADMISSION OF STUDENTS FROM THE FOUR STATE NORMALS.

"Students desiring admission from one of the State normal schools must fulfill the same requirements as students from other colleges, except that normal students are allowed to count for admission some subjects not specified as admission units by the University of Texas.

"Students who graduated from the State Normal Schools before 1914 will be given full admission, and, in addition, one unspecified course toward a degree.

"Students attending the State Normal Schools during and after the session of 1913-14 will receive credit as follows:

"Credit will be given only for full years of work.

"On completion of the second year, students will be given fourteen admission units, provided three units in one foreign language or two in each of two foreign languages (other than Latin) are included. If foreign language units are not included, only twelve admission units will be allowed.

"On completion of the third year, students will be given fourteen admission units as provided for at the end of the second year; and, in addition, five college courses, provided (1) the student completed the entire second and third year at the normal schools, or (2) was admitted to the normal school with at least fourteen units' credit as a graduate of a school affiliated with the University of Texas, or (3) was admitted by examination covering either the second year's entire course of study in the normal school or fourteen admission units accepted by the University of Texas. In case students were admitted to the third year class with credit for only twelve admission units, they will receive only twelve admission units and five college courses by reason of their completion of the third year normal course.

"On completion of the fourth year, students will be given fourteen admission units as provided for at the end of the second year, and, in addition, ten college courses, provided the student (1) completed the third year at the normal school, subject to the above mentioned conditions for admission to the third year; or (2) was admitted to the fourth year by examination covering the entire course of study of the second and third years, or covering the required admission units to the University of Texas and the entire course of study of the third year; or (3) was admitted to the fourth year by reason of having creditably completed an entire year of work in a recognized college; and, in addition, presented the equivalent of full admission to the University of Texas. In case students present only twelve admission units on entering the fourth year, they will be allowed only twelve admission units and ten college courses on completing the fourth year.

"Students, however, who were admitted to the fourth year by reason of graduation from a State Normal School prior to 1914 will be credited with only six college courses in addition to the fourteen admission units as provided for at the end of the second year.

"It is to be noted that the course credits offered cannot be specified as to subjects in advance. They can be specified only after examination of the work done in each individual case. Unspecified credits will count towards University degrees as elective courses, but will not satisfy specific degree requirements. It may result from this that a student from a normal school admitted to the University with five college courses' credit will find it necessary to complete more than fifteen additional courses in order to secure the bachelor's degree; a student admitted with ten courses, to complete more than ten additional courses.

"As in the case of students from other colleges, all credits given to students from the normal schools are conditional and may be reduced after the student matriculates in the University of Texas."

THE COURSES OF STUDY.

When education was a class distinction the curriculum of the school was narrow, rigid, and non-adaptable. Today we endeavor to educate all the children of all the people for the combined reason of the children's natural right, the State's political necessity, and the economic wisdom of the commonwealth. The modern university answers the public need with a multitude of courses of subjects of study, for the most part elective, with only certain requirements to insure breadth and thoroughness. For general culture and for the varied activities of social life, this elective system is to be commended.

But the definite field of the normal school is to prepare the teachers demanded by our public school system. This work does not require so wide a field of possible selection, and in general restricts the curriculum requisite for any student to four lines of culture material. These four are: First, the mother tongue as the universal medium of culture, its structure, its proper use, and its heritage of literature; second, the subjects dealing with the profession of teaching, its philosophical and scientific bases, and their practical applications; third, the line of subject matter that the prospective teacher expects to teach; and, fourth, certain minor subjects in each course selected from the majors of other courses for purposes of general culture and information. It is really only in the third class that there is need for marked differentiation.

These varying requirements are then best fulfilled by the organization of certain definite courses, co-ordinate and equivalent, but varying as to purpose, and hence as to the matter included in the above mentioned third class.

For these reasons the curriculum of the North Texas State Normal College is organized into the following seven courses:

- I. The *Agriculture Course*, for the training of teachers of agriculture and of the biological and physical sciences upon which this great industry and art is based. It especially aims at the preparation of principals of consolidated schools and rural high schools.
- II. The *Home Economics Course* to prepare for the teaching of the home arts and sciences in schools of any grade. This course is exclusively for women.
- III. The *Manual Training Course* for the preparation of teachers of the manual arts and vocational education.
- IV. The *Language Course*, in which the student may select Latin, German, or Spanish, for the preparation of teachers of these languages for our public and high schools, and also for those who desire the foundation for higher classical and scientific education, or who may wish to learn modern foreign languages for the purposes of business and travel.
- V. The *Science Course* to supply the need for teachers of mathematics and science in high schools and for departmental teachers and principals of elementary schools.

VI. The *Primary and Arts Course* to train teachers for the primary and intermediate grades of elementary schools, and more particularly to supply the growing demand for departmental teachers of music and drawing, and supervisors of these subjects in city school systems. This is also exclusively a women's course.

VII. The *History-English Course*, for the preparation of teachers of history and English in high schools and the higher grades of elementary schools, and for those who desire to divide their attention between science and language.

All courses involve four years of study, each divided into three terms of twelve weeks. Credit in any subject is based upon a unit involving four recitations a week for one term. Students are normally expected to carry five subjects abreast, hence credit for a year's work is fifteen units, for the entire course sixty units, exclusive of physical education, which is required of all students.

SYNOPSIS OF COURSES OF STUDY.

In the following table the numbers for each subject refer to a detailed description of the units given later in the bulletin. The notation used enables the reader to tell at a glance whether the subject is given in the freshman, sophomore, junior, or senior class. Numbers beginning with "1" indicate the subject is in the freshman class, "2" the sophomore class, "3" the junior class, and "4" the senior class; i. e., Mathematics 12 is a freshman subject, 21 a sophomore subject, 30 a junior subject, and 45 a senior subject.

DEPARTMENT OF AGRICULTURE.

PROF. DAVIS, PROF. LEGETT.

Agriculture 10. Elementary Agriculture. 1 unit.

A twelve weeks' course in the rudiments of the subject. The subjects covered will be those considered in Ferguson and Lewis' "Elements of Agriculture."

Agriculture 20. Economic Entomology. 1 unit.

Destructive insects and their method of control, including the boll worm, the boll weevil, the grasshopper, the army worm, and the San Jose scale.

Practice in mixing and applying the standard spray materials.

Text-book: Sanderson's "Insect Pests of Farm, Garden and Orchard."

Agriculture 30. Agronomy. 1 unit.

History, classification, culture, uses, etc., of corn, wheat, oats, barley, alfalfa, and cowpeas. Laboratory work in grain judging, germination methods, seed selection.

The composition, texture, water holding capacity, tillage and improvement of different classes of soils. Humus and its function, soil inoculation, conservation of soil water; irrigation and drainage problems.

A study of the cotton plant from planting to maturity, including buying and selling, history and working of the cotton exchange; theory and practice in cotton classing; arithmetic of cotton.

Texts: Livingston's "Field Crop Production," Miller's "Cotton Trade Guide and Student's Manual," Stephenson's and Schaub's "Soil Physics Laboratory Guide."

Agriculture 31. Animal Husbandry. 1 unit.

Feeds and feeding, composition and nutritive value of the common feeds, methods of determining the feed value of feeds and balanced rations. Breeds of live stock are studied in text, from lantern slides of noted animals, and then trips are made to study and judge the various types of live stock. Animal diseases, as Texas fever and hog cholera, are studied, emphasizing methods of prevention.

The characteristics of the dairy breeds, methods of producing clean milk and its products; testing milk for fat and for adulterants; practice in setting up and operating centrifugal separators.

Text: Plumb's "Types and Breeds of Farm Animals."

Agriculture 32. Horticulture. 1 unit.

The principles of fruit growing are studied under the following topics: location, climate, tillage, fertilization; plants and planting; lay-

ing out orchards, pruning, thinning of fruit, protection against frost, renovation of old orchards; microscopic study of troublesome fungi.

Practice in school gardening.

Text-book: Bailey's "Principles of Fruit Growing."

Agriculture 40. Agricultural Bacteriology. 1 unit.

The course will include a study of nitrifying bacteria, legume bacteria, bacteria concerned in souring of milk, in silage, in sewage purification, in canning and animal diseases. Bacteria in barnyard manure and control, bacteria in bread making, in preservation of foods, vinegar making, and in many industrial processes.

Text-book: "Agricultural Bacteriology," Conn.

Agriculture 41. Experimental Plant Breeding. 1 unit.

Methods of improving and fixing types. A study of Mendel's Law. This work will be carried out in the school garden. Eugenics will be treated; lectures on topics of current interest in the work.

Text-book: Walter's "Genetics."

Agriculture 42. Agricultural Economics. 1 unit.

This course will cover, as far as possible, the subject of rural credits, the organization of buying and selling concerns, of creameries, elevators, etc., the marketing problem, the tenant system of this and of other countries.

Text-book: Carver's "Principles of Rural Economics."

DEPARTMENT OF BIOLOGY.

PROF. HARRIS. PROF. LEGETT.

Biology 10. Physiology. 1 unit.

Physiology as the "Science of the Laws of Health" and "Sanitation" are the chief divisions of this course. A discussion of the subject rather than the text is required. Special emphasis is placed upon exercise, cleanliness, and proper eating as requisites of good health; upon the prevention and spread of disease; the use of narcotics; repair of injuries; and public hygiene and sanitation.

Text: Overton's "Applied Physiology: Advanced."

Biology 20. Zoology. 1 unit.

This is a course in general Zoology for beginners. The laboratory work includes a close study of physiology and life histories of the following forms: red legged locust, crayfish, fresh water mussel, squid, earthworm and starfish. Using these as representatives the relationship between the different phyla is shown. Modern conclusions in regard to

evolution and heredity are brought out in lectures and required readings. Throughout the course methods of prevention and control of forms of economic importance are emphasized.

Biology 21. Zoology. 1 unit.

This term's work is a continuation of Biology 20, and uses as laboratory material the sea anemone, several protozoa, and the toad.

Text for Biology 20 and 21: Linville and Kelley's "General Zoology." Richard's "Laboratory Guide in General Zoology."

Biology 30. General Biology. 1 unit.

Introductory Study. Principles of Biology illustrated by Plants. The subject is considered under the following heads: biology the science of life; characteristics of living things; structure and life of a plant; comparison of animal and plant biology; forests and their conservation; classification of animals and plants.

Biology 31. General Biology. 1 unit.

Principles of Biology as illustrated by types of animals. Protozoa; worm-like animals; starfish; insects and allies; shell animals; introduction to the vertebrates.

Biology 32. General Biology. 1 unit.

Principles of biology applied to human structure and life. Human biology and classification of man; human physiology and activities; civic biology.

Text-book for Biology 30, 31 and 32: Bigelow's "Applied Biology."

Biology 33. Botany. 1 unit.

This is a course in the physiology of plants and the phenomena of plant growth. In the laboratory the student will begin with a study of seed germination and follow the development of the plant to its maturity and the fruitage period.

Biology 34. Botany. 1 unit.

In this course enough time will be devoted to the morphology of the flowering plants to make pollination and fertilization intelligible to the pupil, but the major portion of the time will be given to a study of plant members, seeds and fruits. As soon as living plants are available in the spring, all of the laboratory work will be given to the collection and classification of plants. The pupil will become familiar with the principal families and gain a thorough working knowledge of the key to the groups and families of plants.

Text-books for Biology 33 and 34: Bergen's "Essentials of Botany." Coulter's "Botany of Western Texas."

Biology 40. Botany. 1 unit.

This is a course in the physiology of plants. Emphasis is placed on the theories that explain the phenomena of such and plant action itself. A well equipped laboratory enables the students to observe the conditions and effects of germination, respiration, photosynthesis, tropism, etc.

Text-books: Bergen and Davis' "Principles of Botany," Part I; Atkinson's "College Botany," Part I.

Biology 41. Botany. 1 unit.

In this course the general morphology of plants is studied, showing the development of plant members, and also the development and differentiation of sex in plants. The compound microscope is freely used by individual students. Freehand drawing of microscopic work is required, together with notes on all laboratory work.

Text-books: Bergen and Davis' "Principles of Botany," Part I.

Biology 42. Botany. 1 unit.

This is a course in plant ecology in which the economic phases of the subject are considered. The factors influencing vegetation types, the vegetation types and societies and their relation to the distribution and progress of man will be studied. Part of the time will be devoted to the study of representative families of the Angiosperms, and the pupil will become familiar with the methods of identifying and classifying plants.

Text-books: Atkinson's "College Botany," Parts IV and V; Coulter's "Botany of Western Texas."

Biology 43. Bacteriology. 1 unit.

The nature and conditions affecting the growth of bacteria, yeasts, and molds. The application of these facts to household sanitation.

Biology 44. Growth and Structure of Timber. 1 unit.

This course will consist of the treatment of the kinds and distributions of forests, kinds of timber, structure and adaptability. Properties, such as shrinkage, warping, durability, etc., will receive principal attention. Brief consideration will be given to seasoning by different methods, treatment of woods, logging and milling, and the preservation of forests.

The work will be covered by text, lectures, lantern slides, and papers prepared by the student.

DEPARTMENT OF CHEMISTRY.

PROF. MASTERS.

Chemistry 30. 1 unit.

Oxygen, Hydrogen, and Nitrogen, together with some of their compounds, are studied. The laws of Boyle and Charles, the atomic theory and the theory of electrolytic dissociation, the law of chemical combination, solutions, chemical equations, neutralization, and valence will be considered.

The time is equally divided between the laboratory and the recitation.

Chemistry 31. 1 unit.

The Chlorine family, the Phosphorus family, Sulphur, Carbon, Silicon, Boron and some of their compounds are studied, and some of the rare non-metallic elements receive brief attention. Equilibrium, the Periodic law, molecular and atomic weights and the chemistry of the flame are included in this course.

Chemistry 32. 1 unit.

In this will be included the study of the metallic elements, their more important compounds and the methods of reducing their ores, and, in addition, some time is given to identifying metallic and acid ions.

Text-book for Chemistry 30, 31, and 32: McPherson and Henderson's "A Course in General Chemistry."

Chemistry 40. 1 unit.

This is a course in qualitative chemical analysis and consists of four hours' laboratory work per week in preliminary reaction and analysis of the Alkali, Alkaline Earth, Aluminum and Zinc Groups, and two recitations per week, in which are studied these metallic groups, together with osmotic pressure and the theories of solution, ionization and equilibrium.

Chemistry 41. 1 unit.

This course is a continuation of Chemistry 40, and the same time is given to the recitation and to the laboratory work as in that course. The Silver, Copper, and Arsenic groups are studied, as are the metallic groups in Chemistry 40, and, in addition, the reactions of the acid ions. The Hydrolysis of salts and the theory of complex ions are discussed.

Chemistry 42. 1 unit.

In this course greater time is given to laboratory work. Systematic analysis of the ions studied in the two preceding courses is practiced, and oxidation and reductions are discussed.

Text-book for Chemistry 40, 41 and 42: "The Elements of Qualitative Chemical Analysis," Vols. I and II, Julius Stieglitz.

Chemistry 43. 1 unit.

This is a course in Quantitative Agricultural Analysis. Standard solutions are prepared and applied in simple analytic processes. Tests are made for reducing sugars. Limestone, vinegar, cotton seed meal and wheat bran are analyzed.

Chemistry 44. 1 unit.

This course is a continuation of Chemistry 43. Soils, Fertilizers, and water are analyzed. Arsenic and Paris Green is determined. Bordeaux Mixture is tested for soluble copper.

Chemistry 45. 1 unit.

This is a course in Household Chemistry, and includes the study of the chemical composition of the type foods, water, fats, proteins, minerals and carbohydrates, and also chemistry of fuels and tests for textile fibres. Organic Chemistry is given in explanation of the composition of compounds.

Text-book: Vult's "Laboratory Manual."

Chemistry 46. 1 unit.

This is a course in Biological Chemistry. The composition and nutrition of the cell; the process of fermentation; respiration; salivary, gastric, pancreatic, and intestinal digestion; absorption, and excretion are studied.

DEPARTMENT OF CIVICS AND PHYSIOGRAPHY.

PROF. PENDER.

Civics 30. 1 unit.

This course is abridged, but fundamental. It begins with a few lessons in "The Science of Politics." Then follows a review of the subject in three divisions: "The Making of the American Government," "The National Government," and "The State Government." The subject is enlivened by free class discussion of our present-day governments, municipal, state, and national, with the problems confronting each of them. Students are required to use reference books, to read at least one book treating some phase of governmental activity or reform, and to write a book review or theme.

Text: Hinsdale's "The American Government."

Civics 31. 1 unit.

The course in Civics 31 includes the following subjects: "Some Elements of Politics," "The Historical Development of Government," "Development on English Soil," "The Colonial Period," "The Revolution," "The Constitution," "Nationality and Colonialism," "Nationality and

Democracy," "Nationality and Slavery," "The New Nation," and the organization, principles, and practical workings of government in nation, state, and municipality.

Civics 32. 1 unit.

Civics 32 is a continuation of Civics 31. It embraces a discussion of the "Policies and Problems" of government. Among these are: "Suffrage and Elections," "The Political Party" as a natural result of Democracy," "Constitutional and Legal Rights," "Taxation," "Money," "Commerce, Industry and Labor," "Foreign Affairs and Colonies," "Natural Resources and their Conservation," and "The Duties of Citizenship." The course closes with a discussion of the principles underlying "Insurance" and "Investment." Students are required to read and report on some book read pertaining to some phase of government, and to write a book review or theme.

Text for Civics 31 and 32: Ashley's "The American Federal State."

Civics 40. Political Science. 1 unit.

Text-book: "Introduction to Political Science," Garner, Chapters I-VIII.

Civics 41. Political Science. 1 unit.

Text-book: "Introduction to Political Science," Garner Chapters IX-XVII.

Physiography 10. 1 unit.

Physiography, or Physical Geography, is recognized as one of the most fundamental of the lesser sciences. The central theme is the earth and its various forms in their relation of man and his development. Naturally there is discussion of the origin, classification, characteristics, evolution and ultimate end of all forms of matter and life. Outside reading, observation of nature, and individual thinking are encouraged. The subject is made scientific, vital, human, and practical.

Text: Tarr's "New Physical Geography."

DEPARTMENT OF DRAWING.

MISS HILLYAR, MISS WILKIN.

Drawing 10. 1 unit.

Object Drawing—Cylindrical perspective, simple groups.

Plant Study—Pencil, crayon-color.

Figure Drawing—Type form work from pose.

Paper Cutting—Illustrations from Nursery Rhymes and stories.

Design—Cut letters, signs, notices, posters.

Color—Easy matching of color, light and dark, color circle.

Construction.

Picture Study.

Drawing 20. 1 unit.

Plant Study—Careful drawing, plant analysis, pencil.

Water Color—Handling applied to trees and plant forms.

Object Drawing—Simple groups in crayo-color.

Design—Application of plant units to border and overall patterns, stencil.

Construction.

Masterpieces.

Drawing 21. 1 unit.

Object Drawing—Rectangular perspective, light and shade groups in charcoal and water color.

Working drawings.

Lettering—Freehand, letters, cipher, monogram.

Landscape—Cut paper illustrations.

Design—Applied to animal construction.

References: Letters in Ornament, Day; Alphabets Old and New, Day; Light and Shade, Newton.

Drawing 22. 1 unit.

Plant Study—Careful drawing for plant analysis, pencil and water color.

Object Drawing—Simple groups in cut paper for rectangular perspective—proportion.

Design—Application of plant units to border and overall patterns.

Lettering—Freehand, cipher and monograms.

Construction.

Reference books: "Alphabets Old and New," Day; "Hand Book of Plant Form," Clark; "Letters in Ornament," Clark.

Drawing 30. 1 unit.

Plant Study—Pencil, water color.

Still Life—Grouping.

Design—Composition, space, filling, motifs, plant and trees.

Hue—Value, intensity, color harmony.

Application to decorative panel.

Perspective.

Construction.

Art History—Apollo.

References: Theory and Practice of Teaching Art, A. W. Dow; Theory of Pure Design, Ross.

Drawing 31. 1 unit.

Landscape—Charcoal, water color.

Design—Tapestry border.

Still life.

Working drawings.

Construction.

Block printing.

Drawing 32. 1 unit.

Plant Study—Careful attention to ensemble, water color.

Landscape—Pencil, charcoal, water color.

Out-of-door sketching.

Posters.

Art History—Apollo.

References: Theory and Practice of Teaching Art, A. W. Dow; Picture Composition, Poore.

Drawing 33. 1 unit.

Object Drawing—Proportion, cylindrical and rectangular perspective, simple groups.

Design—Geometric units, simple borders, application in black print and stencil.

Color—Hue, value, chromo, color harmony.

Problem—Original costume in color.

Reference: Historic Costume.

Drawing 34. 1 unit.

Object Drawing—Light shade.

Plant Study—Light and dark.

Composition—Design, space filling, using plant and tree motif.

Color—Hue, value, chromo, harmonizing color, application to decorative panels.

Lettering—Signs, posters, mottoes.

Construction.

Reference: Theory and Practice, Dow; Elements of Fine and Industrial Arts, Sargent.

Drawing 35. 1 unit.

Plant Study—Light and dark, pencil and crayon-color.

Object Drawing—Cut paper for proportion and grouping.

Color—Matching of color, color circle.

Lettering—Freehand.

Design—Animal motif.

Construction.

Art History—Renaissance.

References: Theory and Practice of Teaching Art, Dow; Fine and Industrial Arts in Elementary Schools, Sargent.

Drawing 40. 1 unit.

Plant study.

Composition.

Design—Posters.

Still Life—Charcoal and water color.

Construction—Writing folio.

Problems for Primary Grades—Paper cutting.

Art History—Flemish Art.

References: Fine and Industrial Arts, Sargent; Composition, Dow.

Drawing 41. 1 unit.

Still life.

Perspective, illustrations.

Book plates.

Book making.

Block Printing—Original designs.

Art History—French Art.

References: Composition, A. W. Dow; Fine and Industrial Arts in Elementary Schools, Sargent.

Drawing 42. 1 unit.

Pose Drawing—Original composition.

Still Life—Charcoal, water color.

Design.

Problems for the primary grades.

Basketry—Weaving, stick printing.

Picture study in the garden.

Art History—Great Britain.

References: How to Show Pictures to Children, Miss Hurl; How to Enjoy Pictures, Miss Emery; With Pen and Ink, James Hall.

Drawing 43. 1 unit.

Still Life—Light and shade.

Perspective.

Applied Design—Hangings and surface patterns.

Landscape—Charcoal and water color.

Problem—Original room arrangement.

References: The House Dignified, French; Home Furnishings, Kellog.

Drawing 44. 1 unit.

Composition—Combined bird and plant motif.

Posters.

Object Drawing—Quick sketching.

Landscape—Monotypes, water color.

Construction—With application to design.

Reference Books: Theory and Practice, Dow; Elements of Fine and Industrial Arts, Sargent.

DEPARTMENT OF EDUCATION.

PROF. SWENSON, PROF. CHRISLIP, MISS MOORE, MISS FIERO.

Education 10. School Management. 1 unit.

This course, counting one unit of study, is given each of three terms of the year to different groups of freshmen. Sutton and Horn's "School-Room Essentials" is used as text to give a general presentation of educational problems in both theory and practice.

Special attention is given to the consideration of the teacher's work in a country school.

Education 20. Elementary Method. 1 unit.

The course in Elementary Method is an introductory course in General Method. It includes a study of the foundation principles and the fundamental laws of teaching; the rules and purposes of the recitation; the use of drills and reviews; the making of lesson plans.

The course is based upon Roark's "Method in Education."

Education 21. Advanced Management. 1 unit.

This course deals with Management differentiated from Method and involves the various phases and processes of education except that of instruction. The classroom is taken as the unit of management, and the point of view is that of the individual teacher in charge of a room. Bagley's "Class Room Management" is used as text, supplemented by library work.

Education 22. Special Method. 1 unit.

This course is planned to furnish special training in the intermediate and grammar grades of the public school course. It will consist of discussions of principles which underlie and determine the selection of subjects of study and the methods of presenting subject matter to children in the various grades of the intermediate department.

The course will be based upon Compayre's "Practical Pedagogy."

Education 30. General Psychology. 1 unit.

The course will consider:

1. The Psychological Organism.
2. Sensation.
3. Perception.
4. Attention and Interest.
5. Memory, Imagination, and Thought.
6. Feeling and Emotion.
7. Will.

Laboratory work and observation of classes in the Normal Training School will be given one period per week.

Text-book: Angell's Psychology.

Education 31. The Method of the Recitation. 1 unit.

The course will consider:

1. The Formal Steps of the Recitation.
2. The Value of Type Studies.
3. The Psychology of Occupations.
4. The Psychology of Elementary School Subjects.
5. The School and the Child.
6. The Organization of Subject Material and the Making of Lesson Plans.

Laboratory work and observation of classes in the Normal Training School will be given one period per week.

Text-book: McMurry's "Method of the Recitation"; Dewey's "School and Society."

Education 32. Primary Method. 1 unit.

The course in Primary Method includes a study of the special Methods in the work of the first four years of the public school course. Special methods in the teaching of reading, number work, language, story telling, dramatization, constructive work, etc., are considered; the making of lesson plans and the observation and use of concrete material emphasized.

Education 40. General Method. 1 unit.

The course in General Method provides for a thorough study of the formal steps of the recitation, the problems of how to study and teaching how to study; the factors determining the selection and arrangement of subject matter.

The methods of securing interest; individual attention; the elements of skill in drill; development; and appreciation.

Text-books: McMurry's "How to Study and Teaching How to Study"; Thorndyke's "Principles of Teaching."

Education 41. History of Education. 1 unit.

This subject will be treated as a phase of General History, being a study of the continued focal point where one generation transmits to the next its institutions and the results of its experience. The systems of the various epochs and of the great reformers will be analyzed for the lessons they can teach the modern teacher, the study thus subserving both cultural and practical ends.

Graves' "Student's History of Education" will be used as a text, supplemented by a brief comparative study of the public school system evolved by the United States and the leading European nations from current educational documents.

Education 42. School Administration. 1 unit.

This course considers a series of problems especially valuable to the prospective principal or superintendent, or any one that expects to lead

public educational opinion in his field of work. Some of these problems are school finances, construction and equipment of buildings, preparation and selection of teachers, the course of study, the program, the side activities and the social interrelations of the school, the work of supervision, and the problem of special schools. The student will be guided by a syllabus, but the class work will consist largely of lectures and discussions, followed by library work, the study of national, State, city, and county reports, etc., essays and individual solution of assigned problems. Hollister's "Administration of Education in a Democracy" is used as a text.

Education 43. Principles and Problems of Education. 1 unit.

This course will not necessarily be identical from year to year, but will consider the current problems that the trend of educational interest may point out as of paramount importance, at the time. During the ensuing session the social and practical trend of education will be noticed.

Texts: Dewey's Ethical Principles Underlying Education; Reports of Educational Surveys by different universities; bulletins of the United States Bureau of Education and State Departments of Education.

Education 44. Practice Teaching in the Training School. 1 unit.

Education 45. Child Psychology. 1 unit.

This course includes a study of the problems which are concerned with the development of the child, mental and physical. A study is made of the problems of heredity, instinct, etc., and how to direct play, imitation, collective and constructive instinct. The division of the life of a child into distinct periods with the individual characteristics of each is considered.

The course is based on Kirkpatrick's "Fundamentals of Child Study."

DEPARTMENT OF ENGLISH.

MISS BLANTON, MISS CLARK, MISS PARKER, MISS SWEET,
MISS ATWELL.

English 10. Elementary Grammar. 1 unit.

This course begins with a review of the parts of speech, followed by a brief study of the phrase, the clause, the verb, and the verbal, as a preparation for sentence analysis. Sentence analysis, including a study of the simple and the compound sentence, forms a part of the work of each week. The course also includes a study in detail of the classification and inflections of the noun and the study of most of its construction, as the basis of the English sentence. Drill is given on correct number, gender and case forms and uses.

English 11. Elementary Grammar. 1 unit.

This course is a continuation of English 10, and includes as much study as time permits of the classification, inflections, and constructions of the pronoun, the adjective, the verb, and the adverb. Sentence analysis is continued, and includes the study of complex sentences containing the common types of simple dependent clauses. Drill is given on the correct forms and uses of the parts of speech.

Text-books for English 10 and 11: Smith's "Our Language Grammar" and Blanton's "Grammar Outline."

English 12. Elementary Composition. 1 unit.

This course has for its primary purpose to make correct form in writing habitual with the student. It includes the following: A detailed study of capitalization and punctuation; a study of the paragraph, including the principles of paragraph construction, and the different methods of paragraph development; a study of letter writing, with drill on correct forms, and practice in writing business, social, and informal letters; simple compositions, including reproductions, paraphrasing, and short exercises in narration and description. In connection with the work in composition, students are required to read one long novel, one short novel, and a number of brief narrative and descriptive articles selected by the instructor. On these, reports, either oral or written, are required, and from them are taken some of the subjects for compositions.

Text-books: Merkley and Ferguson's "Composition-Rhetoric (selections from chapters on correctness, clearness, paragraphing, the whole composition, and letters)"; Blanton's "Composition and Punctuation." Classics for supplemental reading: Scott's "Ivanhoe," Irving's "Sketch Book," Hawthorne's "House of Seven Gables," Hale's "A Man Without a Country," Lowell's "The Vision of Sir Launfal."

English 20. English Literature. 1 unit.

This course consists of the History of English Literature from the Anglo-Saxon Period to the Classical Age. (Long, Chapters I to IX.) A study is made of the representative writers belonging to each period, including their biographies, their style, and their representative writings. Representative poems are read and discussed by the class, and as much memory work is done as time permits. A critical essay, based upon the reading, is required.

Supplementary reading, four of the following: Gaskill's "Cranford," Shakespeare's "Julius Caesar," "Merchant of Venice," Bunyan's "Pilgrim's Progress" (Part I), "The Book of Ruth."

English 21. English Literature. 1 unit.

This course is a continuation of English 20 and includes the history of English Literature from the Classical Age to the Victorian Age. (Long, Chapters IX to XI.) As in English 20, a study is made of

representative writers and their works. A critical essay, based upon the reading, is required.

Supplemental reading, four of the following: Pope's "Rape of the Lock," Coleridge's "Ancient Mariner," Dickens' "David Copperfield," Tennyson's "Princess," Stevenson's "Treasure Island."

Text-books for English 20 and 21: Long's "English Literature," or Bronson's "English Poems."

English 22. American Literature. 1 unit.

This course consists of the history of American Literature from the Colonial Period to the present time. A study is made of the representative writers belonging to each period, including their biographies, their style, and their representative writings. Selected pieces of literature are read and discussed by the class, and as much memory work is done as time permits. One critical essay, based upon the reading, is required.

Supplementary reading, four of the following: Cooper's "The Deer-slayer," Henry Grady's "Essays," Southern Poets, Franklin's "Autobiography," Page's "Red Rock," and Longfellow's "Hiawatha."

Text-book: Halleck's "History of American Literature."

English 30. Advanced Grammar. 1 unit.

This course is planned with the purpose of removing deficiencies in previous training, of preparing teachers for work in the primary and intermediate grades, and of giving drill on principles, a knowledge of which is essential in the study of language and literature. It includes a review of the classification and construction of the parts of speech and of the principles of correct grammatical usage; a study of the phrase, the verbal, and of the various types of the dependent clause; and regular practice in sentence analysis, as a means of developing the reasoning powers, and as an aid in forming habits of clear thinking and accurate expression.

Text-books and methods of teaching grammar are discussed, and pupils are required to read selected chapters of Carpenter, Baker, and Scott's "The Teaching of English." Prerequisite: English 10 and 11.

Text-books: Kimball's "English Sentence," Buehler's "English Grammar," Blanton's "Grammar Outline."

English 31. Advanced Composition. 1 unit.

This course consists of a practical study of narration and description with the primary aim of developing realization and adequate expression in the field of imaginative composition. The chief emphasis is placed upon theme writing, which consists of frequent short descriptions and descriptive narrative sketches, together with one or more narrative themes of from 600 to 1500 words in length. The course includes also a review of capitalization, punctuation, sentence-structure, the use of outlines, and such principles of paragraph structure as are applicable.

to narration and description. A study of versification is required, with some practice in verse writing. Precision in oral composition is given as much attention as time permits. As supplementary reading, the class is required to read a number of classics which are illustrative of the forms of composition covered by the course, and upon which reports, either oral or written, are made. This supplementary reading includes one long novel, one short novel, and at least twelve short stories, from a selected list furnished by the instructor.

Classics for supplementary reading: Dickens' "A Tale of Two Cities," Eliot's "Silas Marner," Blackmore's "Lorna Doone," Selections from Warner's Essays, Selections from Poe's "Prose Tales."

English 32. Advanced Composition. 1 unit.

This course is a continuation of English 31. It consists principally of a practical study of exposition and argument, including much practice in theme writing. The course also includes a study of the construction of outlines and simple briefs; of paragraph structure, including a detailed study of principles and methods of development; of diction, with special emphasis upon the meanings and proper use of words frequently misused; of the more common figures of speech; and of letter writing. Practice in the compilation and organization of material will be afforded through the writing of two long themes, one in the expository and one in the argumentative field, each about 1000 words in length, and each requiring the examination of a mass of material. In addition to these, short themes will be required weekly. Methods of teaching composition will be studied and discussed in connection with the various parts of the course. The supplementary reading required will consist of three or more authors, the selection of these being made by the instructor. Current periodicals will also be drawn upon for supplementary material.

Prerequisite: English 31.

Text-books for English 31 and 32: Newcomer and Seward's "Rhetoric in Practice"; Blanton's "Punctuation and Composition"; Woolley's "Handbook of Composition," and selected chapters from Carpenter, Baker, and Scott's "The Teaching of English."

Classics for supplementary reading: De Quincey's "Joan of Arc," Carlyle's "Heroes and Hero Worship," Macaulay's "Essays on Lord Clive and Warren Hastings," Burke's "Speech on the Conciliation," Selections from Emerson's Essays.

English 40. Literary Masterpieces. 1 unit.

In this course a critical study is made of representative English poems belonging to the Elizabethan Age, the Puritan Period, the Classical Age, and the Romantic School. A critical essay is required, based upon the reading of the course, and as much memory work is done as time permits.

Supplementary reading: Goldsmith's "Vicar of Wakefield," Addi-

son's "Sir Roger de Coverley's Papers," Thackeray's "English Humorists," and Scott's "Kenilworth."

Text-books: Pancoast's "Introduction to English Literature" (used chiefly as a reference book), and Bronson's "English Poems."

English 41. Shakespeare. 1 unit.

In this course a brief study is made of the development of the English drama, including the Elizabethan theatre and the manner of presenting the plays. This is followed by a study of the Elizabethan Age and the life of Shakespeare. Two plays, which are selected each year by the teacher, are studied critically, and a critical essay is required in connection with the course.

Supplementary reading: Four of the following plays: "As You Like It," "Cymbeline," "The Tempest," "A Winter's Tale," "Comedy of Errors," "Midsummer Night's Dream," "Richard III."

Text-books: Pancoast's "English Literature"; any standard edition of Shakespeare's plays.

English 42. The Victorian Age. 1 unit.

In this course a study will be made, first, of the period, and then of the representative writers belonging to the period, including their biographies, their style, and selected writings. The authors studied will be Carlyle and Ruskin as representative essayists; Dickens, Thackeray, and George Eliot as representative novelists; and Tennyson and Browning as representative poets. Critical studies will be made in class of Carlyle's "Essay on Burns," Ruskin's "Sesame and Lilies," Tennyson's "Idylls of the King," and Browning's "Pippa Passes."

Text-books: Pancoast's "Introduction to English Literature" and Bronson's "English Poems."

English 43. Advanced Grammar. 1 unit.

This course is an extension of English 30. It is planned to give special preparation to teachers of English Grammar. The course begins with a review of the various constructions of the sentence, followed by analysis, including that of the most difficult types of compound and complex sentences. Special study is made of elliptical constructions of the verbal, including the participle, the infinitive, and the gerund and of disputed points. Methods of teaching will be discussed and applied.

Text-books: Kimball's "English Sentence," Buehler's "English Grammar," Blanton's "Grammar Outline," selected chapters from Carpenter, Baker and Scott's "The Teaching of English."

DEPARTMENT OF GERMAN AND SPANISH.

PROF. ANDERSON.

German 10. 1 unit.

Elementary German. Reading, writing and speaking German.

Text-books: Guerber's "Märchen und Erzählungen," Vol. 1. Bacon's "Vorwaerts," pages 1 to 79.

German 11. 1 unit.

Reading easy prose. An inductive study of elementary German grammar.

Text-books: Bacon's "Vorwaerts," completed. Prokosch's "Introduction to German."

German 12. 1 unit.

Oral and written composition. Reproduction in the student's German of stories he has read.

Text-books: Müller's and Wenckebach's "Glück Auf," Guerber's "Märchen und Erzählungen," Vol. 2.

German 20. 1 unit.

Short papers on various topics of German life. Class discussions of German customs.

Text-books: Gronow's "Jung Deutschland," Holzwarth's "Gruss aus Deutschland."

German 21. 1 unit.

Study of German customs and institutions.

Text-books: Mosher's "Willkommen in Deutschland," Decker and Markisch's "Deutschland und die Deutschen."

German 22. 1 unit.

Practical German. The German of every-day life and business.

Text-books: Patton's "An American in Germany"; Kutner's "Commercial German."

German 30. 1 unit.

Outline of German Literature. Lectures. Reading of selected texts.

Text-books: Wenckebach's "Deutsche Literaturgeschichte," Keller's "Bilder aus der Deutschen Litteratur."

German 31. 1 unit.

Study of German poetry, with special attention to historical development, form and meter.

Text-books: Nollen's "German Poetry." Klenze's "Deutsche Gedichte."

German 32. 1 unit.

Study of German prose. Reading of representative prose writers.

Text-books: Wildenbruch's "Das edle Blut," Hauff's "Die Karavanne."

German 40. 1 unit.

German drama. Close study of Schiller's "Wilhelm Tell." Rapid reading of several of Schiller's works.

German 41. 1 unit.

German drama. Close study of Goethe's "Faust." Rapid reading of several of Goethe's works.

German 42. 1 unit.

The Teaching of German. Basic principles of modern language instruction with special reference to elementary high school courses.

Text-books: Leopold Bahlsen's "The Teaching of Modern Languages," Walter's "Die Reform des neusprachlichen Unterrichts auf Schule und Universitat."

SPANISH.

Spanish 10. 1 unit.

Elementary Spanish. Reading, writing and speaking Spanish.

Text-books: Dowling's "Reading, Writing and Speaking Spanish." Harrison's "Elementary Spanish Reader."

Spanish 11. 1 unit.

Reading easy prose, inductive instruction in the elements of Spanish grammar.

Text-books: Hall's "All Spanish Method" (First Book), Roessler and Remy's "First Spanish Reader."

Spanish 12. 1 unit.

Oral and written composition. Reproduction in the student's Spanish of stories he has read.

Text-books: Marion y des Garenn'es "Introducción a la lengua castellana," Ramsey's "Elementary Spanish Reader."

Spanish 20. 1 unit.

Short papers on various topics of life in Spanish speaking countries.

Text-books: Downer and Elio's "Lecturas modernas," Alarcon's "Novelas Cortas," Becquer's "Legends, Tales, and Poems."

Spanish 21. 1 unit.

Study of customs and institutions in the Latin-American Republics.

Text-books: Maurice Kelly's "Historia de la literatura Espanola."

Spanish 22. 1 unit.

Practical Spanish. The Spanish of every-day life and business.

Text-books: Pinney's "Spanish and English Conversation" (2 books); Harrison's "A Spanish Commercial Reader."

NOTE.—Spanish may be substituted for either Latin or German in the freshman and sophomore year.

DEPARTMENT OF HISTORY.

PROF. CRIDDLE, MISS MITCHELL, MISS WILSON, PROF. MCKAY.

History 10. 1 unit.

Grecian history to the rise of Macedonia.

Texts: Myers' "Ancient History"; Botsford's "Source-book of Ancient History."

History 11. 1 unit.

Grecian history completed. Roman history to the Third Punic War.

Texts: Myers' "Ancient History"; Botsford's "Source-book of Ancient History."

History 12. 1 unit.

Roman history completed.

Texts: Myers' "Ancient History"; Botsford's "Source-book of Ancient History."

History 20. Medieval History. 1 unit.

This course will cover a period of about a thousand years from the downfall of the Roman Empire to the close of the fifteenth century.

There will be a constant use of source-books for illustrative material.

Texts: Myers' "Medieval and Modern History"; Ogg's "Source-book of Medieval History."

History 21. 1 unit.

Modern history to the French Revolution.

Text: Myers' "Medieval and Modern History."

History 22. 1 unit.

Modern history completed.

Text: Myers' "Medieval and Modern History."

History 30. 1 unit.

English history to the end of the reign of Tudors.

Texts: Andrews' "History of England"; Lee's Source-book of English History."

History 31. 1 unit.

English history completed.

Texts: Andrews' "History of England"; Lee's Source-book of English History."

History 40. 1 unit.

American history from 1750 to 1829.

Texts: Hart's "Formation of the Union"; MacDonald's "Documentary Source-book of American History."

History 41. 1 unit.

American history since 1829.

Texts: Wilson's "Division and Reunion"; MacDonald's "Documentary Source-book of American History."

History 42. 1 unit.

European history of the Nineteenth Century.

Texts: Robinson and Beard's "Development of Modern Europe," Vol. II; Robinson and Beard's "Readings in Modern European History," Vol. II.

History 43. 1 unit.

Industrial history of the United States.

Text: Coman's "Industrial History of the United States."

DEPARTMENT OF HOME ECONOMICS.

MISS SHAFFER, MISS RATHBONE.

The purpose of this course is to prepare teachers of this subject for grades and high schools. The Home Economics work is begun in the sophomore year, and those students entering the junior year will be conditioned in Home Economics 20, 21 and 22, and Science 25.

Upon presentation of credentials and note-books of previous work in Home Economics, the instructor may remove part or all of these conditions. High School Physics may be substituted for Science 25. Those entering the senior year from higher institutions will be conditioned in all sophomore and junior work that has not been included in their previous course.

It is recommended that students entering the junior year with conditions in Home Economics 21, 22 and 23, and Science 25, remove those conditions at the previous summer session. Students will be allowed to take double work in Home Economics in the junior year to remove these conditions, but this makes a very difficult program, and few students are able to do it.

In laboratory classes, when the registration is large, classes may be divided into sections, and work of another term be given to one section. This will be arranged entirely by the teachers in charge of these courses.

Besides the teacher's course, elective courses have been arranged for the students not taking the Home Economics course. One course will

be given in Foods, one in Clothing, and one in The Home, each independent of the other and each counting one unit.

Home Economics "A." Foods. 1 unit.

Composition, preparation, and cookery of our staple foods. Use of food in the body, balanced out in health and disease, cost and sanitation of foods for the home.

Home Economics "B." Clothing. 1 unit.

Economic study of clothing. Designing, cutting, and making of clothing for the family.

Home Economics "C." The Home. 1 unit.

Plan, decoration and furnishings of the home. Sanitation and management, division of the income, and study of budgets.

Home Economics 20. Food Products and Textiles. 1 unit.

The source, composition, cost, as well as the preparation, of the various staple foods from the raw state to the finished product in the marketable form will be treated in the first part of the course. In the second part the study of the production and manufacture of linen, silk, cotton, and wool, and the manufacturing conditions which affect the hygienic, economic, and esthetic value of materials.

Text-books: Sherman's "Food Products," Wolman's "Textiles."

Home Economics 21. Elementary Garment Making. 1 unit.

Making of all fundamental stitches, drafting, and the use of the pattern, hand and machine sewing applied to construction and repair of simple garments, and the attachments of the sewing machine.

Home Economics 22. Advanced Garment Making. 1 unit.

The construction of more difficult garments with application of embroidery and other decoration. The last half of this course gives instruction in designing and drafting patterns for hats, constructing and covering frames, making and placing trimming.

Home Economics 30. Principles of Cookery. 1 unit.

The aim of this course is to teach the elementary principles of cookery; the effect of heat on type foods, proper methods of combining foods and the changes which take place. Skill in handling apparatus and materials will be emphasized.

Home Economics 31. Food Preparation. 1 unit.

This course gives the opportunity for practice in home cookery. It will include the planning, cooking, and serving of meals. Care of food

in the home, marketing and cost of materials will be emphasized. Some experimental cooking will also be given.

Home Economics 32. Dressmaking. 1 unit.

Shirtwaists and skirts and simple dresses are made in this course. The use of the drafted pattern, cutting and fitting are included.

Home Economics 40. The House. 1 unit.

The location, structure, furnishings, and decorations of the house are considered here as well as the care, cleaning, and management of the house.

Home Economics 41. Dietetics. 1 unit.

The nutritive functions of proteins, fats, carbohydrates and minerals, with dietary standards and their application to practical problems in both health and disease. Dietaries of families of different incomes and for infants and children.

Text-book: Sherman's "Chemistry of Food and Nutrition."

Home Economics 42. Dietetics. 1 unit.

A continuation of Home Economics 41 during another term.

Home Economics 43. Methods of Home Economics. 1 unit.

This course deals with the organization of the course of study in Home Economics in the different grades of elementary and secondary schools; selection of topics and their adaptation to the different grades; the method of the recitation; equipment and illustrative materials; observation and practice in the Training School.

DEPARTMENT OF LATIN.

PROF. McDONALD.

Latin 10. 1 unit.

This course gives a thorough review of first year Latin, preparatory for the reading of Caesar.

Latin 11. 1 unit.

Caesar's Gallic War, Books 1 and 2. Composition based on text read.

Latin 12. 1 unit.

Caesar's Gallic War, Books 3 and 4. Composition based on text read.

Latin 20. 1 unit.

Caesar's Gallic War. Selection from Books 5, 6 and 7. Composition based on text read.

Latin 21. 1 unit.

Cicero's First and Second Catiline. Composition daily.

Latin 22. 1 unit.

Cicero's Third and Fourth Catiline. Selections from Letters. Composition daily.

Latin 30. 1 unit.

Cicero's Manilian Law and Archias. Composition daily.

Latin 31. 1 unit.

Vergil's Aeneid, Books 1 and 2. Study of Prosody and Mythology.

Latin 32. 1 unit.

Vergil's Aeneid, Books 3, 4 and 5. Study of Prosody and Mythology continued.

Latin 40. 1 unit.

Livy, Book 21. Ritchie's Composition daily.

Latin 41. 1 unit.

Livy, Book 22, and selections from Book 1. Ritchie's Composition.

Latin 42. 1 unit.

Horace, Selections from Odes and Epodes.

NOTE.—The above course requires a minimum of one year's Latin for entrance to freshman class. For the benefit of those students who may desire to study Latin, but who have not had preparation, a class will be organized in first year Latin, and credit will be given for such work the History-English course.

DEPARTMENT OF MANUAL TRAINING.

PROF. VITZ.

The course in Manual Training is designed to provide thorough instruction in the various phases of the subject for those preparing to teach and supervise Manual Training in the public schools of the State. Provision is made for students enrolling in any course to take a short course in Manual Training, substituting not more than three units in Manual Training for other work in the course elected. Such substitution must have the approval and permission of the President. Students making such substitutions will be permitted to choose either

Manual Training 1 and 2 (particularly adapted to city schools) or Manual Training 11, 8 and 12 (a short course especially designed to meet the needs of rural schools). Since the subject of Manual Training is given such importance in modern education all who can are urged to take advantage of these substitutions.

The new fireproof Manual Arts building will enable the school to meet all reasonable demands for preparing teachers of Manual Training and Home Economics for the high schools of Texas.

Manual Training 20. Mechanical Drawing. 1 unit.

The work in this course includes the following: Lettering, Straight and Curve Line Shop Problems, Planes of Projections, Revolution of Solids, Development of Surfaces, Intersections, Working Drawings of the exercises to be made in the shop the following term. Tests on practical problems covering the work.

Text: Bennett's "Problems in Mechanical Drawing."

Manual Training 21. Bench Work. 1 unit.

Analysis of tool processes, the construction of simple models adapted to seventh and eighth grade work. Their purpose is to teach planing, gauging, scoring, sawing, chiseling, boring, etc. Nailing, screwing and lap-jointing will be the method of fastening. Construction of principal joints, the application of each joint in medium-sized pieces of furniture. Lectures will be given on sharpening, glues, sanding, scraping, staining, filling, finishing, etc.

Texts: Moore's "Manual Training Toys"; Noyes' "Handiwork in Wood."

Manual Training 22. Vocational Woodwork. 1 unit.

This course is designed to give the student a working knowledge of "piece work" as is employed by the wood industries in the construction of cabinets, tables, and other pieces. Where such pieces are wanted in quantities the student is given adequate instruction in the use and construction of the various machines before actual operation is begun.

The work is covered by notes, lantern slides, where time will permit, and the construction of such equipment as may be needed by the College.

Manual Training 23. Mechanical Drawing. 1 unit.

Principles of mechanical and architectural drawing. The use of drawing instruments. Applications to farm problems. Working drawings are made of barns, silos, chicken houses and other problems in rural life.

Bulletins U. S. Department of Agriculture—Notes.

Manual Training 30. Machine Drafting. 1 unit.

Lettering, elements of machine drafting consists of: Study of Practical Drafting Room Practice, Types of Screw Threads, Proportions of

Standard Bolts and Nuts, Types of Fastenings, Drawing of Machine Parts from Life. Machine parts using Standardized Proportions.

All drawings will be made on detail paper, traced on imperial cloth. Each student must learn to make good blue prints, using his own tracings.

Text: Jameson's "Elements of Mechanical Drawing."

Manual Training 31. Wood Turning and Pattern Making. 1 unit.

Wood Turning: Exercises teaching all the cuts in spindle turning, face-plate work, chuck work and mandrel turning. Attention will be given to the correct handling of tools, accuracy, speed, etc.

Pattern Making: The pattern work consists of bench work and turned patterns. The principal types of patterns are studied and made. Students make their own calculations for draft, shrinkage, rap, etc. Lectures are given covering the work, these being accompanied by demonstrations in molding.

Texts: Crawshaw's "Problems in Wood Turning"; Purfield's "Wood Pattern Making."

Manual Training 32. Foundry Work. 1 unit.

The molding and casting of simple castings. The use of the more complex patterns. Core making. Types of molds are covered by operations in the shop, by lectures, and by lantern slides. Management of the cupola furnace, such as charging, pouring, and its care.

Manual Training 40. Advance Machine Drafting. 1 unit.

This course includes the study of gears, cams, parallel motions, etc.; assembly and detail drawings of some large machines. If time permits, isometric and cavalier projections are studied.

Text: Mathewson's "Notes for Mechanical Drawing."

Manual Training 41. Architectural Drafting. 1 unit.

This course consists of architectural lettering, study of types of buildings and roofs, study and drawing in detail of frame construction, individual planning of bungalow, isometric and cavalier projection.

Manual Training 42. Blacksmithing. 1 unit.

Management of the forge, the making of fires, exercises in twisting, bending, lengthening, up setting, welding, tool forging, tempering, annealing, and case hardening. Heat treatment of metals. Practical applications.

Text: Bacon's "Hand Forging."

Manual Training 43. Method of Manual Training. 1 unit.

Historical review of the theories and practices of educational reforms, such as Pestalozzi, Froebel, and others. A review of the work that

has been done in this country, work that is now being done; study of present indications as to the probable future status of manual training in its relation with vocational training and the work of the trade schools.

The laws on the subject in this State as well as those of the most important States in the United States.

Method of teaching, planning of courses of study for manual training in grades and high school, study of equipments, proper installation of power machinery and their relative location for greatest efficiency, etc.

The work will be covered by text, lectures, lantern slides, and theses by the students.

Text: Rowe's "The Meaning of Manual Arts and Industries."

Manual Training 1 "W." House and Cement Construction. 1 unit.

Frame house construction, roof construction, construction of models of buildings and problems designed in the drafting room.

Construction of concrete and cement forms. Discussions on the use of cement on the farm. Practical applications will be made by the construction of various forms as may be needed by the College.

Texts: King's "Constructive Carpentry"; Brace and Mayne's "Farm Shop Work."

Manual Training 2 "W." House and Cement Construction. 1 unit.

This course is a continuation of Manual Training 11. The work is similar to that already given, but the problems undertaken are more complicated and difficult.

Text: Bulletins U. S. Department of Agriculture.

DEPARTMENT OF MATHEMATICS.

PROF. BUTLER. PROF. PETERS, PROF. SMITH, PROF. DOWNER.

Mathematics 10. Elementary Algebra. 1 unit.

Simultaneous simple equations, indeterminate equations, inequalities, involution and evolution, theory of exponents, radicals, imaginary expressions, quadratic equations.

Text: Wentworth's "New School Algebra."

Mathematics 11. Elementary Algebra Continued. 1 unit.

Simultaneous quadratics, ratio, proportion, variation, arithmetical, geometrical and harmonical progressions, variables and limits, properties of series, binomial theorem, logarithms.

Text: Wentworth's "New School Algebra."

Mathematics 12. Plane Geometry, 1 unit.

Book 1. Wentworth and Smith.

Mathematics 20. Plane Geometry Continued. 1 unit.

Books 2 and 3. Wentworth and Smith.

Mathematics 21. Plane Geometry Continued. 1 unit.

Books 4 and 5. Wentworth and Smith.

Mathematics 22. Algebra. 1 unit.

Roots, radicals, exponents, quadratics, systems solvable by quadratics, progressions, limits and infinity, logarithms, ratio, proportion, variation, imaginaries, theory of quadratic equations.

Text: Second Course in Algebra, by Hawkes-Luby-Touton.

Mathematics 30. College Algebra. 1 unit.

Text: To be selected.

Mathematics 31. Trigonometry. 1 unit.

Text: Wentworth and Smith's Plane Trigonometry.

Mathematics 32. Solid Geometry. 1 unit.

Text: Wentworth and Smith.

Mathematics 40. Analytics. 1 unit.

Cartesian co-ordinates, the curve and the equation, the straight line.

Text: Smith and Gale's "Introduction to Analytic Geometry."

Mathematics 41. Analytics Continued. 1 unit.

The circle and the equation, polar co-ordinates, conic sections and equations of the second degree, tangents and normals.

Text: Smith and Gale's "Introduction to Analytic Geometry."

Mathematics 42. The Teaching of Secondary Mathematics. 1 unit.

A professional course for teachers of mathematics.

In all the work in mathematics three ends will be kept constantly in view:

First. To prepare teachers of the subject.

Second. To secure mental discipline and culture.

Third. To make mathematics a ready and useful instrument.

Text: Young's "Teaching of Secondary Mathematics."

Mathematics 43. Shop Mathematics. 1 unit.

This course is designed to correlate Manual Training and Mathematics.

The work is given as presented in Breckenridge, Mersereau and Moore's "Shop Mathematics."

DEPARTMENT OF MUSIC.

MISS PARRILE, MISS ANDERSON.

Music 10. Elements of Music. 1 unit.

This course discusses the development of musical theory, elements notation, ear-training, phrase writing, time subdivisions, scale and interval singing and sight reading.

Music 20. For Supervisors and Grade Teachers. 1 unit.

To be preceded by Music 10. A regular course in Public School Music is here begun in combination with work of the preceding course—rotations, songs, motives, figures, rhythmic development, ear-training, artistic expression, memorization.

Music 21. 1 unit.

A continuation of the first term's work, including the use of syllables, staff notation, independent reading of motives and figures, reading new songs from staff notation, memorization.

Music 22. 1 unit.

A course in sight reading with a review of the elements of music. Key and time signatures, note value, four-part singing.

Music 30. For Supervisors and Grade Teachers. 1 unit.

The course in Public School Music is continued. A general review is given of Music 20, including work in eye-training, song analysis, intervals.

Music 31. 1 unit.

Development of artistic singing. Study of rhythmic notation. Development of ear-training. Creative work, to develop musical ideas. Sight reading.

Music 32. 1 unit.

A continuation of the elements of notation, completing the first three years of Public School Music.

Music 33. 1 unit.

A course in elementary harmony, including scale study, major, minor, chromatic,—signatures,—intervals and chord study,—major, minor diminished and augmented,—inversion—simple forms of modulation.

Music 40. For Supervisors and Grade Teachers. 1 unit.

Independent sight reading of one-part songs, the quarter-note beat, the eighth-note, rhythm study, introduction of two-part singing in the form of rounds and canon studies. Sharp chromatics, diatonics.

Music 41. T unit.

Development of problems in time, flat chromatics, minor melodies, interval studies in rhythm, key signatures, scale study in the major and minor modes, modulation, development in two-part singing.

Music 42. 1 unit.

Three-part rounds and songs, time problems such as the half-note beat, four equal notes to a beat, triplets, syncopation, introduction of the bass clef, drill in four-part songs.

Music 43. History of Music. 1 unit.

This course is especially designed for students of the History-English and Science courses. It gives an outline of music and musicians with a course of reading relating to musical literature. Use of victrola for illustrations and appreciation.

DEPARTMENT OF PHYSICAL EDUCATION AND ATHLETICS.

MISS HARRISS, PROF. ST. CLAIR, PROF. MCKAY.

The course in Physical Education aims to maintain and promote the health of the students, and to aid them in the formation of habits of hygienic living; to give them the knowledge necessary for the intelligent teaching of school gymnastics and the supervision of out-of-door plays and games.

Systematic instruction is given concerning the means for keeping the body in health, for maintaining normal, progressive growth and development, for securing grace in posture, carriage, and action, and for developing a disposition to enter, with pleasure and profit, the various recreations so necessary in any phase of a successful life.

Free and unrestricted action of the body is essential to good mental and physical development. Accordingly, our young ladies are urged to wear hygienic clothing at all times. In the gymnasium, all students are expected to wear their gymnasium suits.

Physical Education 1f. 1 unit.

Swedish gymnastics, consisting of floor work, games, and folk dancing.

Physical Education 2f. 1 unit.

German gymnastics, folk dancing, games, such as basketball, soccer football, indoor baseball, and volley ball.

Physical Education 3f. 1 unit.

Games as in Physical Education 2f; lectures on the theory of play and playground supervision. Mastery of the rules and regulations governing games suitable for rural and city schools.

Physical Education 4f. 1 unit.

Advanced Swedish gymnastics. Training in playground supervision and in the coaching of athletics.

All athletic sports are open to all students registered in the College. First term, football and tennis. Second term, basketball and tennis. Third term, baseball, tennis, and track sports.

The requirements are the same in number of units for men and women, though the kind of exercises and sports differ.

Physical Education is required of all classes and in all courses. Classes meet twice a week for a minimum of twenty-four weeks, exclusive of the time devoted to physical examination, the number of weeks depending upon the nature of the work.

DEPARTMENT OF PHYSICS.

PROF. BORDEN.

Physics 20. 1 unit.

Elementary Physics, Simple Machines, Mechanics of Liquids and Gases, Action of Forces, Elasticity and Strength of Materials, Accelerated Motion.

Lectures and demonstrations three hours per week; laboratory work two hours per week.

Physics 21. 1 unit.

Energy and Momentum, Heat, Heat Engines, Magnetism, Beginning of Electricity. Electrical Measurements and Measuring Instruments.

Lectures and demonstrations three hours per week; laboratory work two hours per week.

Physics 22. 1 unit.

Induced Current, Dynamos, Motors, and Alternating Current Machines, Sound, and Light.

Lectures and demonstrations three hours per week; laboratory work two hours per week.

Text-book for Physics 20, 21 and 22: Black and Davis' "Practical Physics."

Physics 23. 1 unit.

This course is designed for the students of the Home Economic Department, and teaches the principles of physics as applied in the home. Illustrative examples and applications are taken largely from the home, and the common system of weights and measures is used. School and home are thus united in the acquisition of knowledge that will be used in every-day life.

Lectures and demonstrations four hours per week.

Text-book: Lynde's "Household Physics."

Physics 40. 1 unit.

Prerequisite: Physics 20, 21, 22, or the equivalent.

Mechanics, including Vector Analysis, Force and Torque, Energy Transformation, Moment of Inertia, Machines, Power, and the Kinetic Energy of Rotating Masses. Heat, including Calorimetry, Kinetic Theory of Gases, and Thermodynamics.

Lectures and demonstrations three hours per week; laboratory work two hours per week.

Physics 41. 1 unit.

Electricity and Magnetism, including Electrostatics, Electro-magnetism, Electrical Measuring Instruments; Electro-magnetic Waves, and Alternating Generators.

Lectures and demonstrations three hours per week; laboratory work two hours per week.

Physics 42. 1 unit.

Sound and Light, in which Optical Instruments, Dispersion, Color Phenomena, and Polarization of Light will receive special emphasis.

Lectures and demonstrations three hours per week; laboratory work two hours per week.

Text-book for Physics 40, 41 and 42: "A Text-book in Physics," Spinney.

Physics 43. 1 unit.

This course is designed for students in the Manual Training Department in the junior and senior year, and is intended to give them a working knowledge of the machines and subjects studied, to the end that they may be able to properly care for the power and light apparatus of which they may have control.

Study of Gas Engines, Electric Generators and Motors, including principal types, methods of winding, connections, care of parts, troubles, etc. Electric Lighting and Wiring, including power consumption and cost, Efficiency of various types of lamps, requirements of insurance underwriters, etc. Storage Batteries, Switchboards, and Power Installation.

Time: Four hours per week; course will include lectures, study of actual commercial machines and apparatus installed in the College laboratories and powerhouse on the Campus, and books on electrical engineering from the library.

DEPARTMENT OF READING.

MISS PRICE.

A complete symmetric education from the most prosaic scholarship the highest professional art is impossible without expression; there-

fore it is the aim of this department to give to the pupil such instruction as will aid him in public speaking, reading, and the teaching of reading.

To think on one's feet is a power rarely possessed. This department leads the student unconsciously into this art, and this fits him for useful membership in society, in business, or the professional world.

Great stress is laid upon reading, speaking, and conversing correctly. The attempt is made to weed out all faults in the oral English. The speaking voice is developed, and articulation receives the most careful attention, for without it there can be no success on the platform, in the pulpit, at the bar, or in social circles. The teacher especially needs to articulate well. Pronunciation is zealously guarded.

Deep breathing and breath control are taught among the introductory steps. Perfect poise is early taught, and by precept, example and self demonstration on the part of the pupil, this, the only graceful position for a man or woman to assume, is daily enforced. The artistic use of hands, arms, head, torso, and the general carriage of the man as a whole, is taught and insisted upon.

Reading 10. 1 unit.

Instruction in correct breathing, correct pronunciation, reading from memory, and story telling.

Texts: King's "Elocutionary Reading and Graded Recitations" Ashmore's "Manual of Pronunciation."

Reading 20. 1 unit.

In all spoken languages there are not only thoughts but feelings. The great failure in reading and speaking is the inability to rightly render the feeling. Feeling is the soul of utterance, and the symbol that conveys feeling to the listener is tone. The best way to lead the student into correct interpretation of the higher literature is to show him its relationship to the experiences of daily life; hence we give drill in toning, studies in pause and prominence, method of studying a selection, and of practicing delivery.

Text: Natural Drills in Expression with Selections, by Arthur Edward Phillips.

Reading 30. 1 unit.

Continuation of Reading 20. Instruction in the method of teaching primary reading. The use and place of phonics. Reading from memory and story telling.

Texts: Briggs and Coffman's "Reading in the Public Schools" King's "Practice of Speech."

Reading 40. 1 unit.

Breathing and voice culture continued. Debating, extemporaneous speaking, and reading from memory.

Text: King's "Practice of Speech."

REGULATIONS CONCERNING INTERCOLLEGIATE ACTIVITIES.

Students are disqualified to represent the Normal College in inter-collegiate games or contests, or any extraordinary student activity by the following conditions:

1. Failure to make a passing grade in at least three subjects of the full regular course in which the student is registered.
2. Being "under discipline."
3. Being the beneficiary in actuality or promise of any financial consideration for participation in such game, contest, or activity.

Disqualification under (1) and (2) may be removed at any time by the teacher or committee responsible for such disqualification, when the occasion therefor has been removed by the student.

DEPARTMENT OF PIANO.

MISS ANDERSON.

The Department of Piano has been added to the College during the past year. It is not included in the regular course but is open to all who wish to avail themselves of the opportunity.

Terms, per Month—

Two lessons a week, one-half hour each.....	\$8 00
Half time	5 00

TEXT-BOOKS.

AGRICULTURE.

Elements of Agriculture, Ferguson and Lewis.
 Insect Pests of Farm, Garden, and Orchard, Sanderson.
 Field Crop Production, Livingston.
 Types and Breeds of Farm Animals, Plumb.
 American Cotton System, Miller.
 Principles of Fruit Growing, Bailey.
 Agricultural Bacteriology, Conn.
 Rural Economics, Carver.
 Genetics, Walter.

BIOLOGY.

General Zoology, Linville and Kelley.
 Applied Physiology, Overton.
 Essentials of Botany (Advanced), Bergen.
 Principles of Botany, Bergen and Davis.
 College Botany, Atkinson.

CHEMISTRY.

Course in General Chemistry, McPherson and Henderson.
Elements of Qualitative Chemical Analysis, Stieglitz.

CIVICS.

American Government, Hinsdale.
The American Federal State, Ashley.
Introduction to Political Science, Garner.

EDUCATION.

Schoolroom Essentials, Sutton and Horn.
Method in Education, Roark.
Classroom Management, Bagley.
Principles of Teaching, Thorndyke.
School and Society, Dewey.
Psychology, Angell.
Practical Pedagogy, Compayre.
Fundamentals of Child Study, Kirkpatrick.
Method of the Recitation, McMurry.
History of Education, Graves.
Ethical Principles Underlying Education, Dewey.
Administration of Education, Hollister.
Principles of Education, Ruediger.

ENGLISH.

Our Language Grammar, Smith.
English Grammar, Buehler.
English Literature, Long.
History of American Literature, Halleck.
The English Sentence, Kimball.
Grammar Outlines, Blanton.
Handbook of Composition, Woolley.
Introduction to English Literature, Pancoast.
Standard English Poems, Pancoast.
Composition and Punctuation, Blanton.
English Poems, Bronson.
The Teaching of English, Carpenter, Baker, and Scott.

GERMAN.

Märchen und Erzählungen, Vol. 1, Guerber.
Vorwärts, Bacon.
Introduction to German, Prokosch.
Glück Auf, Müller and Wenckeback.
Jung Deutschland, Gronow.
Gruss aus Deutschland, Holzwarth.
Willkommen in Deutschland, Mosher.

Deutschland und die Deutschen, Decker and Markisch.
 An American in Germany, Pattou.
 Commercial German, Kutner.
 Deutsche Litteraturgeschichte, Wenckeback.
 Bilder aus der Deutschen Litteratur, Keller.
 German Poetry, Nollen.
 Deutsche Gedichte, Klenze.
 Das edle Blut, Wildenbruch.
 Die Karavanne, Hauff.
 The Teaching of Modern Languages, Bahlsen.

HISTORY.

Ancient History, Myers.
 Medieval and Modern History, Myers.
 History of England, Andrews.
 Industrial History of the United States, Coman.
 Formation of the Union, Hart.
 Division and Reunion, Wilson.
 Development of Modern European History, Vol. II, Robinson and
 Beard.
 Source-book of American History, Botsford.
 Source-book of English History, Lee.
 Documentary Source-book of American History, McDonald.
 Source-book of Medieval History, Ogg.
 Readings in Modern European History, Vol. II, Robinson and Beard.

HOME ECONOMICS.

Food Products, Sherman.
 Textiles, Woolman.
 Chemistry of Food and Nutrition, Sherman.

LATIN.

First Year Latin, Gunnison and Harley.
 Caesar, Gunnison and Harley.
 Cicero, Gunnison and Harley.
 Livy, Westcott.
 Horace, Moore and Morris.

MANUAL TRAINING.

Hand Forging, Bacon.
 Problems in Mechanical Drawing, Bennett.
 Manual Training Toys, Moore.
 Elements of Mechanical Drawing, Jameson.

PHYSICS.

Practical Physics, Black and Davis.
 Household Physics, Lynde.
 Text-book in Physics, Spinney.

READING.

Elocutionary Reading and Graded Recitations. King.
 Manual of Pronunciation, Ashmore.
 Reading in the Public Schools, Briggs and Coffman.
 Practice of Speech, King.

STUDENT ACTIVITIES.

In institutions of learning in times past the subject matter of studies has often been from our modern point of view practically worthless, the method of teaching unscientific and bunglesome, and the control over the pupils barbarous. This was practically true of the medieval universities as well as of some educational enterprises not so remote. And yet, these schools thus criticised, were still educational in a very real sense, because of the voluntary student activities prevailing in them, made possible by the shortness of the school day and school term. For in these activities the choicest young minds of the nation or race came in contact, whether in conflict or co-operation, with each other.

Because curriculum, method, and government have all changed for the better is no reason for despising and dispensing with the educational value of student activities. Not only do these activities furnish opportunity for social education in leadership and loyalty, but they provide training in the application of theory learned in the classroom to practical conditions outside. And this is precisely the work the student will engage in through all his after life, and success in which will be the final measure of his usefulness and the real test of the efficiency of the school. They also satisfy a natural craving for social intercourse, which it would be both stupid and wicked for any school to seek to oppose. They also serve to give legitimate occupation to those members of the school community whose time is not fully occupied by the work adapted to the average capacity of the group.

The North Texas State Normal College has adopted and adhered

to a policy of encouraging a wide line of student activities, literary, forensic, dramatic, athletic, social, journalistic, artistic, and spiritual. While student initiative and leadership is encouraged, these activities are in no case left to or thrust upon the sole responsibility of students, but are under the sympathetic and more or less closely directive influence of committees from the Faculty.

Literary Societies.—The school at present supports four literary societies, the Mary Arden and the Current Literature Clubs for girls, and the John H. Reagan and the Robert E. Lee Literary Societies for boys. The girls' clubs meet bi-weekly, while the boys' societies have weekly sessions. The Mary Arden Literary Club is limited to membership of forty, and gives preference to advanced students. It was originally organized to sustain and extend the study of Shakespeare, but it generally studies as well some modern author each year, or traces some problem of timely importance. The Current Literature Club, larger and more democratic in its organization, stimulates the perusal of the highest grade of modern literature, and also discusses questions of social and civic importance. Both of these clubs are "federated" with other women's clubs in city and State club work.

The societies named for the great Southern leaders seek to develop qualities of manliness and loyalty as well as give training in debating, declamation, and parliamentary practice. The Henry W. Grady Literary Society takes the place of the Reagan and the Lee in the summer session. For purposes of intercollegiate contests the two boys' societies are combined into the Oratorical Association. Under the auspices of this organization the school is a member of the Texas Normals Debating League, in which each of the Texas Normal Schools annually meets in debate two of the sister institutions. Debates occur simultaneously at all the Normals, the identical question is discussed, and each school supports both sides of the question. The school is also represented in the State Peace Oratorical Association. In the local contest for the honor of representing the school in the State contest there participated this year four young men and four young women.

Student Publications.—Elected representatives of the various classes, twenty-eight in number, constitute the Press Club, which publishes a monthly publication, *The Journal*, and an annual, *The Yucca*. The editor-in-chief of *The Journal* is elected by the board of four associate editors, who in turn are elected by the respective literary societies. The editor-in-chief of *The Yucca* is elected by the entire student body. This office is the highest honor in the gift of the students, and the election is contested in the typical American fashion. The business manager of the publications is elected by the Faculty. *The Journal* furnishes a repository for the best products of student literary effort and a record of current events in the school. *The Yucca* is an illustrated year book of the College life and activity. Such publications are invaluable to a school, for the associations formed during the year they serve as much to enrich the later life of the student as his formal

work in classroom, library, and laboratory, and it is the human side of the school that gives these tasks a life meaning.

The Correspondents Club is another student activity of great usefulness to the school. The students coming from certain counties or groups of counties have for some years been organized for social purposes into county or section clubs. These clubs elect certain member correspondents of home or county papers, whose duty it is to send every month a news letter giving the main happenings at the College. These letters are primarily of interest to the families and friends of the students, and also serve to bind to their alma mater the alumni now engaged in teaching in every part of the State. Incidentally they may serve to interest some ambitious boy or girl, whom the school was established to help, and whose value to the State can thus be greatly enhanced.

Sketch Club.—Interest in an art has always been a powerful means of binding a group of persons together. The Sketch Club is composed of a group of students who have some artistic ability and who are interested in drawing and painting, and who want to give more time to the work than the class period affords. These students make most of the illustrations for *The Yucca*, as well as the artistic posters carrying announcement of other activities. For this sort of work the weekly sessions are held in the classroom, but at other times when the weather permits sketching tours into the open are substituted. The membership of the club is limited to twenty-five.

Musical Organizations.—The fundamental musical organization of the school is the Choral Club. It is our purpose to have a chorus of two hundred voices each year. This chorus is made up of students who can read music fairly well at sight. It meets for practice twice a week throughout the year. A varied selection of musical masterpieces, consisting of modern part songs, and selections from oratorio and opera are studied. While concerts are given from time to time during the year, the most important feature of the chorus is the May Festival, which constitutes a leading part of the Commencement Week program. A credit of one unit is given for regular attendance and conscientious work. The Musical Club for Young Women and the Glee Club are two popular organizations for girls and boys, respectively. Each consists of about fifty voices. Fluent reading at sight is required for membership in either. Recitals and musicales are given throughout the year. Besides the musical numbers that enrich the literary and devotional programs of other organizations are largely the fruit of the work of these clubs.

The Normal Band has proved one of the most successful of the student organizations. The school owns the following instruments: six cornets, three clarinets, one saxophone, two mellophones, two trombones, two tenors, two baritones, two basses, two drums, and one piccolo. Ten of these were added during the last year. In addition to the twenty trained players constituting the regular band, four classes of beginners have been given instruction and practice. In all seventy-five per-

sons have during the year participated in this musical activity under the leadership of Prof. J. W. Pender. There is already the assurance of a full band for next year.

Athletics.—Since man is body as well as intellect and soul, it is the duty of every school to provide opportunity for physical as well as mental and moral development. It is no new educational doctrine that a sound mind can normally dwell only in a sound body, hence the full education of an individual requires that careful attention be given to the physical side of his being. Besides the regular course in physical education, the inter-class and inter-school contests are aimed primarily to increase the student's capacity for mental effort, for moral stamina, and for social service. Competitive athletic games with schools of equal rank are made part of the athletic program. But since intercollegiate games do not afford the opportunity of participation to the majority of students, great stress is laid upon competition between classes and other groups. In this way it is hoped the entire student body may be reached by the invigorating influence of strenuous play. The school owns about five acres of land prepared for baseball, basketball, tennis, volley ball, and other games. The athletic interests are safeguarded by a committee of the Faculty and by an association of students. Representatives of both bodies form the Athletic Council, whose duty it is to keep athletic interest in the school, not only alive and healthy, but sane and intelligent as well.

The Student Volunteer Fire Company has on a number of occasions rendered praiseworthy service in the school neighborhood. An equipment of helmets and waterproofs has lately been added to the apparatus supplied by the city. No student is required or permitted to assume any risks such as entering a burning building, but more than once the control of the fire has been credited to the boys by their having a stream of water on the fire several minutes before the city apparatus arrived on the scene.

The Young Men's Christian Association.—The Young Men's Christian Association was organized in the school two years ago and has readily gained in influence. During the past year about one hundred have been enrolled as active members. Delegates have been sent each year to the western or southern summer encampments as well as to the meetings of the State association. Weekly devotional meetings are held for an hour immediately after supper on Thursday nights. Speakers with vision and message, both from within and without the school, then address the boys and set up ideals of manliness and service. It is hoped in the near future to secure the services of a special "secretary," who will devote his entire time to the work. Some special lines of study may then be organized under the auspices of the association in mission work, philanthropy, and Bible study, to put the students in touch with these great movements in the world.

Young Women's Christian Association.—The Young Women's Christian Association of the Normal College for the past year, in addi-

tion to the social features and regular weekly devotional services, has been favored with several visits from well-known student workers of the State and international force, whose contributions have been inspiring and helpful. The association sent several delegates to the Jubilee Conference held in Fort Worth in February. It has contributed to the support of a Y. W. C. A. secretary in China. Several special public programs were rendered in the auditorium on appropriate occasions. The greatest work undertaken by the Young Women's Christian Association has, however, been the raising among the Faculty and students of a fund for the purpose of employing a student secretary for next year. Miss Appleby, the new secretary, is a woman trained in student work, and her coming will be of untold value in the molding of religious thought and life among the students.

TERM REPORTS.

At the end of each term of twelve weeks a report of the work of the student for that term will be sent the parent or guardian.

EXPENSES.

Tuition is free.

Each student enrolling in the school during the regular nine months session shall pay an incidental fee of \$15 upon entrance, and no other fees or charges shall be levied against or collected from any student, and each student is entitled to the free use of text-books furnished by the school, which books, if returned in satisfactory condition at a time designated by the President, shall entitle the student to a refund of \$2.00.

The payment of this fee of \$15 is to be made by the student upon entrance to the school. It is the only fee paid during the session of nine months. There are no additional fees for library, books, laboratory, Manual Training, Domestic Science, etc.

The fee is \$15 whether the student enters at the beginning of the session or near the close of the session, whether the student continues in school for the entire session or only a few days of the year. No part of the fee is refunded, except \$2.00 upon prompt return of books. In order to be entitled to the refund of \$2.00, the student must return the books used by him at the time designated for their return.

No one should ask exemption from or modification of the fee or its conditions. Neither discretion nor authority is given the President of the school to alter the terms or conditions of its payment.

BOARDING PLACES AND RATES.

The school has no dormitory. In proximity to the school there are between one hundred and fifty and two hundred good boarding and

rooming houses. Every year the number of boarding houses is increased and the conveniences improved. Nearly all these houses have electric lights, sewerage, hot and cold water appliances, and are screened, while many have natural gas for cooking, heating, and lighting.

Students are permitted to select from an *approved* list their own boarding places. Frequent changes for trivial causes are discouraged and students, after the first ten days may change their places of residence only with the consent of one of the deans of the Faculty.

Men and women students must have separate boarding and separate rooming houses.

A list of *approved* houses is furnished each student upon arrival at the school. No student is permitted to engage board at a house not on this list. Such list cannot be furnished the student in advance of arrival, because (1) frequent changes and additions made in houses near the beginning of the session render it impracticable to make a complete list; (2) such list would convey no useful information to one unacquainted with the topography of the town, and (3) it is not necessary for students to engage board in advance; there being always ample accommodations regardless of the number of students. Reports have at times become current that all boarding places have been filled before the beginning of the session or very soon thereafter. No student has, in the history of the school, been forced to leave for lack of board, and such report in future, if heard, should be promptly discredited.

Board and rooms cannot always be secured in the same house. More than half the students secure rooms at one place and meals at another. Because numerous houses make special provision for furnishing meals to large numbers, frequently more satisfactory conditions can be found by not insisting on having meals and rooms at the same place.

Approved Houses.—An approved boarding house is one that co-operates with the school, enforces the regulations concerning the conduct of students, exerts a good influence over the students, treats them kindly, but firmly, and affords good board with sanitary conditions.

Whenever it is found that the proprietor of a boarding house does not meet the requirements of an "approved house," fails or refuses to enforce the regulations and to report violations, the students are removed from such house.

All persons desiring to take Normal students as boarders must apply to the school in writing, stating the number of boarders desired, whether men or women, stating whether they offer rooms or meals, or both, giving rates in each case, and specifying the conveniences offered.

If upon application a boarding house is approved, it is placed on the approved list and the proprietor is furnished a printed copy of the regulations of the school.

Rates.—Rates of board (including rooms, meals, fuel, light, and other facilities) vary from sixteen to twenty dollars per calendar month, owing to proximity to the school, and conveniences offered. A few houses charge somewhat more than the rates above quoted, but there are ample facilities at these rates.

Upon reaching Denton students should report at once to the office of the school, where a list of boarding houses will be furnished and their locations ascertained. No attention should be given those who advise the student to engage board before coming to the office.

Electric cars run from the railroad station to the Normal College.

THE LYCEUM COURSE.

The fact that preparation for complete living and good citizenship involves development and training of the social and esthetic nature, as well as the intellectual, is fully recognized in this College.

As a potent factor in this direction the Normal has always maintained a strong course of lectures and entertainments, each year securing the best available talent. Men and women of national reputation, famous as leaders in public life, noted artists, musicians, and writers have been secured, who have contributed much to the student's realization of the college purpose of helpfulness and spiritual uplift.

KINDS OF CERTIFICATES GRANTED ON WORK DONE IN THE TEXAS STATE NORMAL SCHOOLS.

1. The student completing the work of the freshman (first year) class receives a second grade certificate valid for six years.
2. The student completing the work of the sophomore (second year) class receives a first grade certificate valid for six years.
3. The student completing the work of the junior (third year) class receives a first grade certificate, stating which of the seven courses pursued and valid for six years.
4. The student completing the work of the senior (fourth year) class receives a permanent certificate, stating the course pursued, which is valid during good behavior.

All certificates are issued by the State Department of Education. They bear the seal of the department and are signed by the State Superintendent of Public Instruction.

The student completing the work of the senior class is awarded the diploma of the College. The diploma states the special course completed. It bears the seal of the College and is signed by the President.

The certificates granted by a State Normal School should not be confused with certificates obtained from summer normal institutes and county boards of examination.

Certificates granted by State Normal Schools may be built upon for higher certificates, but the Normal Schools do not grant certificates to applicants by simply "taking the additional subjects" for higher certificates.

GOVERNMENT.

Those entering a Normal School are expected to be of sufficient maturity and to have come with a purpose so serious and definite that espionage is unnecessary. By far the greater number of students who come here are eager, earnest, and industrious young men and women, who cheerfully comply with all regulations. But experience has demonstrated the necessity of having well defined regulations concerning the conduct at school and at the boarding places, for the guidance of those whose inclination or whose judgment renders proper direction necessary.

Upon matriculation the student is given a printed copy of the regulations concerning the conduct of students and he is requested not to register if unwilling to conform to the requirements. Whenever a student wilfully violates the regulations, ignores the efforts of the faculty to assist him in his character building, manifests a spirit of insubordination to authority, or shows himself out of harmony with the school and its ideals, he is advised that he is not in the right school and is requested to withdraw.

Continuance in school depends upon punctual class attendance and obedience to regulations. Students who must continually be admonished, restrained, reprimanded, or denied the usual privileges, are undesirable, and they will not be retained in the school.

The purpose of the school is to train teachers for the public schools of Texas, and it should not inflict upon the children of the State as teachers those whose character, habits of thought, or low ideals unfit them for directors and exemplars of the young.

To all those who are seeking opportunity to work under wholesome influences, favorable conditions, competent and sympathetic direction, is extended a hearty welcome. Those who are merely seeking diversion, change of environment, or increased social advantages, and those incapable or unwilling to lead the life of a student are advised—urged—go elsewhere.

DIRECTIONS TO STUDENTS APPLYING FOR ADMISSION.

Students should note the requirements for entrance, and understand that the school has no authority to admit them without implicit compliance with the directions of the Board of Regents. Students should not write asking that in their cases these requirements be not enforced on account of their age, experience, or other reason, for no such request can receive consideration.

Students should remember that the requirements for entrance and for certificates are the same in all the Texas State Normal Schools.

Credentials, certificates of promotion, etc., upon which entrance examinations are sought to be absolved must be documents signed officially by the proper authority.

Credentials, statements, certificates of promotion, to receive consideration must be from—

(a) High schools affiliated with colleges or universities previously named.

(b) High schools approved by the State Department of Education.

Students desiring to enter on examination, on certificate, diploma or promotion card from accredited high schools should report at the beginning of the session, and avoid trouble and delay in classification.

Credits are given only for full terms' work. Students entering late in the term find difficulty in being classified promptly and making up the work already done by the class.

A term is twelve weeks.

Students should not request exemptions not mentioned in the bulletin, as the school is without authority to grant such requests.

Diplomas, promotion cards, statements, etc., from schools not duly accredited should not be urged as exemptions from examination. This school has no authority to affiliate, accredit or approve schools of any kind.

THE TEACHERS' RECOMMENDATION COMMITTEE.

A committee of the faculty, without fee or compensation of any kind, acts as a Teachers' Bureau for the purpose of aiding worthy students in finding employment upon leaving school and assisting school boards in finding competent teachers. This committee places every year several hundred teachers. Its service to school boards have proved satisfactory, and it receives applications from school officials every week in the year.

Any communication concerning the work addressed to the President or the Secretary of the school or to the Chairman of the Committee on Recommendations will receive prompt attention.

CITY OF DENTON.

Denton is a city of churches, schools, and beautiful homes.

It is on the Texas & Pacific and the Missouri, Kansas & Texas Railroads, thirty-five miles from Fort Worth and thirty-seven miles from Dallas, and accessible from all sections of the State.

Denton has an efficient system of public schools, three ward schools and a high school building. Two State educational institutions are located here.

Denton has a population of more than six thousand. It has free mail delivery, two telephone exchanges, and a system of electric street cars. The city owns and maintains an electric light and power plant, waterworks, and sewer system. It has natural gas for light and fuel. So Denton, with its railroads, telegraph and telephone connections, street

ars, ice manufactory, fire department, waterworks, local telephone, sewerage and natural gas, lacks none of the public utilities enjoyed by much larger cities.

THE TRAINING SCHOOL.

In connection with the Normal School proper is conducted a school of nine grades. The purpose of this school is to afford the Normal students the opportunity of observing the organization, conduct, control, instruction, and other details of a model public school, and to give students actual practice and experience in teaching under expert direction.

The experience thus acquired is far more helpful and valuable to the teacher than that gained in the usual haphazard method upon which the young teacher depends when he starts out for himself either in the grades or in the rural schools.

The completion of the work of the ninth grade in the Training School admits the students to the freshman class of the College without examination.

Until a more commodious building and a greater number of teachers can be provided by appropriation, each teacher, except that of the first grade, will have charge of two grades. All these are experienced and trained teachers. A technically trained and experienced director is in charge of the entire instruction.

The Training School is designed to give the students of the Normal College careful training in the art of teaching in the grades. Each student in the Normal School department is required to teach at least one term before graduation, under the supervision and instruction of the director and the training teachers.

The different members of the Normal School faculty and the teachers in the Training School give "model" recitations with criticisms and discussions of the work in the different subjects.

In some cases the daily observation and criticism of classes followed by oral or written discussion, or both, may be substituted for a term of teaching by the student.

While actual teaching in the Training School is required only of members of the senior class, members of the other classes are required to do observation work, prepare lesson plans, etc. Each student teacher is required to prepare lesson plans a week in advance of the work, which plans are examined, criticised, and, when necessary, revised by the director or training teachers. The conduct of recitations by the student teacher is observed by the training teacher, and helpful criticisms given in private.

Students of the Normal School department are also appointed to superintend the playground of the Training School during recess periods.

Admission to the Training School.—Pupils from any section of Texas may be admitted to the Training School until the limit, sixteen to a grade, is reached.

The Training School is closely correlated with the public schools of Denton. There is cordial co-operation with the school board, the superintendent and the corps of teachers of the public schools.

At the beginning of the session pupils will be admitted on promotion cards from the public schools, or classified by examination, but after the school year begins all transfers from the public schools are discouraged, and pupils suspended from other schools and those who leave school on account of having been disciplined are not desired.

Tuition in the Training School is free, nor is there any incidental or other fee. The "per capita" apportionment by the State is not transferred to the school, its expenses being met by regular appropriations, hence we reserve the right to refuse or to dismiss pupils who, from irregular attendance, habits, persistent misconduct, or inability, prove burdensome to the class.

COURSE OF STUDY IN THE TRAINING SCHOOL.

GRADE I.

English: 1. Reading. 2. Spelling. 3. Phonics. 4. Language.

Number Work: 1. Counting. 2. Addition to 10. 3. Subtraction. 4. Simple measures.

Social and Industrial Life: 1. The home and community. 2. Industrial and fine arts. 3. Plant and animal life.

Music: 1. Rhythm. 2. Tone. 3. Scale. 4. Musical games.

GRADE II.

English: 1. Reading and literature. 2. Language. 3. Spelling and phonics.

Arithmetic: 1. Counting. 2. Forty-five combinations. 3. Multiplication through the 5's. 4. Division as inverse of multiplication. 5. Measurements. 6. Simple fractional parts. 7. Analysis.

Social and Industrial Life: 1. Industrial and fine arts. 2. Nature study, birds, trees, insects. 3. Home and community. 4. Pre-historic life.

Music: 1. Rhythm. 2. Tone. 3. Key quality. 4. Appreciation.

GRADE III.

English: 1. Reading and literature. 2. Language. 3. Spelling. 4. Phonics.

Arithmetic: 1. Counting. 2. Addition and subtraction. 3. Multiplication and division. 4. Measurements. 5. Simple fractional forms. 6. Problems.

Texas Geography.
Hebrew History Stories.
Industrial and Fine Arts.
Music, including appreciation.

GRADE IV.

English: 1. Reading and literature. 2. Language and composition. 3. Spelling.

Arithmetic: 1. Counting. 2. The four fundamental operations. 3. Roman notation to 500. 4. Measures. 5. Fractions. 6. Practical problems.

Geography: 1. Home geography. 2. The world as a whole. 3. United States—type studies.

History: Greek and early Roman life.

Studies in Universal Life: 1. Stars and planets. 2. Mother earth—soil—air—water—interdependence of life.

Industrial and Fine Arts.

Music.

GRADE V.

English: 1. Reading and literature. 2. Language and composition. 3. Spelling.

Arithmetic: 1. The four fundamental operations. 2. Fractions—common and decimal. 3. Problems.

Geography: 1. Europe. 2. Australia. 3. Certain phases of United States. 4. Simple presentation of latitude and longitude.

History: Late Roman, Medieval, and English life to 1492.

Studies in Universal Life: 1. Common wayside things. 2. Man's dominion. 3. Our wonderful bodies. 4. The dwelling place of man's spirit.

Industrial and Fine Arts.

Music.

GRADE VI.

English: 1. Appreciative reading and literature. 2. Composition and grammar.

Arithmetic: 1. Constant review of fundamental operations. 2. Counting by aliquot parts. 3. Denominate numbers. 4. Percentage. 5. Problems.

Geography: 1. Asia. 2. Africa. 3. South America.

History: 1. Texas (half year). 2. United States, to Revolution (half year).

Physiology.

Industrial and Fine Arts.

Music.

GRADE VII.

English: 1. Appreciative reading and literature. 2. Composition. 3. Grammar.

Arithmetic: 1. Percentage as used in business. 2. Ratio and proportion. 3. Mensuration. 4. Problems.

Geography: 1. North America (in detail). 2. Europe (in detail). Emphasis on immigration problems.

History: United States (industrial side emphasized). Civics.

Elementary Agriculture.

Industrial and Fine Arts.

Music.

GRADE VIII.

English: 1. Literature. 2. Composition. 3. Grammar.

Mathematics: 1. Algebra through fractions. 2. Mensuration. 3. Problems.

Ancient History.

First Year Science.

Industrial Arts.

Fine Arts or Latin.

Music.

GRADE IX.

English: 1. Literature. 2. Composition. 3. Grammar.

Algebra.

Biology: 1. Plants. 2. Animals. 3. Man.

Medieval History.

Industrial Arts.

Fine Arts or Latin.

Music.

THE SUMMER SESSION.

The summer session of the North Texas State Normal begins about June 1st and closes about August 1st of each year. Two distinct schools are maintained, "The Summer School" and the "Summer Normal." Students of the different schools are taught in separate classes and do different classes of work. Students of the Summer School are applying for "credit" towards certificates or diplomas of the institution. Students of the Summer Normal review the subjects for examination for certificates issued by the State Superintendent of Public Instruction.

The general purpose of the summer session is to meet the demands and to reach the students that cannot be met during the regular session. There are in all sections of the State many teachers who, despite limited preparation, are doing good work in the cause of education. These teachers, barred by circumstances often from the advantages of college or normal schools, desire to broaden their scholarship, and increase their efficiency in school work. It is to this class that the summer session appeals. To these are offered the advantages of a large and competent faculty of specialists, the library, laboratories, apparatus, and equipments of the Normal College.

The Summer School Section.—The student registering in the summer school section does "credit work" towards a certificate or diploma of the school. The work of a summer term corresponds practically to that of a term of the regular session. The first summer the student attends he takes the work as outlined for the first term of the regular session in the course he elects, and similarly for each subsequent term. At the close of the summer session examinations are given for entrance to all classes of the regular session.

The Summer Normal Section.—For those who register in the Summer Normal section is offered a review of subjects required for the different grades of State certificates. The work of this section is conducted in compliance with the directions of the State Superintendent of Public Instruction, and the summer normal examinations for certificates conducted at such times as he designates.

The advantages offered teachers during the summer have been realized and appreciated, as evidenced by the increased attendance from year to year. The summer session of last season (1914) enrolled 1027 students.

SUMMER SESSION, 1916.

May 30 to July 29.

CALENDAR FOR 1917-18

First Term

Faculty meeting, Thursday, September 13, 1917, at 9 A.

Registration of new pupils begins Saturday, September 15, at 1:30 P. M.

Registration of new pupils, entrance and condition examinations, and classification of students upon credentials, Monday, Tuesday, and Wednesday, September 17, 18 and 19.

Registration of former students, Wednesday, September 19.

All assemble in Auditorium Thursday, September 20, at 9 A. M.

Formation of classes and beginning of recitations Thursday, September 20, at 1:30 P. M.

First term ends Saturday, December 8, 1917.

Second Term

Second term begins Tuesday, December 11, 1917.

School dismissed for Christmas holidays, Saturday, December 22, 1917.

School reassembles Tuesday, January 1, 1918.

Second term ends Saturday, March 2, 1918.

Third Term

Third term begins Tuesday, March 5, 1918.

Session 1917-18 closes Tuesday, May 28, 1918.

Summer Term

Summer term begins Tuesday, June 4, 1918.

DIRECTIONS TO STUDENTS

When students arrive in Denton, they should take the street car and come at once to the Normal College office, where a Faculty Committee will assist them in securing suitable boarding places.

Students coming for the first time, and also former students who have conditions to be removed, should reach Denton not later than Saturday, September 15, in order to be ready for examinations and classification on Monday, September 17.

Former students already classified and without conditions should report for registration Wednesday, September 19.

It is important that students come at the times above specified, and thus avoid delay in classification.

FACULTY *for* 1917-1918

W. H. BRUCE, A. B., A. M., PH. D., LL. D., *President*,

A. B., Alabama Polytechnic Institute; A. M. Baylor University; Ph. D., Mercer University; LL. D., Trinity University. Professor of Mathematics 1901-'06; President since October, 1906.

L. D. BORDEN, B. S., A. B.,

Physics.

B. S., Southwestern University; A. B., University of Nashville; L. I., Peabody Normal College; Student Chicago University; Student Cornell University. Present position since September, 1901.

MISS ANNIE WEBB BLANTON, B. Lit.,

English.

B. Lit., University of Texas; Student Chicago University. Present position since September, 1901.

MISS M. ANNE MOORE, M. L., A. B.,

Education.

M. L., Southwestern University; A. B., Chicago University. Present position since September, 1901.

MISS EMMA MITCHELL,

History.

Graduate Aiken Institute, Paris, Texas; Student Chicago University. Present position since September, 1901.

MISS EDITH LANIER CLARK, B. Lit., A. M.,

Dean of Women, English.

B. Lit. and A. M., University of Texas; Student Chicago University; Student Columbia University. Present position since September, 1902.

J. H. LEGETT,

Agriculture.

Graduate North Texas State Normal College; Student Chicago University. Present position since November, 1906.

MISS ELIZABETH ALGER HILLYAR,

Drawing.

Student Woman's Art School of New York; Diploma Columbia University. Present position since September, 1906.

W. D. BUTLER, A. B., A. M.,

Dean, Mathematics.

A. B. and A. M., Bethel (Kentucky) College; Student Johns Hopkins University; Student Chicago University. Present position since October, 1906.

J. R. SWENSON, A. B., A. M.,

Education.

A. B., University of Denver; A. M., University of Texas; Graduate Student Columbia University, 1905-'06 and 1906-'07. Present position since September, 1907.

T. E. PETERS, A. B., A. M.,

Mathematics.

A. B. and A. M., Greenville (Kentucky) College. Present position since January, 1908.

C. L. DAVIS, B. S., M. S.,

Agriculture.

B. S., University of Tennessee; Graduate Student Iowa State College; M. S., University of Wisconsin. Present position since September, 1909.

J. W. SMITH,

Treasurer, Mathematics.

Student University of Texas. Present position since September, 1909.

P. E. McDONALD, A. B.,

Associate Dean, Latin.

A. B., University of Nashville; L. I., Peabody Normal College. Present position since November, 1909.

E. D. CRIDDLE, B. Lit.,

History.

B. Lit., University of Texas. Present position since November, 1909.

W. N. MASTERS, B. S., A. B.,

Chemistry.

B. S. and A. B., National Normal University, Lebanon, Ohio. Present position since September, 1910.

E. L. ANDERSON, A. B.,

German.

A. B., University of West Virginia; Student Leland Stanford University, 1901-'02, 1902-'03; Student Marburg University, Germany, summer, 1905; Student Columbia University, 1908-'09. Present position since September, 1912.

MISS CORA BELLE WILSON, A. B., A. M.,

History.

L. I., Peabody Normal College; A. B., University of Nashville; A. M., Columbia University. Present position since September, 1912.

HUGO J. P. VITZ, B. S.,

Manual Training.

B. S., Purdue University. Present position since September, 1912.

MISS MARGARET W. PRICE,

Reading.

Graduate Rogersville (Tennessee) Synodical College; Graduate King's School of Oratory, Pittsburg, Pennsylvania. Present position since September, 1912.

MISS CLARA M. PARKER, A. B.,

Associate Dean of Women, Latin.

A. B., University of Texas; Student Chicago University; Student Columbia University. Present position since June, 1913.

J. P. DOWNER, A. B.,

Mathematics.

A. B., Cumberland (Tennessee) University. Present position since September, 1913.

J. W. PENDER, A. B.,

Civics.

A. B., Grayson College. Present position since September, 1913.

MISS MAUDE L. FIERO, B. S.,

Education, Director of Training School.

Graduate State Normal School, New Platz, New York; B. S., Columbia University. Present position since January, 1914.

MISS BEULAH A. HARRISS, A. B.,

Physical Education.

A. B., University of Nebraska; Graduate State Normal School, Peru, Nebraska. Present position since September, 1914.

MISS MARY C. SWEET, A. B.,

English.

A. B., Daniel Baker College; A. B., University of Texas; Graduate student, University of Texas; Graduate student, Columbia University. Present position since November, 1914.

MISS BURTIE J. ATTWELL, A. B.,

English.

A. B., University of Texas; Student Cambridge University, England; Student Sorbonne University, Paris, France. Present position since September, 1915.

MISS LILLIAN M. PARRILL,

Music.

Graduate American Institute of Normal Methods, Northwestern University, Pupil, Oscar Saenger, New York City; Pupil, Chas. C. Washburn, Nashville, Tennessee. Present position since September, 1915.

J. W. ST. CLAIR, A. B.,

Physical Education and Director of Athletics.

A. B., Baylor University; Student Chicago University. Present position since September, 1915.

B. B. HARRIS, B. S.,

Biology.

B. S., Clemson A. and M. College of South Carolina; Student University of Ohio. Present position since June, 1916.

S. S. McKAY, A. B.,

History.

A. B., University of Texas. Present position since June, 1916.

A. E. CHRISLIP, A. B., A. M.,

Education.

L. I., Peabody Normal College; A. B., University of Nashville; A. M., Columbia University; Graduate student Columbia University, 1910-'13. Present position since September, 1916.

MISS FLORA L. WILKIN,

Drawing.

Student Chicago University; Student Columbia University. Present position since September, 1916.

MISS BETTY M. HUNT, A. B.,

Home Economics.

A. B., University of Tennessee; Graduate student Columbia University. Present position since September, 1916.

MISS MARY ANDERSON, B. Mus.,

Instrumental Music.

B. Mus., Baylor University; Student two years conservatory Leipsic. Present position since September, 1916.

MISS CORALEE GARRISON, A. B.,

Reading.

A. B., Westminster College; Graduate King's School of Oratory; Graduate Western Maryland College. Present position since October, 1916.

F. L. MASTERSON, A. B., A. M.,

Education.

Graduate Sam Houston Normal Institute; A. B., University of Texas; A. M., Harvard University. Present position since November, 1916.

W. J. McCONNELL, A. B.,

Mathematics.

Graduate North Texas State Normal College; A. B., University of Denver. Present position since November, 1916.

MISS RUBY C. SMITH, A. B.,

Spanish.

Graduate Southwest Texas State Normal School; A. B., University of Texas. Present position since November, 1916.

MISS DELLA MARIE CLARK, A. B.,

Physical Education.

A. B., University of Nebraska. Present position since December, 1916.

L. M. ELLISON, A. B., A. M., PH. D.,

English.

Graduate Sam Houston Normal Institute; A. B. and A. M., University of Texas; Ph. D., Chicago University. Present position since January, 1917.

F. E. POINDEXTER, A. B.,

Physics.

A. B., University of Texas; Graduate Student University of Texas. Present position since January, 1917.

MISS ROSEBUD M. VAUGHAN, A. B., A. M.,

English.

A. B., University of Arkansas; A. M., University of California. Present position since June, 1917.

MISS ALICE SIGWORTH,

Reading and Drawing.

Graduate State Normal School, Indiana, Pennsylvania; Graduate Emerson College of Oratory; Student New School of Design, Boston, Massachusetts. Present position since June, 1917.

MISS EMMA A. BAIE, B. S.,

Home Economics.

B. S. in Home Economics and B. S. in Industrial Science, Iowa State College, Ames, Iowa; Student Drake University, Des Moines, Iowa. Present position since June, 1917.

MISS CHRISTINE NORAD SOUTH, A. B., B. S.,

Home Economics.

A. B., Winthrop Normal and Industrial College, South Carolina; B. S., Columbia University; Student University of Virginia; Student University of California. Present position September, 1917.

L. F. METZLER, A. B., M. S.,

Agriculture.

A. B., Kansas State Normal School, Emporia; M. S., Kansas State Agricultural College, Manhattan. Present position September, 1917.

L. L. MILLER, A. B.,

Chemistry.

Graduate North Texas State Normal College; A. B., University of Texas. Present position September, 1917.

W. M. TANNER, A. B., A. M.,

English.

Graduate North Texas State Normal College; A. B. and A. M., University of Texas. Present position September, 1917.

R. D. NELSON, M. DI., B. A., M. A.,

English.

M. Di. and B. A., Iowa State Teachers' College; M. A., University of Iowa. Present position September, 1917.

MISS LOLA BRANDENBURG, B. S.,

Home Economics.

B. S., State Manual Training Normal School, Pittsburg, Kansas. Present position September, 1917.

MISS MARGERY BALLARD,

Music.

Graduate College of Industrial Arts (Texas); Student Cincinnati Conservatory of Music; Pupil Oscar Seagle, New York City. Present position September, 1917.

HARLAND H. ALLEN, A. B., A. M.,

History and Civics.

A. B. and A. M., Colorado State Teachers' College. Present position September, 1917.

TRAINING SCHOOL FACULTY

■■■■■■■■■■

A. S. KEITH,
Principal.

(Supplying the place of L. P. Floyd, on leave of absence).

MISS WILLIE M. FLOYD,
Supervisor of Eighth and Ninth Grades.

Student University of Texas; Student Iowa State Teachers' College; Student Columbia University. Present position since January, 1914.

MISS LETA M. BROOKS,
Supervisor of Sixth and Seventh Grades.

Student Baylor University; Graduate North Texas State Normal College; Student Iowa State Teachers' College. Present position since January, 1914.

MISS GLADYS LINSLEY,
Supervisor of Fourth and Fifth Grades.

Graduate North Texas State Normal College. Present position since September, 1916.

MISS RENA M. ANDREWS,
Supervisor of Second and Third Grades.

Student Harvard University; Student Chicago University; Student University of Tennessee; Student University of Texas; Student Columbia University. Present position since October, 1916.

MRS. CORA M. MARTIN,
Supervisor of First Grade.

Graduate North Texas State Normal College; Student University of Texas; Student Columbia University. Present position since January, 1914.

* * * * *

MRS. PEARL CARDEN McCRACKEN,
Librarian.

Graduate Normal School, Glasgow, Kentucky; Student Columbia University. Present position since February, 1903.

MISS HIXIE PITTMAN,
Assistant Librarian.

Graduate North Texas State Normal College. Present position since September, 1915.

A. C. MCGINNIS,
Registrar.

Graduate Draughon's Business College, Dallas; Graduate Toby's Business College, Waco. Present position since September, 1913.

MISS GERTRUDE WEAR,
Secretary to President.

Graduate Selvidge Business College, Ardmore, Oklahoma. Present position since February, 1915.

J. E. HUDSPETH,
Bookkeeper.

Graduate Metropolitan Business College, Dallas. Present position since September, 1916.

MISS MINTA MAXEY,
Stenographer.

Graduate North Texas State Normal College; Student Draughon's Business College, Denton. Present position since September, 1916.

* * * * *

MISS ERMA APPLEBY, A. B.,
Secretary Young Women's Christian Association.

A. B., Grinnell College, Iowa; Graduate National Training School of Young Women's Christian Association, New York City. Present position since September, 1916.

NORTH TEXAS STATE NORMAL COLLEGE

On March 31, 1899, the Governor of Texas approved a bill that had been passed by the Legislature, establishing in Denton an institution to be known as the "North Texas State Normal College," the purpose of which was to prepare teachers for all grades of the public school work.

For some years the activities of the school were limited to the preparation of teachers for the common schools, without affording any special training for technical work.

In 1911, a Board of Regents was created for the Texas State Normal Schools. This was the beginning of the era to standardize these schools, enlarge their courses and enable them to discharge fully their obligations by meeting the demands of the public school system of the State for all grades of public school teachers.

The adoption of seven distinct courses of study, the fundamentals in all of which being the same, has enabled the school during the last few years to send forth better prepared teachers.

Beginning in September, 1917, two additional years' work has been added to the course formerly given, the completion of which will entitle the pupil to receive the standard Bachelor's Degree in Education.

Liberal appropriations from the legislature during the past several years, the addition of buildings, apparatus and appliances, and the election of a much larger faculty have contributed to the efficiency of the College.

The course of study as now planned admits one to the freshman class after having completed the ninth grade of an accredited high school.

The normal school diploma and permanent certificate will be granted as heretofore, to those completing the fourth-year or senior class of the Normal College. Students remaining for subsequent work will be graduated with the Bachelor's Degree upon satisfactory completion of the work of the two additional years. Since the entrance requirements have been made to conform to those of standard colleges of America, and the amount of work for college graduation made equivalent to that of our best institutions, the Bachelor's Degree as conferred will be recognized everywhere.

In addition to the preparation of teachers of the so-called literary and scientific subjects, the school is now equipped with buildings, appliances and faculty necessary to train effective teachers in all phases of Home Economics, Manual Training, Public School Music, Public School Art, Reading, and Physical Education.

Every phase of the teacher's work receives just consideration, and in our enlarged sphere of usefulness we expect to meet the demands of all grades of school work, the elementary, the grammar, and the high school in all its departments.

MATERIAL EQUIPMENT

BUILDINGS

The Administration Building. In 1903 the Administration Building, a brick, with basement and two stories, was constructed. It contains the administrative offices, the auditorium, and several class rooms. The cost of this building was approximately \$60,000.

The Science Building. In 1910 the Science Building was constructed. This is a fire-proof brick and reinforced concrete structure of three floors. It contains several recitation rooms and the laboratories for Chemistry, Physics and Agriculture. Its cost, not including equipment, was \$35,000.

The Library Building. In 1912-13 the Library Building is completed. It is a fire-proof building of brick and steel structure. It contains the stack room, reading rooms, several recitation rooms. Two years ago, an appropriation by the Legislature permitted its equipment with complete and adequate furniture and appliances necessary to a first-class library building. Its cost, with the equipment, was about \$65,000.

The Manual Arts Building. In 1914-15 a handsome fire-proof building of three stories was constructed for the Manual Training and Home Economics Departments. It has been equipped with the best appliances for every phase of these departments. Its cost, with equipment, was \$65,000.

The Heating Plant. In 1915-16 a central heating and power plant was constructed of brick at a cost of \$35,000.

The Education Building. The Thirty-fifth Legislature has recently appropriated \$80,000 for the construction of an Education Building. This will be ready for occupancy at the beginning of the session in September, 1918.

EQUIPMENT

In addition to the necessary supplies common to all the institutions, the College has now well equipped laboratories in Chemistry, Physics, Botany and Agriculture. Its laboratories and shops for the Department of Home Economics and Manual Training are of the most modern type. In addition to the foregoing, the College is supplied with engine for power light, stereopticons, musical instruments, etc.

The buildings are electric lighted, steam heated, and connected with the city sewer. The laboratories are connected

with natural gas pipes of the company that supplies the city. The offices have telephone connections, both local and long distance.

FACULTY

The faculty consists of specialists chosen on account of scholarship, training, character and successful experience. Among its members are found graduates of nearly all of the great universities of America.

UNIFORM ENTRANCE REQUIREMENTS TO ALL THE STATE NORMAL SCHOOLS OF TEXAS

Previous to the session beginning September, 1917, a student applying for entrance to any class of one of the normal schools was required to be examined on the work of the next lower class in the course elected.

Since the standardization of the schools, and the addition of two years of college work leading to the Bachelor's degree, the normal schools have adopted the American college method for the admission of students.

1. **Uniform Requirements.** The requirements for entrance to the various classes of the State Normal Schools of Texas are uniform, as directed by the State Normal School Board of Regents.

2. **Age.** Any person who is sixteen years of age on or before January 1 of the school year may enter a State Normal School at the beginning of the Fall Term or at any suitable time during the school year.

3. Applicants for entrance to the First Year or Freshman class of the Normal department should present a minimum of seven admission units as follows:

Algebra, 1 or 2 units
Grammar and Composition, 2 units
History, 1 or 2 units
Electives sufficient to make 7 units in all.

An entrance unit is understood to be five recitations a week of forty-five minutes each for thirty-six weeks. The Elective units may be made up from any subjects offered in an approved high school. Mature students over twenty-one years of age may, at the direction of the President, be admitted without examination to the First Year or Freshman class. A second grade state certificate exempts the holder from examination in all the subjects mentioned except Algebra and Composition. The completion of the NINTH GRADE of an approved high school exempts from examination for entrance to this class, but graduates of high schools of 3B class are given tentative

classification, subject to modification or reduction as students do or do not maintain satisfactory class standing.

4. Applicants for entrance to the Second Year, or Sophomore class, of the Normal department should present eleven admission units as follows:

Algebra, 2 units
Geometry, $\frac{1}{2}$ or 1 unit
English, 2 units
History, 2 units
Electives, 4 or $4\frac{1}{2}$ units.

Students who desire to pursue language courses must offer at least one unit of foreign language. A first grade state certificate exempts from all examination for entrance to this class; a permanent primary certificate exempts from all examination in all subjects required for entrance to the Second Year Sophomore Class, except in Algebra and Geometry of the First Year or Freshman class; a second grade state certificate exempts from all examinations for entrance in Agriculture, Physiology, Reading and School Management. The completion of the TENTH GRADE of an affiliated high school, or of an approved high school of 2A and higher classes, exempts from all examination for entrance to the Second Year or Sophomore class. Graduates of high schools of 2B class will be given **tentative** classification, conditioned on the work of the high school from which they came and on the maintenance of satisfactory standing in class by the student.

5. Applicants for entrance to the Third Year or Junior class of the Normal department should present fourteen standard admission units for full admission, twelve being required for conditional admission. Beginning in September, 1919, fifteen admission units will be required for full admission to this class, and thirteen units for conditional admission. The following units are prescribed for all students:

English, 3 units
History, 2 units
Algebra, 2 units
Geometry, 1 unit.

Provided, that the students of the History-English Course must offer two units of foreign language, and those of the Language Course two units of a modern language or three units of Latin.

SUBJECTS AND UNITS THAT MAY BE PRESENTED FOR ADMISSION

English, 3 or 4
 History and Civics:
 Ancient History, 1
 Mediaeval and Modern H., 1
 American History, 1
 English History, 1
 English History, 1
 Civics, $\frac{1}{2}$
 Mathematics:
 Algebra, 2
 Plane Geometry, 1
 Solid Geometry, $\frac{1}{2}$
 Trigonometry, $\frac{1}{2}$
 Foreign Languages:
 Latin, 2, 3 or 4
 Spanish, 2 or 3
 School Management, $\frac{1}{2}$
 Elementary Psychology, $\frac{1}{2}$

Natural Sciences:
 Biology, 1
 Botany, 1
 Chemistry, 1
 Introduction to Science, 1
 Physics, 1
 Physiography, $\frac{1}{2}$
 Physiology and Hygiene, 1, 2
 Zoology, 1
 Vocational Subjects:
 Agriculture, $\frac{1}{2}$ -2
 Bookkeeping, 1
 Domestic Art, $\frac{1}{2}$ or 1
 Drawing, $\frac{1}{2}$ or 1
 Manual Training, $\frac{1}{2}$ or 1
 Stenography and Typewriting, 1

Holders of first grade state certificates will receive credit for nine units: three in English, two in Algebra, one in Plane Geometry, one in Ancient History, one in Mediaeval and Modern History, one-half in Civics, and one-half in School Management. Holders of permanent state teacher's certificates will be admitted to the Third Year or Junior Class.

6. Advanced College Standing. Applicants for entrance to the Fourth Year or Senior class of the Normal department (which is the second year of the strictly college course) must be examined on the work of the immediately preceding class of the course elected by the applicant.

Students seeking advanced standing on account of work done in another college must present a certificate from a Normal College or other approved institution showing satisfactory completion of the work of college rank. In addition there he should present letters of honorable discharge from such institution, and he must meet the standard entrance requirements as already described in Section 5.

Applicants for entrance to the Senior class of the Normal department must have completed the full equivalent of one year's work of college rank in a Normal College or other recognized college or university.

Applicants for entrance to the Fifth Year or Junior College Class must have completed the equivalent of two years work in a Normal College or other recognized college or university.

7. Admission as Mature Students. Persons twenty or more years of age or over, who are not graduates of standard high schools, may, at the discretion of the President of the Normal School, be admitted without examination to the College Courses. In the enforcement of this regulation, especial consideration will be given to mature students whose high school training

ng has been followed by successful experience in teaching, to students who have had other practical preparation, and to those who have made special attainments in some particular line. Students admitted in this manner will, upon the completion of the Freshman College Course in English, History, Mathematics and Science with a grade of "C" be given credit for the full entrance units in these subjects. Other entrance units may be absolved in like manner. In all classes, mature students are expected to satisfy the standard entrance requirements of fifteen units not later than two years after admission.

8. Time of Examination. Applicants for the first year class must be examined upon entrance in all required subjects; applicants for admission to other classes must be examined upon entrance in the required English, History, Mathematics, and Science, and may defer examinations in other subjects to the middle of the session. These regulations apply to students from affiliated or accredited high schools, who may be admitted partly by examination, as well as to students who enter by examination solely.

9. Credits from Other Institutions. Entrance credits for work done in any college or university are determined by the President of the Normal School. Work completed satisfactorily in any one of the Texas State Normal Schools is fully recognized by the others. Those completing the work of the first year in one normal school are admitted to the second year class in any State Normal School in Texas, and similarly to other classes; provided, that of the fifteen units required for certificate, at least five must be made in the normal school that issues the certificate, and provided also that the entire fifteen units required for Normal diplomas must be made in the normal school that issues the diploma. Only "entrance credits" are given for work done in schools other than the Texas State Normal Schools.

10. Definition of Unit. In the Normal department, the unit of work for the first two years shall be four recitations per week for twelve weeks, or forty-eight recitations per term in a subject. For each class room hour in the Normal department, one and one-fourth (1 1/4) hours of preparation are expected. In College Courses the unit of work shall be three recitations per week for twelve weeks, or thirty-six recitations per term in a subject. For each class room hour, two hours of preparation are expected.

11. The Term's Work. The work of a term is five units, exclusive of regular assignments in physical education. The work in physical education is counted as one unit for the year, classes meeting at least two times per week.

12. Credentials. Credentials entitling the holder to exemption from examination must be official statements signed by proper authorities. Promotion cards and diplomas from

high schools and colleges must be accompanied by official statements of the work completed by the students, and signed by the superintendent, principal, or president. Work in a grade partially completed is not considered for entrance or credit.

13. Recognized Colleges. The University of Texas, Baylor University, Southern Methodist University, Southwestern University, Texas Christian University, Trinity University, Austin College, and Rice Institute are recognized colleges and universities, affiliation with which is approved.

14. High Schools. "Approved" high schools are those accredited by the State Department of Education; "affiliated" high schools are those accredited by the University of Texas or other "recognized" institutions.

For session beginning September, 1917, the Normal Schools recognize the classification issued by the State Superintendent of Public Instruction for Texas, on June 17, in Bulletin No. 64.

In this bulletin the standard schools are designated "A" schools, and are fully accredited by the Department of Education. Those on tentative lists are marked "B" schools, and are not yet fully accredited.

The State Department of Education recommends the following credits for graduates of the different classes of school for session 1916-17:

1A, or Standard 4-year High Schools: 14 or more college entrance units.

1B, or Probationary 4-year High Schools: Conditional entrance into freshman class of universities and junior class of normal schools. (Number of conditions should be determined separately for each school, according to its standards, but should not be fewer than two or more than four).

2A, or Standard 3-year High Schools: unconditional entrance into senior class of 1A high schools and sophomore class of normal schools.

2B, or Probationary 3-year High Schools: Conditional entrance into senior class of 1A high schools and sophomore class of normal schools. (Number of conditions to be determined separately for each school, according to its standards).

3A, or Standard 2-year High Schools: unconditional entrance into junior class of 1A schools and freshman class of normal schools.

3B, or Probationary 2-year High Schools: conditional entrance into junior class of 1A schools and freshman class of normal schools. (Number of conditions should be determined separately for each school, according to its standards).

THE COURSES OF STUDY

The modern university answers the public need with a multitude of courses of subjects of study, for the most part elective, with only certain requirements to insure breadth and thoroughness. For general culture and for the varied activities of social life, this elective system is to be commended.

But the definite field of the normal school is to prepare the teachers demanded by our public school system. This work does not require so wide a field of possible selection, and in general restricts the curriculum requisite for any student to four lines of culture material. These four are: First, the mother tongue of the universal medium of culture, its structure, its proper use, and its heritage of literature; second, the subjects dealing with the profession of teaching, its philosophical and scientific bases, and their practical applications; third, the line of subject matter that the prospective teacher expects to teach; and, fourth, certain minor subjects in each course selected from the majors of other courses for purposes of general culture and information. It is really only in the third class that there is need for marked differentiation.

These varying requirements are then best fulfilled by the organization of certain definite courses, co-ordinate and equivalent, but varying as to purpose, and hence as to the matter included in the above mentioned third class.

For these reasons the curriculum of the North Texas State Normal College is organized into the following seven courses:

I. The **Agriculture Course**, for the training of teachers of agriculture and of the biological and physical sciences upon which this great industry and art is based. It especially aims at the preparation of principals of consolidated schools and rural high schools.

II. The **Home Economics Course** to prepare for the teaching of the home arts and sciences in schools of any grade. This course is exclusively for women.

III. The **Manual Training Course** for the preparation of teachers of the manual arts and vocational education.

IV. The **Language Course**, in which the student may select Latin, German, or Spanish, for the preparation of teachers of these languages in our public and high schools, and also for those who desire the foundation for higher classical and scientific education, or who may wish the modern foreign languages for the purposes of business and travel.

V. The **Science Course** to supply the need for teachers of mathematics and science in high schools and for departmental teachers and principals of elementary schools.

VI. The **Primary and Art Course**, to train teachers for the primary and intermediate grades of elementary schools, and more particularly to supply the growing demand for de-

partmental teachers of music and drawing, and supervisors of these subjects in city school systems. This is also exclusively a women's course.

VII. The **History-English Course**, for the preparation of teachers of history and English in high schools and the higher grades of elementary schools, and for those who desire to divide their attention between science and language.

A student entering the first year or Freshman Class should complete any one of these courses in four years. Then he is granted a diploma and a permanent teacher's certificate. Should he desire to continue his work, he is admitted to the Junior College class without condition.

SYNOPSIS OF COURSES OF STUDY.

In the following table the numbers for each subject refer to a detailed description of the units given later in the bulletin. The notation used enables the reader to tell at a glance whether the subject is given in the freshman, sophomore, junior, or senior class. Numbers beginning with "1" indicate the subject is in the freshman class, "2" the sophomore class, "3" the junior class, and "4" the senior class; i. e., Mathematics 12 is a freshman subject, 21 a sophomore subject, 30 a junior subject, 45 a senior subject, 50 a college junior subject. A letter-subject; as "foreign language 50A" means that this subject is at its position in the course.

THE SENIOR COLLEGE

JUNIOR COLLEGE CLASS

(5th Year).

Any course leading to Bachelor's degree must include an Education major, an academic major of twelve units, an academic minor of nine and an academic minor of six units.

All credits counted toward a degree must be standard college units.

That is, all credits made during the last two years of the former four-year course and the two years, the first of which is begun September, 1917, must rank as college work.

Majors may be in English, Mathematics, History and Social Science, Language, and the Sciences, including Physics Chemistry and Biology.

In all courses there must be at least six college units in English and three in History or Social Science.

The following course of study for the fifth or Junior College Year is prepared tentatively.

Conditions not possible to be foreseen may modify the course hereafter.

After the close of session 1917-18 both the additional years directed by the Board of Regents will be offered. The bulletin to be published about March 1st, 1918, will give the entire course of study for both years.

Graduation under the four-year diploma course, or the completion of two years' work of college rank, including the fourteen standard college entrance units, is prerequisite for admission to this class.

DEPARTMENT OF AGRICULTURE

Agriculture 10. Elementary Agriculture. 1 unit.

A twelve weeks' course in the rudiments of the subject. The subjects covered will be those considered in Ferguson and Lewis' "Elements of Agriculture."

Agriculture 20. Economic Entomology. 1 unit.

Destructive insects and their method of control, including the boll worm, the boll weevil, the grasshopper, the army worm, and the San Jose scale.

Practice in mixing and applying the standard spray materials.

Text-book: Sanderson's "Insect Pests of Farm, Garden, and Orchard."

Agriculture 21. Farm Book-keeping. 1 unit.

The general principles of accounts; practice in keeping farm accounts.

Agriculture 30. Agronomy. 1 unit.

History, classification, culture, uses, etc., of corn, wheat, oats, barley, alfalfa, and cowpeas. Laboratory work in grain judging, germination methods, seed selection.

A study of the cotton plant from planting to maturity, including buying and selling, history and working of the cotton exchange; theory and practice in cotton classing, arithmetic of cotton.

Texts: Livingston's "Field Crop Production," Miller's "Cotton Trade Guide and Student's Manual."

Agriculture 31. Animal Husbandry. 1 unit.

Feeds and feeding, composition and nutritive value of the common feeds, methods of determining the feed value of feeds and balanced rations. Breeds of live stock are studied in text, from lantern slides of noted animals, and then trips are made to study and judge the various types of live stock. Animal diseases, as Texas fever and hog cholera, are studied, emphasizing methods of prevention.

The characteristics of the dairy breeds, methods of producing clean milk and its products; testing milk for fats and for adulterants; practice in setting up and operating centrifugal separators.

Text: Plumb's "Types and Breeds of Farm Animals."

Agriculture 32. Horticulture. 1 unit.

The principles of fruit growing are studied under the following topics: location, climate, tillage, fertilization; plants and planting; laying out orchards, pruning, thinning of fruit, protection against frost, renovation of old orchards; microscopic study of troublesome fungi.

Practice in school gardening.

Texts: Bailey's "Principles of Fruit Growing," and Voorhees "Fertilizers."

Agriculture 40. Agricultural Bacteriology. 1 unit.

The course will include a study of nitrifying bacteria, legume bacteria, bacteria concerned in souring milk, in silage, in sewage purification, in canning and animal diseases. Bacteria in barnyard manure and control of bacteria in bread making, in preservation of foods, vinegar making, and in many industrial processes.

Text-book: "Agricultural Bacteriology," Conn.

Agriculture 41. Advanced Agronomy. 1 unit.

The first six weeks of the term is given to the study of methods of improving types of plants and animals. A close study is made of Mendel's law.

The other six weeks of the term, soils are studied under the following heads: the composition, texture, water holding capacity, tillage and irrigation.

improvement of different classes of soils. Humus and its function, soil, inoculation, conservation of soil water; irrigation and drainage problems. Texts: Walters' "Genetics," and Lyons and Fippin's "The Soil."

Agriculture 42. Agricultural Economics. 1 unit.

This course will cover, as far as possible, the subject of rural credits, the organization of buying and selling concerns, of creameries, elevators, etc., the marketing problem, the tenant system of this and other countries. Text-book: Carver's "Principles of Rural Economics."

Agriculture 50. Practical Landscape Gardening.

Planning of school grounds, streets and parks, vacant lots and school gardens. Special attention will be placed upon beautifying villages and community centers. A close study will be made of the care and development of the wood lot.

Agriculture 51. Agricultural Engineering.

Agricultural surveying, drainage, irrigation, roads, farm machinery, farm structures.

Agriculture 52. Methods in Teaching Agriculture.

The course will include a study of subject matter suitable for schools of different grades; a series of experiments for country schools, and the selection of equipment for teaching agriculture.

Special attention will be given to planning home project work.

DEPARTMENT OF BIOLOGY

Biology 1. Physiology. 1 unit.

Physiology as the "Science of the Laws of Health" and "Sanitation" are the chief divisions of this course. A discussion of the subject rather than the text is required. Special emphasis is placed upon exercise, cleanliness, and proper eating as requisites of good health; upon the prevention and spread of disease; the use of narcotics; repair of injuries; and public hygiene and sanitation.

Text: Overton's "Applied Physiology: Advanced."

Biology 20. Zoology. 1 unit.

This is a course in general Zoology for beginners. The laboratory work includes a close study of physiology and life histories of the following forms: red legged locust, crayfish, fresh water mussel, squid, earthworm and starfish. Using these as representatives and relationship between the different phyla is shown. Modern conclusions in regard to evolution and heredity are brought out in lectures and required readings. Throughout the course methods of prevention and control of forms of economic importance are emphasized.

Biology 21. Zoology. 1 unit.

This term's work is a continuation of Biology 20, and uses as laboratory material the sea anemone, several protozoa, and the toad.

Text for Biology 20 and 21: Linville and Kelley's "General Zoology." Chad's "Laboratory Guide in General Zoology."

Biology 30. General Biology. 1 unit.

Introductory Study. Principles of Biology illustrated by Plants. The subject is considered under the following head: biology and science of life; characteristics of living things; structure and life of a plant; comparison of

animal and plant biology; forests and their conservation; classification of animals and plants.

Biology 31. General Biology. 1 unit.

Principles of Biology as illustrated by types of animals. Protozoa; worm-like animals; starfish; insects and allies; shell animals; introduction to the vertebrates.

Biology 32. General Biology. 1 unit.

Principles of biology applied to human structure and life. Human biology and classification of man; human physiology and activities; civic biology.

Text-book for Biology 30, 31 and 32: Bigelow's "Applied Biology."

Biology 33. Botany. 1 unit.

This is a course in the physiology of plants and the phenomena of plant growth. In the laboratory the student will begin with a study of seed germination and follow the development of the plant to its maturity and the fruitage period.

Biology 34. Botany. 1 unit.

In this course enough time will be devoted to the morphology of the flowering plants to make pollination and fertilization intelligible to the pupil, but the major portion of the time will be given to a study of plant members, seeds and fruits. As soon as living plants are available in the spring, all of the laboratory work will be given to the collection and classification of plants. The pupil will become familiar with the principal families and gain a thorough working knowledge of the key to the groups and families of plants.

Text-book for Biology 33 and 34: Bergen's "Essentials of Botany," Coulter's "Botany of Western Texas."

Biology 40. Botany. 1 unit.

This is a course in the physiology of plants. Emphasis is placed on the theories that explain the phenomena of such and plant action itself. A well equipped laboratory enables the students to observe the conditions and effects of germination, respiration, photosynthesis, tropism, etc.

Text-books: Bergen and Davis' "Principles of Botany," Part I; Atkinson's "College Botany," Part I.

Biology 41. Botany. 1 unit.

In this course the general morphology of plants is studied, showing the development of plant members, and also the development and differentiation of sex in plants. The compound microscope is freely used by individual students. Freehand drawing of microscopic work is required, together with notes on all laboratory work.

Text-books: Bergen and Davis' "Principles of Botany," Part I.

Biology 42. Botany. 1 unit.

This is a course in plant ecology in which the economic phases of the subject are considered. The factors influencing vegetation types, the vegetation types and societies and their relation to the distribution and progress of man will be studied. Part of the time will be devoted to the study of representative families of the Angiosperms, and the pupil will become familiar with the methods of identifying and classifying plants.

Text-books: Atkinson's "College Botany," Parts IV and V; Coulter "Botany of Western Texas."

Biology 43. Bacteriology. 1 unit.

The nature and conditions affecting the growth of bacteria, yeasts, and molds. The application of these facts to household sanitation.

Biology 44. Growth and Structure of Timber. 1 unit.

This course will consist of the treatment of the kinds and distributions of forests, kinds of timber, structure and adaptability. Properties, such as shrinkage, warping, durability, etc., will receive principal attention. Brief consideration will be given to seasoning by different methods, treatment of woods, logging and milling, and the preservation of forests.

The work will be covered by text, lectures, lantern slides, and papers prepared by the student.

Biology 50. Bacteriology.

Bacteriology of water supplies for homes and for cities, methods of sewage disposal, problems of rural hygiene as related to bacteriology.

Biology 51. Continuation of Biology 50.**DEPARTMENT OF CHEMISTRY****Chemistry 30. 1 unit.**

Oxygen, Hydrogen, and Nitrogen, together with some of their compounds, are studied. The laws of Boyle and Charles, the atomic theory and the theory of electrolytic dissociation, the law of chemical combination, solutions, chemical equations, neutralization, and valence will be considered.

The time is equally divided between the laboratory and the recitation.

Chemistry 31. 1 unit.

The Chlorine family, the Phosphorus family, Sulphur, Carbon, Silicon, Boron and some of their compounds are studied, and some of the rare non-metallic elements receive brief attention. Equilibrium, the Periodic law, molecular and atomic weights and the chemistry of the flame are included in this course. Prerequisite: Chemistry 30.

Chemistry 32. 1 unit.

In this will be included the study of the metallic elements, their more important compounds and the methods of reducing their ores, and, in addition, some time is given to identifying metallic and acid ions. Prerequisite: Chemistry 30 and 31.

Text-book for Chemistry 30, 31, and 32: McPherson and Henderson's "A course in General Chemistry."

Chemistry 40. 1 unit.

This course is a qualitative chemical analysis and consists of four hours' laboratory work per week in preliminary reaction and analysis of the Alkali, Alkaline Earth, Aluminum and Zinc Groups, and two recitations per week, in which are studied these metallic groups, together with osmotic pressure and the theories of solution, ionization and equilibrium. Prerequisite: Chemistry 30, 31, and 32.

Chemistry 41. 1 unit.

This course is a continuation of Chemistry 40, and the same time is given to the recitation and to the laboratory work as in that course. The Silver, Copper, and Arsenic groups are studied, as are the metallic groups in Chemistry 40, and, in addition, the reactions of the acid ions. The Hydrolysis of salts and the theory of complex ions are discussed. Prerequisite: Chemistry 40.

Chemistry 42. 1 unit.

In this course greater time is given to laboratory work. Systematic

analysis of the ions studied in the two preceding courses is practiced, and oxidation and reductions are discussed. Prerequisite: Chemistry 41.

Text-book for Chemistry 40, 41 and 42: "The Elements of Qualitative Chemical Analysis," Vols. I and II, Julius Stieglitz.

Chemistry 43. 1 unit.

This is a course in Quantitative Agricultural Chemical Analysis. Standard solutions are prepared and applied in simple analytic processes. Limestone, vinegar, cotton seed meal and wheat bran are analyzed. Prerequisite: Chemistry 30, 31, and 32.

Chemistry 44. 1 unit.

This course, a continuation of the Agricultural Chemistry given above, is a course in soil analysis. Soil is tested for its various constituents and for acidity and alkalinity. Soil is analyzed quantitatively for iron, calcium, phosphorus and potash. Prerequisite: Chemistry 43.

Chemistry 47. 1 unit.

This is a continuation of the Agricultural Chemistry of the two preceding courses. Fertilizers are analyzed quantitatively. Moisture, phosphoric acid, potash and nitrogen are determined. Some time is given to the analysis of milk and to the sanitary examination of water. One lecture and eight laboratory hours a week are required in Chemistry 43, 44, and 45. Hedges and Bryant's Laboratory Manual of Agricultural Chemistry is the basis of the laboratory work in these three courses. Prerequisite: Chemistry 43.

Chemistry 45. 1 unit.

This is a course in Household Chemistry, and includes the study of the chemical composition of the type foods, water, fats, proteins, minerals and carbohydrates, and also chemistry of fuels and tests for textile fibres. Organic Chemistry is given in explanation of the composition of compounds. Prerequisite: Chemistry 30, 31, and 32.

Text-book: Vult's "Laboratory Manual."

Chemistry 46. 1 unit.

This is a course in Biological Chemistry. The composition and nutrition of the cell; the process of fermentation; respiration; salivary, gastric, pancreatic, and intestinal digestion; absorption, and excretion are studied. Prerequisite: Chemistry 30, 31, 32, and 45.

Chemistry 50. 1 unit

This is a course in Organic Chemistry. Structural formulas and isomerism, the paraffins and other hydrocarbons, alcohols, ethers, aldehydes, ketons, organic acids, esters, etc., are studied. Two lectures and three laboratory periods per week. Prerequisite: Chemistry 30, 31, and 32.

Chemistry 51. 1 unit.

This is a continuation of Chemistry 50, which is a Prerequisite to this course. Aromatic compounds and related substances are studied.

Text-book for Chemistry 50 and 51: Stoddard's "Introduction to Organic Chemistry."

Chemistry 52. 1 unit.

This is a course in Physiological Chemistry and is a continuation of Chemistry 46, which is prerequisite to this course.

Text-book: Hawk's "Practical Physiological Chemistry."

1. Note on Additional Chemistry for 5th and 6th years: Chemistry 40, 41, and 42 which is now elective with Physics 40, 41, and 42 in the fourth year of the Science Course is to be taken in the fifth year of this course by

those who elected Physics in the fourth year, and also by pupils in the Agricultural Course in the fifth year.

2. Chemistry 50, 51, and 52 is to be taken by pupils of the Home Economics Course in the fifth year.

3. Chemistry 60, 61, and 62 is to be elective in the sixth year with Physics.

DEPARTMENT OF CIVICS AND PHYSIOGRAPHY

Civics 30. 1 unit.

This course is abridged, but fundamental. It begins with a few lessons in "The Science of Politics." Then follows a review of the subject in three divisions: "The Making of the American Government," "The National Government," and "The State Government." The subject is enlivened by free class discussion of our present-day government, municipal, state, and national, with the problems confronting each of them. Students are required to use reference books, to read at least one book treating some phase of governmental activity or reform, and to write a book review or theme.

Text: Hindale's "The American Government."

Civics 31. 1 unit.

The course in Civics 31 includes the following subjects: "Some Elements of Politics," "The Historical Development of Government," "Development on English Soil," "The Colonial Period," "The Revolution," "The Constitution," "Nationality and Colonialism," "Nationality and Democracy," "Nationality and Slavery," "The New Nation," and the organization, principles, and practical workings of government in nation, state, and municipality.

Civics 32. 1 unit.

Civics 32 is a continuation of Civics 31. It embraces a discussion of the Policies and Problems of government. Among these are: "Suffrage and Elections," "The Political Party, as a Natural Result of Democracy," "Constitutional and Legal Rights," "Taxation," "Money," "Commerce, Industry and Labor," "Foreign Affairs and Colonies," "Natural Resources and their Conservation," and "The Duties of Citizenship." The course closes with a discussion of the principles underlying "Insurance" and "Investment." Students are required to read and report on some book read pertaining to some phase of government, and to write a book review or theme.

Text for Civics 31 and 32: Ashley's "The American Federal State."

Civics 40. Political Science. 1 unit.

Text-book: "Introduction to Political Science," Garner, Chapters I-VIII.

Civics 41. Political Science. 1 unit.

Text-book: "Introduction to Political Science," Garner, Chapters IX-VII.

Physiography 10. 1 unit.

Physiography, or Physical Geography, is recognized as one of the most fundamental of the lesser sciences. The central theme is the earth and its various forms in their relation to man and his development. Naturally there is discussion of the origin, classification, characteristics, evolution and ultimate end of all forms of matter and life. Outside reading, observation nature, and individual thinking are encouraged. The subject is made scientific, vital, human, and practical.

Text: Tarr's "New Physical Geography."

DEPARTMENT OF DRAWING

The aim of the courses in Drawing is to familiarize the student with the fundamental principles of art, in order that he may use them in every day life; to train him to an appreciation of the world's masterpieces of Architecture, Sculpture and Painting; to develop his power of observation and to cultivate in him a love for the beautiful in the world about him.

The Drawing and Music of "each year" of the "Primary and Art Course" is prerequisite to the next succeeding year; i. e., Drawing 10 or Music 10 must precede Drawing 20 or Music 20.

Drawing 10. 1 unit.

Cylindrical perspective; object drawing; lettering; plant study; landscapes; design; color theory; construction; picture study.

Drawing 11. 1 unit.

Cylindrical perspective; simple groups; color theory; plant study; pen lettering; design; construction; picture study.

Drawing 20. 1 unit.

Rectangular perspective; light and shade in object drawing; plant study; tree forms; posters; design; construction; picture study; problems for the grades.

Drawing 24. 1 unit.

Cylindrical and rectangular perspective; still life; lettering; design; wood block printing; color theory; study of masterpieces of architecture.

Drawing 30. 1 unit.

Advanced still life; plant study; pencil massing and water color; landscape compositions; monograms; surface patterns; pose drawing; color harmonies; construction problems; picture study; problems for the grades.

Drawing 31. 1 unit.

Art History.

Text-book: "Apollo," illustrations with lantern slides.

Drawing 33. 1 unit.

Advanced design; composition with landscape motif; careful drawing for plant analysis; pen lettering; advanced still life; book plate; construction problems; problems for grades.

Drawing 33. 1 unit.

Costume design.

Drawing 34. 1 unit.

Lettering; design in application to manual training projects; color theory; construction; picture study.

Drawing 40. 1 unit.

Advanced plant study; still life compositions; design; landscape from nature; advanced color theory; construction; problems for the grades.

Drawing 41. 1 unit.

Art History.

Texts: "Art of Flanders," "Art of France," "Art of Great Britain"

Drawing 42. 1 unit.

Advanced work in plant study, still life; lesson plans and planning for courses for grades; design; construction.

Drawing 43. 1 unit.

Lettering; household decoration; study of masterpieces in painting and architecture.

Drawing 44. 1 unit.

Advanced design; lettering; book plates; posters, application of design; study of masterpieces of painting.

Drawing 45. 1 unit.

Art History.

Text: "Apollo;" illustrations with lantern slide.

Drawing 50. 1 unit.

Art Structure. The course in Art Structure stands for: (a) freedom—to use line, tone, color, in expressing your own ideas; (b) power—to appreciate fine qualities of proportion, arrangement and color and to obtain these qualities in your work. Exercises with brush and ink, charcoal, colored crayons, water color. Original designs, copies of masterpieces. Wood-block or linoleum printing, stenciling.

Method: (1) Principles of composition—how lines, tones, colors may be united together to produce fine quality. (2) Original design—use of one's creative power in choosing and combining lines, tones, colors. (3) Use—application in teaching designing, painting and handicraft.

Reference books: Day, Pattern Design; Johnson, Writing, Illuminating and Lettering; Oka Kura, The Book of Tea; Dow, Composition, and The Theory and Practice of Teaching Art; Ross, Theory of Pure Design.

Drawing 51. 1 unit.

Art History.

Reference books: Kenyon Cox, Artist and Public; M. T. Emery, How to Enjoy Pictures; Julia Cartwright, Raphael.

Drawing 52. 1 unit.

Advanced Drawing. Drawing and painting from still life; plant life; figure and landscape.

Reference books: Norton, Free Hand Perspective and Sketching; Ames Hall, Pen and Ink, Plant Life.

DEPARTMENT OF EDUCATION.

Education 10. School Management. 1 unit.

This course will present in a simple but systematic way the problems which the earnest teacher must solve in order to have a successful school. The matter of school routine, the program, attendance, order, incentives, and attention to the individual pupil, as well as the management of the class, the technique of the recitation, the review, and the examination, will be taken under consideration.

Sutton and Horn's "School-room Essentials" and Bagley's "Class-room Management" will be used as texts.

Education 20. Psychology of Elementary Subjects. 1 unit.

The course in Elementary Method is an introductory course in General Method. It includes a study of the foundation principles and the fundamental laws of teaching; the problem of interest and attention; the steps in the learning process and the value of subject material in stimulating the activity of the process; the rules and purposes of the recitation; the use of drills and review, etc.

Text-book: Compayre's "Theoretical Pedagogy."

Education 21. Psychology of Elementary Subjects. 1 unit.

This course is a continuation of Education 20, which is a prerequisite for the course. The course is planned to furnish special training in the selection of subjects of study and the methods of presenting subject matter to children in the various grades of the intermediate department.

Text-book: Compayre's "Practical Pedagogy."

Education 22. Rural School Problems. 1 unit.

This course considers more particularly the problems of the school in the open country, the environment of which is unfamiliar to many who essay the role of rural-school teacher. Within the last quarter century great progress has been made in the organization of rural education, involving modification in both culture-material and method of instruction, and in the correlation of the school with other forces of a social-educative nature in the community. The inherent worth of the country school as a field of labor for the professional teacher will constantly be held forth.

Some book on the order of Carney's "Country Life and the Country School" will be used as text, supplemented by extensive assignments of collateral reading.

Education 30. Psychology. The Learning Process. 1 unit.

This course is designed to acquaint the prospective teacher with the principal types of mental activity in relation to both the learning and teaching process. Emphasis will be placed on the first phase and the topics introduced will include sensation, perception, memory, judgment, feeling, emotion, will, and habit.

Laboratory work and observation of classes in the Training School will be given one period per week.

Text-book: Angell's Psychology.

Education 31. Psychology. The Teaching Process. 1 unit.

This course is a continuation of Education 30, which is required as a prerequisite. The aim of this course is to develop methods of introduction from an examination of psychological principles and laws involved in the learning process. The course will consider the Formal Steps of the Recitation, the value of Type Studies, the Psychology of Occupation, The School and The Child. The organization of subject matter and the making of lesson plans, laboratory work and observation of classes in the Training School, will be given one period per week.

Text-book: McMurry's "Method of the Recitation;" Dewey's "School and Society."

Education 32. Special Primary Method. 1 unit.

The aim of this course is to give training in and appreciation of the work of the primary school. It will include a study of the special method in the work of the first four years of the public school course.

The topics discussed will include the guiding principles that determine the aims and methods of teaching the subjects of the primary curriculum, sources of material, special methods in the teaching of reading, number, work, language, story telling, dramatization and constructive work. The observation and construction of concrete materials, charts, hand work, compiling and making of readers, language books, etc., will be emphasized.

Text-book: Gesell's "The Normal Child and Primary Education."

Education 33. Teaching in the Secondary School. 1 unit.

This course will take up briefly the psychology of adolescence as the dominant factor of high-school method. Then will follow an application of the principles of method to a few typical high-school subjects, so that the students who later go into secondary-school work may plan their work intelligently, judge it critically and meet its problems fortified both by a

understanding of the scientific basis of their solution and by knowledge of what successful teachers are doing in the field.

Some book on the order of Parker's "Methods of Teaching in High School" will be used as a text. Much independent work will also be required.

Education 40. General Method. 1 unit.

The course in general method is designed to give in a systematic way the principles underlying the process of instruction. It provides a thorough study of the problems of how to study and teaching how to study; the factors determining the selection, organization, and arrangement of subject matter. A consideration of the problem supplementing knowledge will be made in connection with the problem of sources of material. The methods of securing interest, individual attention, the elements of skill in drill development, and appreciation.

Text-book: McMurry's "How to Study and Teaching How to Study." Thorndyke's "Principles of Teaching."

Education 41. History of Education. 1 unit.

This subject will be treated as a phase of General History, being a study of the continued focal point where one generation transmits to the next its institutions and the results of its experience. The systems of the various epochs and of the great reformers will be analyzed for the lessons they can teach the modern teacher, the study thus subserving both cultural and practical ends.

Duggan's "Student's Text-book in the History of Education" will be used as a text, supplemented by a brief comparative study of the public school system evolved by the United States and the leading European nations from current educational documents.

Education 42. School Administration. 1 unit.

This course considers a series of problems especially valuable to the prospective principal or superintendent, or any one that expects to lead public educational opinion in his field of work. Some of these problems are school finances, construction and equipment of buildings, preparation and selection of teachers, the course of study, the program, the side activities and the social interrelations of the school, the work of supervision, and the problem of special schools. The student will be guided by a syllabus, but the class work will consist largely of lectures and discussions, followed by library work, the study of national, State, city, and county reports, etc., essays and individual solution of assigned problems. Hollister's "Administration of Education in a Democracy" is used as a text.

Education 43. Principles and Problems of Education. 1 unit.

This course will not necessarily be identical from year to year, but will consider the current problems that the trend of educational interest may point out as of paramount importance at the time. During the ensuing session the social and practical trend of education will be noticed.

Text: Dewey's Ethical Principles Underlying Education; Reports of Educational Surveys by different universities; bulletins of the United States Bureau of Education and State Departments of Education.

Education 44. Practice Teaching in the Training School. 1 unit.

Education 45. Child Psychology. 1 unit.

This course includes a study of the problems which are concerned with the development of the child, mental and physical. A study is made of the problems of heredity, instinct, etc., and how to direct play, imitation, collective and constructive instinct. The division of the life of a child into distinct periods with the individual characteristics of each is considered.

Text-book: Kirkpatrick's "Fundamentals of Child Study."

Education 50, 51, 52. Educational Foundations, 1 unit each.

This is a connected course treating of the bases of educational science in biology and psychology. The progressive reconstruction of educational practice in response to social needs demands that the educator continually refer back to fundamentals, so that he may not lose his bearings. It is such a purpose that this course is intended to serve.

Text: Bolton's "Principles of Education" will be used as a text. Chapters I to IX, treating more particularly of topics in biology, will be given the first term; Chapters X to XIX, dealing with the more general powers of the mind, will constitute the work of the second term; Chapters XX to XXVIII, treating specifically of the more complex aspects of mental activity in relation to education, will occupy the attention of the class during the third term.

Education 53. Advanced Child Study. 1 unit.

The psychology of infancy, childhood, and adolescence. The course provides for a scientific study of the development of the mind during childhood and adolescence with special emphasis upon the importance of these facts to the teacher. Special study is made and emphasis placed upon the characteristics of each period of child growth and the means of stimulating growth and development. Opportunity is afforded for all students of education interested in special classes to discuss such topics as precocity, backwardness, feeble-mindedness, moral eccentricities, etc.

Text: Chamberlain's "The Child."

Education 54 and 55. Social Development and Education. 1 unit each.

This course is planned for the study of the typical attitudes of the child in his reaction to various social experiences. Such topics as the problem of sociability; the need of communication, responsiveness to community sentiment, genesis of the sense of duty; characteristics of respect as a social phenomenon, the principle of social types, etc., will be discussed. Observation studies, testing out fundamental principles will be made.

Text: O'Shea "Social Development and Education."

DEPARTMENT OF ENGLISH.**English 10. Elementary Grammar. 1 unit.**

This course begins with a review of the parts of speech, followed by a brief study of the phrase, the clause, the verb, and the verbal, as a preparation for sentence analysis. Sentence analysis, including a study of the simple and the compound sentence, forms a part of the work of each week. The course also includes a study in detail of the classification and inflection of the noun and the study of most of its construction, as the basis of the English sentence. Drill is given on correct number, gender and case forms and uses.

English 11. Elementary Grammar. 1 unit.

This course is a continuation of English 10, and includes as much study as time permits of the classification, inflections, and constructions of the pronoun, the adjective, the verb, and the adverb. Sentence analysis is continued, and includes the study of complex sentences containing the common types of simple dependent clauses. Drill is given on the correct forms and uses of the parts of speech. Prerequisite—English 10.

Text-books for English 10 and 11; Smith's "Our Language Grammar" and Blanton's "Grammar Outline."

English 12. Elementary Composition. 1 unit.

This course has for its primary purpose to make correct form in writing habitual with the student. It includes the following: A detailed study of capitalization and punctuation; a study of the paragraph, including the

principles of paragraph construction, and the different methods of paragraph development; a study of letter writing, with drill on correct forms, and practice in writing business, social, and informal letters; simple compositions, including reproductions, paraphrasing, and short exercises in narration and description. In connection with the work in composition, students are required to read one long novel, one short novel, and a number of brief narrative and descriptive articles selected by the instructor. On these, reports, either oral or written, are required, and from them are taken some of the subjects for compositions.

Text-books: Merkley and Ferguson's "Composition-Rhetoric (selections from chapters on correctness, clearness, paragraphing, the whole composition, and letters)"; Blanton's "Composition and Punctuation."

SUPPLEMENTARY READING.

I. Two selections from the following groups (to be purchased by the student):

1. Lanier's "Boy's King Arthur," or "Boy's Froissart," or a selected group of classic myths.
2. A Shakespearean Play: "The Merchant of Venice" or "A Midsummer Night's Dream."
3. Stevenson's "Inland Voyage" and "Travels with a Donkey."
4. Arnold's "Sohrab and Rustum," or Lowell's "Vision of Sir Launfal."

II. A novel (to be selected from the reference library) by either Hawthorne, Scott, Dickens, Stevenson, or Cooper.

English 20. English Literature to Augustan Age. 1 unit.

This course consists of the History of English Literature from the Anglo-Saxon Period to the Augustan Age. (Long, Chapters I to IX.) A study is made of the representative writers belonging to each period, including their biographies, their style, and their representative writings. Representative poems are read and discussed by the class, and as much memory work is done as time permits. A critical essay, based upon the reading, required.

SUPPLEMENTARY READING.

I. Two selections from the following group (to be purchased by the student):

1. A modernized version of either Chaucer's "Knight's Tale" or "Nun's Priest's Tale."
2. Shakespearean Play: "Romeo and Juliet" or "Julius Caesar."
3. Malory's "Morte D' Arthur," or Bunyan's "Pilgrim's Progress."

II. Ballads, Elizabethan and Seventeenth Century Poems, from Pancoast or Bronson Collections (furnished by the school).

III. A historical novel bearing upon a period covered by the course: Scott's "Ivanhoe," Scott's "Kenilworth," Reade's "The Cloister and the Earth," Kingsley's "Westward Ho," Doyle's "The White Company," etc. (Reference Library).

English 21. English Literature from Augustan to Victorian Age. 1 unit.

This course is a continuation of English 20 and includes the history of English Literature from the Augustan Age to the Victorian Age. (Long, Chapters IX to XI.) As in English 20, a study is made of representative writers and their works. A critical essay, based upon the reading, is required.

SUPPLEMENTARY READING.

I. One of the following (to be purchased by the student):

1. Swift's "Gulliver's Travels."
2. Addison and Steele's "Sir Roger de Coverly Papers."
3. Defoe's "Robinson Crusoe."

II. Selections from Pancoast's or Bronson's Collection of Poems,

(furnished by the school), including "The Rape of the Lock," "The Deserted Village," and "The Ancient Mariner." Prerequisite 1, English 20.

English 22. American Literature. 1 unit.

This course consists of the history of American Literature from the Colonial Period to the present time. A study is made of the representative writers belonging to each period, including their biographies, their style, and their representative writings. Selected pieces of literature are read and discussed by the class, and as much memory work is done as time permits. One critical essay, based upon the reading, is required.

SUPPLEMENTARY READING.

- I. A collection of American stories and poems (to be selected).
- II. An American Novel (Reference Library).

English 30. Advanced Grammar. 1 unit.

This course is planned with the purpose of removing deficiencies in previous training, of preparing teachers for work in the primary and intermediate grades, and of giving drill on principles, a knowledge of which is essential in the study of language and literature. It includes a review of the classification and construction of the parts of speech and of the principles of correct grammatical usage; a study of the phrase, the verbal, and of the various types of the dependent clause; and regular practice in sentence analysis, as a means of developing the reasoning powers, and as an aid in forming habits of clear thinking and accurate expression.

Text-books and methods of teaching grammar are discussed, and pupils are required to read selected chapters of Carpenter, Baker, and Scott's "The Teaching of English." Prerequisite: English 10 and 11.

Text-books: Kimball's "English Sentence," Buehler's "English Grammar," Blanton's "Grammar Outline."

English 31. Advanced Composition. 1 unit.

This course consists of a practical study of narration and description, with the primary aim of developing realization and adequate expression in the field of imaginative composition. The chief emphasis is placed upon theme writing, which consists of frequent short descriptions and descriptive narrative sketches, together with one or more narrative themes of from 600 to 1500 words in length. The course includes also a review of capitalization, punctuation, sentence-structure, the use of outlines, and such principles of paragraph structure as are applicable to narration and description. A study of versification is required, with some practice in verse writing. Precision in oral composition is given as much attention as time permits. As supplementary reading, the class is required to read a number of classics which are illustrative of the forms of composition covered by the course, and upon which reports, either oral or written, are made.

SUPPLEMENTARY READING.

- I. One long novel (to be purchased by the student).
- II. One short novel (to be purchased by the student).
- III. Volume of short stories and descriptive sketches (furnished by the school), to be selected.

English 32. Advanced Composition. 1 unit.

This course is a continuation of English 31. It consists principally of practical study of exposition and argument, including much practice in them writing. The course also includes a study of the construction of outlines and simple briefs; of paragraph structure, including a detailed study of principles and methods of development; of diction, with special emphasis upon the meaning and proper use of words frequently misused; of the more common figures of speech; and of letter writing. Practice in the compilation

and organization of material will be afforded through the writing of two long themes, one in the expository and one in the argumentative field, each about 1000 words in length, and each requiring the examination of a mass of material. In addition to these, short themes will be required weekly. Methods of teaching composition will be studied and discussed in connection with the various parts of the course. The supplementary reading required will consist of three or more authors, the selection of these being made by the instructor. Current periodicals will also be drawn upon for supplementary material.

Prerequisite: English 31.

SUPPLEMENTARY READING.

I. Two classics (to be purchased by the student).

II. A volume of expository and argumentative selections (furnished by the school), to be selected.

Textbooks for English 31 and 32: Newcomer and Seward's "Rhetoric in Practice"; Blanton's "Punctuation and Composition"; Wooley's "Handbook of Composition," and selected chapters from Carpenter, Baker, and Scott's "The Teaching of English."

English 40. Critical and Historical Course in English Literature. 1 unit.

In this course a study will be made of the Elizabethan, Puritan, and Classical Periods of English Literature, together with the biographies, style, and selected writings of the most representative authors. A critical essay is required, based upon the periods studied.

SUPPLEMENTARY READING.

I. Goldsmith's "Vicar of Wakefield".

II. Thackeray's "English Humorists".

III. Three of Shakespeare's plays—to be selected.

These classics are to be purchased by the student.

Text-books: Pancoast's Introduction to English Literature (used chiefly as a reference); Bronson's English Poems (furnished by the school).

English 41. English Literature. 1 unit.

This course is a continuation of English 40, and it is recommended that the student take English 40 before English 41. The Romantic and the Victorian Periods of English literature will be studied, including the biographies, style, and selected writings of the most representative authors. A critical essay based upon the supplementary reading will be required.

SUPPLEMENTARY READING.

I. A novel by Scott, Dickens, or George Elliot (to be purchased by the student).

II. Essays—Macaulay's "Milton", Ruskin's "Sesame and Lilies", Tennyson's "Idyls of the King", (to be purchased by the student).

Text-books: Pancoast's "Introduction to English Literature" (used chiefly as a reference); Bronson's "English Poems", (furnished by the school).

English 42. Advanced Grammar. 1 unit.

This course is an extension of English 30. It is planned to give special preparation to teachers of English Grammar. The course begins with a review of the various constructions of the sentence, followed by analysis, including that of the most difficult types of compound and complex sentences. Special study is made of elliptical constructions, of the verbal, including the participle, the infinitive, and the gerund; and of disputed points. Methods of teaching will be discussed and applied in the training school.

Text-books: Kimball's "English Sentence," Buehler's "English Gram-

mar," Blanton's "Grammar Outline," selected chapters from Carpenter, Baker and Scott's "The Teaching of English." Prerequisite: English 30. Supplementary reading: Topics assigned for library work.

English 50. Shakespeare. 1 unit.

This course includes a rapid reading of several plays representing successive stages in the development of Shakespeare's dramatic art, and a detailed study of a few of the great comedies and tragedies. The texts are to be purchased by the student.

English 51. English Literature—Romantic Period—1750-1832. 1 unit.

This course includes a study of the English Romantic movement. The romantic reaction will be traced through the work of Gray, Collins, Goldsmith, Cowper, and Burns, and the complete ascendancy of romanticism will be studied in the work of Wordsworth, Coleridge, Shelley, Byron, and Keats.

Text-books: Pancoast's or Bronson's collections of "English Poems" (furnished by the school). The student will purchase classics selected by the teacher.

English 52. Victorian Poetry. 1 unit.

This course includes studies in the poetry of Tennyson, Browning, Mrs Browning, Arnold, and Swinburne.

Text-books: Pancoast's or Bronson's "English Poems" (furnished by the school). The student will purchase classics selected by the teacher.

English 53. Victorian Prose. 1 unit.

This course includes (1) the study of the development of English prose fiction, with special emphasis upon the novel of the 19th century (2) studies of the various types of Victorian prose literature, exclusive of the novel; (3) detailed study of the essay. The student will be required to purchase certain classics selected for this course.

DEPARTMENT OF GERMAN.

German 10. 1 unit.

Elementary German. Reading, writing and speaking German.

Text-books: Guenger's "Marchen und Erzählungen," Vol. 1. Bacon "Vorwaerts," pages 1 to 79.

German 11. 1 unit.

Reading easy prose. An inductive study of elementary German grammar.

Text-books: Bacon's "Vorwaerts," completed. Prokosch's "Introduction to German."

German 12. 1 unit.

Oral and written composition. Reproduction in the student's German of stories he has read.

Text-books: Muller's and Wenckebach's "Gluck Auf," Guenger's "Marchen und Erzählungen," Vol. 2.

German 20. 1 unit.

Short papers on various topics of German life. Class discussions of German customs.

Text-books: Gronow's "Jung Deutschland," Holzwarth's "Gruss an Deutschland."

German 21. 1 unit.

Study of German customs and institutions.

Text-books: Mosher's "Willkommen in Deutschland," Decker and Markisch's "Deutschland und die Deutschen."

German 22. 1 unit.

Practical German. The German of every-day life and business.

Text-books: Patton's "An American in Germany"; Kutner's "Commercial German."

German 30. 1 unit.

Outline of German Literature. Lectures. Reading of selected texts.

Text-books: Wenckebach's "Deutsche Litteraturgeschichte," Keller's "Bilder aus der Deutschen Litteratur."

German 31. 1 unit.

Study of German poetry, with special attention to historical development, form and meter.

Text-books: Nollen's "German Poetry." Klenze's "Deutsche Gedichte."

German 32. 1 unit.

Study of German prose. Reading of representative prose writers.

Text-books: Wildenbruch's "Das adle Blut," Hauff's "Die Karavanne."

German 40. 1 unit.

German drama. Close study of Schiller's "Wilhelm Tell." Rapid reading of several of Schiller's works.

German 41. 1 unit.

German drama. Close study of Goethe's "Faust." Rapid reading of several of Goethe's works.

German 42. 1 unit.

The Teaching of German. Basic principles of modern language instruction with special reference to elementary high school courses.

Text-books: Leopold Bahlsen's "The Teaching of Modern Languages," Walter's "Die Reform des neusprachlichen Unterrichts auf Schule und Universität."

German 50. 1 unit.

The Novel.

Text-books: Kreyssig's "Vorlesungen ueber den deutschen Roman der Gegenwart." Spielhagen's "Beitraege zur Theorie und Technik des Romans." Whitcomb's "The Study of the Novel."

German 51. 1 unit.

Modern Drama.

Text-books: Sittenberger's "Studien zur Dramaturgie der Gegenwart." Studies in Mosenthal, Bahr, Schmitzler and others. Hauptmann's "Die Versunkene Glocke." Sudermann's "Frau Sorge." Faulda's "Das verlorene Paradies."

German 52. 1 unit.

Lyrics and Ballads.

Text-books: Bruinier's "Das deutsche Volkslied." Chevalier's "Zur Poetik der Ballade." Werner's "Lyrik und Lyriker."

DEPARTMENT OF HISTORY.

History 10. 1 unit.

Grecian history to the rise of Macedonia.

Texts: Myers' "Ancient History"; Botsford's "Source-book of Ancient History."

History 11. 1 unit.

Grecian history completed. Roman history to the Third Punic War.

Texts: Myers' "Ancient History"; Botsford's "Source-book of Ancient History."

History 12. 1 unit.

Roman history completed.

Texts: Myer's "Ancient History"; Botsford's "Source-book of Ancient History."

History 20. Medieval History. 1 unit.

This course will cover a period of about a thousand years from the downfall of the Roman Empire to the close of the fifteenth century.

There will be a constant use of source-books for illustrative material.

Texts: Myers' "Medieval and Modern History"; Ogg's "Source-book of Medieval History."

History 21. 1 unit.

Modern history to the French Revolution.

Text: Myers' "Medieval and Modern History."

History 22. 1 unit.

Modern history completed.

Text: Myers' "Medieval and Modern History."

History 30. 1 unit.

English history to the end of the reign of Tudors.

Texts: Andrews' "History of England"; Lee's "Source-book of English History."

History 31. 1 unit.

English history completed.

Texts: Andrews' "History of England"; Lee's "Source-book of English History."

History 32. 1 unit.

Amercian history from 1492-1750.

Text: Thwaites' "The Colonies."

History 40. 1 unit.

American history from 1750 to 1829.

Texts: Hart's "Formation of the Union"; MacDonald's "Documentary Source-book of American History."

History 41. 1 unit.

American history since 1829.

Texts: Wilson's "Division and Reunion"; MacDonald's "Documentary Source-book of American History."

History 43. 1 unit.

Industrial history of the United States.

Text: Coman's "Industrial History of the United States."

History 50. 1 unit.

European history of the Eighteenth Century.

Texts: Robinson and Beard's "Development of Modern Europe," Vol. I;
Robinson and Beard's "Readings in Modern European History," Vol. 1.

History 51. 1 unit.

European history of the Nineteenth Century.

Texts: Robinson and Beard's "Development of Modern Europe," Vol. II;
Robinson and Beard's "Readings in Modern European History," Vol. II.

History 52. 1 unit.

American history since 1877.

DEPARTMENT OF HOME ECONOMICS.

The purpose of this course is to prepare teachers of this subject for grades and high schools. The Home Economics work is begun in the sophomore year, and those students entering the junior year will be conditioned in Home Economics 20, 21 and 22, and Science 25.

Chemistry 30 must be taken either previous to or parallel with Home Economics 30.

Home Economics 43 should be taken last term of senior year.

Besides the teacher's course, elective courses have been arranged for the students not taking the Home Economics course. One course will be given in Foods, one in Clothing, and one in The Home, each independent of the other and each counting one unit.

Home Economics "A." Foods. 1 unit.

Composition, preparation, and cookery of our staple foods. Use of food in the body, balanced out in health and disease, cost and sanitation of foods for the home.

Home Economics "B." Clothing. 1 unit.

Economic study of clothing. Designing, cutting, and making of clothing for the family.

Home Economics "C." The Home. 1 unit.

Plan, decoration and furnishings of the home. Sanitation and management, division of the income, and study of budgets.

Home Economics 20. Food Products and Textiles. 1 unit.

The source, composition, cost, as well as the preparation, of the various staple foods from the raw state to the finished product in the marketable form will be treated in the first part of the course. In the second part the study of the production and manufacture of linen, silk, cotton, and wool, and the manufacturing conditions which affect the hygienic, economic, and esthetic value of materials.

Text-books: Sherman's "Food Products," Wolman's "Textiles."

Home Economics 21. Elementary Garment Making. 1 unit.

Making of all fundamental stitches, drafting, and the use of the pattern, hand and machine sewing applied to construction and repair of simple garments, and the attachments of the sewing machine.

Home Economics 22. Advanced Garment Making. 1 unit.

The construction of more difficult garments with application of em-

broidery and other decoration. The last half of this course gives instruction in designing and drafting patterns for hats, constructing and covering frames, making and placing trimming.

Home Economics 30. Principles of Cookery. 1 unit.

The aim of this course is to teach the elementary principles of cookery; the effect of heat on type foods, proper methods of combining foods and the changes which take place. Skill in handling apparatus and materials will be emphasized.

Home Economics 31. Food Preparation. 1 unit.

This course gives the opportunity for practice in home cookery. It will include the planning, cooking, and serving of meals. Care of food in the home, marketing and cost of materials will be emphasized. Some experimental cooking will also be given. Prerequisite Home Economics 30.

Home Economics 32. Dressmaking. 1 unit.

Shirtwaists and skirts and simple dresses are made in this course. The use of the drafted pattern, cutting and fitting are included. Prerequisite Home Economics 21.

Home Economics 40. The House. 1 unit.

The location, structure, furnishings, and decorations of the house are considered here as well as the care, cleaning, and management of the house.

Home Economics 41. Dietetics. 1 unit.

The nutritive functions of proteins, fats, carbohydrates and minerals with dietary standards and their application to practical problems in both health and disease. Dietaries of families of different incomes and for infants and children. Prerequisite Chemistry 45.

Text-book: Sherman "Chemistry of Food and Nutrition."

Home Economics 42. Dietetics. 1 unit.

A continuation of Home Economics 41 during another term. Prerequisite Chemistry 46 and Home Economics 41.

Home Economics 43. Methods of Home Economics. 1 unit.

This course deals with the organization of the course of study in Home Economics in the different grades of elementary and secondary schools; selection of topics and their adaptation to the different grades; the method of the recitation; equipment and illustrative materials; observation and practice in the Training School.

DEPARTMENT OF LATIN.

Latin 10. 1 unit.

Review of first year Latin, preparatory to reading of Caesar.
Gunnison and Harley.

Latin 11. 1 unit.

Caesar's Gallic War, books 1 and 2. Composition daily.
Gunnison and Harley's Caesar.

Latin 12. 1 unit.

Caesar's Gallic War, books 3 and 4. Composition.
Gunnison and Harley's Caesar.

Latin 20. 1 unit.

Caesar, selections from other than first four books.

Latin 21. 1 unit.

Cicero's first and second Catiline. Composition.
Gunnison and Harley's Cicero.

Latin 22. 1 unit.

Cicero's third and fourth Catiline. Composition.
Gunnison and Harley's Cicero.

Latin 30. 1 unit.

Manilian Law and Archias. Composition.
Gunnison and Harley's Cicero.

Latin 31. 1 unit.

Aeneid, books 1 and 2. Prosody and Mythology.
Frieze's Vergil.

Latin 32. 1 unit.

Aeneid, three books.
Frieze's Vergil.

Latin 40. 1 unit.

Latin prose. Selections vary from year to year.

Latin 41. 1 unit.

Continuation Latin 40.

Latin 42. 1 unit.

Latin poets. Prosody.

Latin 50. 1 unit.

Latin poets. Prosody and Mythology.

Latin 51. 1 unit.

Continuation Latin 50.

Latin 52. 1 unit.

Latin historians, Sallust, Tacitus, or Livy. Prose composition.

DEPARTMENT OF MANUAL TRAINING.

The course in Manual Training is designed to provide thorough instruction in the various phases of the subject for those preparing to teach and supervise Manual Training in the public schools of the State.

Provision is made for students enrolling in any course to take a short course in Manual Training, substituting not more than three units in Manual Training for other work in the course elected. Such substitution must have the approval and permission of the President.

Each student is expected to construct, near the close of a course, a piece to take with him, to be placed and used in his home, if he so desires. The size, design, and difficulty of the project permitted to be made, will depend upon the skill developed in his previous work and as time will permit.

In addition to the work given in the training school, methods of presentation are given side by side with the "content" of the subject. The student is taught not only to "do" but also how to "tell."

The new fireproof Manual Arts building will enable the school to meet all reasonable demands for preparing teachers of Manual Training and Home Economics for the high schools of Texas.

Manual Training 11. Elementary Mechanical Drawing. 1 unit.

No prerequisites.

This course is especially designed for students in the Science Department. The course includes the elements of mechanical drawing, isometric and cavalier projection, use of instruments, free hand sketching. Application will be made in the sketching of apparatus, used in the science laboratories.

Manual Training 20. Mechanical Drawing. 1 unit.

The work in this course includes the following: Lettering, Straight and Curve Line Shop Problems, Planes of Projections, Revolution of Solids, Development of Surfaces, Intersections, Working Drawings of the exercises to be made in the shop the following term. Tests on practical problems covering the work.

Text: Bennett's "Problems in Mechanical Drawing."

Manual Training 21. Bench Work. 1 unit.

Analysis of tool processes, the construction of simple models adapted to seventh and eighth grade work. Their purpose is to teach planing, gauging, scoring, sawing, chiseling, boring, etc. Nailing, screwing and lap-jointing will be the method of fastening. Construction of principal joints, the application of each joint in medium-sized pieces of furniture. Lectures will be given on sharpening, glues, sanding, scraping, staining, filling, finishing, etc.

Texts: Moore's "Manual Training Toys"; Noyes' "Handiwork in Wood."

Manual Training 22. Vocational Woodwork. 1 unit.

Manual Training 21, pre-requisite.

This course is designed to give the student a working knowledge of "piece work" as is employed by the wood industries in the construction of cabinets, tables, and other pieces. Where such pieces are wanted in quantities the student is given adequate instruction in the use and construction of the various machines before actual operation is begun.

The work is covered by notes, lantern slides, where time will permit, and the construction of such equipment as may be needed by the College.

Manual Training 23. Mechanical Drawing. 1 unit.

Principles of mechanical and architectural drawing. The use of drawing instruments. Application to farm problems. Working drawings are made of barns, silos, chicken houses and other problems in rural life.

Bulletins U. S. Department of Agriculture—Notes.

Manual Training 30. Machine Drafting. 1 unit.

Manual Training 20, pre-requisite.

Lettering, elements of machine drafting consists of: Study of Practical Drafting Room Practice, Types of Screw Threads, Proportions of Standard Bolts and Nuts, Types of Fastenings, Drawing of Machine Parts from Life. Machine parts using Standardized Proportions.

All drawings will be made on detail paper, traced on imperial cloth. Each student must learn to make good blue prints, using his own tracings.

Text: Jameson's "Elements of Mechanical Drawing."

Manual Training 31. Wood Turning and Pattern Making. 1 unit.

Manual Training 22, pre-requisite.

Wood Turning: Exercises teaching all the cuts in spindle turning, face-plate work, chuck work and mandrel turning. Attention will be given to the correct handling of tools, accuracy, speed, etc.

Pattern Making: The pattern work consists of bench work and turned patterns. The principal types of patterns are studied and made. Students make their own calculations for draft, shrinkage, rap, etc. Lectures are

given covering the work, these being accompanied by demonstrations in molding.

Text: Crawshaw's "Problems in Wood Turning"; Purfield's "Wood Pattern Making."

Manual Training 32. Foundry Work. 1 unit.

The molding and casting of simple castings. The use of the more complex patterns. Core making. Types of molds are covered by operations in the shop, by lectures, and by lantern slides. Management of the cupola furnace, such as charging, pouring, and its care.

Text: "Elementary Foundry Practice," Richards.

Manual Training 40. Advanced Machine Drafting. 1 unit.

Manual Training 30, pre-requisite.

This course includes the study of gears, cams, parallel motions, etc.; assembly and detail drawings of some large machines. If time permits, isometric and cavalier projections are studied.

Text: Mathewson's "Notes for Mechanical Drawing."

Manual Training 41. Architectural Drafting. 1 unit.

Manual Training 20, pre-requisite.

This course consists of architectural lettering, study of types of buildings and roofs, study and drawing in detail of frame construction, individual planning of bungalow, isometric and cavalier projection.

Manual Training 42. Blacksmithing. 1 unit.

Management of the forge, the making of fires, exercises in twisting, bending, lengthening, up setting, welding, tool forging, tempering, annealing, and case hardening. Heat treatment of metals. Practical applications.

Text: Bacon's "Hand Forging."

Manual Training 43. Method of Manual Training. 1 unit.

Historical review of the theories and practices of educational reformers, such as Pestalozzi, Froebel, and others. A review of the work that has been done in this country, work that is now being done; study of present indications as to the probable future status of manual training in its relation with vocational training and the work of the trade schools.

The laws on the subject in this State as well as those of the most important States in the United States.

Method of teaching, planning of courses of study for manual training in grades and high school, study of equipments, proper installation of power machinery and their relative location for greatest efficiency, etc.

The work will be covered by text, lectures, lantern slides, and theses by the students.

Text: Rowe's "The Meaning of Manual Arts and Industries."

Manual Training 50. Machine Design. 1 unit.

Manual Training 30, pre-requisite.

A combination of discourse and drawing-board work. The talks will include the various kinds of structural fastenings, as rivets, bolts, plates, etc.; strengths of various materials in tension, compression, bending, and torsion; drives; joints; stresses in various structures; applications of standard formulae in calculating strains, ruptures, etc.

Applications of the principles learned will be made in the design of simple machines to be built for the college shops. The projects designed will take their course thru the pattern shop, foundry, and machine shop.

Manual Training 51. Cement and Concrete Construction. 1 unit.

Cement has become one of the most useful materials in construction work of all kinds. It is one of the most important of the newer forms of

industrial work given in schools. Its use is constantly increasing, not only in the building world, but also in the home and on the farm.

This course includes the construction of concrete and cement forms for all castings studied. The work covered will include pottery, urns, benches, fence posts, walks, and other ornamental work, as time will permit.

Discourses will be given on the history and manufacture of cement, aggregates, mixtures, tools, forms, equipment, re-inforcements, etc.

Practical applications will be made as far as possible in the construction of work needed by the college.

Text: Bulletins by U. S. Department of Agriculture and by the National Association of Cement Manufacturers.

Manual Training 52. Advanced Blacksmithing. 1 unit.

Manual Training 42, pre-requisite.

This is a continuation of Manual Training 42. Larger and more intricate work of various types will be done under the power hammer as well as on the anvil. Duplicate work will be given considerable attention. As far as possible the tools will be furnished for the machine shop. If time permits, ornamental forging will be gone into—the amount and kind depending upon the previous skill shown by the student.

Text: Bacon's "Hand Forging" and ornamental-iron catalogs furnished by the trade.

DEPARTMENT OF MATHEMATICS.

Mathematics 10. Elementary Algebra. 1 unit.

Simultaneous simple equations, indeterminate equations, inequalities, involution and evolution, theory of exponents, radicals, imaginary expressions, quadratic equations.

Text: Wentworth's New School Algebra.

Mathematics 11. Elementary Algebra continued. 1 unit.

Simultaneous quadratics, ratio, proportion, variation, arithmetical, geometrical and harmonical progressions, variables and limits, properties of series, binomial theorem, logarithms.

Text: Wentworth's New School Algebra.

Mathematics 12. Plane Geometry. 1 unit.

Book 1. Wentworth and Smith.

Mathematics 20. Plane Geometry continued. 1 unit.

Books 2 and 3. Wentworth and Smith.

Mathematics 12 is pre-requisite.

Mathematics 21. Plane Geometry continued. 1 unit.

Books 4 and 5. Wentworth and Smith.

Mathematics 20 is pre-requisite.

Mathematics 22. Algebra. 1 unit.

Roots, radicals, exponents, quadratics, systems solvable by quadratics, progressions, limits and infinity, logarithms, ratio, proportion, variation, imaginaries, theory of quadratic equations.

Text: Second Course in Algebra by Hawkes-Luby-Touton.

Mathematics 30. College Algebra. 1 unit.

Functions and their graphs, quadratic equations, inequalities, complex numbers, logarithms.

Text: Hawkes' Higher Algebra.

Mathematics 31. Trigonometry. 1 unit.

Text: Wentworth and Smith.

Mathematics 32. Solid Geometry. 1 unit.

Text: Wentworth and Smith.

Mathematics 40. Analytics. 1 unit.

Cartesian Co-ordinates, the curve and the equation, the straight line, Plane Geometry, Algebra, and Trigonometry, are pre-requisites.

Mathematics 41. Analytics continued. 1 unit.

The circle and the equation, polar co-ordinates, conic sections, and equations of the second degree, tangents and normals.

Text for Mathematics, 40 and 41: Smith and Gale's Introduction to Analytic Geometry.

Mathematics 42. The Teaching of Secondary Mathematics. 1 unit.

A professional course for teachers of mathematics.

Text: J. W. A. Young's The Teaching of Secondary Mathematics.

In all the work in mathematics three ends will be kept constantly in view:

First. To prepare teachers of the subject.

Second. To secure mental discipline and culture.

Third. To make mathematics a ready and useful instrument.

Mathematics 50. College Algebra continued. 1 unit.

Theory of equations, permutations, probability, determinants, partial fractions and infinite series.

Mathematics 30 is a pre-requisite.

Text: Hawkes' Higher Algebra.

Mathematics 51. Analytical Geometry. 1 unit.

Text: Tanner and Allen's Analytical Geometry.

Mathematics 52. Analytical Geometry continued. 1 unit.

Text: Tanner and Allen's Analytical Geometry.

Mathematics 60. Differential Calculus. 1 unit.

Text: To be selected.

Mathematics 61. Differential Calculus continued. 1 unit.

Text: To be selected.

Mathematics 62. Integral Calculus. 1 unit.

Text: To be selected.

N. B.—Mathematics 60, 61, 62 will not be given before the Summer term of 1918.

DEPARTMENT OF MUSIC.

Music 10. 1 unit.

This course teaches the development of musical theory, elements of notation, ear training, phrase writing, time subdivisions, scale and interval singing and sight reading.

Music 20. 1 unit.

To be preceded by Music 10. A regular course in Public School Music is begun, including rote songs, motives, figures, rhythmic development, training, artistic expression, memorization.

This will cover the first three years of Public School Music.

Text: Progressive Music Series, Book I.

Music 23. 1 unit.

Sight reading, with a review of the problems of Music 10. Four-part singing.

Text: School Song Book.

Music 30. 1 unit.

Music 30 must be preceded by Music 10 and 20. Here the problems of 4th and 5th grade music are taken up, including tone drills, time problems, and theory; character of notation, minor, mode, sharp and flat chromatics, introduction of two part singing, key signatures, scale studies, pitch names of lines and spaces of the staff, names of keys on piano key board.

Text: Progressive Music Series, Book II.

Music 31. 1 unit.

Music 31 must be preceded by Music 30. The problems of the 6th and 7th grades are taught, including a review of 4th and 5th grades. Building major scales, deriving key signatures from the scales, building minor scales, normal, harmonic, melodic, modulation to nearly related keys, the bridging tone in modulation, introduction of three-part singing, the ascending and descending chromatic scale, syncopation, complicated rythms, contrapuntal style, dotted quarter note beat 9-8 12-8 measure.

Text: Progressive Music Series, Book III.

Music 32. 1 unit.

Music 32 must be preceded by Music 30 and 31. This course discusses the story of the opera, illustrated by Victrola.

Music 34. 1 unit.

A course in Elementary Harmony, including scale study, major, minor, chromatic, signatures, interval and chord study, major, minor, diminished and augmented, inversion, simple forms of modulation.

Music 40. 1 unit.

Music 40 must be preceded by Music 30, 31, 32. This course discusses the problems of the 6th and 7th grades, including a review of the 4th and 5th grades. Building major scales, deriving key signatures from the scales, building minor scales, normal, harmonic, melodic, modulation to nearly related keys, the bridging tone in modulation, introduction of four-part singing, building the chromatic scale, syncopation, complicated rhythm, contrapuntal style, dotted quarter note bear 9-8 12-8 measure.

Text: Progressive Music Series, Book III.

Music 41. 1 unit.

Music 41 must be preceded by Music 40. The problems of the 8th and 9th grade music are developed here, including four-part singing. The bass clef is introduced.

Text: Progressive Music Series, Book IV.

Music 42. 1 unit.

Music 42 must be preceded by Music 41. History of Music.

Text: Pratt's "History of Music."

Music 44. 1 unit.

Music 44 must be preceded by Music 34. Sight reading, four-part singing.

Music 50. 1 unit.

Harmony and ear-training. Major and minor scales; circle of key chords of three tones; inversion; close and open harmony; intervals; cadences.

Music 51. 1 unit.

Harmony and ear-training. To be preceded by Music 50. Melody formation; harmonization; dominant 7th chords; harmonic and melodic progressions; dominant 9th chord.

Music 52. 1 unit.

Harmony and ear-training. To be preceded by Music 51. Demonstration of intervals; examples of cadences; harmonic analysis; original exercises.

DEPARTMENT OF PHYSICAL EDUCATION AND ATHLETICS.

The course in Physical Education aims to maintain and promote the health of the students, and to aid them in the formation of habits of hygienic living; to give them the knowledge necessary for intelligent teaching of school gymnastics and supervision of out-door plays and games.

Systematic instruction is given concerning the means for keeping the body in health, for maintaining normal progressive growth and development, for securing grace, in posture, carriage and action.

"Physical Education 10 and 20" are required of all classes, and in all courses, for the first two resident years additional work is elective. Classes meet twice a week for a minimum of twenty-four weeks, exclusive of the time devoted to physical examinations. The number of weeks depending upon the nature of the work.

All athletic sports are opened to all students registered in the College. First term, Football and Tennis; second term, Basketball and Tennis; third term, Baseball, Tennis and Track Sports. The requirements are the same in number of units, for men and women, though the kinds of exercises and sports differ.

Those who desire advanced work in Physical Education, leading to a certificate in Physical Education, are required to complete four (4) additional units in the advanced courses, one of which must be Hygiene. The other three courses to be elected from Physical Education 30, 32, 40, 41, 42, 43, 44, 45.

A certificate as Teacher of Physical Education will be granted to those who complete the four-year course in conjunction with the course in Physical Education which includes the two years of residential work and the additional four units of advanced work.

All students are required to wear the regulation gymnasium suit in the gymnasium.

Physical Education 10. 1 unit.

(m) Swedish gymnastics and games.

(w) Swedish gymnastics, consisting of floor work, games and folk dancing suitable for rural and city schools.

Physical Education 20. 1 unit.

(m) German gymnastics and games, such as basketball, soccer football, indoor baseball and volley ball.

(w) German gymnastics, folk dancing, games, such as basketball, soccer football, indoor baseball and volley ball.

ADVANCED COURSES**Physical Education 30. 1 unit.**

Theory and Psychology of Play.

Physical Education 31. 1 unit.

Hygiene.

Physical Education 32. 1 unit.

- (m) History and Literature of Physical Education and Athletics.
- (w) History and Literature of Physical Education.

Physical Education 40. 1 unit.

- (m) Theory and Practice of Football Coaching.
- (w) Methods of Teaching Physical Education.

Physical Education 41. 1 unit.

Theory and practice of basketball coaching.

Physical Education 42. 1 unit.

Theory and practice of volley ball and tennis coaching.

Physical Education 43. 1 unit.

- (m) Theory and practice of baseball coaching.
- (w) Theory and practice of indoor baseball coaching.

Physical Education 44. 1 unit.

Theory and practice of track athletics.

Physical Education 45. 1 unit.

- (w) Advanced folk dancing.

DEPARTMENT OF PHYSICS.**Physics 20. 1 unit.**

Elementary Physics, Simple Machines, Mechanics of Liquids and Gases, Action of Forces, Elasticity and Strength of Materials, Accelerated Motion. Lectures and demonstrations three hours per week; laboratory work two hours per week.

Physics 21. 1 unit.

Energy and Momentum, Heat, Heat Engines, Magnetism, Beginning of Electricity. Electrical Measurements and Measuring Instruments. Lectures and demonstrations three hours per week; laboratory work two hours per week.

Physics 22. 1 unit.

Induced Current, Dynamos, Motors, and Alternating Current Machines Sound, and Light. Lectures and demonstrations three hours per week; laboratory work two hours per week.

Text-book for Physics 20, 21 and 22: Black and Davis' "Practical Physics."

Physics 23. 1 unit.

This course is designed for the students of the Home Economics Department, and teaches the principle of physics as applied in the home. Illustrative examples and applications are taken largely from the home, and the common system of weights and measures is used. School and home are thus united in the acquisition of knowledge that will be used in everyday life.

Lectures and demonstrations four hours per week.
Text-book: Lynde's "Household Physics."

Physics 40. 1 unit.

Prerequisite: Physics 20, 21, 22, or the equivalent.
Mechanics, including Vector Analysis, Force and Torque, Energy Trans-

formation, Moment of Inertia, Machines, Power, and the Kinetic Energy of Rotating Masses. Heat, including Calorimetry, Kinetic Theory of Gases, and Thermodynamics.

Physics 41. 1 unit.

Electricity and Magnetism, including Electrostatics, Electro-magnetism, Electrical Measuring Instruments; Electro-magnetic Waves, and Alternating Generators.

Lectures and demonstrations three hours per week; laboratory work two hours per week.

Physics 42. 1 unit.

Sound and Light, in which Optical Instruments, Dispersion, Color Phenomena, and Polarization of Light will receive special emphasis.

Text-book for Physics 40, 41 and 42: "A Text-book in Physics," Spiney.

Physics 43. 1 unit.

This course is designed for students in the Manual Training Department in the junior and senior year, and is intended to give them a working knowledge of the machines and subjects studied, to the end that they may be able to properly care for the power and light apparatus of which they may have control.

Study of Gas Engines, Electric Generators and Motors, including principal types, methods of winding, connections, care of parts, troubles, etc. Electric Lighting and Wiring, including power consumption and cost, efficiency of various types of lamps, requirements of insurance underwriters, etc. Storage Batteries, Switchboards, and Power Installation.

Time: Three hours per week; course will include lectures, study of actual commercial machines and apparatus installed in the College laboratories and powerhouse on the Campus, and books on electrical engineering from the library.

Physics 60. Electricity and Magnetism. 1 unit.

A presentation of many phases of electrical engineering practice in immediately usable form, based upon the fundamental principles of electrical theory and measurements.

The course will include a sufficient drill in concrete practical problems, together with laboratory work in Direct and Alternating Current Machinery.

Physics 61. Continuation of Physics 60. 1 unit.

Physics 62. Sound and Light. 1 unit.

An advanced course including a thorough study of the wave theory, refraction, dispersion, interference and polarization.

Experiments will include work with sonometers, interferometers, polariscopes and spectrometers.

DEPARTMENT OF READING.

Reading 10. 1 unit.

Instruction in correct breathing, correct pronunciation, reading from memory, and story telling.

Texts: "Evolution of Expression," Vol. I. and II.
Ashmore's "Manual of Pronunciation."

Reading 20. 1 unit.

In all spoken language there are not only thoughts but feeling. The great failure in reading and speaking is the inability to rightly render the feeling. Feeling is the soul of utterance, and the symbol that conveys feeling to the listener is tone. The best way to lead the student into correct interpretation of the higher literature is to show him its relationship to the experiences of daily life; hence we give drills in toning, studies in pause and prominence, method of studying a selection, and practicing delivery.

Text: Natural Drills in Expression with Selections, by Arthur Edward Phillips.

Reading 21. 1 unit.

Expressive Voice Culture and Philosophy of Expression.

Drill on the first eight steps in the evolution of Art. Study of the tone color, form, sympathy and beauty of the voice in relation to the imagination and emotion.

Texts: Emerson's "Evolution of Expression," Vol. I. and II.
Ashmore's "Manual of Pronunciation."

Reading 30. 1 unit.

Advanced interpretation, reading from memory, analytic study of English pronunciation and enunciation and breath control.

Texts: Kings "Practice of Speech."

"American Prose," compiled by Horace E. Scudder.

Reading 31. 1 unit.

Acoustics and Philosophy of Expression.

Drill on the first eight steps in the evolution of art. Instruction in the anatomy and physiology of the vocal organs and study of Bell's method of visible speech which is the mechanical basis for accurate pronunciation of all languages.

Text: Kidder's "An Outline of Vocal Psychology and Bell's Visible Speech." Emerson's "Evolution of Expression," Vol. I. and II.

Reading 40. 1 unit.

Advanced Interpretation, study of impersonation and discussion of the artistic principles involved and the tone color and form of the voice as an interpreter of the mental states.

Texts: Anna Morgan's "Selected Readings." "The Golden Treasury."

Reading 41. 1 unit.

Literary Interpretation.

Drill on the last eight steps in the evolution of art and their pedagogical application. Expressive study of description, narration, epic, lyric and dramatic poetry and dramatic prose.

Texts: Emerson's "Evolution of Expression," Vol. III. and IV.

Reading 42. 1 unit.

Public Speaking as a Practical Art.

The course is not only for the student of public speaking, but also for the average man who, making no pretensions to being an orator, needs to

know how, when occasion demands, to stand on his feet and talk simply, clearly and effectively.

Texts: "Public Speaking," by James Albert Winans; Shurter's "Masterpieces of Modern Oratory."

Reading 50. 1 unit.

Dramatic Interpretation and Pantomime.

Study is made of the drama in its relation to education and character building and standard and original pantomimes are presented.

Reading 51. 1 unit.

Dramatic Training.

The technique of the drama. The analysis and group interpretation of standard plays, following the order of development of the drama. As prospective teachers, students are given practical stage training in how to produce plays and entertainments of all kinds.

Reading 52. 1 unit.

Dramatic Art.

The intensive study and dramatic presentation of representative modern dramas. Plays are studied in their two-fold relation as dramatic art and literature.

DEPARTMENT OF SPANISH.

Spanish 10. 1 unit.

Elementary Spanish. Reading, writing and speaking Spanish.

Text-books: Dowling's "Reading, Writing and Speaking Spanish." Harrison's "Elementary Spanish Reader."

Spanish 11. 1 unit.

Reading easy prose. Inductive instruction in the elements of Spanish grammar.

Text-books: Hall's "All Spanish Method," (First Book); Rossler and Remy's "First Spanish Reader."

Spanish 12. 1 unit.

Oral and written composition. Reproduction in the student's Spanish of stories he has read.

Text-books: Coester's "Spanish Grammar"; Roessler and Remy's "First Spanish Reader"; Hall's "All Spanish Method."

Spanish 20. 1 unit.

DEPARTMENT OF PIANO

Miss Anderson

Elementary. Course in Hand Culture: Kohler, Practical Method; Mathews Graded Course, Books I and II; Braur, Op. 15; Lemoine, Op 37, etc.; Sonatinas by Clementi, Dussek, Kuhlau; lighter compositions by classic and modern composers.

Intermediate. A limited number of studies by Berens, Duvernoy, Doring, Heller, Czerny, Loeschhorn, Bach, etc. Sonatas and compositions by Haydn, Mozart, Beethoven, Schumann, Mendelssohn, Chopin, Grieg and others.

Advanced. Studies from Bach, Three-part Inventions; Cramer von Bulow, continued, Czerny, Dexterity; Bach, Well-tempered Clavichord; Clementi, Gradus ad Parnassum, etc. Concert compositions by classic and modern composers.

Recitals will be given from time to time to accustom pupils to playing in public.

Terms: Per month, two lessons a week, 1-2 hour each \$8.00. Half time, \$5.00.

The Department of Piano is not maintained by the State, and the salary of Miss Anderson is not paid by the Board of Regents; hence the tuition for lessons on the piano is not included in the regular Normal fees.

While no one is required to take piano music for a certificate in any one of the seven courses offered, still one unit of credit is given for three full terms' work on piano.

Instrumental music is not provided for in the appropriation for the school. It is not required in any one of the seven courses offered, but many students each year wish lessons on piano. To accommodate these Miss Anderson is provided with a studio by the school. The tuition fees for piano music are paid to her and constitute her whole compensation.

The authorities of the College heartily recommend Miss Anderson as a competent and skillful teacher.

REGULATIONS CONCERNING INTERCOLLEGIATE ACTIVITIES

Students are disqualified to represent the Normal College in intercollegiate games or contests, or any extraordinary student activity by the following conditions:

1. Failure to make a passing grade in at least three subjects of the full regular course in which the student is registered.
2. Being "under discipline."
3. Being the beneficiary in actuality or promise of any financial consideration for participation in such game, contest or activity.

Disqualification under (1) and (2) may be removed at any time by the teacher or committee responsible for such disqualification, when the occasion therefor has been removed by the student.

THE LYCEUM COURSE

The Normal has always maintained a strong course of lectures and entertainments, each year securing the best available talent. Men and women of national reputation, famous as leaders in public life, noted artists, musicians, and writers have been secured, who have contributed much to the student's realization of the college purpose of helpfulness and spiritual uplift.

THE TEACHERS' RECOMMENDATION COMMITTEE

A committee of the faculty, without fee or compensation of any kind, acts as a Teachers' Bureau for the purpose of aiding worthy students in finding employment upon leaving school and assisting school boards in finding competent teachers. The committee places every year several hundred teachers. Its services to school boards have proven satisfactory, and it receives applications from school officials every week in the year.

Any communication concerning the work addressed to the President or the Secretary of the school or to the Chairman of the Committee on Recommendations will receive prompt attention.

STUDENT ACTIVITIES

Every modern college now recognizes the educational value of various kinds of student activities. These activities furnish opportunity for social education in leadership and loyalty and provide training in the application of theory in the school room for the practical conditions outside. They satisfy a natural craving for social intercourse which it would be stupid for any college to oppose.

The College has adopted and has adhered to the policy of encouraging a wide line of student activities, literary, forensic, dramatic, athletic, social, journalistic, artistic and spiritual. These activities are not left to or thrust upon the sole responsibility of students, but they are under the sympathetic and directive influence of committees of the students and faculty.

Literary Societies. The school supports several literary societies: The Mary Arden and Current Literary Clubs for women, the John H. Reagan and Robert E. Lee Literary Societies for men. The women's societies meet bi-weekly, and the men's societies have weekly sessions.

The Mary Arden Club is limited to membership of 40, and gives preference to advanced students. It was organized for

the study of Shakespeare, but each session it devotes some time to some modern author or studies some problem of present importance.

The Current Literature Club, larger in its membership, stimulates the study of the highest grade of modern literature, and also attacks questions of social and civic importance. Both of these clubs are "federated" with other women's clubs of the city and state.

The Reagan and Lee Literary Societies for men seek the development of qualities of manliness and loyalty, as well as training in debating, declamation, and parliamentary practice. These two societies have no meetings during the summer sessions, but all members of both societies and other men in the school join during the summer session in the Henry W. Grady Literary Society.

For the purpose of intercollegiate contests, the men's societies are combined into an oratorical association. Under the auspices of this organization, the school is a member of the Texas Normal College Debating League, in which each of the normal schools meets in annual debate two of the sister institutions. The annual debates occur simultaneously at all the normals, the same question being discussed at both places, and each school supporting both sides of the question, taking the affirmative side at one place and the negative side at the other. The school is also represented in the State Peace Oratorical Association.

Student Publications. Elected representatives of all the classes in the school constitute the Press Club, which issues a weekly publication, "The Campus Chat," a quarterly, "The Avesta," and an annual, "The Yucca." The editor-in-chief of "The Campus Chat" and "The Avesta" is elected by the board of associate editors, who are elected by their respective literary societies.

The editor-in-chief of "The Yucca" is elected by the entire student body. The office is esteemed the highest honor in the eyes of the students, and the election is contested in the typical American college fashion. The business manager of the publications is elected by the Faculty.

"The Campus Chat" and "The Avesta" furnish a repository for the best products of student literary effort and a record of current events in the school. "The Yucca" is an illustrated year book of college life and activities. These publications are valuable to the school, for the associations formed during the year serve as much to enrich the later life of the student as the formal work in classroom, library, and laboratory, and it is the human side of the school that gives these tasks a life meaning.

Correspondents' Club. This student activity is of great usefulness to the school. The students coming from certain

counties or groups of counties have for some years been organizing for social purposes into county or section clubs. These clubs elect certain members correspondents of home or county papers, whose duty it is to send every month a news letter giving the main happenings at the College. These letters are primarily of interest to the families and friends of the students. It affords fine training to those members who prepare articles for these papers.

Sketch Club. The Sketch Club is composed of a group of students who have some artistic ability, and who are interested in drawing and painting, and who want to give more time to the work than the class period affords.

Musical Organizations. The fundamental musical organization of the school is the Choral Club. A chorus is made up of students who can read music fairly well at sight. It meets for practice twice a week throughout the year. A varied selection of musical masterpieces, consisting of modern part songs, and selections from oratoria and opera are studied. While concerts are given from time to time during the year, the most important feature of the chorus is the May Festival, which constitutes a leading part of the Commencement Week program. A credit of one unit is given for regular attendance and conscientious work. The Musical Club for Young Women and the Glee Club are two popular organizations for women and men, respectively. Each consists of about fifty voices. Fluent reading at sight is required for membership in either. Recitals and musicales are given throughout the year. Besides the musical numbers that enrich the literary and devotional programs of other organizations are largely the fruit of the work of these clubs.

The **Normal Band** has proved one of the most successful of the student organizations. The school owns its instruments. In addition to the twenty trained players constituting the regular band, classes of beginners are given instruction and practice.

Athletics. It is the duty of every school to provide opportunity for physical as well as mental and moral development. Besides the regular courses in physical education, the interclass and inter-school contests are aimed primarily to increase the student's capacity for mental effort, for moral stamina, and for social service. Competitive athletic games with schools of equal rank are made part of the athletic program. But since intercollegiate games do not afford the opportunity of participation to the majority of students, great stress is laid upon competition between classes and other groups. In this way it is hoped the entire student body may be reached by invigorating influence of strenuous play. The school owns about five acres of land prepared for baseball, basketball, tennis, volleyball, and other games. The athletic interests are safeguarded.

by a committee of the faculty and by an association of students. Representatives of both bodies form the Athletic Council, whose duty it is to keep athletic interest in the school, not only alive and healthy, but sane and intelligent as well.

Young Men's Christian Association. The Young Men's Christian Association was organized in the school three years ago, and has steadily gained in influence. During each year about one hundred have been enrolled as active members. Delegates have been sent each year to the western or southern encampments as well as to the meetings of the State association. Weekly devotional meetings are held for an hour on Thursday evenings. Speakers with vision and message, both from within and without the school, then address the men and set up ideals of manliness and service. It is hoped in the near future to secure the services of a special "secretary," who shall devote his entire time to the work. Some special lines of study may then be organized under the auspices of the association in mission work, philanthropy, and Bible study, to put the students in touch with these great movements in the world.

Young Women's Christian Association, Miss Erma Appleby, General Secretary. The Young Women's Christian Association has been organized in the North Texas State Normal College for three years. It is the largest student organization of the College, enrolling during the past session over 460 members. The Young Women's Association employs a resident secretary, Miss Erma Appleby, who devotes her entire time to the welfare of the girls of the institution. Miss Appleby is a graduate of the National Training School for Secretaries, in New York City. The Association is open to members of all churches, and offers associate membership to those who belong to no church at all. The aim of the Association is to unite the young women of the institution in loyalty to Jesus Christ, to serve as a connecting link between the students and the local churches, and to help build up the social life of the students. The Association has a well furnished rest room in the Science Hall. This is open to the students at all times. Miss Appleby also has her office here. Weekly meetings are held on Wednesday evenings. Membership dues are \$1.00 per calendar year.

TERM REPORTS

At the end of each term of twelve weeks a report of the work of the student for that term will be sent to the parent or guardian.

EXPENSES

Tuition is free.

Each student enrolling in the school during the regular nine months' session shall pay an incidental fee of \$15.00 upon

entrance, and no other fees or charges shall be levied against or collected from any student, and each student is entitled to the free use of text-books furnished by the school, which books, if returned in satisfactory condition at a time designated by the President, shall entitle the student to a refund of \$2.00.

The payment of this fee of \$15.00 is to be made by the student upon entrance to the school. It is the only fee paid during the session of nine months. There are no additional fees for library, books, laboratory, Manual Training, Domestic Science, etc.

The student is furnished all text-books except the English Classics used in the supplementary work of the English Department. It is best for the student that he own these classics and that he keep them, with his notations, for use when he teaches English himself.

The fee is \$15.00 whether the student enters at the beginning of the session or near the close of the session, whether the student continues in school for the entire session or only a few days of the year. No part of the fee is refunded, except \$2.00 upon prompt return of books. In order to be entitled to the refund of \$2.00, the student must return the books used by him at the time designated for their return.

No one should ask exemption from or modification of the fee or its conditions. Neither discretion nor authority is given the President of the school to alter the terms or conditions of its payment.

BOARDING PLACES AND RATES

The school has no dormitory. In proximity to the school there are between one hundred and fifty and two hundred good boarding and rooming houses. Each year the number of boarding houses is increased and the conveniences improved. Nearly all these houses have electric lights, sewerage, hot and cold water appliances, and are screened, while many have natural gas for cooking, heating and lighting.

Students are permitted to select from an **approved** list their own boarding places. Frequent changes for trivial causes are discouraged and students, after the first ten days, may change their places of residence only with the consent of one of the deans of the faculty, who have charge of all matters pertaining to board.

Men and women students must have separate boarding and separate rooming houses.

A list of **approved** houses is furnished each student upon arrival at the school. No student is permitted to engage board at a house not on this list. Such list cannot be furnished the student in advance of arrival, because (1) frequent changes and additions made in houses near the beginning of the session render it impracticable to make a complete list. (2)

Such list would convey no useful information to one unacquainted with the topography of the town, and (3) it is not necessary for students to engage board in advance; there being always ample accommodations regardless of the number of students. Reports have at times become current that all boarding places have been filled before the beginning of the session or very soon thereafter. No student has, in the history of the school, been forced to leave for lack of board, and such report in future, if heard, should be promptly discredited.

Board and rooms cannot always be secured in the same house. More than half the students secure rooms at one place and meals at another. Because numerous houses make special provision for furnishing meals to large numbers, frequently more satisfactory conditions can be found by not insisting on having meals and rooms at the same place.

Approved Houses.—An approved boarding house is one that co-operates with the school, enforces the regulations concerning the conduct of students, exerts a good influence over the students, treats them kindly, but firmly, and affords good board with sanitary conditions.

Whenever it is found that the proprietor of a boarding house does not meet the requirements of an "approved house," fails or refuses to enforce the regulations and to report violations, the students are removed from such house.

All persons desiring to take Normal students as boarders must apply to the school in writing, stating the number of boarders desired, whether men or women, stating whether they offer rooms or meals, or both, giving rates in each case, and specifying the conveniences offered.

If upon application a boarding house is approved, it is placed on the approved list and the proprietor is furnished a printed copy of the regulations of the school.

Rates of Board—During the past session board, including room, meals, fuel, lights, etc, varied from \$16 to \$20 per calendar month. It is hoped that the rates will not be advanced, but much depends upon war conditions. At any rate, board will be as cheap here as at any other place in the State.

KINDS OF CERTIFICATES GRANTED ON WORK DONE IN THE TEXAS STATE NORMAL SCHOOLS.

1. The student completing the work of the freshman (first year) class receives a second grade certificates valid for six years.

2. The student completing the work of the sophomore (second year) class receives a first grade certificate valid for six years.

3. The student completing the work of the junior (third year) class receives a first grade certificate, stating which of the seven courses pursued and valid for six years.

4. The student completing the work of the senior (fourth year) class receives a permanent certificate, stating the course pursued, which is valid during good behavior.

All certificates are issued by the State Department of Education. They bear the seal of the department and are signed by the State Superintendent of Public Instruction.

The student completing the work of the senior class is awarded the diploma of the College. The diploma states the special course completed. It bears the seal of the College and is signed by the President.

The certificates granted by a State Normal School should not be confused with certificates obtained from summer normal institutes and county boards of examination.

Certificates granted by State Normal Schools may be built upon for higher certificates, but the Normal Schools do not grant certificates to applicants by simply "taking the additional subjects" for higher certificates.

GOVERNMENT.

Those entering a Normal School are expected to be of sufficient maturity and to have come with a purpose so serious and definite that espionage is unnecessary. By far the greater number of students who come here are eager, earnest and industrious young men and women, who cheerfully comply with all regulations. But experience has demonstrated the necessity of having well defined regulations concerning the conduct at school and at the boarding places, for the guidance of those whose inclination or whose judgment renders proper direction necessary.

Upon matriculation the student is given a printed copy of the regulations concerning the conduct of students and he is requested not to register if unwilling to conform to the requirements. Whenever a student wilfully violates the regulations, ignores the efforts of the faculty to assist him in his character building, manifests a spirit of insubordination to authority, or shows himself out of harmony with the school and its ideals, he is advised that he is not in the right school and is requested to withdraw.

Continuance in school depends upon punctual class attendance and obedience to regulations. Students who must continually be admonished, restrained, reprimanded, or denied the usual privileges, are undesirable, and they will not be retained in the school.

The purpose of the school is to train teachers for the public schools of Texas, and it should not inflict upon the children of the State as teachers those whose character, habits of thought, or low ideals unfit them for directors and exemplars to the young.

To all those who are seeking opportunity to work under wholesome influences, favorable conditions, competent and sympathetic direction, is extended a hearty welcome. Those who are merely seeking diversion, change of environment, or increased social advantages, and those incapable or unwilling to lead the life of a student are advised—urged—to go elsewhere.

DIRECTIONS TO STUDENTS APPLYING FOR ADMISSION

Students should note the requirements for entrance, and understand that the school has no authority to admit them without implicit compliance with the directions of the Board of Regents. Students should not write asking that in their cases requirements be not enforced on account of their age, experience, or other reasons, for no such request can receive consideration.

Students should remember that the requirements for entrance and for certificates are the same in all the Texas State Normal Schools.

Credentials, certificates of promotion, etc., upon which entrance examinations are sought to be absolved must be documents signed officially by the proper authority.

Credentials, statements, certificates of promotion, to receive consideration must be from—

(a) High schools affiliated with colleges or universities previously named.

(b) High schools approved by the State Department of Education.

Students desiring to enter on examination, on certificate, diploma or promotion card from accredited high schools should report at the beginning of the session, and avoid trouble and delay in classification.

Credits are given only for full terms' work. Students entering late in the term find difficulty in being classed promptly and making up the work already done by the class.

A term is twelve weeks.

Students should not request exemptions not mentioned in the bulletin, as the school is without authority to grant such requests.

Diplomas, promotion cards, statements, etc., from school not duly accredited should not be urged as exemptions from examination. This school has no authority to affiliate, accredit or approve schools of any kind.

THE TRAINING SCHOOL.

In connection with the Normal School proper is conducted a school of nine grades. The purpose of this school is to afford the Normal students the opportunity of observing the organization, conduct, control, instruction, and other details of a model public school, and to give students actual practice and experience in teaching under expert direction.

The experience thus acquired is far more helpful and valuable to the teacher than that gained in the usual haphazard methods upon which the young teacher depends when he starts out for himself either in the grades or in the rural schools.

The completion of the work of the ninth grade in the Training School admits the students to the Freshman class of the College without examination.

Until a more commodious building and a greater number of teachers can be provided by appropriation, each teacher except that of the first grade, will have charge of two grades. All these are experienced and trained teachers. A technically trained and experienced director is in charge of the entire instruction.

The Training School is designed to give the students of the Normal College careful training in the art of teaching the grades. Each student in the Normal School department is required to teach at least one term before graduation, under the supervision and instruction of the director and the training teachers.

The different members of the Normal School faculty and the teachers in the Training School give "model" recitations with criticisms and discussions of the work in the different subjects.

In some cases the daily observation and criticism of classes followed by oral or written discussion, or both, may be substituted for a term of teaching by the student.

While actual teaching in the Training School is required only of members of the Senior class, members of the other classes are required to do observation work, prepare lesson plans, etc. Each student teacher is required to prepare lesson plans a week in advance of the work, which plans are examined, criticised, and, when necessary, revised by the director or training teachers. The conduct of recitations by the student teacher is observed by the training teacher, and helpful criticisms given in private.

Students of the Normal School department are also appointed to superintend the playground of the Training School during recess periods.

THE SUMMER SESSION.

The summer session of the North Texas State Normal begins about June 1st and closes about August 1st of each year. Two distinct schools are maintained, "The Summer School" and the "Summer Normal." Students of the different schools are taught in separate classes and do different classes of work. Students of the Summer School are applying for "credit" towards certificates or diplomas of the institution. Students of the Summer Normal review the subjects for examination for certificates issued by the State Superintendent of Public Instruction.

The general purpose of the summer session is to meet the demands and to reach the students that cannot be met during the regular session. There are in all sections of the State many teachers who, despite limited preparation, are doing good work in the cause of education. These teachers, barred by circumstances often from the advantages of college or normal schools, desire to broaden their scholarship, and increase their efficiency in school work. It is to this class that the summer session appeals. To these are offered the advantages of a large and competent faculty of specialists, the library, laboratories, apparatus, and equipments of the Normal College.

The Summer School Section.—The student registering in the summer school section does "credit work" towards a certificate or diploma of the school. The work of a summer term corresponds practically to that of a term of the regular session. The first summer the student attends he takes the work as outlined for the first term of the regular session in the course he elects, and similarly for each subsequent term.

The work of the Senior (fourth year), the Junior (third year), and the Sophomore (second year), in all seven courses planned regularly as in the regular session. The work of the Freshman (first year) class may be taken with the summer normal section and in classes organized for "conditioned" students so as to prepare for entrance to the Sophomore class.

At the close of the summer session examinations are given for entrance to all classes of the regular session.

The Summer Normal Section.—For those who register in the Summer Normal section is offered a review of subjects required for the different grades of State certificates. The work in this section is conducted in compliance with directions of the State Superintendent of Public Instruction, and the summer normal examinations for certificates conducted at such times as he designates.

The advantages offered teachers during the summer have been realized and appreciated, as evidenced by the increased attendance from year to year. The summer session of 1917 enrolled 1,768 students.

SUMMER SESSION 1917

June 5 to August 11.

ADJUSTMENT OF FORMER STUDENTS TO NEW CONDITIONS.

Although the nomenclature of classes and courses of study have been changed within the past few years, former students will have no difficulty in finding their proper places, when it is understood that each class now, as heretofore, covers one year's work.

Prior to 1911 the course consisted of three years' work. Since that time four years have been required for graduation. Beginning in September, 1917, an additional two years' course was added, upon completion of which the Bachelor's degree is conferred. This addition makes a course extending over six years.

Upon completion of the **fourth year** or **senior** class of the normal department, the student receives, as heretofore, a permanent certificate and diploma, and is enrolled as an alumnus of the school.

Graduates of the former "three year course" are eligible to enter the fourth year or senior Normal class; those having completed the second year at any time since the organization of the school are eligible to the present third year or junior class, etc. Those having graduated in the four year course are admitted to the fifth year (Junior College) class.

Students are not affected by the changes in the course as to subjects offered. No student in continuous attendance is required to do more units' work for completion of a particular course or for graduation than the number demanded at the time of matriculation. A "credit" once recorded is never canceled on account of additions or changes in a course.

SUMMARY OF STUDENTS, SESSION 1916-17.

According to Classes

	Men	Women	Total
Number of Freshmen	109	176	285
Number of Sophomores	145	297	442

SUMMARY OF STUDENTS, YEAR ENDING AUGUST 11, 1917

	Men	Women	Total
Number of students enrolled, Session 1916-17.....	518	985	1503
Number of students enrolled, Summer Session 1917.....	407	1361	1768
Total number of students enrolled during the year..	925	2346	3271
Including students counted twice.....	114	254	368
Net enrollment in Normal College.....	811	2092	2903
Enrollment in Training School.....	69	76	145
Enrollment for year September 1, 1916 to August 31, 1917, (no one counted twice).....	880	2168	3048
Number of counties of Texas represented, Session 1916-17.....			129
Number of counties represented Summer Session, 1917.....			140
Number of counties of Texas represented during the year, no county counted twice			155
Number of states represented during the year.....			40

CATALOGUE AND ALUMNI BULLETIN.

The regular catalogue number, for session 1917-18, will be issued within sixty days. This will be combined with the Alumni Bulletin that has been in contemplation for two years. The bulletin will give the names of students enrolled during the last twelve months, all those receiving the different grades of certificates, list of graduates from the organization of the school, with a sketch of all those we have been able to locate.

CALENDAR FOR 1918-19

FIRST TERM

Faculty meeting, Monday, September 23, 1918, at 9:00 a. m.

Registration of new pupils begins Monday, September 23, at 1:30 p. m.

Registration of new pupils, entrance and condition examinations, and classification of students upon credentials, Tuesday, Wednesday and Thursday, September 24, 25, and 26.

Registration of former students, Wednesday, September 25.

Assembly in Auditorium Friday, September 27, at 10:00 a. m.

Formation of classes and beginning of recitations, Friday, September 27, at 1:30 p. m.

First term ends Saturday, December 21, 1918.

School dismissed for Christmas Holidays, Saturday, December 21, 1918.

SECOND TERM

Second term begins Tuesday, December 31, 1918.

Second term ends Saturday, March 15, 1919.

THIRD TERM

Third term begins Tuesday, March 18, 1919.

Session 1918-19 closes Monday, June 2, 1919.

SUMMER TERM

Summer term begins Tuesday, June 10, 1919.

Summer term ends Saturday, August 15, 1919.

DIRECTIONS TO STUDENTS

When students arrive in Denton, they should come at once to the Normal College office, where a Faculty Committee will assist them in securing suitable boarding places.

Students coming for the first time, and also former students who have conditions to be removed, should reach Denton not later than Saturday, September 21, in order to be ready for examinations and classification on Monday, September 23.

Former students already classified and without conditions should report for registration Wednesday, September 25.

It is important that students come at the times above specified, and thus avoid delay in classification.

Committees will meet all trains on September 23, 24 and 25.

FACULTY AND ADMINISTRATION—1918-1919

ADMINISTRATION

W. H. BRUCE.....	<i>President</i>
W. D. BUTLER.....	<i>Dean</i>
P. E. McDONALD.....	<i>Dean of Summer School</i>
MISS EDITH L. CLARK.....	<i>Dean of Women</i>
MISS CLARA M. PARKER.....	<i>Associate Dean of Women</i>
J. W. SMITH.....	<i>Secretary-Treasurer</i>

FACULTY

- W. H. BRUCE, A. B., A. M., PH. D., LL. D., *President*.
A. B., Alabama Polytechnic Institute; A. M., Baylor University; Ph. D., Mercer University; LL. D., Trinity University.
- C. L. DAVIS, B. S., M. S., *Agriculture*.
B. S., University of Tennessee; Graduate Student Iowa State College; M. S., University of Wisconsin.
- J. H. LEGETT, *Agriculture*.
Graduate North Texas State Normal College; Student Chicago University.
- L. F. METZLER, A. B., M. S., *Agriculture*.
A. B., Kansas State Normal School, Emporia; M. S., Kansas State Agricultural College, Manhattan.
- R. L. MARQUIS, A. B., A. M., *Biology and Chemistry*.
A. B., Texas Christian University; A. B., University of Texas, A. M., Chicago University.
- B. B. HARRIS, B. S., *Biology*.
B. S., Clemson A. and M. College of South Carolina; Student University of Ohio.
- W. N. MASTERS, B. S., A. B., *Chemistry*.
B. S. and A. B., National Normal University, Lebanon, Ohio.
- L. L. MILLER, A. B., A. M., *Chemistry*.
Graduate North Texas State Normal College; A. B. and A. M., University of Texas.
- J. W. PENDER, A. B., *Civics*.
A. B., Grayson College.
- HARLAND H. ALLEN, A. B., A. M., *History and Civics*.
A. B. and A. M., Colorado State Teachers' College.
- MISS ELIZABETH ALGER HILLYAR, *Drawing*.
Student Woman's Art School of New York; Diploma Columbia University.
- MISS FLORA L. WILKIN, *Drawing*.
Student Chicago University; Student Columbia University.
- J. R. SWENSON, A. B., A. M., *Education*.
A. B., University of Denver; A. M., University of Texas; Graduate Student Columbia University, 1905-06 and 1906-07.

A. E. CHRISLIP, A. B., A. M., *Education*.

L. I., Peabody Normal College; A. B., University of Nashville; A. M., Columbia University; Graduate Student Columbia University, 1910-13.

F. V. GARRISON, B. S., *Education*.

B. S., Central College; Student Chicago University.

MISS M. ANNE MOORE, M. L., A. B., *Education*.

M. L., Southwestern University; A. B., Chicago University.

L. M. ELLISON, A. B., A. M., PH. D., *English*.

Graduate Sam Houston Normal Institute; A. B. and A. M., University of Texas; Ph. D., Chicago University.

MISS BURTIE J. ATTWELL, A. B., *English*.

A. B., University of Texas; Student Cambridge University, England; Student Sorbonne University, Paris, France.

MISS ANNIE WEBB BLANTON, B. LIT., *English*.

B. Lit., University of Texas; Student Chicago University.

MISS EDITH LANIER CLARK, B. LIT., A. M., *English*.

B. Lit. and A. M., University of Texas; Student Chicago University; Student Columbia University.

MISS KATHERINE HORNBEAK, A. B., A. M., *English*.

A. B., Trinity University; A. M., Columbia University.

MISS MARY C. SWEET, A. B., A. M., *English*.

A. B., Daniel Baker College; A. B. and A. M., University of Texas; Graduate Student Columbia University.

B. E. LOONEY, A. B., A. M., *English*.

A. B. and A. M., Trinity University; A. B., Chicago University.

MISS ROSEBUD M. VAUGHAN, A. B., A. M., *English*.

A. B., University of Arkansas; A. M., University of California.

MISS MYRTLE E. WILLIAMS, A. B., A. M., *English*.

A. B., Grenada College; A. M., University of California.

MISS MARTHA SWEET, A. B., *French and German*.

A. B., University of Texas.

E. D. CRIDDLE, B. LIT., *History*.

B. Lit., University of Texas.

MISS EMMA MITCHELL, *History*.

Graduate Aiken Institute, Paris, Texas; Student Chicago University.

MISS CORA BELLE WILSON, A. B., A. M., *History*.

L. I., Peabody Normal College; A. B., University of Nashville; A. M., Columbia University.

S. S. MCKAY, A. B., *History*.

A. B., University of Texas.

MISS EMMA A. BAIE, B. S., *Home Economics*.

B. S. in Home Economics and B. S. in Industrial Science, Iowa State College, Ames, Iowa; Student Drake University, Des Moines, Iowa.

MISS LOLA BRANDENBURG, B. S., *Home Economics*.

B. S., State Manual Training Normal School, Pittsburg, Kansas.

MRS. PEARL B. HARRIS, *Home Economics*.

Graduate, College of Industrial Arts, Denton, Texas.

MISS CHARLOTTE MAYFIELD, B. S., *Home Economics*.

Graduate Southwest Texas State Normal College; B. S., Kansas State Agricultural College,

P. E. McDONALD, A. B., *Associate Dean, Latin*:

A. B., University of Nashville; L. I., Peabody Normal College.

MISS CLARA M. PARKER, A. B., *Associate Dean of Women, Latin*.

A. B., University of Texas; Student Chicago University; Student Columbia University.

HUGO J. P. VITZ, B. S., *Manual Training*.

B. S., Purdue University.

S. A. BLACKBURN, B. ED., *Manual Training*.

B. Ed., Illinois State Normal University; Graduate Bradley Polytechnic Institute.

W. D. BUTLER, A. B., A. M., *Dean, Mathematics*.

A. B. and A. M., Bethel (Kentucky) College; Student Johns Hopkins University; Student Chicago University.

J. P. DOWNER, A. B., *Mathematics*.

A. B. Cumberland (Tennessee) University.

W. J. McCONNELL, A. B., *Mathematics*.

Graduate North Texas State Normal College; A. B., University of Denver.

T. E. PETERS, A. B., A. M., *Mathematics*.

A. B. and A. M., Greenville (Kentucky) College.

HUGH PORTER, A. B., *Mathematics*.

A. B., University of Texas.

J. W. SMITH, *Secretary-Treasurer, Mathematics*.

Student University of Texas.

MISS LILLIAN M. PARRILL, *Music*.

Graduate American Institute of Normal Methods; Northwestern University; Pupil, Oscar Saenger, New York City; Pupil, Chas. C. Washburn, Nashville, Tennessee.

MISS MARGERY BALLARD, *Music*.

Graduate College of Industrial Arts (Texas); Student Cincinnati Conservatory of Music; Pupil, Oscar Seagle, New York City.

J. W. ST. CLAIR, A. B., *Physical Education and Director of Athletics*.

A. B., Baylor University; Student Chicago University.

MISS DELLA MARIE CLARK, A. B., *Physical Education*.

A. B., University of Nebraska.

MISS BEULAH A. HARRISS, A. B., *Physical Education*.

A. B., University of Nebraska; Graduate State Normal School, Peru, Nebraska.

L. D. BORDEN, B. S., A. B., *Physics*.

B. S., Southwestern University; A. B., University of Nashville; L. I., Peabody Normal College; Student Chicago University; Student Cornell University.

F. E. POINDEXTER, A. B., A. M., *Physics.*

A. B. and A. M., University of Texas.

MISS MARGARET WALKER PRICE, *Reading.*

Graduate Rogersville (Tennessee) Synodical College; Graduate King's School of Oratory, Pittsburg, Pennsylvania.

MISS CORALEE GARRISON, A. B., *Reading.*

A. B., Westminster College; Graduate King's School of Oratory; Graduate Western Maryland College.

MISS ALICE SIGWORTH, *Reading and Drawing.*

Graduate State Normal School, Indiana, Pennsylvania; Graduate Emerson College of Oratory; Student New School of Design, Boston Massachusetts.

MISS RUBY C. SMITH, A. B., *Spanish.*

Graduate Southwest Texas State Normal School; A. B., University of Texas.

L. P. FLOYD, B. S., *Director of Training School.*

Graduate North Texas State Normal College; B. S., Peabody Teachers' College.

A. S. KEITH, *Principal of Training School.*

Graduate Chilton Normal College.

MISS WILLIE M. FLOYD, *Training School.*

Student University of Texas; Student Iowa State Teachers' College; Student Columbia University.

MISS VIRGINIA HALL, *Training School.*

Graduate North Texas State Normal College.

MRS. GLADYS LINSLEY JONES, *Training School.*

Graduate North Texas State Normal College.

MISS MARGARET WHITE, *Training School.*

Graduate North Texas State Normal College.

MISS DODIE HOOE, *Training School.*

Student Chicago University; Student Columbia University.

MISS MARY ANDERSON, B. MUS., *Instrumental Music.*

B. Mus., Baylor University; Student two years Conservatory Leipsic.

MRS. PEARL CARDEN MCCracken, *Librarian.*

Graduate Normal School, Glasgow, Kentucky; Student Columbia University.

MISS HIXIE PITTMAN, *Assistant Librarian.*

Graduate North Texas State Normal School.

A. C. MCGINNIS, *Registrar.*

Graduate Draughon's Business College, Dallas; Graduate Toby's Business College, Waco.

MISS EVELYN WELLS, *Secretary to President.*

Graduate Albuquerque (New Mexico) Business College.

MISS LILLIE MAE REEDER, *Stenographer.*

Graduate Draughon's Business College, Fort Worth.

NORTH TEXAS STATE NORMAL COLLEGE

For some years after the establishment of the College on March 31, 1899, the activities of the school were limited to the preparation of teachers for the common schools, without affording any special training for technical work.

In 1911, a Board of Regents was created for the Texas State Normal Schools. This was the beginning of the era to standardize these schools, enlarge their courses and enable them to discharge fully their obligations by meeting the demands of the public school system of the State for all grades of public school teachers.

The adoption of seven distinct courses of study, the fundamentals in all of which being the same, has enabled the school during the last few years to send forth better prepared teachers.

Beginning in September, 1917, two additional years' work has been added to the course formerly given, the completion of which will entitle the pupil to receive the standard Bachelor's Degree in Education.

Liberal appropriations from the Legislature during the past several years, the addition of buildings, apparatus and appliances, and the election of a much larger Faculty have contributed to the efficiency of the College.

In addition to the preparation of teachers of the so-called literary and scientific subjects, the school is now equipped with buildings, appliances and Faculty necessary to train effective teachers in all phases of Home Economics, Manual Training, Public School Music, Public School Art, Reading, and Physical Education.

Every phase of the teacher's work receives just consideration, and in our enlarged sphere of usefulness we expect to meet the demands of all grades of school work, the elementary, the grammar, and the high school in all its departments.

MATERIAL EQUIPMENT.

BUILDINGS.

The Administration Building.—In 1903 the Administration Building, a brick, with basement and two stories, was constructed. It contains administrative offices, the auditorium, and several class rooms. The cost of this building was approximately \$60,000.

The Science Building.—In 1910 the Science Building was constructed. This is a fireproof brick and reinforced concrete structure of three floors. It contains several recitation rooms and the laboratories for Chemistry, Physics and Agriculture. Its cost, not including equipment, was \$35,000.

The Library Building.—In 1912-13 the Library Building was completed. It is a fireproof building of brick and steel structure. It contains the stack room, reading rooms, several recitation rooms. Two years ago, an appropriation by the Legislature permitted its equipment with complete and adequate furniture and appliances necessary to a first-class library building. Its cost, with the equipment, was about \$65,000.

The Manual Arts Building.—In 1914-15 a handsome fireproof building of three stories was constructed for the Manual Training and Home Economics Departments. It has been equipped with the best appliances for every phase of these two departments. Its cost, with equipment, was \$65,000.

The Heating Plant.—In 1915-16 a central heating and power plant was constructed of brick at a cost of \$35,000.

The Education Building.—The Thirty-fifth Legislature has recently appropriated \$80,000 for the construction of an Education Building. This will be ready for occupancy at the beginning of the session in September, 1918.

EQUIPMENT

In addition to the necessary supplies common to all the institutions, the College has now well equipped laboratories for Chemistry, Physics, Botany and Agriculture. Its laboratories and shops for the Department of Home Economics and Manual Training are of the most modern type. In addition to the foregoing, the College is supplied with engine for power and light, stereopticons, musical instruments, etc.

The buildings are electric lighted, steam heated, and connected with the city sewer. The laboratories are connected with natural gas pipes of the company that supplies the city. The offices have telephone connections, both local and long distance.

FACULTY

The Faculty consists of specialists chosen on account of scholarship, training, character and successful experience. Among its members are found graduates of nearly all of the great universities of America.

UNIFORM REQUIREMENTS OF THE TEXAS STATE NORMAL SCHOOLS

I. The following divisions are maintained in each Normal School:

1. *Normal Training School.*—The Training School shall consist of the first nine grades of a standardized school.

2. *Normal School Division.*—There shall be two years' of work in this division, the first year and the second year of the normal school.

3. *Normal College—Diploma Division.*—This division shall cover the first two years of college curricula.

4. *Normal College—Degree Division.*—This division embraces the third and fourth years' of college curricula.

5. The six classes in the Normal Schools are designated as follows: Freshman, Sophomore, Junior, Senior, College Junior, and College Senior.

6. *Degrees.*—There shall be two degrees, the B. A. in Education, and the B. S. in Education.

7. The B. A. degree may be conferred upon the presentation of the required language for admission to the junior class, and in addition hereto at least two years in a foreign language for graduation.

8. The B. S. degree may be conferred without foreign language for admission or graduation.

II. The unit of credit shall be the "term-hour,"—term-hour being defined as one recitation per week (or its equivalent) for one term of twelve weeks, requiring two hours' preparation therefor by the student of average ability.

III. The following are recognized equivalents:

1. For the Freshmen and Sophomores, four recitations per week, requiring a total weekly preparation of five hours, are equivalent to three term-hours.

2. Two hours of laboratory work per week, requiring one hour of preparation and subsequent completion of notes, are equivalent to one term-hour.

3. Three hours of laboratory work per week, requiring no preparation and no subsequent work on notes, are equivalent to one term-hour.

4. Subjects requiring little or no preparation for the recitation are given term-hour credits according to the total time required, based upon the principle of the above equivalents.

IV. 1. *Majors and Minors.*—A major is a subject in which a student does his most intensive work. The major may consist of a minimum of 36 or a maximum of 54 term-hours. A minor may consist of a minimum of 18 or a maximum of 27 term-hours.

2. *Degree Requirements.*—Each candidate for a degree must elect one major, a first minor of 27 term-hours, and a second minor of 18 term-hours.

The candidate for any degree must present 18 term-hours of English, 9 term-hours of Social Science, 9 term-hours of a laboratory science, not less than 42 nor more than 54 term-hours of Education, including departmental method courses. The candidate for the B. A. degree must include his course at least 9 term-hours in mathematics and 18 term-hours in foreign language.

In designating the requirements for the degree, it is meant that the work above the sophomore, or second year, class shall be standard college work.

3. *The Term's Work.*—The work of a term is fifteen term-hours, exclusive of regular assignment in Physical Education.

4. All students are required to take Physical Education twice a week during the first two years of resident work. A student may elect and

count towards a certificate, diploma, or B. S. degree, six term-hours of Physical Education in addition to the two years required.

ENTRANCE REQUIREMENTS

V. The following regulations govern the admission of students to the State Normal Schools of Texas:

1. *Uniform Requirements.*—The requirements for admission to the various classes of the State Normal Schools of Texas are uniform, as directed by the State Normal School Board of Regents.

2. *Age.*—Any person who is sixteen years of age on or before January 1 of the school year may enter a State Normal School at the beginning of the fall term, or at any suitable time during the school year.

3. All claims for admission are reduced as far as possible to standard high school admission units; a unit being a year's work—180 recitations of 40 minutes each—in an accredited high school.

A first-class high school offers a possible 15 admission units.

A second class high school offers a possible 11 admission units.

A third-class high school offers a possible 7 admission units.

4. *Accredited High Schools.*—Accredited high schools are those approved by the State Department of Education, and work done in the schools, when officially certified to, is accepted for admission.

5. *Credentials.*—Credentials entitling the holder to exemption from examination must be official statements signed by proper authorities. Promotion cards and diplomas from high schools and colleges must be accompanied by official statements of the work completed by the students, and signed by the superintendent, principal, or president. Work partially completed is not considered for admission credits.

6. Applicants for admission to the Freshman class shall present a minimum of 7 admission units as follows:

Algebra 1 or 2

English 2

History 1 or 2

Electives sufficient to make 7

If application is made for admission to the Latin section of the Language Course, one admission unit of Latin is required.

7. Applicants for admission to the Sophomore class shall present 11 admission units as follows:

Algebra 2

History 2

Geometry $\frac{1}{2}$ or 1

English 2

Electives sufficient to make 11

For admission to the Language Course, two units of Latin or one unit of modern language is required.

8. Applicants for admission to the junior class shall present 14 admission units (after September, 1919, 15 units) as follows:

English 3

Algebra 2

History 2

Geometry 1

Electives sufficient to make 14 $\frac{1}{2}$

For admission to the Language Course, three units of Latin or two units of a modern language are required.

9. For admission to the Senior class, a statement must be presented showing the completion of one year's (45 term-hours) college work, including three term-hours in Education.

10. For admission to the College Junior class a statement must be presented showing the completion of two years' (90 term-hours) college work, including at least one year's (9 term-hours) work in Education.

11. For admission to the College Senior class a statement must be presented showing the completion of at least three years' (135 term-hours) college work, including at least two years' (18 term-hours) in Education.

12. Students meeting the admission requirements in all subjects except Education may elect this subject as part of their work.

VI. *Admission on Teachers' State Certificates.*—The following admission credits are allowed to holders of State certificates:

1. Second Grade Certificate

English 1	Management $\frac{1}{2}$
History $\frac{1}{2}$	Agriculture $\frac{1}{2}$
Physiology and Hygiene $\frac{1}{2}$	Unspecified 1
One or more year's work in Teaching 1	
Total 5 units	

2. First Grade Certificate

English 3	Ancient History 1
Algebra 2	Mediaeval and Modern History 1
Geometry 1	Physical Geography $\frac{1}{2}$
American History $\frac{1}{2}$	Physiology and Hygiene $\frac{1}{2}$
Management $\frac{1}{2}$	Agriculture $\frac{1}{2}$
Civics $\frac{1}{2}$	
One or more year's experience in teaching 1	
Total 12 units	

3. Permanent Primary Certificate

(a) *Built Upon a Second Grade.* The 5 units allowed on the second grade certificate, and the following $1\frac{1}{2}$ units:

English 3	Physical Geography $\frac{1}{2}$
Civics $\frac{1}{2}$	Psychology $\frac{1}{2}$
One or more year's experience in teaching 1	
Total $10\frac{1}{2}$ units.	

(b) *Built on a First Grade Certificate.* The 12 units allowed on the first grade certificate and the following $1\frac{1}{2}$ units:

English 1	Psychology $\frac{1}{2}$
One or more year's experience in teaching 1	
Total $14\frac{1}{2}$ units.	

4. Permanent Certificate

History 4	Physiology and Hygiene $\frac{1}{2}$
English $2\frac{1}{2}$	Agriculture $\frac{1}{2}$
Mathematics 4	Management $\frac{1}{2}$
Civics $\frac{1}{2}$	Psychology $\frac{1}{2}$
Bookkeeping $\frac{1}{2}$	Physiology $\frac{1}{2}$
One or more year's experience in teaching 1	
Total 15 units.	

VII. *Electives.* List of subjects from which admission units may be chosen is as follows:

Education:

Elementary Psychology $\frac{1}{2}$
 School Management $\frac{1}{2}$
 English 3 or 4

History:

American 1
 Ancient 1
 English 1
 Mediaeval and Modern 1
 Civics $\frac{1}{2}$

Language:

Latin 2, 3, or 4
 French 2 or 3
 German 2 or 3
 Spanish 2 or 3

Mathematics:

Arithmetic $\frac{1}{2}$
 Algebra 2
 Plane Geometry 1
 Solid Geometry $\frac{1}{2}$
 Trigonometry $\frac{1}{2}$

Science:

Biology 1
 Botany 1
 Chemistry 1
 Introduction to Science 1
 Physics 1
 Physiography $\frac{1}{2}$
 Physiology and Hygiene $\frac{1}{2}$
 Zoology 1

Vocational:

Agriculture $\frac{1}{2}$ to 2
 Bookkeeping $\frac{1}{2}$ or 1
 Domestic Art $\frac{1}{2}$ or 1
 Domestic Science $\frac{1}{2}$ or 1
 Drawing $\frac{1}{2}$ or 1
 Manual Training $\frac{1}{2}$ or 1
 Music $\frac{1}{2}$ or 1
 Stenography and
 Typewriting 1

VIII. 1. *Admission by Examination.*—Applicants who do not present credentials from accredited high schools for admission to the above named classes may absolve the standard entrance requirements by examination.

2. *Time of Examination.*—Applicants for the Freshman class must be examined upon entrance in all required subjects; applicants for admission to other classes must be examined upon entrance in the required English, History, Mathematics, and Science, and may defer examinations in other subjects to the middle of the session. These regulations apply to students from affiliated or accredited high schools, who may be admitted partly by examination, as well as to students who enter by examination solely.

IX. *Admission of Mature Students.*—Persons twenty-one years of age or over, who are not graduates of standard high schools, may, at

the discretion of the President of the Normal School, be admitted without examination to any of the classes below the Senior or fourth year. In the enforcement of this regulation especial consideration will be given to mature students whose training has been followed by successful experience in teaching, to students who have had other practical preparation, and to those who have made special attainments in some particular line. Students admitted in this manner will, upon the completion of the work of the Junior class in English, History, Mathematics, and Science with a grade of "C" be given credit for full admission in these subjects. Other admission units may be absolved in like manner. In all cases, mature students and others must remove conditions and satisfy the admission requirements to the satisfaction of the Admission Committee not later than two years after admission, and before any certificate can be granted.

X. *Credits from Other Institutions.*—Admission credits for work done in any college or university are determined by the President of the Normal School. Work completed satisfactorily in any one of the Texas State Normal Schools is fully recognized by the others. Students completing the work of the first year in one Normal School are admitted to the second-year class in any State Normal School in Texas, and similarly to other classes; provided, that of the forty-five term-hours required for a certificate, at least fifteen must be made in the Normal School that issues the certificate, and provided also that the entire forty-five term-hours required for a Normal diploma must be done in the Normal School that issues the diploma.

XI. *Certificates.*—1. The student completing the work of the Freshman (first year) class receives a second grade certificate valid for six years.

2. The student completing the work of the Sophomore (second year) class receives a first grade certificate valid for six years.

3. The student completing the work of the Junior (third year) class receives a first grade certificate, stating which of the seven courses pursued, and valid for six years.

4. The student completing the work of the Senior (fourth year) class receives a permanent certificate, stating the course pursued, which is valid during good behavior.

5. All certificates are issued by the State Department of Education, and are signed by the State Superintendent of Public Instruction.

6. The student completing the work of the Senior class is awarded also the diploma of the College. The diploma states the special course completed. It bears the seal of the College, and is signed by the President.

7. Upon completion of the College Senior, or sixth year, the diploma conferring the degree A. B. or B. S. is awarded the student.

8. A permanent certificate is awarded to those students who complete the College Junior or College Senior year and have not been granted the permanent certificate before during the course.

9. The certificate granted by the State Normal School should not be confused with certificates obtained from summer normal institutes and county boards of examination.

10. Certificates granted by the State Normal Schools may be built upon for higher certificates, but the Normal Schools do not grant certificates to applicants by simply "taking the additional subjects" for higher certificates.

11. Standard high school work may be accepted and not repeated in the State Normal Schools, and students may be allowed to elect other subjects in their stead; but credit for high school work shall not be subtracted from the forty-five term-hours required for issuance of teachers' certificates.

12. A student completing two full terms' work of a given class and meeting the residence requirement of two terms, may, upon passing a satisfactory examination in one term's work of the next lower class, be granted the certificate of said lower class.

13. A student who has been in attendance three full terms and who fails in one or more subjects, may be granted the certificate of a lower class at the discretion of the faculty.

14. A student who has at any time been granted a certificate from a Texas State Normal School, may, upon completion of two thirds of the work required for the next higher grade of certificate, receive a certificate of the same grade formerly granted him.

15. When students transfer academic credits from accredited colleges and attend a State Normal School for work in Education only, they are recommended to the State Superintendent of Public Instruction for a State certificate only, as provided by law.

THE COURSES OF STUDY

The modern university answers the public need with a multitude of courses of subjects of study, for the most part elective, with only certain requirements to insure breadth and thoroughness. For general culture and for the varied activities of social life, this elective system is to be commended.

But the definite field of the normal school is to prepare the teachers demanded by our public school system. This work does not require so wide a field of possible selection, and in general restricts the curriculum requisite for any student to four lines of culture material. These four are: First, the mother tongue of the universal medium of culture, its structure, its proper use, and its heritage of literature; second, the subjects dealing with the profession of teaching, its philosophical and scientific bases, and their practical applications; third, the line of subject matter that the prospective teacher expects to teach; and, fourth, certain minor subjects in each course selected from the majors of other courses for purposes of general culture and information. It is really only in the third class that there is need for marked differentiation.

These varying requirements are then best fulfilled by the organization of certain definite courses, co-ordinate and equivalent, but varying as to purpose, and hence as to the matter included in the above mentioned third class.

For these reasons the curriculum of the North Texas State Normal College is organized into the following seven courses:

I. The *Agriculture Course* for the training of teachers of agriculture and of the biological and physical sciences upon which this great industry and art is based. It especially aims at the preparation of principals of consolidated schools and rural high schools.

II. The *Home Economics Course* to prepare for the teaching of the home arts and sciences in schools of any grade. This course is exclusively for women.

III. The *Manual Training Course* for the preparation of teachers of the manual arts and vocational education.

IV. The *Language Course*, in which the student may select Latin, French, German, or Spanish, for the preparation of teachers of these languages in our public and high schools, and also for those who desire the foundation for higher classical and scientific education, or who may wish the modern foreign languages for the purposes of business and travel.

V. The *Science Course* to supply the need for teachers of mathematics and science in high schools and for departmental teachers and principals of elementary schools.

VI. The *Primary and Art Course* to train teachers for the primary and intermediate grades of elementary schools, and more particularly to supply the growing demand for departmental teachers of music and drawing, and supervisors of these subjects in city school systems. This is also exclusively a women's course.

VII. The *History-English Course* for the preparation of teachers of history and English in high schools and the higher grades of elementary schools, and for those who desire to divide their attention between science and language.

A student entering the first year or Freshman class should complete any one of these courses in four years. Then he is granted a diploma and a permanent teacher's certificate. Should he desire to continue his work, he is admitted to the Junior College class without condition.

Note: For detailed description of the courses, see Bulletin No. 57.

MILITARY TRAINING

The Board of Regents of the Normal Schools of Texas have directed them to accept the offer of the War Department of the government to give military training during the next year, and as long thereafter as the United States government thinks conditions justify. More definite information concerning the course in military training, for which full credit will be allowed, will be furnished when the War Department has given final instructions.

Special attention is called to the following that has been received from the Emergency Council on Education, Washington, D. C.:

"The War Department has come fully to realize the importance of keeping students in the colleges and universities in preparation for the supply of trained men which will certainly be needed in the future as a war asset. It goes without saying that the demand for trained men will be equally large in the post-war period as a general peace asset. It seems a matter of great importance that a campaign be undertaken throughout the country to bring the public to a full realization of this extremely important fact. Public opinion ought to be educated to the point of bringing pressure to bear on young men under the draft age to stay in college for the sake of securing the preparation which will make them most useful to the country when the time of need arrives. All departments of the government are growing to a realization of the importance of undertaking a campaign to bring about this result."

DEPARTMENT OF PIANO

MISS ANDERSON

Elementary.—Course in Hand Culture: Kohler, Practical Method; Mathews Graded Course, Books I and II; Braur, Op. 15; Lemoine, Op. 37, etc.; Sonatinas by Clementi, Dussek, Kuhlau; lighter compositions by classic and modern composers.

Intermediate.—A limited number of studies by Berens, Duvernoy, Doring, Heller, Czerny, Loeschorn, Bach etc. Sonatas and compositions by Haydn, Mozart, Beethoven, Schumann, Mendelssohn, Chopin, Grieg and others.

Advanced.—Studies from Bach, Three-part Inventions; Cramer von Bulow, continued; Czerny, Dexterity; Bach, Well-tempered Clavichord; Clementi, Gradus ad Parnassum, etc. Concert compositions by classic and modern composers.

Recitals will be given from time to time to accustom pupils to playing in public.

Terms.—Per month, two lessons a week, one-half hour each, \$8.00. Half time, \$5.00.

The Department of Piano is not maintained by the State, and the salary of Miss Anderson is not paid by the Board of Regents; hence the

tuition for lessons on the piano is not included in the regular Normal fees.

While no one is required to take piano music for a certificate in any one of the seven courses offered, still one unit of credit is given for three full terms' work on piano.

Instrumental music is not provided for in the appropriation for the school. It is not required in any one of the seven courses offered, but many students each year wish lessons on piano. To accommodate these Miss Anderson is provided with a studio by the school. The tuition fees for piano music are paid to her and constitute her whole compensation.

The authorities of the College heartily recommend Miss Anderson as a competent and skillful teacher.

REGULATIONS CONCERNING INTERCOLLEGIATE ACTIVITIES

Students are disqualified to represent the Normal College in intercollegiate games or contests, or any extraordinary student activity by the following conditions:

1. Failure to make a passing grade in at least three subjects of the full regular course in which the student is registered.
2. Being "under discipline."
3. Being the beneficiary in actuality or promise of any financial consideration for participation in such game, contest or activity.

Disqualification under (1) and (2) may be removed at any time by the teacher or committee responsible for such disqualification, when the occasion therefor has been removed by the student.

THE LYCEUM COURSE

The Normal has always maintained a strong course of lectures and entertainments, each year securing the best available talent. Men and women of national reputation, famous as leaders in public life, noted artists, musicians, and writers have been secured, who have contributed much to the student's realization of the college purpose of helpfulness and spiritual life.

THE TEACHER'S RECOMMENDATION COMMITTEE

A committee of the Faculty, without fee or compensation of any kind, acts as a Teachers' Bureau for the purpose of aiding worthy students in finding employment upon leaving school and assisting school boards in finding competent teachers. The committee places every year several hundred teachers. Its services to school boards have proven satisfactory, and it receives applications from school officials every week in the year.

Any communication concerning the work addressed to the President or the Secretary of the school or to the Chairman of the Committee on Recommendations will receive prompt attention.

STUDENT ACTIVITIES

Every modern college now recognizes the educational value of various kinds of student activities. These activities furnish opportunity for social education in leadership and loyalty and provide training in the application of theory in the school room for the practical conditions outside. They satisfy a natural craving for social intercourse which it would be stupid for any college to oppose.

The College has adopted and has adhered to the policy of encouraging a wide line of student activities, literary, forensic, dramatic, athletic, social, journalistic, artistic and spiritual. These activities are not left to or thrust upon the sole responsibility of students, but they are under the sympathetic and directive influence of committees of the students and Faculty.

Literary Societies.—The school supports several literary societies: The Mary Arden and Current Literary Clubs for women, the John H. Reagan and Robert E. Lee Literary Societies for men. The women's societies meet bi-weekly, and the men's societies have weekly sessions.

The Mary Arden Club is limited to membership of 40, and gives preference to advanced students. It was organized for the study of Shakespeare, but each session it devotes some time to some modern author or studies some problem of present importance.

The Current Literature Club, larger in its membership, stimulates the study of the highest grade of modern literature, and also attacks questions of social and civic importance. Both of these clubs are "federated" with other women's clubs of the city and State.

The Reagan and Lee Literary Societies for men seek the development of qualities of manliness and loyalty, as well as training in debating, declamation, and parliamentary practice. These two societies have no meetings during the summer sessions, but all members of both societies and other men in the school join during the summer session in the Henry W. Grady Literary Society.

For the purpose of intercollegiate contests, the men's societies are combined into an oratorical association. Under the auspices of this organization, the school is a member of the Texas Normal College Debating League, in which each of the normal schools meets in annual debate two of the sister institutions. The annual debates occur simultaneously at all the Normals, the same question being discussed at both places, and each school supporting both sides of the question, taking the affirmative side at one place and the negative side at the other. The school is also represented in the State Peace Oratorical Association.

Student Publications.—Elected representatives of all the classes in the school constitute the Press Club, which issues a weekly publication. "The Campus Chat," a quarterly, "The Avesta," and an annual, "The Yucca." The editor-in-chief of "The Campus Chat" and "The Avesta" is elected by the board of associate editors, who are elected by their respective literary societies.

The editor-in-chief of "The Yucca" is elected by the entire student body. The office is esteemed the highest honor in the gift of the students, and the election is contested in the typical American college

fashion. The business manager of the publication is elected by the Faculty.

"The Campus Chat" and "The Avesta" furnish a repository for the best products of student literary effort and a record of current events in the school. "The Yucca" is an illustrated year-book of college life and activities. These publications are invaluable to the school, for the associations formed during the year serve as much to enrich the later life of the student as his formal work in class room, library, and laboratory, and it is the human side of the school that gives these tasks a life meaning.

Correspondents' Club.—This student activity is of great usefulness to the school. The students coming from certain counties or groups of counties have for some years been organizing for social purposes into county or section clubs. These clubs elect certain members correspondents of home or county papers, whose duty it is to send every month a news letter giving the main happenings at the College. These letters are primarily of interest to the families and friends of the students. It affords fine training to those members who prepare articles for these papers.

Sketch Club.—The Sketch Club is composed of a group of students who have some artistic ability, and who are interested in drawing and painting, and who want to give more time to the work than the class period affords.

Musical Organizations.—The fundamental musical organization of the school is the Choral Club. A chorus is made up of students who can read music fairly well at sight. It meets for practice twice a week throughout the year. A varied selection of musical masterpieces, consisting of modern part songs, and selections from oratoria and opera are studied. While concerts are given from time to time during the year, the most important feature of the chorus is the May Festival, which constitutes a leading part of the Commencement Week program. A credit of one unit is given for regular attendance and conscientious work. The Musical Club for Young Women and the Glee Club are two popular organizations for women and men, respectively. Each consists of about fifty voices. Fluent reading at sight is required for membership in either. Recitals and musicales are given throughout the year. Besides the musical members that enrich the literary and devotional programs of other organizations are largely the fruit of the work of these clubs.

The *Normal Band* has proved one of the most successful of the student organizations. The school owns its instruments. In addition to the twenty trained players constituting the regular band, classes of beginners are given instruction and practice.

Athletics.—It is the duty of every school to provide opportunity for physical as well as mental and moral development. Besides the regular courses in physical education, the inter-class and inter-school contests are aimed primarily to increase the student's capacity for mental effort,

for moral stamina, and for social service. Competitive athletic games with schools of equal rank are made part of the athletic program. But since intercollegiate games do not afford the opportunity of participation to the majority of students, great stress is laid upon competition between classes and other groups. In this way it is hoped the entire student body may be reached by invigorating influence of strenuous play. The school owns about five acres of land prepared for baseball, basketball, tennis, volley ball, and other games. The athletic interests are safeguarded by a committee of the Faculty and by an association of students. Representatives of both bodies form the Athletic Council, whose duty it is to keep athletic interest in the school, not only alive and healthy, and same and intelligent as well.

Young Men's Christian Association.—The Young Men's Christian Association was organized in the school three years ago, and has steadily gained in influence. During each year about one hundred have been enrolled as active members. Delegates have been sent each year to the western or southern encampments as well as to the meetings of the State association. Weekly devotional meetings are held for an hour on Thursday evenings. Speakers with vision and messages, both from within and without the school, then address the men and set up ideals of manliness and service. It is hoped in the near future to secure the services of a special "secretary," who shall devote his entire time to the work. Some special lines of study may then be organized under the auspices of the association in mission work, philanthropy, and Bible study, to put the students in touch with these great movements in the world.

Young Women's Christian Association.—The Young Women's Christian Association has been organized in the North Texas State Normal College for three years. It is the largest student organization of the College, enrolling during the past session over 460 members. The Young Women's Christian employs a resident secretary, who devotes her entire time to the welfare of the girls of the institution. The Association is open to members of all churches, and offers associate membership to those who belong to no church at all. The aim of the Association is to unite the young women of the institution in loyalty to Jesus Christ, to serve as a connecting link between the students and the local churches, and to help build up the social life of the students. The Association has a well furnished rest room in the Science Hall. This is open to the students at all times. Weekly meetings are held on Wednesday evenings. Membership dues are \$1.00 per calendar year.

TERM REPORTS

At the end of each term of twelve weeks a report of the work of the student for that term will be sent to the parent or guardian.

EXPENSES

Tuition is free.

Each student enrolling in the school during the regular nine months' session shall pay an incidental fee of \$15.00 upon entrance, and no

other fees or charges shall be levied against or collected from any student, and each student is entitled to the free use of text-books furnished by the school, which books, if returned in satisfactory condition at a time designated by the President, shall entitle the student to a refund of \$2.00.

The payment of this fee of \$15.00 is to be made by the student upon entrance to the school. It is the only fee paid during the session of nine months. There are no additional fees for library, books, laboratory, Manual Training, Domestic Science, etc.

The student is furnished all text-books except the English classics used in the supplementary work of the English Department. It is best for the student that he own these classics and that he keep them, with his notations, for use when he teaches English himself.

The fee is \$15.00 whether the student enters at the beginning of the session or near the close of the session, whether the student continues in school for the entire session or only a few days of the year. No part of the fee is refunded except \$2.00 upon prompt return of books. In order to be entitled to the refund of \$2.00, the student must return the books used by him at the time designated for their return.

No one should ask exemption from or modification of the fee or its conditions. Neither discretion nor authority is given the President of the school to alter the terms or conditions of its payment.

BOARDING PLACES AND RATES

The school has no dormitory. In proximity to the school there are between one hundred and fifty and two hundred good boarding and rooming houses. Each year the number of boarding houses is increased and the conveniences improved. Nearly all these houses have electric lights, sewerage, hot and cold water appliances, and are screened, while many have natural gas for cooking, heating and lighting.

Students are permitted to select from an *approved* list their own boarding places. Frequent changes for trivial causes are discouraged and students, after the first ten days, may change their places of residence only with the consent of one of the deans of the Faculty, who have charge of all matters pertaining to board.

Men and women students must have separate boarding and separate rooming houses.

A list of *approved* houses is furnished each student upon arrival at the school. No student is permitted to engage board at a house not on this list. Such list cannot be furnished the student in advance of arrival, because (1) frequent changes and additions made in houses near the beginning of the session render it impracticable to make a complete list. (2) Such list would convey no useful information to one unacquainted with the topography of the town, and (3) it is not necessary for students to engage board in advance; there being always ample accommodations regardless of the number of students. Reports have at times become current that all boarding places have been filled before the beginning of the session or very soon thereafter. No student has,

in the history of the school, been forced to leave for lack of board, and such report in future, if heard, should be promptly discredited.

Board and rooms cannot always be secured in the same house. More than half the students secure rooms at one place and meals at another. Because numerous houses make special provision for furnishing meals to large numbers, frequently more satisfactory conditions can be found by not insisting on having meals and rooms at the same place.

Approved Houses.—An approved boarding house is one that co-operates with the school, enforces the regulations concerning the conduct of students, exerts a good influence over the students, treats them kindly, but firmly, and affords good board with sanitary conditions.

Whenever it is found that the proprietor of a boarding house does not meet the requirements of an "approved house," fails or refuses to enforce the regulations and to report violations, the students are removed from such house.

All persons desiring to take Normal students as boarders must apply to the school in writing, stating the number of boarders desired, whether men or women, stating whether they offer rooms or meals, or both, giving rates in each case, and specifying the conveniences offered.

If upon application a boarding house is approved, it is placed on the approved list and the proprietor is furnished a printed copy of the regulations of the school.

Rates of Board.—During the past session board, including room, meals, fuel, lights, etc., varied from \$18 to \$22 per calendar month. It is hoped that the rates will not be advanced, but much depends upon war conditions. At any rate, board will be as cheap here as at any other place in the State.

GOVERNMENT

Those entering a Normal School are expected to be of sufficient maturity and to have come with a purpose so serious and definite that espionage is unnecessary. By far the greater number of students who come here are eager, earnest and industrious young men and women, who cheerfully comply with all regulations. But experience has demonstrated the necessity of having well defined regulations concerning the conduct at school and at the boarding places, for the guidance of those whose inclination or whose judgment renders proper direction necessary.

Upon matriculation the student is given a printed copy of the regulations concerning the conduct of students, and he is requested not to register if unwilling to conform to the requirements. Whenever a student wilfully violates the regulations, ignores the efforts of the Faculty to assist him in his character building, manifests a spirit of insubordination to authority, or shows himself out of harmony with the school and its ideals, he is advised that he is not in the right school and is requested to withdraw.

Continuance in school depends upon punctual class attendance and obedience to regulations. Students who must continually be admon-

ished, restrained, reprimanded, or denied the usual privileges, are undesirable, and they will not be retained in the school.

The purpose of the school is to train teachers for the public schools of Texas, and it should not inflict upon the children of the State as teachers those whose character, habits of thought, or low ideals unfit them for directors and exemplars of the young.

To all those who are seeking opportunity to work under wholesome influences, favorable conditions, competent and sympathetic direction, is extended a hearty welcome. Those who are merely seeking diversion, change of environment, or increased social advantages, and those incapable or unwilling to lead the life of a student are advised—urged—to go elsewhere.

DIRECTIONS TO STUDENTS APPLYING FOR ADMISSION

Students should note the requirements for entrance, and understand that the school has no authority to admit them without implicit compliance with the directions of the Board of Regents. Students should not write asking that in their cases requirements be not enforced on account of their age, experience, or other reasons, for no such request can receive consideration.

Students should remember that the requirements for entrance and for certificates are the same in all the Texas State Normal Schools.

Credentials, certificates of promotion, etc., upon which entrance examinations are sought to be absolved must be documents signed officially by the proper authority.

Credentials, statements, certificates of promotion, to receive consideration, must be from—

(a) High schools affiliated with colleges or universities previously named.

(b) High schools approved by the State Department of Education.

Students desiring to enter on examination, on certificate, diploma or promotion card from accredited high schools should report at the beginning of the session, and avoid trouble and delay in classification.

Credits are given only for full terms' work. Students entering late in the term find difficulty in being classed promptly and making up the work already done by the class.

Students should not request exemptions not mentioned in the bulletin, as the school is without authority to grant such requests.

Diplomas, promotion cards, statements, etc., from schools not duly accredited should not be urged as exemptions from examination.

THE TRAINING SCHOOL

In connection with the Normal School proper is conducted a school of nine grades. The purpose of this school is to afford the Normal students the opportunity of observing the organization, conduct, control, instruction, and other details of a model public school, and to give

students actual practice and experience in teaching under expert direction.

The experience thus acquired is far more helpful and valuable to the teacher than that gained in the usual haphazard methods upon which the young teacher depends when he starts out for himself either in the grades or in the rural schools.

The completion of the work of the ninth grade in the Training School admits the students to the Freshman class of the College without examination.

Until a more commodious building and a greater number of teachers can be provided by appropriation, each teacher, except that of the first grade, will have charge of two grades. All these are experienced and trained teachers. A technically trained and experienced director is in charge of the entire instruction.

The Training School is designed to give the students of the Normal College careful training in the art of teaching in the grades. Each student in the Normal School department is required to teach at least one term before graduation, under the supervision and instruction of the director and the training teachers.

The different members of the Normal School Faculty and the teachers in the Training School give "model" recitations with criticisms and discussions of the work in the different subjects.

In some cases the daily observation and criticism of classes followed by oral or written discussion, or both, may be substituted for a term of teaching by the student.

While actual teaching in the Training School is required only of members of the Senior class, members of the other classes are required to do observation work, prepare lesson plans, etc. Each student teacher is required to prepare lesson plans a week in advance of the work, which plans are examined, criticized, and, when necessary, revised by the director or training teachers. The conduct of recitations by the student teacher is observed by the training teacher, and helpful criticisms given in private.

Students of the Normal School department are also appointed to superintend the playground of the Training School during recess periods.

THE SUMMER SESSION

The summer session of the North Texas State Normal begins about June 1st and closes about August 1st of each year. Two distinct schools are maintained, "The Summer School" and the "Summer Normal." Students of the different schools are taught in separate classes and do different classes of work. Students of the Summer School are applying for "credit" towards certificates or diplomas of the institution. Students of the Summer Normal review the subjects for examination for certificates issued by the State Superintendent of Public Instruction.

The general purpose of the summer session is to meet the demands and to reach the students that cannot be met during the regular session. There are in all sections of the State many teachers who, despite

limited preparation, are doing good work in the cause of education. These teachers, barred by circumstances often from the advantages of college or normal schools, desire to broaden their scholarship, and increase their efficiency in school work. It is to this class that the summer session appeals. To these are offered the advantages of a large and competent faculty of specialists, the library, laboratories, apparatus, and equipments of the Normal College.

The Summer School Section.—The student registering in the summer school section does "credit work" towards a certificate or diploma of the school. The work of a summer term corresponds practically to that of a term of the regular session. The first summer the student attends he takes the work as outlined for the first term of the regular session in the course he elects, and similarly for each subsequent term.

The work of the Senior (fourth year), the Junior (third year), and the Sophomore (second year), in all seven courses is planned regularly as in the regular session. The work of the Freshman (first year) class may be taken with the summer normal section and in classes organized for "conditioned" students so as to prepare for entrance to the Sophomore class.

At the close of the summer session examinations are given for entrance to all classes of the regular session.

The Summer Normal Section.—For those who register in the Summer Normal section is offered a review of subjects required for the different grades of State certificates. The work of this section is conducted in compliance with directions of the State Superintendent of Public Instruction, and the summer normal examinations for certificates conducted at such times as he designates.

The advantages offered teachers during the summer have been realized and appreciated, as evidenced by the increased attendance from year to year. The summer session of 1917 enrolled 1768 students.

ADJUSTMENT OF FORMER STUDENTS TO NEW CONDITIONS

Although the nomenclature of classes and courses of study have been changed within the past few years, former students will have no difficulty in finding their proper places, when it is understood that each class now, as heretofore, covers one year's work.

Prior to 1911 the course consisted of three years' work. Since that time four years have been required for graduation. Beginning in September, 1917, an additional two years' course is added, upon completion of which the Bachelor's degree is conferred. This addition makes a course extending over six years.

Upon completion of the *fourth year* or *senior* class of the *Normal* department, the student receives, as heretofore, a permanent certificate and diploma, and is enrolled as an alumnus of the school.

Graduates of the former "three year course" are eligible to enter the

fourth year or senior Normal class; those having completed the second year at any time since the organization of the school are eligible to the present third year or junior class, etc. Those having graduated in the four year course are admitted to the fifth year (Junior College) class.

Students are not affected by the changes in the course as to subjects offered. No student in continuous attendance is required to do more units' work for completion of a particular class or for graduation than the number demanded at the time of his matriculation. A "credit" once recorded is never cancelled on account of additions or changes in a course.

SUMMER SESSION, 1918

June 4 to August 10

ADMINISTRATIVE OFFICERS

W. H. BRUCE.....	President
W. D. BUTLER.....	Dean

MISS FLORA L. WILKIN	Drawing
MISS MYRTLE WILLIAMS, A. M.	English
W. L. WILLIS (Honey Grove)	Mathematics

STUDENTS ENROLLED IN TRAINING SCHOOL, SESSION 1917-18.

FIRST GRADE

Anderson, Ervin	Hudspeth, Bill	Vitz, Elise
Barnes, Gladys	Richards, Juanita	Walden, Herbert
Bellah, Miriam	Smith, Robert	Whitehead, Wendell
Burgoon, Claude	Stanley, Allie	Wilcoxon, Monia
Grant, Irby	Sullivan, Wilana	Wright, Noble
	Taliaferro, Edra	

SECOND GRADE

Barton, Velma Lee	Davis, Rebecca	Smoot, Charles
Bellah, William	Evers, Lotta	Smoot, Homer B.
Blewett, Floyd	Fry, Margaret	Smith, Emory
Collins, Charleen	Hunter, Herbert	Speer, Lucille
Cunningham, M. Bell	Klepper, Marguerite	Wright, Gober
Chrislip, Margaret	Jones, George	

THIRD GRADE

Christal, Richard	Kerfoot, C. W.	Smith, Dorothy
Good, Alleen	Keith, Wendell	Sutton, William
Fry, Jim	Legett, Jesse	Sewell, Joyce
Hoke, Dean	Mahan, Frank	Wright, Helen
Hooper, Jewel	Myers, Ollie	

FOURTH GRADE

Barrow, Cassie	Drake, Bob E.	Rains, R. K.
Bates, Louise	Johnson, Cecil	Skaggs, Winnie
Caddell, Marvin	Marriott, Rhea	Stout, Myron
Clayton, E. M.	Myers, Mories	Taliaferro, Evelyn
Christianson, Ruth	Orr, Thelma	Wright, Eulalie
Curtis, Boyd	Poole, Lawrence	Yerby, Weldon

FIFTH GRADE

Bellah, Roswell	Floyd, Dora	Stanton, James
Blair, Lora	Jones, Owsley	Underwood, Fred
Blewett, Margaret	Lomax, Robert	Willis, Helen
Davis, Lloyd	Simmons, Gregg	Wright, Allen
Edwards, Bill	Spear, Lon A.	

SIXTH GRADE

Blair, Nina	Crawford, Jack	Smith, Margaret
Bailey, Helen	Hasell, Vera	Smith, Ruth
Caddell, Harry	Mahan, Hazel	Smoot, Elaine
Chrislip, Mary	Simmons, James	Williams, Julia
Christal, Nancy	Sims, Beno	Woodward, Frances

SEVENTH GRADE

Bates, Richard	Davis, Thomas	Reynolds, Mary
Bellah, Louise	Jones, Arthur	Smith, Willis
Blewett, Roberta	Keith, Lowell	Stanton, Robert
Burgoon, Buford	Long, Frances Mae	Tabor, Otis
Crawford, Ruth	Lomax, Elizabeth	Wright, Elizabeth
Cannon, Margaret	Peters, Cassa	

EIGHTH GRADE

Banks, Marie
Blewett, Gladys
Bradley, M. Jacob
Cox, Carol
Davis, Wallace
Edwards, Virginia

Fullingim, Vala
Lawrence, Floyd
Poole, Christal
Smith, Julia
Stout, Louise
Underwood, M. Alice

Underwood, Carl
Williams, C. A.
Wiley, Margaret
Smoot, Walter

NINTH GRADE

Blewett, Willis
Clark, Florence
Davidson, William
Davis, John
Erwin, Will

Fox, Ulric
Gale, Jack
Herbert, W. H.
May, Dora Lee
Marriott, Velda

Taliaferro, Leon
Underwood, Freda
Waggoner, Crystelle

CATALOG OF STUDENTS, SESSION 1917-18

Name	County
Acklin, Mrs. Kate	Denton
Acklin, Pauline	Denton
Adams, Eva	Denton
Adams, L. D.	Ellis
Addison, O. G.	Denton
Agnew, Exa Irene	Eastland
Aiken, Lucy Lee	Hood
Ainsworth, Edna	Scurry
Airhart, Jennie Lynn	Collin
Akard, Anna May	Parker
Alexander, Addie	Denton
Alexander, Edith Alma	Collin
Alexander, Frances	Denton
Allen, A. B.	Cherokee
Allen, Mary E.	Denton
Allen, Mary Edith	McLennan
Allen, Nell	Tom Green
Allen, Ruth	Bosque
Allgood, E. M.	Denton
Allgood, Mamie	Denton
Allgood, Muriel	Denton
Allred, Elizabeth	Hill
Alsup, Alma	Bosque
Alsup, Thelma	Bosque
Amis, S. J.	Rains
Amis, Stella	Rains
Amos, Junia	Denton
Anderson, J. S.	Smith
Anderson, Pauline	Van Zandt
Anderson, Ruth	Ellis
Anding, Mary Roe	Robertson
Andrews, H. R.	Denton
Andrews, Laura Leigh	Bowie
Armstrong, Helen	Comanche
Arnold, Edna Milton	Coleman
Arnold, Mattie	Houston
Arrington, Pearl	Nacogdoches
Arthur, Jodie	Irving
Ashcraft, Zana	Johnson
Atwood, Mabel Gladys	Oklahoma
Austin, Iona	Tarrant
Awalt, Laura	Freestone
Baggett, Annabelle	Ellis
Baggett, Winnie	Ellis
Bailey, Dixie	Denton
Bailey, Fanny C.	Kaufman
Bain, Anna	Navarro
Baker, Arkle	Denton
Baker, Lewis	Collin
Baker, Mary Virginia	Tarrant
Baker, Ruth	Denton
Baker, Ruth	Schleicher
Baker, R. N.	Denton
Baley, Anna Belle	Childress

Name	County
Ball, Bessie	Johnson
Ball, D. E.	Wilbarger
Ball, Eva Lee	Johnson
Ball, Neva	Johnson
Ball, Orpha	Cass

Acklin, Mrs. Kate	Denton
Acklin, Pauline	Denton
Adams, Bertie E.	Kaufman
Adams, Lela Inay	Denton
Adams, Ruby M.	Denton
Agin, Minnie	Bosque
Aiken, Lucy Lee	Hood
Akridge, Bernice	Collin
Aldredge, Ruby	Denton
Alexander, Edna	Tarrant
Alexander, Frankie	Bosque
Alexander, Louise	Denton
Alford, Anna Elizabeth	Harrison
Alfrey, Mattie	Hill
Allen, Errett Pinkney	Ward
Allen, Joe T.	Denton
Allen, Mrs. Mary E.	Denton
Allen, Rose A.	Collin
Allgood, Muriel	Denton
Allison, Ruel Blakely	Throckmorton
Almon, Vera Emily	Cooke
Alsup, J. D.	Bell
Alsup, Thelma	Bosque
Alsup, Treda	Bell
Amis, Aletha Rebecca	Rains
Amos, Charlcie	Denton
Amos, Minnie	Denton
Anderson, Evelyn Lorayne	Navarro
Anderson, Pauline	Van Zandt
Andrew, J. Martin	Hunt
Arnett, Willie B.	Navarro
Arnn, Elsie	Lubbock
Arnold, Edna Milton	Coleman
Arthur, Jodie	Dallas
Atwood, Mable Gladys	Jackson
Bailey, Corryenne	Kaufman
Baird, Edna Mae	Denton
Baker, Annie Belle	Anderson
Baker, I. E.	Hamilton
Balfour, Nettie	Smith
Ball, Annie Mae	Lamar
Ball, Dewey E.	Denton
Ball, Essie	Denton
Ball, Eva Lee	Johnson
Ball, Kate	Denton
Ball, Lola	Montague
Ball, Orpha	Cass
Ballard, Eula May	Wood
Ballard, Loucile	Montague
Ballinger, Mary Kate	Johnson
Balthrop, Effie	Denton
Bando, Bertha	Young

Name	County
Barker, Fern May	Somervell
Barrett, Maurine	Denton
Barron, Cannon	Limestone
Barrow, Lucile	Coryell
Barrow, Margaret	Denton
Bars, Clint	Limestone
Barthold, Rosa Mae	Denton
Barton, Alma	Hill
Barton, Gladys	Clay
Barton, Lillie	Hood
Bass, Sadie Kate	Harrison
Bates, Rema	Clay
Baxter, Della	Grayson
Beach, Ruby	Erath
Bean, Carrie	Parker
Beard, Laura Hollis	Denton
Bearden, Lola	Red River
Beasley, Dewey	Angelina
Beck, Cora Mae	Van Zandt
Beck, J. J.	Collingsworth
Beck, Leona	Van Zandt
Bell, Rena	Navarro
Bellows, Gladys	Collin
Bennett, Alice	Palo Pinto
Bennett, Alice	Tarrant
Bennett, Jessie A.	Smith
Bennett, Johnnie Lee	Palo Pinto
Benson, Viola	Hill
Bentley, Era	Ellis
Bentley, Homer D.	Navarro
Bentley, Lola	Cooke
Benton, Mary	Hill
Berry, Jewell	Upshur
Betts, Nannie E.	Cooke
Bibb, Lora	Dallas
Bibb, Mary Louise	Harrison
Biggerstaff, Eunice	Fannin
Biggerstaff, Florence	Fannin
Biggerstaff, Winnie	Fannin

Adventist	1	Episcopal	4
Baptist	438	Lutheran	3
Catholic	6	Methodist	428
Christian	134	Presbyterian	108
Church of Christ	48	No preference	17
Average age of students			19.9
Number of counties in Texas represented			126
Number of States represented			7
High School graduates			637
Number having experience as teachers			284

SUMMARY OF STUDENTS, SUMMER SESSION 1918.

	Men.	Women.	Total.
Number of students enrolled in Summer School Section	171	1028	1199
Number of students enrolled in Summer Normal Section	41	460	501
Total number of students enrolled	212	1488	1700
Number of counties in Texas represented			133
Number of States represented			5

SUMMARY OF STUDENTS, YEAR ENDING AUGUST 10, 1918.

	Men.	Women.	Total.
Number of students enrolled, Session 1917-18	275	912	1187
Number of students enrolled, Summer Session 1918	212	1488	1700
Total number of students enrolled during the year	487	2400	2887
Excluding students counted twice	63	298	361
Net enrollment in Normal College	424	2102	2526
Enrollment in Training School	66	79	145
Net enrollment for year September 1, 1917, to August 31, 1918 (no one counted twice)	490	2181	2671
Number of counties in Texas represented, Session 1917-18			126
Number of counties represented, Summer Session 1918			133
Number of counties of Texas represented during the year, no county counted twice			155
Number of States represented during the year			10

DIRECTIONS TO STUDENTS.

When students arrive in Denton, they should come at once to the Normal College office, where a Faculty Committee will assist them in securing suitable boarding places.

Students coming for the first time, and also former students who have conditions to be removed, should reach Denton not later than Saturday, September 20, in order to be ready for examinations and classification on Monday, September 22.

Former students already classified and without conditions should report for registration Wednesday, September 24.

It is important that students come at the times above specified, and thus avoid delay in classification.

Committees will meet all trains on September 22, 23 and 24.

For ready classification and other advantages the student should report always at the beginning of a term. Prompt attention is secured by registering on the days of registration.

Late arrivals must suffer unavoidable delay in examination for classification.

CALENDAR FOR 1919-20.

FIRST TERM.

Faculty meeting. Monday, September 22, 1919, at 9:00 a. m.

Registration of new pupils begins Monday, September 22, at 1:30 p. m.

Registration of new pupils, entrance and condition examinations, and classification of students upon credentials, Tuesday, Wednesday and Thursday, September 23, 24, and 25.

Registration of former students, Wednesday, September 24.

Assembly in Auditorium Friday, September 26, at 10:00 a. m.

Formation of classes and beginning of recitations, Friday, September 26, at 1:30 p. m.

First term ends Saturday, December 20, 1919.

School dismissed for Christmas Holidays, Saturday, December 20, 1919.

SECOND TERM.

Second term begins Tuesday, December 30, 1919.

Second term ends Saturday, March 13, 1920.

THIRD TERM.

Third term begins Tuesday, March 16, 1920.

Session 1919-20 closes Monday, May 31, 1920.

SUMMER TERM.

Summer term begins Tuesday, June 8, 1920.

Summer term ends Saturday, August 14, 1920.

STATE NORMAL COLLEGE BOARD OF REGENTS.

HON. A. C. GOETH, <i>President</i>	Austin
HON. M. O. FLOWERS, <i>Vice-President</i>	Lockhart
HON. R. J. ECKHARDT.....	Taylor
HON. A. B. MARTIN.....	Plainview
HON. J. A. ELKINS.....	Houston
HON. A. B. WATKINS.....	Athens
HON. H. A. TURNER, <i>Secretary</i>	Austin

ADMINISTRATIVE OFFICERS.

W. H. BRUCE.....	<i>President</i>
W. D. BUTLER.....	<i>Dean</i>
MISS EDITH L. CLARK.....	<i>Dean of Women</i>
J. W. SMITH.....	<i>Secretary-Treasurer</i>
A. C. MCGINNIS.....	<i>Registrar</i>
MISS GERTRUDE WEAR.....	<i>Secretary to President</i>
MISS RUBY C. SMITH.....	<i>Associate Dean of Women</i>
E. D. CRIDDLE.....	<i>Dean of Summer School</i>
W. W. WRIGHT.....	<i>Bookkeeper</i>
MISS LILLIE MAY REEDER.....	<i>Assistant Registrar</i>
MISS MATTIE GROUND.....	<i>Office Assistant</i>
MRS. PEARL C. MCCracken.....	<i>Librarian</i>
MISS HIXIE PITTMAN.....	<i>Assistant Librarian</i>
MISS MARIE RUSS.....	<i>Student Life Secretary</i>

FACULTY.

DEPARTMENT OF EDUCATION.

W. H. BRUCE, *President.*

A. B., Alabama Polytechnic Institute; A. M., Baylor University; Ph. D., Mercer University; LL. D., Trinity University.

J. R. SWENSON, *Education.*

A. B., University of Denver; A. M., University of Texas; Graduate Student Columbia University, 1905-07.

A. E. CHRISLIP, *Education.*

L. I., Peabody Normal College; A. B., University of Nashville; A. M., Columbia University.

F. V. GARRISON, *Education.*

A. B., Central College; Student Chicago University.

MISS M. ANNE MOORE, *Education.*

M. L., Southwestern University; A. B., Chicago University.

MISS ELVINA HARRINGTON, *Director of Kindergarten School.*

B. S., A. M., Columbia University.

MRS. CORA M. MARTIN, *Primary Education; Critic Teacher.*

B. S., Columbia University.

A. S. KEITH, *Principal Training School.*

Graduate Chilton Normal College.

MISS WILLIE M. FLOYD, *Critic Teacher.*

Student University of Texas; Iowa State Teachers' College; Columbia University.

MISS VIRGINIA HAILE, *Critic Teacher.*

Graduate North Texas State Normal College; Student Chicago University.

MISS MARGARET WHITE, *Critic Teacher.*

Graduate North Texas State Normal College; Student Columbia University.

MISS PHOEBE GOODE, *Critic Teacher.*

Graduate North Texas State Normal College.

MISS JULIA MCINTYRE, *Critic Teacher.*

Student Simmons College; North Texas State Normal College.

MISS MAMIE E. SMITH, *Music and Critic Teacher.*

Graduate North Texas State Normal College; Student Columbia University.

DEPARTMENT OF ENGLISH.

S. B. NEFF, *English.*

A. B., A. M., Yale; A. M., Ph. D., Harvard.

MISS EDITH L. CLARK, *English.*

B. Lit., A. M., University of Texas.

MISS MARY C. SWEET, *English.*

A. B., Daniel Baker College; A. M., University of Texas.

MISS MYRTLE E. WILLIAMS, *English.*

A. B., Grenada College; A. M., University of California.

B. E. LOONEY, *English.*

A. B., A. M., Trinity University; A. B., Chicago University.

MISS KATHERINE HORNBEAK, *English.*

A. B., Trinity University; A. M., Columbia University.

MISS MARTHA SWEET, *English.*

A. B., University of Texas.

MISS BESSIE L. SHOOK, *English.*

A. B., A. M., University of Texas.

MISS CLARA EDITH MORLEY, *English.*

A. B., University of Minnesota; A. M., Columbia University.

DEPARTMENT OF HISTORY.

E. D. CRIDDLE, *History.*

B. Lit., University of Texas.

L. W. NEWTON, *History.*

A. B., A. M., University of Texas.

E. H. FARRINGTON, *History.*

A. B., Baylor University.

S. S. MCKAY, *History.*

A. B., A. M., University of Texas.

MISS ANNA POWELL, *History.*

A. B., University of Texas; Student University of California.

DEPARTMENT OF MATHEMATICS.

W. D. BUTLER, *Mathematics.*

A. B., A. M., Bethel (Ky.) College; Student Johns Hopkins University; Chicago University.

T. E. PETERS, *Mathematics.*

A. B., A. M., Greenville (Ky.) College.

J. W. SMITH, *Mathematics.*

Student University of Texas.

J. P. DOWNER, *Mathematics.*

A. B., Cumberland (Tenn.) University.

HUGH PORTER, *Mathematics.*

A. B., A. M., University of Texas.

MISS MYRTLE C. BROWN, *Mathematics.*

A. B., A. M., University of Texas.

DEPARTMENT OF SCIENCE.

R. L. MARQUIS, *Biology.*

A. B., Texas Christian University; A. M., University of Texas.

W. N. MASTERS, *Chemistry.*

B. S., A. B., National Normal University.

L. P. FLOYD, *Chemistry*.

Graduate North Texas State Normal College; B. S., Peabody Teachers' College.

L. L. MILLER, *Physics*.

Graduate North Texas State Normal College; A. B., A. M., University of Texas.

R. L. TURNER, *Physics*.

A. B., Chicago University.

DEPARTMENT OF FOREIGN LANGUAGES.

J. N. BROWN, *Latin*.

A. B., Emory and Henry College; A. M., Chicago University; Graduate Student Columbia University.

MISS MIGNONETTE SPILMAN, *Latin*.

A. B., University of Kansas; A. M., Chicago University.

E. L. ANDERSON, *French*.

A. B., University of West Virginia; Student Leland Stanford University; Columbia University; Marburg University.

MISS RUBY C. SMITH, *Spanish*.

A. B., A. M., University of Texas; Graduate Southwest Texas State Normal College.

DEPARTMENT OF GOVERNMENT.

W. J. McCONNELL, *Government*.

A. B., A. M., University of Denver.

J. W. PENDER, *Government*.

A. B., Grayson College.

DEPARTMENT OF AGRICULTURE.

B. B. HARRIS, *Agriculture*.

B. S., Clemson A. and M. College; Student University of Ohio.

J. H. LEGETT, *Agriculture*.

Graduate North Texas State Normal College; Student Chicago University.

DEPARTMENT OF FINE ARTS.

MISS ELIZABETH A. HILLYAR, *Drawing*.

Graduate Woman's Art School, New York; Graduate Art Department of Columbia University.

MRS. ELEANOR H. GIBBS, *Drawing*.

Graduate Applied Arts School, Chicago; Student Columbia University.

MISS LILLIAN M. PARRILL, *Music*.

Graduate American Institute of Normal Methods; Northwestern University; Pupil of Oscar Saenger, New York; Pupil, Chas. C. Washburne, Nashville.

MISS ALICE SIGWORTH, *Reading*.

Graduate State Normal School, Indiana, Penn.; Graduate Emerson School of Oratory, Boston; Graduate School of Design, Boston.

MISS CORALEE GARRISON, *Reading*.

A. B., Westminster College; Graduate King's School of Oratory, Pittsburg; Graduate Western Maryland College.

MISS MARY ANDERSON, *Piano*.

B. Mus., Baylor University; Student Conservatory of Leipzig.

DEPARTMENT OF MANUAL ARTS.

H. J. P. VITZ, *Manual Training*.

B. S., Perdue University.

S. A. BLACKBURN, *Manual Training*.

B. Ed., Illinois State Normal University; Graduate Bradley Polytechnic Institute.

DEPARTMENT OF HOME ECONOMICS.

MISS EMMA A. BAIE, *Home Economics*.

B. S., Iowa State College; Student Drake (Iowa) University.

MISS EDNA ST. JOHN, *Home Economics*.

B. S., Kansas State Agricultural College.

MISS CHARLOTTE MAYFIELD, *Home Economics*.

B. S., Kansas State Agricultural College.

MISS AMY BRANDENBURG, *Home Economics*.

B. S., Kansas State Manual Training Normal College.

DEPARTMENT OF PHYSICAL EDUCATION.

J. W. ST. CLAIR, *Physical Education*.

A. B., Baylor University; Student Chicago University.

MISS BEULAH A. HARRISS, *Physical Education*.

Graduate State Normal School, Peru, Nebraska; A. B., University of Nebraska.

MISS JULIA ISENSEE, *Physical Education*.

A. B., University of North Dakota.

COMMERCIAL DEPARTMENT.

A. A. MILLER, *Commercial Branches*.

LL. B., University of Memphis.

NORTH TEXAS STATE NORMAL COLLEGE

For some years after the establishment of the College on March 31, 1899, the activities of the school were limited to the preparation of teachers for the common schools, without affording any special training for technical work.

In 1911, a Board of Regents was created for the Texas State Normal Schools. This was the beginning of the era to standardize these schools, enlarge their courses and enable them to discharge fully their obligations by meeting the demands of the public school system of the State for all grades of public school teachers.

The adoption of seven distinct courses of study, the fundamentals in all of which being the same, has enabled the school during the last few years to send forth better prepared teachers.

Beginning in September, 1917, two additional years' work were added to the course formerly given, the completion of which will entitle the student to receive the standard Bachelor's Degree in Education.

Liberal appropriations from the Legislature during the past several years, the addition of buildings, apparatus and appliances, and the election of a much larger Faculty have contributed to the efficiency of the College.

In addition to the preparation of teachers of the so-called literary and scientific subjects, the school is now equipped with buildings, appliances and Faculty necessary to train effective teachers in all phases of Home Economics, Manual Training, Public School Music, Public School Art, Reading, and Physical Education.

Every phase of the teacher's work receives just consideration, and in our enlarged sphere of usefulness we expect to meet the demands of all grades of school work, the elementary, the grammar, and the high school in all its departments.

SCHOLARSHIPS.

The Board of Normal Regents offers scholarships annually to the honor students among young women and to the honor students among young men in the graduating class of each fully affiliated high school. These scholarships entitle the holders to exemption from incidental fees in a Texas Normal College.

The Board of Normal Regents offers annually one scholarship, worth \$100, to each of the Normal Colleges, open to students who have completed with high rank a two-year or three-year college course in a Normal College.

MATERIAL EQUIPMENT.

BUILDINGS.

The Administration Building.—In 1903 the Administration Building, a brick, with basement and two stories, was constructed. It contains administrative offices, and auditorium, and several class rooms. The cost of this building was approximately \$60,000.

The Science Building.—In 1910 the Science Building was constructed. This is a fireproof brick and reinforced concrete structure of three floors. It contains several recitation rooms and the laboratories for Chemistry, Physics and Agriculture. Its cost, not including equipment, was \$35,000.

The Library Building.—In 1912-13 the Library Building was completed. It is a fireproof building of brick and steel structure. It contains the stack room, reading rooms, several recitation rooms. Two years ago, an appropriation by the Legislature permitted its equipment with complete and adequate furniture and appliances necessary to a first-class library building. Its cost, with the equipment, was about \$65,000.

The Manual Arts Building.—In 1914-15 a handsome fireproof building of three stories was constructed for the Manual Training and Home Economics Departments. It has been equipped with the best appliances for every phase of these two departments. Its cost, with equipment, was \$65,000.

The Heating Plant.—In 1915-16 a central heating and power plant was constructed of brick at a cost of \$35,000.

The Education Building.—In 1917-18 a modern building of three stories was constructed for the accommodation of the Educational Department, including the Training School.

The Music Building.—The music classes are conducted in a remodeled, handsome modern residence.

EQUIPMENT.

In addition to the necessary supplies common to all the institutions, the College has now well equipped laboratories for Chemistry, Physics, Botany and Agriculture. Its laboratories and shops for the Department of Home Economics and Manual Training are of the most modern type. In addition to the foregoing, the College is supplied with engine for power and light, stereopticons, musical instruments, etc.

The buildings are electric lighted, steam heated, and connected with the city sewer. The laboratories are connected with natural gas pipes of the company that supplies the city. The offices have telephone connections, both local and long distance.

FACULTY.

The Faculty consists of specialists chosen on account of scholarship, training, character and successful experience. Among its members are found graduates of nearly all of the great universities of America.

GENERAL INFORMATION

DIVISIONS OF THE WORK.

The following divisions are maintained:

1. *Normal Training School.* The Training School consists of the first nine grades of a standardized school.
2. *Normal School Division.* There are two years of work in this division, the first year and the second year of the normal school.
3. *Normal College—Diploma Division.* This division covers the first two years of college curricula.
4. *Normal College—Degree Division.* This division embraces the third and fourth years of college curricula.
5. The six classes in the Normal Schools are designated as follows: Freshman, Sophomore, Junior, Senior, College Junior, and College Senior.

ADMISSION REQUIREMENTS.

1. *Uniform Requirements.* The requirements for admission to the various classes of the State Normal Schools of Texas are uniform, as directed by the State Normal Board of Regents.
2. *Age.* Any person who is sixteen years of age on or before January 1 of the school year may enter a State Normal School at the beginning of the fall term, or at any suitable time during the school year.
3. *Unit.* All claims for admission are reduced as far as possible to standard high school admission units; a unit being a year's work—180 recitations of 40 minutes each—in an accredited high school.
4. *Accredited High Schools.* Accredited High Schools are those approved by the State Department of Education, and work done in the schools, when officially certified to, is accepted for admission.
5. All work done in high schools in subjects in which the schools have been affiliated is recognized for admission to the Junior class.
6. Graduates of high schools of the first class not affiliated will be admitted to the Sophomore class with the privilege of satisfying Junior entrance by class work and by examination at the close of one term. Graduates of high schools of the second class will be admitted to the Sophomore class without condition. Graduates of high schools of the third class will be admitted to the Freshman class, but if such graduates have finished a four-year high school course, these graduates have the privilege of clearing entrance requirements to the Sophomore class in one term. Students completing the tenth grade of a high school of the first class or second class will be admitted to the Sophomore class without examination. Students may, however, take entrance examination for admission to higher classes than those to which they are entitled on the basis of classified high schools.

7. *Credentials.* Credentials entitling the holder to exemption from examination must be official statements signed by proper authorities. Promotion cards and diplomas from high schools and colleges must be accompanied by official statements of the work completed by the students, and signed by the superintendent, principal, or president. Work partially completed is not considered for admission credits.

8. *Freshman, Normal School.* Applicants for admission to the Freshman class shall present a minimum of 7 admission units as follows:

Algebra, 1 or 2

English, 2

History, 1 or 2

Electives sufficient to make 7.

If application is made for admission to the Latin section of the Language Course, one admission unit of Latin is required.

9. *Sophomore, Normal School.* Applicants for admission to the Sophomore class shall present 11 admission units as follows:

Algebra, 2

Geometry, $\frac{1}{2}$ or 1

History, 2

English, 2

Electives sufficient to make 11.

For admission to the Language Course, two units of Latin or one unit of modern language are required.

10. *Junior, Normal College.* Applicants for admission to the Junior class shall present 15 admission units as follows:

English, 3

History, 2

Algebra, 2

Geometry, 1

Electives sufficient to make 15

For admission to the Language Course, three units of Latin or two units of a modern language are required.

11. *Senior, Normal College.* For admission to the Senior class a statement must be presented showing the completion of one year's (45 term-hours) college work, including three term-hours in Education.

12. *College Junior.* For admission to the College Junior class a statement must be presented showing the completion of two years' (90 term-hours) college work, including at least one year's (9 term-hours) work in Education.

13. *College Senior.* For admission to the College Senior class a statement must be presented showing the completion of at least three years' (135 term-hours) college work, including at least two years' (18 term-hours) in Education.

Students meeting the admission requirements in all subjects except Education may elect this subject as part of their work.

14. *Admission on Teachers' State Certificates.* The following admission credits are allowed to holders of State certificates:

Second Grade Certificate:

English, 1	Management, $\frac{1}{2}$
History, $\frac{1}{2}$	Agriculture, $\frac{1}{2}$
Physiology and Hygiene, $\frac{1}{2}$	Unspecified, 1
One or more year's work in teaching, 1	
Total: 5 units	

First Grade Certificate:

English, 3	Ancient History, 1
Algebra, 2	Physical Geography, $\frac{1}{2}$
Geometry, 1	Mediaeval and Modern History, 1
American History, $\frac{1}{2}$	Physiology and Hygiene, $\frac{1}{2}$
Management, $\frac{1}{2}$	Agriculture, $\frac{1}{2}$
Civics, $\frac{1}{2}$	
One or more year's experience in teaching, 1	
Total: 12 units	

Permanent Primary Certificate:

(a) *Built on a Second Grade Certificate.* The five units allowed on the second grade certificate, and the following $4\frac{1}{2}$ units:

English, 3	Physical Geography, $\frac{1}{2}$
Civics, $\frac{1}{2}$	Psychology, $\frac{1}{2}$
Total: $9\frac{1}{2}$ units.	

(b) *Built on a First Grade Certificate.*—The twelve units allowed on the first grade certificate and the following $1\frac{1}{2}$ units:

English, 1	Psychology, $\frac{1}{2}$
Total: $13\frac{1}{2}$ units	

Permanent Certificate:

History, 4	Physiology and Hygiene, $\frac{1}{2}$
English, $2\frac{1}{2}$	Agriculture, $\frac{1}{2}$
Mathematics, 4	Management, $\frac{1}{2}$
Civics, $\frac{1}{2}$	Psychology, $\frac{1}{2}$
Bookkeeping, $\frac{1}{2}$	Physiology, $\frac{1}{2}$
One or more year's experience in teaching, 1	
Total: 15 units.	

Electives. List of subjects recommended by the Department of Education from which admission units may be chosen:

Agriculture, $\frac{1}{2}$ to 4	Commercial Geography, $\frac{1}{2}$
Advanced Arithmetic, $\frac{1}{2}$	Civics, $\frac{1}{2}$ to 1
Ancient History, 1	Commercial Law, $\frac{1}{2}$
Algebra, 2	Domestic Art, $\frac{1}{2}$ to 2
American History, $\frac{1}{2}$ to 1	Domestic Science, $\frac{1}{2}$ to 2
Animal Production, 1 to $1\frac{1}{2}$	Drawing, $\frac{1}{2}$ or 1
Astronomy, 1	English, 2 to 4
Bookkeeping, 1	English History, $\frac{1}{2}$ to 1
Botany, 1	French, 2 to 4
Chemistry, 1	German, 2 to 4
Commercial Arithmetic, $\frac{1}{2}$	General Science, 1

Latin, 2 to 4	Psychology, $\frac{1}{2}$
Mechanical Drawing, $\frac{1}{2}$ to 4	Spanish, 2 to 4
Medieval and Modern History, 1	Solid Geometry, $\frac{1}{2}$
Music, $\frac{1}{2}$ or 1	School Management, $\frac{1}{2}$
Physics, 1	Sociology, $\frac{1}{2}$
Plane Geometry, 1	Stenography and
Physiography, $\frac{1}{2}$	Typewriting, 1 to 2
Physiology and Hygiene, $\frac{1}{2}$	Shop Work, $\frac{1}{2}$ to 4
Plant Production, 1 to $1\frac{1}{2}$	Trigonometry, $\frac{1}{2}$
Public Speaking, $\frac{1}{2}$ to 1	Zoology, 1

15. *Admission of Mature Students.* Persons twenty-one years of age or over, who are not graduates of standard high schools, may at the discretion of the President of the Normal School, be admitted without examination to any of the classes below the senior or fourth year. In the enforcement of this regulation especial consideration will be given to mature students whose training has been followed by successful experience in teaching, to students who have had other practical preparation, and to those who have made special attainments in some particular line. Students admitted in this manner will, upon the completion of the work of the Junior class in English, History, Mathematics and Science with a grade of "C" be given credit for full admission in these subjects. Other admission units may be absolved in like manner. In all cases mature students and others must remove conditions and satisfy the admission requirements to the satisfaction of the Admission Committee not later than two years after admission, and before any certificate can be granted.

16. *Credits from Other Institutions.* Admission credits for work done in any college or university are determined by the President of the Normal School. Work completed satisfactorily in any one of the Texas State Normal Schools is fully recognized by the others. Those completing the work of the first year in one Normal School are admitted to the second year class in any State Normal School in Texas, and similarly to other classes; provided, that of the forty-five term-hours required for a certificate, at least fifteen must be made in the Normal School that issues the certificate, and provided also that the entire forty-five term-hours required for Normal diploma must be done in the Normal School that issues the diploma.

CERTIFICATES, DIPLOMAS AND DEGREES.

1. *Freshman, Normal School.* The student completing the work of the Freshman (first year) class receives a first grade certificate valid for six years.

2. *Sophomore, Normal School.* The student completing the work of the Sophomore (second year) class receives a first grade certificate valid for six years.

3. *Junior, Normal College.* The student completing the work of the Junior (third year) class receives a first grade certificate, stating which of the seven courses pursued, and valid for six years.

4. *Senior, Normal College.* The student completing the work of the Senior (fourth year) class receives a diploma and a permanent certificate,

stating the course pursued, which certificate is valid during good behavior.

5. *Certificates.* All certificates are issued by the State Department of Education, and are signed by the State Superintendent of Public Instruction.

6. *Diplomas.* The student completing the work of the Senior class is awarded also the diploma of the College. The diploma states the special course completed. It bears the seal of the College, and is signed by the President.

7. *Degrees.* Upon completion of the College Senior, or sixth year the diploma conferring the degree A. B. or B. S. is awarded the student.

8. *Certificates for Advanced Work.* A permanent certificate is awarded also to those students who complete the College Junior or the College Senior year and have not been granted the permanent certificate before during the course.

9. *State Normal Certificates.* The certificate granted by the State Normal School should not be confused with certificates obtained from summer normal institutes and county boards of examination.

10. *Building.* Certificates granted by the State Normal Schools may be built upon for higher certificates, but the Normal Schools do not grant certificates to applicants by simply "taking the additional subjects" for higher certificates.

11. *High School Work.* Standard high school work may be accepted and not repeated in the State Normal Schools, and students may be allowed to elect other subjects in their stead, but credit for high school work shall not be subtracted from the forty-five term-hours required for issuance of teachers' certificates.

12. *Incomplete Work.* A student who has been in attendance three full terms and who fails in one or more subjects, may be granted the certificate of a lower class at the discretion of the faculty.

13. *Renewal.* A student who has at any time been granted a certificate from a Texas State Normal School, may, upon completion of two-thirds of the work required for the next higher grade of certificate, receive a certificate of the same grade formerly granted him.

14. *On College Credits.* When students transfer academic credits from accredited colleges and attend a State Normal School for work in Education only, they are recommended to the State Superintendent of Public Instruction for a State certificate only, as provided by law.

"An applicant for a certificate must present at least one course in English and one course in Education. The remaining three courses shall be divided among any other three departments of the College. Five departments must be represented in the application. Not more than 120 hours' credit may be presented in any one subject."

DEFINITION OF TERMS.

1. *Term-Hour.* This is the unit of credit. It is defined as one recitation per week (or its equivalent) for one term of twelve weeks, requiring two hours' preparation therefor by the student of average ability.

2. *Equivalents.* The following are recognized equivalents:

a. For the Freshmen and Sophomores, four recitations per week, requiring a total weekly preparation of five hours, are equivalent to three term-hours.

b. Two hours of laboratory work per week, requiring one hour of preparation and subsequent completion of notes, are equivalent to one term-hour.

c. Three hours of laboratory work per week, requiring no preparation and no subsequent work on notes, are equivalent to one term-hour.

d. Subjects requiring little or no preparation for the recitation are given term-hour credits according to the total time required, based upon the principle in the above equivalents.

3. *Majors and Minors.* A major is a subject in which a student does his most intensive work. The major may consist of a minimum of 36 or a maximum of 54 term-hours. A minor may consist of a minimum of 18 or a maximum of 27 term-hours.

4. *The Term's Work.* The work of a term is fifteen term-hours, exclusive of regular assignment in Physical Education.

DEGREES.

1. *Degrees.* There shall be two degrees, the B. A. in Education, and the B. S. in Education.

a. The B. A. degree may be conferred upon the presentation of the required language for admission to the Junior class, and in addition thereto at least two years in a foreign language for graduation.

b. The B. S. degree may be conferred without foreign language for admission or graduation.

2. *Degree Requirements.* Each candidate for a degree must elect one major, a first minor of 27 term-hours, and a second minor of 18 term-hours.

The candidate for any degree must present 18 term-hours of English, 9 term-hours of Social Science, 9 term-hours of a laboratory science, not less than 42 nor more than 54 term-hours of Education, including departmental method courses. The candidate for the B. A. degree must include in his course at least 9 term-hours in mathematics and 18 term-hours in foreign language.

In designating the requirements for the degree, it is meant that the work above the Sophomore, or second year, class shall be standard college work.

3. *Residence.* A residence of three quarters, or thirty-six weeks, is required for a diploma or a degree.

PHYSICAL EDUCATION.

1. *Physical Education.* All students are required to take Physical Education twice a week during the first two years of resident work. A student may elect and count towards a certificate, diploma, or B. S. degree, six term-hours of Physical Education in addition to the two years required.

THE COURSES OF STUDY.

The curriculum is organized into the following seven courses:

1. The *Agriculture Course* for the training of teachers of agriculture and of the biological and physical sciences upon which this great industry and art is based. It especially aims at the preparation of principals of consolidated schools and rural high schools.

2. The *Home Economics Course* to prepare for the teaching of the home arts and sciences in schools of any grade. This course is exclusively for women.

3. The *Manual Training Course* for the preparation of teachers of the manual arts and vocational education.

4. The *Language Course*, in which the student may select Latin, French, or Spanish, for the preparation of teachers of these languages in our public and high schools, and also for those who desire the foundation for higher classical and scientific education, or who may wish the modern foreign languages for the purpose of business and travel.

5. The *Science Course* to supply the need for teachers of mathematics and science in high schools and for departmental teachers and principals of elementary schools.

6. The *Primary and Art Course* to train teachers for the primary and intermediate grades of elementary schools, and more particularly to supply the growing demand for departmental teachers of music and drawing, and supervisors of these subjects in city school systems. This is also exclusively a women's course.

7. The *History-English Course* for the preparation of teachers of history and English in high schools and the higher grades of elementary schools, and for those who desire to divide their attention between science and language.

A student entering the first year or Freshman class should complete any one of these courses in four years. Then he is granted a diploma and a permanent teacher's certificate. Should he desire to continue his work, he is admitted to the Junior College class without condition.

NORMAL SCHOOL DIVISION

OUTLINE OF COURSES.

FRESHMAN GROUP.

Students who present seven admission units, viz.: Algebra 1 or 2, English 2, History 1 or 2, and Electives (see Electives) sufficient to make seven, are admitted to this class.

Students who satisfy the above admission requirements and successfully complete the forty-five term-hours of work outlined below, and in addition have credit for three term-hours in Physical Education, are entitled to a second grade State Normal certificate valid for six years.

Numerals refer to the detailed description of the courses to be found on pages 13 to 20 of this bulletin.

Three term-hours' credit given for each course.

<i>Fall</i>	<i>Winter</i>	<i>Spring</i>
Education 10	Education 10	Education 10 or
English 10	English 11	English 12
History 10	History 11	History 12
Mathematics 10	Mathematics 11	Mathematics 12

Students shall elect nine term-hours from the following:

Foreign Language 10, 11 and 12; Agriculture 10; Biology 10; Home Economics 10; Manual Training 11; Physiography 10; Reading 10; Drawing 10; Music 10.

SOPHOMORE GROUP.

Students who present eleven admission units, viz.: Algebra 2, Geometry $\frac{1}{2}$, History 2, English 2, and Electives (see Electives) sufficient to make eleven, are admitted to this class.

Students who satisfy the above admission requirements, and successfully complete the forty-five term-hours of work outlined below, and in addition have credit for three term-hours of Physical Education, are entitled to a first grade State Normal certificate valid for six years.

The Group Electives are: Agriculture, Home Economics, Manual Training, Language (Foreign), Science, Primary and Art (Drawing, Music, Reading).

<i>Fall</i>	<i>Winter</i>	<i>Spring</i>
Group Elective	Group Elective	Group Elective
Education 20	Education 21	Education 22
English 20	English 21	English 22
History 23	History 24	History 25
Mathematics 20	Mathematics 21	Mathematics 22

Sophomores elect Group Electives as follows: Agriculture 20, 21, 22; Biology 20, 21, 22; Primary and Art, this group; Drawing 20; Music

20; Reading 20; French 20, 21, 22; German 20, 21, 22; Home Economics 20, 21, 22; Latin 20, 21, 22; Manual Training 20, 21, 22; Physics 20, 21, 22; Spanish 20, 21, 22.

Sophomores who begin a foreign language other than Latin take courses designated 50A, 51A, 52A.

The Group Electives must represent nine term-hours in one subject.

DESCRIPTION OF COURSES.

(For more complete outline of each course and each subject see Bulletin No. 60.)

Credit for three term-hours is given for each course.

AGRICULTURE

Agriculture 10. Elementary Agriculture.

Agriculture 20. Economic Farm Pests.

Agriculture 21. Horticulture.

Agriculture 22. Home and School Gardening.

BIOLOGY

Biology 10. Hygiene and Sanitation.

Biology 20 fall, 21 winter, 22 spring. Zoology.

DRAWING

Drawing 10 and Drawing 20 are open to students of the Freshman and Sophomore classes of any course.

Drawing 10.

Cylindrical perspective; object drawing; lettering; plant study; landscapes; design; color theory; construction; picture study.

Drawing 20.

Rectangular perspective; light and shade in object drawing; plant study; tree forms; posters; designs; construction; picture study; problems for the grades.

EDUCATION

Education 10. Introduction to Education.

Education 20. The Learning Process.

Education 21. The Teaching Process.

Education 22. Rural School Problems.

ENGLISH

English 10. Grammar.

English 11. Elementary Composition.

English 12. American Literature.

English 20. English Literature from the Anglo-Saxon to the Augustan Period.

English 21. English Literature from the Augustan to the Victorian Period.

English 22. English Literature of the Victorian Period.

HOME ECONOMICS

Home Economics 10. Elementary Sewing.

Home Economics 20. Household Management.

Home Economics 21. Elementary Sewing.

Home Economics 22. Principles of Cookery.

LATIN

Latin 10.

Review of first year Latin, preparatory to reading of Caesar.

Latin 11.

Caesar's Gallic War, books I and II. Composition daily.

Latin 12.

Caesar's Gallic War, books III and IV. Composition.

Latin 20.

Caesar, selections from other than first four books of Gallic War.

Latin 21.

Cicero's first and second Catiline. Composition.

Latin 22.

Cicero's third Catiline and Manilian Law. Composition work continued.

Note: For students of the History-English course who have not had the Latin prerequisite to Latin 10, courses will be offered in beginners' Latin (Latin 10A, 11A, 12A) and in second year Latin (Caesar, Latin 20A, 21A, 22A), for which full credit will be given in the Freshman and Sophomore courses.

MANUAL TRAINING

Manual Training 11. Bench Work.

Manual Training 20. Mechanical Drawing.

Manual Training 21. Elementary Concrete Construction.

Manual Training 22. Farm Blacksmithing.

MATHEMATICS

Mathematics 10. Elementary Algebra.

Mathematics 11. Elementary Algebra Continued.

Simple equations, simultaneous simple equations, powers and roots, quadratic equations.

Mathematics 12. Plane Geometry, book I.

Mathematics 20. Plane Geometry Continued, books II and III.

Mathematics 21. Plane Geometry Continued, books IV and V.

Mathematics 22. Elementary Algebra Continued.

Simultaneous quadratic equations, ratio, proportion, variation, progressions, binomial theorem, logarithms, complex numbers, cumulative review.

FRENCH

French 10.

Elementary French.

French 11.

Reading, writing, and speaking French.

French 12.

Conversation and written composition.

French 20.

Open to students who have credit for French 10, 11, and 12, or their equivalents. Oral and written composition, reading.

French 21.

Oral and written composition, reading.

French 22.

Reading, grammar, composition.

HISTORY

History 10.

Modern History, 1603-1815.

History 11.

Modern History, 1815-1865.

History 12.

Modern History, 1865 to present time.

History 23.

History of the United States.

History 24.

History of the United States.

History 25.

Texas History.

MUSIC

Music 10. For All Freshman Classes.

This course teaches the development of musical theory, elements of notation, ear-training, scale and interval singing, and sight reading.

Music 20. For All Sophomore Classes.

This work includes the work of Music 10, and discusses the problems of Public School Music from the first to the eighth grade. Especially helpful to students who are interested in chorus singing.

PHYSICAL EDUCATION

Physical Education 10.

(m) Physical drill and games.

(w) Swedish gymnastics, consisting of floor work, games and folk dancing suitable for rural and city schools. One term-hour. Required of all Freshmen.

Physical Education 20.

(m) Theory and Psychology of Play. Gymnastics and games, such as basketball, soccer, football, indoor baseball and volley ball.

(w) Theory and Psychology of Play. Gymnastics and folk dancing, games, such as basketball, soccer football, indoor baseball and volley ball. Required of all Sophomores.

PHYSICS

Physics 20.

Elementary Physics, Simple Machines, Mechanics of Liquids and Gases. Action of Forces, Elasticity and Strength of Materials, Accelerated Motion.

Lectures and demonstrations three hours per week; laboratory work two hours per week.

Physics 21.

Energy and Momentum, Heat, Heat Engines, Magnetism, Beginning of Electricity. Electrical Measurements and Measuring Instruments.

Lectures and demonstrations three hours per week; laboratory work two hours per week.

Physics 22.

Induced Current, Dynamos, Motors and Alternating Current Machines, Sound and Light.

Lectures and demonstrations three hours per week; laboratory work two hours per week.

PHYSIOGRAPHY

Physiography 10. Advanced Work in Physical Geography.

Considerable time is devoted in acquainting students with the use of physical geography apparatus. Repeated each quarter. Three recitations and one laboratory period per week.

READING AND PUBLIC SPEAKING

*Reading 10. Literary Interpretation.**Reading 20. Story Telling.*

SPANISH

Spanish 10.

Elementary Spanish. Reading, writing and speaking Spanish.

Spanish 11.

Reading easy prose. Inductive instruction in the elements of Spanish Grammar.

Spanish 12.

Oral and written composition. Reading. Grammar.

Spanish 20.

Oral and written composition. Grammar.

Spanish 21.

Oral and written composition. Topics of Spanish life. Conversation. Grammar.

Spanish 22.

Study of the customs and institutions of Spanish-America.

TWO NEW DEPARTMENTS.

A Commercial Department, including bookkeeping, penmanship, stenography and typewriting, and a Kindergarten Department for the training of kindergarten teachers will be installed at the beginning of the session in September, 1919.

The courses of study in these new departments will be announced on the organization of the school in September.

NORMAL COLLEGE—DIPLOMA AND DEGREE DIVISIONS

OUTLINE OF COURSES.

Students who present fifteen admission units, viz.: English, 3; History, 2; Algebra, 2; Geometry, 1; Electives (see Electives) sufficient to make fifteen, are admitted to the Junior classes. Two units of Latin are required for admission to Latin classes. Students beginning a modern language take courses designated 50A, 51A, 52A.

Students that elect the History-English Group must present two units of Language or elect 18 term-hours of Language in their course.

Students completing the Junior work and meeting other certificate requirements (see Certificates) are entitled to a first grade State Normal certificate valid for six years. Students completing the Senior work are granted a diploma and a permanent certificate (see Certificates and Diplomas).

DIPLOMA DIVISION.

SYNOPSIS OF COURSES LEADING TO DIPLOMAS AND PERMANENT CERTIFICATES.

Numerals that precede the course names indicate the value of the course in term-hours; those that follow refer to the detailed description of courses to be found on pages 24 to 50 of this bulletin.

NOTES: Students who present fifteen admission units (see Admission) may select any one of the above seven groups.

Electives should be chosen at the time of enrollment. Where courses are continuous the entire sequence must be elected if it is possible to schedule the work.

When a student, through no fault of his own, has become irregular and the courses outlined above cannot be scheduled, substitutions may be made. Such substitutions must be arranged with and agreed to by the head of the department in which the major work is being done. It is understood that no substitutions may be made for English 30, 31, 32, Education 30, 31, 32 or 33, 34, or for the subjects elected as majors. It is desirable that substitutions be made within the department in which the student's regular work is scheduled.

DEGREE DIVISION.

The Normal College offers courses leading to the B. A. degree in Education and the B. S. in Education.

DEGREE REQUIREMENTS.

Specific:

In addition to the general requirements for admission, applicants must present the following for the B. S. degree:

Eighteen term-hours of English, including English 30, 31, 32.

Nine term-hours of Social Science, or Civics.

Nine term-hours of Biology, Chemistry, or Physics.

Forty-two term-hours of Education, including Education 30, 31, 32 or 33, 34.

Additional requirements for the B. A. degree:

Nine term-hours of Mathematics.

Eighteen term-hours of a Foreign Language.

General:

A candidate for a degree must select one major of 36 term-hours, a first minor of 27 term-hours, and a second minor of 18 term-hours.

The head of the department in which the student elects to take his major becomes the student's advisor.

Courses numbered 30 to 49, inclusive, are Diploma and Permanent Certificate courses, and indicate the first and second years of college work. Courses numbered 50 and above do not indicate years and many of them may be elected by first and second year (Junior and Senior) students.

DESCRIPTION OF COURSES.

(For more extensive description of courses see Bulletin No. 60.)

Credit for three term-hours (3 th) is given for each course if no number is indicated.

AGRICULTURE

Agriculture 30. Agronomy.

Agriculture 31. Animal Husbandry.

Agriculture 32. Farm Management.

Agriculture 40. Soils and Their Management.

Agriculture 41. Methods of Teaching Agriculture.

Agriculture 42. Landscape and School Gardening.

BIOLOGY

Biology 30, fall; 31 winter; 32 spring. General Biology.

Biology 50, fall; 51 winter; 52 spring. Human Physiology.

Biology 33, fall; 34 winter; 35 spring. General Botany.

Biology 40, fall; 41 winter; 42 spring. Botany.

Biology 44. Botany.

Growth and structure of timber.

CHEMISTRY

Chemistry 30.

Oxygen, Hydrogen, and Nitrogen, together with some of their compounds, are studied. The laws of Boyle and Charles, the atomic theory and the theory of electrolytic dissociation, the laws of chemical combinations, solutions, chemical equations, neutralization, and valence are considered. 4 th.

Chemistry 31.

The Chlorine family, the Phosphorus family, Sulphur, Carbon, Silicon, Boron and some of their compounds are studied, and some of the rare non-metallic elements receive brief attention. Prerequisite: Chemistry 30. 4 th.

Chemistry 32.

In this is included the study of the metallic elements, their more important compounds and the methods of reducing their ores, and, in addition, some time is given to identifying metallic and acid ions. Prerequisite: Chemistry 30 and 31.

Chemistry 40.

Qualitative Chemical Analysis. In the laboratory the Alkali, Alkaline Earth, Aluminum and Zinc Groups are studied. Prerequisite: Chemistry 30, 31, and 32. 4 th.

Chemistry 41.

A continuation of Chemistry 40. The Silver, Copper, and Arsenic groups are studied, as are the metallic groups in Chemistry 40, and, in addition, the reaction of the acid ions. The Hydrolysis of salts and the theory of complex ions are discussed. Prerequisite: Chemistry 40. 4 th.

Chemistry 42.

Systematic Analysis of the ions studied in the two preceding courses is practiced, and oxidation and reduction are discussed. Prerequisite: Chemistry 40 and 41.

Chemistry 43.

A course in Quantitative Agricultural Chemical Analysis. Standard solutions are prepared and applied in simple analytic processes. Limestone, vinegar, cotton seed meal and wheat bran are analyzed. Prerequisite: Chemistry 30, 31, and 32. 4 th.

Chemistry 44.

This course, a continuation of the Agricultural Chemistry given above, is a course in soil analysis. Soil is tested for its various constituents and for acidity and alkalinity. Soil is analyzed quantitatively for iron, calcium, and phosphorus. Prerequisite: Chemistry 43. 4 th.

Chemistry 45.

A continuation of the Agricultural Chemistry of the two preceding courses. Fertilizers are analyzed quantitatively. Moisture, phosphoric acid, potash and nitrogen are determined.

Chemistry 46.

Introductory course in Household Chemistry.

Chemistry 47.

Continuation of Chemistry 46, and includes the study of type foods, fats, proteins, carbohydrates, etc. The minerals used in foods and household utensils, and the chemistry of fuels, are studied. Prerequisite: Chemistry 46. 4 th.

Chemistry 48.

Continuation of Chemistry 47, and is an introductory course in Biological Chemistry. Fermentation, salivary, gastric, pancreatic and intestinal digestion, etc., are studied. Prerequisite: Chemistry 47. 4 th.

Chemistry 50.

A course in Organic Chemistry. Prerequisite: Chemistry 30, 31, and 32. 4 th.

Chemistry 51.

Continuation of Chemistry 50, which is prerequisite to it. 4 th.

Chemistry 52.

A course in Physiological Chemistry, and is a continuation of Chemistry 48, which is prerequisite to this course. 4 th.

Chemistry 60.

Gravimetric Chemical Analysis. The care and use of the balance, methods of manipulation and theories involved in the processes are discussed. Sodium Chloride, Barium Chloride, Ferrous Ammonium Sulphate, Limestone and Brass are analyzed. Prerequisite: Chemistry 40, 41, and 42. 4 th.

Chemistry 61.

Volumetric Chemical Analysis.

Chemistry 62.

Continuation of Chemistry 60 and 61.

Chemistry 63.

Textile Chemistry, including the study of the properties of the various textiles and tests for the same, dyeing, removal of stains, etc.

GOVERNMENT

Civics 30.

A course in the formation and development of our national government, together with a thorough review of its present methods of operation.

Civics 31.

Continue Course 30 with a study of the operation and function of State government. The last half of the term is given to an exclusive consideration of the government of Texas.

Civics 32.

A course in Commercial Law and the Elements of Business.

Social Science 40.

Introduction to Economics.

Social Science 41.

Modern Economic Problems.

Social Science 42.

Rural Economics.

Social Science 50.

Introduction to Sociology.

Social Science 51.

Modern Social Problems.

Social Science 52.

Social Legislation.

Civics 60.

Introduction to the theory and science of government.

Civics 61.

Comparative Government.

Civics 62.

This course deals with the modern tendencies in government to supervise economic and social life of the people.

DRAWING

Drawing 30, 31, and 32 are prerequisite to the next higher courses for those majoring in the Primary and Art Course.

Drawing 30.

Object drawing, lettering, color theory construction, design and applied design.

Drawing 31.

Art History.

Drawing 32.

Advanced design; composition with landscape motif; careful drawing for plant analysis; pen lettering; advanced still life; book plate; construction problems; problems for grades.

Drawing 40.

Advanced still life compositions; design; landscape; advanced color theory; construction; design.

Drawing 41.

Art History.

Drawing 42.

Advanced work of drawing, 40 continued lesson plans and planning courses for grades.

Drawing 50.

Art Structure. The course in Art Structure stands for: (a) freedom—to use line, tone, color, in expressing your own ideas; (b) power—to appreciate fine qualities of proportion, arrangement and color and to obtain these qualities in your work. Exercises with brush and ink, charcoal, colored crayons, water color. Oriental designs, copies of masterpieces. Wood block or linoleum printing, stenciling.

Drawing 51.

Art History.

Drawing 52.

Advanced Drawing. Drawing and painting from still life; plant life; figure and landscape.

ELECTIVE COURSES IN DRAWING.

Drawing 34.

Public school drawing for the elementary grades. Open to Junior and Senior students of any course. No prerequisites required.

Drawing 31 and 41.

Open to Junior and Senior students of any course. No prerequisites are required for these courses. These courses are a study of the history of the world's masterpieces of architecture, sculpture and painting from their educational and cultural value.

Drawing 33 and 43.

Intended primarily for the students of the Home Economics Course; but may be elected by Juniors and Seniors of any course. No prerequisites are required to enter these courses.

Drawing 33.

Costume design.

Drawing 43.

Art in the Home.

EDUCATION

Education 30. Psychology.

Education 31. Psychology and Pedagogy.

Education 32. Teaching in the Primary Grades.

Education 33. Method in Advanced Grades.

Education 40. Principles of Teaching.

Education 41. History of Education.

Education 42. School Administration.

Education 43. Principles of Supervision.

Education 44. Practice Teaching in the Training School.

Education 45. Child Psychology.

Education 50. Principles of Education.

Education 51. Principles of Education.

Continuation of Education 50.

Education 53. Advanced Child Study.

Education 55. Social Development and Education.

Continuation of Education 54.

Education 56. Educational Psychology.

Education 57. Problems of Secondary Education.

Education 60. Social Ethics.

Education 61. Education in the United States.

Education 62. The Curriculum.

Education 63. Supervision of Instruction in the Elementary School.

Education 64. Rural School Administration and Supervision.

ENGLISH

English 30. Composition.

English 31. Advanced Composition.

English 32. Advanced Composition.

A continuation of English 31.

English 40. English Literature.

English 41. English Literature.

A continuation of English 40.

English 42. The Teaching of English in the Public School.

English 50. Shakespeare.

English 51. English Literature—Romantic Period—1750-1832.

English 52. Victorian Age.

English 53. Victorian Prose.

English 60. Old English.

English 61. Old English.

A continuation of English 60.

English 62. Chaucer.

English 63. Elizabethan Drama.

FRENCH

French 30.

Open to students who present entrance units in French, or who have completed French 50A, 51A, and 52A, or their equivalents. Reading, grammar, and composition.

French 31.

Oral and written composition. Reading of French prose and poetry.

French 32.

French prose.

French 40.

French drama. Close study of "Le Bourgeois Gentilhomme."

French 41.

French drama. Close study of Racine's *Andromaque*. Rapid reading of a number of French plays.

French 42.

Teaching of French. Basic principles of modern language instruction with special reference to high school courses.

French 50A.

Beginners' College French. Open only to students of at least Junior rank who present no entrance units in French.

French 51A.

Conversation and written composition. Grammar.

French 52A.

Oral and written composition, grammar, reading.

HISTORY

History 30.

English History to the end of the reign of Tudors.

History 31.

English History completed.

History 32.

American History from 1492-1750.

History 40.

American History from 1750 to 1829.

History 41.

American History since 1829.

History 42.

Industrial History of the United States.

History 50.

European History of the Eighteenth Century.

History 51.

European History of the Nineteenth Century.

History 52.

American History Since 1877.

History 60.

The Teaching of History.

History 61.

Industrial History of England.

History 62.

The World War.

HOME ECONOMICS

Home Economics "A." Foods.

Elective for Juniors and Seniors not taking the Home Economics Course.

Composition, preparation, cost and cookery of staple foods; serving of type meals; use of food in the body.

Home Economics "B." Textiles and Clothing.

Elective for Juniors and Seniors not taking the Home Economics Course.

Home Economics "C." The Home.

Elective for Juniors and Seniors not taking the Home Economics Course.

*Home Economics 30. Food Preparation.**Home Economics 31. Food Preparation.*

A continuation of Home Economics 30; experimental cookery.

*Home Economics 32. Dressmaking.**Home Economics 40. Millinery.**Home Economics 41. Nutrition.*

Prerequisites: Home Economics 30 and 31 and Chemistry 45.

Latin 43.

Course in Latin Prose Composition with emphasis on the writing of continuous prose.

Latin 50.

Latin poets. Prosody and mythology.

Latin 51.

Latin historians. Prose composition.

Latin 52.

A study of Roman private life.

Latin 60.

Selections from Latin poetry.

Latin 61.

Latin prose writers; selections vary from year to year.

Latin 62.

Continuation of Latin 61.

NOTE.—For students of the History-English course who have not had the Latin prerequisite to Latin 10, courses will be offered in beginners' Latin (Latin 10A, 11A, 12A) and in second year Latin (Caesar, Latin 20A, 21A, 22A), for which full credit will be given in the Freshman and Sophomore courses.

MANUAL TRAINING

Manual Training 30. Mechanical Drawing.

Problems adapted to courses in secondary schools.

Manual Training 31. Machine Drafting.

Study and drawing of machine parts, bolts, threads, etc.

Manual Training 32. Bench Work.

Problems adapted to grade and secondary schools.

*Manual Training 33. Cabinet Making.**Manual Training 34. Wood Turning and Pattern Making.**Manual Training 35. Foundry Work.**Manual Training 40. Advanced Machine Drafting.**Manual Training 41. Architectural Drafting.**Manual Training 42. Blacksmithing.**Manual Training 43. Artsmithing.**Manual Training 44. Cement and Concrete Construction.**Manual Training 45. Method of Manual Training.**Manual Training 50. Elementary Machine Design.**Manual Training 51. Machine Design.**Manual Training 52. Advanced Blacksmithing.**Manual Training 53. Vocational Woodwork.*

- Manual Training 54. Theory and Testing of Concrete Materials.*
- Manual Training 55. Elementary Machine Shop Practice.*
- Manual Training 60. Elementary Machine Shop Practice.*
- Manual Training 61. Machine Shop Practice.*
- Manual Training 62. Machine Shop Practice (Continued).*
- Manual Training 63. Advanced Machine Design.*
- Manual Training 64. Industrial Arts in the Grades.*
- Manual Training 65. Organization of Manual Training.*

MATHEMATICS

Mathematics 30. Trigonometry.

Functions of acute angles, natural functions, logarithms, the right triangle, functions of any angle, function of the sum and the difference of two angles.

Mathematics 31. Trigonometry (Continued).

The oblique triangle, miscellaneous applications, plane sailing, graphs of functions, identities and equations, applications to algebra.

*Mathematics 32. Solid Geometry.**Mathematics 40. College Algebra.**Mathematics 41. Analytics.*

Cartesian co-ordinates, the curve and the equation, the straight line.

Prerequisite: Plane Geometry, Algebra and Trigonometry.

Mathematics 42. Analytics (Continued).

The circle and the equation, polar co-ordinates, conic sections.

Mathematics 43. The Teaching of Secondary Mathematics.

A professional course for teachers of mathematics stressing the pedagogy of the subject with many references to the history of the subject.

Mathematics 50. Analytics.

Tangents and normals, line and conic, loci, general equations of second degree, Euclidean transformations, inversion, poles and polars.

Mathematics 51. Solid Analytics.

Cartesian co-ordinates in space; surface, curves and equations; the plane; the straight line in space; special surfaces; transformation of co-ordinates; quadratic surfaces.

Mathematics 52. History of Elementary Mathematics.

Mathematics 60. Differential Calculus.

Mathematics 61. Differential and Integral Calculus.

Mathematics 62. Differential and Integral Calculus (Continued).

MUSIC

Music 30.

For students wishing to teach and supervise music in public schools.

A regular course in Public School Music is here begun, covering the work of Music 10 and presenting the problems of the first, second and third grades.

Music 31.

Preceded by Music 30, continuing the course of Music in Public Schools and discussing the problems of the fourth and fifth grades.

Music 32.

Preceded by Music 30 and 31, and continuing the work of Public School Music to the close of the seventh grade.

Music 40. Ancient and Mediaeval Music.

A course open to all students who wish to study music from a cultural as well as technical standpoint. This course is planned to prepare teachers to present in an intelligent manner the work of appreciation of music for which there is such a growing demand in the schools of our country.

From the earliest music to the eighteenth century. Chorus singing and Victrola illustrations.

Music 41. Preceded by Music 40.

Continuation of the study of music from the eighteenth century to the middle of the nineteenth century. Chorus singing and Victrola illustrations.

Music 42. Preceded by Music 40 and 41.

Modern composers and their work. Programs of their music are given by the class. Continue Victrola illustrations.

Music 50.

Harmony and ear-training. Major and minor scales; circle of keys; chords of three tones; inversion; close and open harmony; intervals; cadences.

Music 51.

Harmony and ear-training. To be preceded by Music 30. Melody formation; harmonization; dominant seventh chords; harmonic and melodic progressions; dominant ninth chord. One term-hour.

Music 52.

Harmony and ear-training. To be preceded by Music 51. Demonstration of intervals; examples of cadences; harmonic analysis; original exercises. One term-hour.

PHYSICAL EDUCATION

The course in Physical Education aims to maintain and promote the health of the students, and to aid them in the formation of habits of hygienic living; to give them the knowledge necessary for intelligent teaching of school gymnastics and supervision of outdoor play and games.

Systematic instruction is given concerning the means for keeping the body in health, for maintaining normal progressive growth and development, for securing grace, in posture, carriage and action.

Physical Education 10 and 20 are required of all classes, and in all courses, for the first two resident years, additional work is elective. Classes meet twice a week for a minimum of twenty-four weeks, exclusive of the time devoted to physical examinations. The number of weeks depending upon the nature of the work.

All athletic sports are opened to all students registered in the College. First term, football and tennis; second term, basketball and tennis; third term, baseball, tennis and track sports. The requirements are the same in number of units, for men and women, though the kinds of exercises and sports differ.

Those who desire advanced work in Physical Education, leading to a certificate in Physical Education, are required to complete four additional advanced courses, one of which must be hygiene. The other three courses to be elected from Physical Education 30, 32, 40, 41, 42, 43, 44, 45.

A certificate as teacher of Physical Education will be granted to those who complete the four-year course in conjunction with the courses in Physical Education which included the two years of residential work and the additional four courses of advanced work.

All students are required to wear the regulation gymnasium suit.

Physical Education 30.

Anthropometry.

Physical Education 31.

Hygiene.

Physical Education 32.

- (m) History and Literature of Physical Education and Athletics.
- (w) History and Literature of Physical Education.

Theory and practice of track athletics.

Physical Education 45.

(w) Advanced folk dancing.

PHYSICS

Physics 33.

This course is designed for the students of the Home Economics Department, and teaches the principles of physics as applied in the home. Illustrative examples and applications are taken largely from the home, and the common system of weights and measures is used. School and home are thus united in the acquisition of knowledge that will be used in every-day life.

Physics 34.

Continuation of Physics 33.

Physics 40.

Prerequisite: Physics 20, 21, 22, or the equivalent.

Mechanics, including Vector Analysis, Force and Torque, Energy, Transformation, Moment of Inertia, Machines, Power, and the Kinetic Energy of Rotating Masses. Heat, including Calorimetry, Kinetic Theory of Gases, and Thermodynamics. 4 th.

Physics 41. Electricity and Magnetism, Including Electrostatics, Electro-magnetism, Electrical Measuring Instruments; Electro-magnetic Waves, and Alternating Generators.

Physics 42.

Sound and Light, in which Optical Instruments, Dispersion, Color Phenomena, and Polarization of Light will receive special emphasis. 4 th.

Physics 43.

Study of gas engines, electric generators and motors, including principal types, methods of winding, connections, care of parts, troubles, etc. Electric lighting and wiring, including power consumption and cost, efficiency of various types of lamps, requirements of insurance

underwriters, etc. Storage batteries, switchboards, and power installation.

Physics 60. Electricity and Magnetism.

Physics 61.

Continuation of Physics 60. 4 th.

Physics 62. Light.

READING AND PUBLIC SPEAKING

Reading 30. Philosophy of Expression.

A detailed study is made of toning, emphasis and the method of preparing and delivering a selection.

Reading 31. Philosophy of Expression.

This course is a continuation of Reading 30.

Reading 32. Philosophy of Expression.

This course is a continuation of Reading 31.

Reading 33. Poetic Interpretation. Elective.

An expressive study is made of English poetry.

Reading 34. Poetic Interpretation. Elective.

This course must be preceded by Reading 33.

An expressive study is made of American poetry.

Reading 35. Prose Interpretation. Elective.

This course must be preceded by Reading 34.

An expressive study is made of English and American prose.

Reading 40. Advanced Interpretation.

A study is made of impersonation and the tone, color and form of the voice as an interpreter of mental states with discussions of the artistic principles involved.

Reading 41. Advanced Interpretation.

This course is a continuation of Reading 40.

Reading 42. Advanced Interpretation.

This course is a continuation of Reading 41.

Reading 43. History of Oratory and Forensic Oratory. Elective.

This course includes critical study and practice in delivery of famous orations with lectures on the life and period of the orator.

Reading 44. Extemporaneous Speaking and Original Oratory. Elective.

This course must be preceded by Reading 43.

The student is given practice in speaking extemporaneously on selected topics and in the composition and delivery of original orations.

Reading 45. Debate and Argumentation. Elective.

This course must be preceded by Reading 44.

A detailed study is made of the principles of argumentation and debate. The student is required to participate in class debates.

Reading 50. Dramatic Interpretation.

The student is first given lessons in expressive physical culture and gesture. The laws underlying correct impersonation are carefully studied.

Reading 51. Dramatic Training and Pantomime.

This course must be preceded by Reading 50. Lectures are given on make-up and the technique of the drama. Each student is required to present an original pantomime.

Reading 52. Dramatic Art.

This course must be preceded by Reading 51.

This course includes the intensive study and dramatic presentation of representative modern standard plays, following the order of development of the drama. Plays are studied in their two-fold relation as dramatic art and literature. As prospective teachers, students are given training in how to produce entertainments of all kinds.

SPANISH

Spanish 30.

Open to students who present entrance units in Spanish, or who have completed Spanish 50A, 51A, and 52A, or their equivalent. Composition. Reading. Grammar.

Spanish 31.

Composition. Letter writing. Sight reading.

Spanish 32.

Composition. Outline of Spanish literature.

Spanish 40.

Study of the Spanish novel. Lectures.

Spanish 41.

Spanish novel and drama. Lectures.

Spanish 42.

Spanish drama. Lectures.

Spanish 50A.

Beginners' College Spanish. Open only to students who present no Spanish entrance units.

Spanish 51A.

A continuation of Spanish 50A.

Spanish 52A.

A continuation of Spanish 51A. A study of Spanish life. Conversation. Grammar.

Spanish 51.

The Spanish-American novel.

Spanish 52.

The teaching of Spanish.

Spanish 60.

Spanish classical prose.

Spanish 61.

A continuation of Spanish 60.

Spanish 62.

The Picaresque Novel.

DEPARTMENT OF PIANO.

MISS ANDERSON.

Elementary.—Course in Hand Culture: Kohler, Practical Method, Mathews' Graded Course, books I and II; Braur, Op. 15; Lemoine, Op. 37, etc.; Sonatinas by Clementi, Dussek, Kuhlau; lighter compositions by classic and modern composers.

Intermediate.—A limited number of studies by Berens, Duvernoy, Doring, Heller, Czerny, Loeschorn, Bach, etc. Sonatas and compositions by Haydn, Mozart, Beethoven, Schumann, Mendelssohn, Chopin, Grieg and others.

Advanced.—Studies from Bach; Three-part Inventions; Cramer von Bulow, continued; Czerny, Dexterity; Bach, Well-tempered Clavichord; Clementi, Gradus ad Parnassum, etc. Concert compositions by classic and modern composers.

Recitals will be given from time to time to accustom pupils to playing in public.

Terms.—Per month, two lessons a week, one-half hour each, \$8.00. Half time, \$5.00.

The Department of Piano is not maintained by the State, and the salary of Miss Anderson is not paid by the Board of Regents; hence the tuition for lessons on the piano is not included in the regular Normal fees.

While no one is required to take piano music for a certificate in any one of the seven courses offered, still one unit of credit is given for three full terms' work on piano.

Instrumental music is not provided for in the appropriation for the school. It is not required in any one of the seven courses offered, but many students each year wish lessons on piano. To accommodate these Miss Anderson is provided with a studio by the school. The tuition fees for piano music are paid to her and constitute her whole compensation.

The authorities of the College heartily recommend Miss Anderson as a competent and skillful teacher.

REGULATIONS CONCERNING INTERCOLLEGIATE ACTIVITIES.

Students are disqualified to represent the Normal College in intercollegiate games or contests, or any extraordinary student activity by the following conditions:

1. Failure to make a passing grade in at least three subjects of the full regular course in which the student is registered.
2. Being "under discipline."
3. Being the beneficiary in actuality or promise of any financial consideration for participation in such game, contest or activity.

Disqualification under (1) and (2) may be removed at any time by the teacher or committee responsible for such disqualification, when the occasion therefor has been removed by the student.

THE LYCEUM COURSE.

The Normal has always maintained a strong course of lectures and entertainments, each year securing the best available talent. Men and women of national reputation, famous as leaders in public life, noted artists, musicians, and writers, have been secured, who have contributed much to the student's realization of the college purpose of helpfulness and spiritual life.

THE TEACHERS' RECOMMENDATION COMMITTEE.

A committee of the Faculty, without fee or compensation of any kind, acts as a teachers' bureau for the purpose of aiding worthy students in finding employment upon leaving school and assisting school boards in finding competent teachers. The committee places every year several hundred teachers. Its services to school boards have proven satisfactory, and it receives applications from school officials every week in the year.

Any communication concerning the work addressed to the President or the Secretary of the school or to the chairman of the Committee on Recommendations will receive prompt attention.

STUDENT ACTIVITIES.

Every modern college now recognizes the educational value of various kinds of student activities. These activities furnish opportunity for social education in leadership and loyalty and provide training in the

application of theory in the school room for the practical conditions outside. They satisfy a natural craving for social intercourse which it would be stupid for any college to oppose.

The College has adopted and has adhered to the policy of encouraging a wide line of student activities, literary, forensic, dramatic, athletic, social, journalistic, artistic and spiritual. These activities are not left to or thrust upon the sole responsibility of students, but they are under the sympathetic and directive influence of committees of the students and Faculty.

Literary Societies.—The school supports several literary societies: The Mary Arden and Current Literary Societies for women, the John H. Reagan and Robert E. Lee Literary Societies for men. The women's societies meet bi-weekly, and the men's societies have weekly sessions.

The Mary Arden Club is limited to membership of 40, and gives preference to advanced students. It was organized for the study of Shakespeare, but each session it devotes some time to some modern author or studies some problem of present importance.

The Current Literature Club, larger in its membership, stimulates the study of the highest grade of modern literature, and also attacks questions of social and civic importance. Both of these clubs are "federated" with other women's clubs of the city and State.

The Reagan and Lee Literary Societies for men seek the development of qualities of manliness and loyalty, as well as training in debating, declamation, and parliamentary practice. These two societies have no meetings during the summer sessions, but all members of both societies and other men in the school join during the summer session in the Henry W. Grady Literary Society.

For the purpose of intercollegiate contests, the men's societies are combined into an oratorical association. Under the auspices of this organization, the school is a member of the Texas Normal College Debating League, in which each of the normal schools meets in annual debate two of the sister institutions. The annual debates occur simultaneously at the Normals, the same question being discussed at both places, and each school supporting both sides of the question, taking the affirmative side at one place and the negative side at the other. The school is also represented in the State Peace Oratorical Association.

Student Publications.—Elected representatives of all the classes in the school constitute the Press Club, which issues a weekly publication, "The Campus Chat," a quarterly, "The Avesta," and an annual, "The Yucca." The editor-in-chief of "The Campus Chat" and "The Avesta" is elected by the board of associate editors, who are elected by their respective literary societies.

The editor-in-chief of "The Yucca" is elected by the entire student body. The office is esteemed the highest honor in the gift of the students, and the election is contested in the typical American college fashion. The business manager of the publication is elected by the Faculty.

"The Campus Chat" and "The Avesta" furnish a repository for the best products of student literary effort and a record of current events in the school. "The Yucca" is an illustrated year-book of college life

and activities. These publications are invaluable to the school, for the associations formed during the year serve as much to enrich the later life of the student as his formal work in class room, library, and laboratory, and it is the human side of the school that gives these tasks a life meaning.

Correspondents' Club.—This student activity is of great usefulness to the school. The students coming from certain counties or groups of counties have for some years been organizing for social purposes into county or section clubs. These clubs elect certain members correspondents of home or county papers, whose duty it is to send every month a news letter giving the main happenings at the College. These letters are primarily of interest to the families and friends of the students. It affords fine training to those members who prepare articles for these papers.

Sketch Club.—The Sketch Club is composed of a group of students who have some artistic ability, and who are interested in drawing and painting, and who want to give more time to the work than the class period affords.

Musical Organizations.—The fundamental musical organization of the school is the Choral Club. A chorus is made up of students who can read music fairly well at sight. It meets for practice twice a week throughout the year. A varied selection of musical masterpieces, consisting of modern part songs, and selections from oratoria and opera are studies. While concerts are given from time to time during the year, the most important feature of the chorus is the May Festival, which constitutes a leading part of the Commencement Week program. A credit of one unit is given for regular attendance and conscientious work. The Musical Club for Young Women and the Glee Club are two popular organizations for women and men, respectively. Each consists of about fifty voices. Fluent reading at sight is required for membership in either. Recitals and musicales are given throughout the year. Besides the musical members that enrich the literary and devotional programs of other organizations are largely the fruit of the work of these clubs.

The *Normal Band* has proved one of the most successful of the student organizations. The school owns its instruments. In addition to the twenty trained players constituting the regular band, classes of beginners are given instruction and practice.

Athletics.—It is the duty of every school to provide opportunity for physical as well as mental and moral development. Besides the regular courses in physical education, the inter-class and inter-school contests are aimed primarily to increase the student's capacity for mental effort, for moral stamina, and for social service. Competitive athletic games with schools of equal rank are made part of the athletic program. But since intercollegiate games do not afford the opportunity of participation to the majority of students, great stress is laid upon competition between classes and other groups. In this way it is hoped the entire student body may be reached by invigorating influence of strenuous play. The school owns about five acres of land prepared for baseball,

basketball, tennis, volley ball, and other games. The athletic interests are safeguarded by a committee of the Faculty and by an association of students. Representatives of both bodies form the Athletic Council, whose duty it is to keep athletic interest in the school, not only alive and healthy, but sane and intelligent as well.

Young Men's Christian Association.—The Young Men's Christian Association was organized in the school three years ago, and has steadily gained in influence. During each year about one hundred have been enrolled as active members. Delegates have been sent each year to the western or southern encampments as well as to the meetings of the State association. Weekly devotional meetings are held for an hour on Thursday evenings. Speakers with vision and messages, both from within and without the school, then address the men and set up ideals of manliness and service. It is hoped in the near future to secure the services of a special "secretary," who shall devote his entire time to the work. Some special lines of study may then be organized under the auspices of the association in mission work, philanthropy, and Bible study, to put the student in touch with these great movements in the world.

Young Women's Christian Association.—The Young Women's Christian Association has been organized in the North Texas State Normal College for three years. It is the largest student organization of the College, enrolling during the past session over 460 members. The Young Women's Christian Association employs a resident secretary, who devotes her entire time to the welfare of the girls of the institution. The Association is open to members of all churches, and offers associate membership to those who belong to no church at all. The aim of the Association is to unite the young women of the institution in loyalty to Jesus Christ, to serve as a connecting link between the students and the local churches, and to help build up the social life of the students. The Association has a well furnished rest room in the Science Hall. This is open to the students at all times. Weekly meetings are held on Wednesday evenings. Membership dues are \$1.00 per calendar year.

TERM REPORTS.

At the end of each term of twelve weeks a report of the work of the student for that term will be sent to the parent or guardian.

EXPENSES.

Tuition is free.

Each student enrolling in the school during the regular nine months' session shall pay an incidental fee of \$15.00 upon entrance, and no other fees or charges shall be levied against or collected from any student, and each student is entitled to the free use of text-books furnished by the school, which books, if returned in satisfactory condition at a time designated by the President, shall entitle the student to a refund of \$2.00.

The payment of this fee of \$15.00 is to be made by the student upon entrance to the school. It is the only fee paid during the session of

nine months. There are no additional fees for library, books, laboratory, Manual Training, Domestic Science, etc.

The student is furnished all text-books except the English classics used in the supplementary work of the English Department. It is best for the student that he own these classics and that he keep them, with his notations, for use when he teaches English himself.

The fee is \$15.00 whether the student enters at the beginning of the session or near the close of the session, whether the student continues in school for the entire session or only a few days of the year. No part of the fee is refunded except \$2.00 upon prompt return of books. In order to be entitled to the refund of \$2.00 the student must return the books used by him at the time designated for their return.

No one should ask exemption from or modification of the fee or its conditions. Neither discretion nor authority is given the President of the school to alter the terms or conditions of its payment.

BOARDING PLACES AND RATES.

The school has no dormitory. In proximity to the school there are between one hundred and fifty and two hundred good boarding and rooming houses. Each year the number of boarding houses is increased and the conveniences improved. Nearly all these houses have electric lights, sewerage, hot and cold water appliances, and are screened, while many have natural gas for cooking, heating and lighting.

Students are permitted to select from an *approved* list their own boarding places. Frequent changes for trivial causes are discouraged and students, after the first ten days, may change their places of residence only with the consent of one of the deans of the Faculty, who have charge of all matters pertaining to board.

Men and women students must have separate boarding and separate rooming houses.

A list of *approved* houses is furnished each student upon arrival at the school. No student is permitted to engage board at a house not on this list. Such list cannot be furnished the student in advance of arrival, because (1) frequent changes and additions made in houses near the beginning of the session render it impracticable to make a complete list; (2) such list would convey no useful information to one unacquainted with the topography of the town, and (3) it is not necessary for students to engage board in advance, there being always ample accommodations regardless of the number of students. Reports have at times become current that all boarding places have been filled before the beginning of the session or very soon thereafter. No student has, in the history of the school, been forced to leave for lack of board, and such report in future, if heard, should be promptly discredited.

Board and rooms cannot always be secured in the same house. More than half the students secure rooms at one place and meals at another. Because numerous houses make special provision for furnishing meals to large numbers, frequently more satisfactory conditions can be found by not insisting on having meals and rooms at the same place.

Approved Houses.—An approved boarding house is one that co-operates with the school, enforces the regulations concerning the conduct of students, exerts a good influence over the students, treats them kindly, but firmly, and affords good board with sanitary conditions.

Whenever it is found that the proprietor of a boarding house does not meet the requirements of an "approved house," fails or refuses to enforce the regulations and to report violations, the students are removed from such house.

All persons desiring to take Normal students as boarders must apply to the school in writing, stating the number of boarders desired, whether men or women, stating whether they offer rooms or meals, or both, giving rates in each case, and specifying the conveniences offered.

If upon application a boarding house is approved, it is placed on the approved list and the proprietor is furnished a printed copy of the regulations of the school.

Rates of Board.—During the past session board, including room, meals, fuel, lights, etc., varied from \$18.00 to \$22.00 per calendar month. It is hoped that the rates will not be advanced, but much depends upon war conditions. At any rate, board will be as cheap here as at any other place in the State.

GOVERNMENT.

Those entering a Normal School are expected to be of sufficient maturity and to have come with a purpose so serious and definite that espionage is unnecessary. By far the greater number of students who come here are eager, earnest and industrious young men and women, who cheerfully comply with all regulations. But experience has demonstrated the necessity of having well defined regulations concerning the conduct at school and at the boarding places, for the guidance of those whose inclination or whose judgment renders proper direction necessary.

Upon matriculation the student is given a printed copy of the regulations concerning the conduct of students, and he is requested not to register if unwilling to conform to the requirements. Whenever a student wilfully violates the regulations, ignores the efforts of the Faculty to assist him in his character building, manifests a spirit of insubordination to authority, or shows himself out of harmony with the school and its ideals, he is advised that he is not in the right school and is requested to withdraw.

Continuance in school depends upon punctual class attendance and obedience to regulations. Students who must continually be admonished, restrained, reprimanded, or denied the usual privileges, are undesirable, and they will not be retained in the school.

The purpose of the school is to train teachers for the public schools of Texas, and it should not inflict upon the children of the State as teachers those whose character, habits of thought, or low ideals unfit them for directors and exemplars of the young.

To all those who are seeking opportunity to work under wholesome influences, favorable conditions, competent and sympathetic direction, is extended a hearty welcome. Those who are merely seeking diver-

sion, change of environment, or increased social advantages, and those incapable or unwilling to lead the life of a student are advised—urged—to go elsewhere.

DIRECTIONS TO STUDENTS APPLYING FOR ADMISSION.

Students should note the requirements for entrance, and understand that the school has no authority to admit them without implicit compliance with the directions of the Board of Regents. Students should not write asking that in their cases requirements be not enforced on account of their age, experience, or other reasons, for no such request can receive consideration.

Students should remember that the requirements for entrance and for certificates are the same in all the Texas State Normal Schools.

Credentials, certificates of promotion, etc., upon which entrance examinations are sought to be absolved must be documents signed officially by the proper authority.

Credentials, statements, certificates of promotion, to receive consideration, must be from—

(a) High schools affiliated with colleges or universities previously named.

(b) High schools approved by the State Department of Education.

Students desiring to enter on examination, on certificate, diploma or promotion card from accredited high schools should report at the beginning of the session, and avoid trouble and delay in classification.

Credits are given only for full term's work. Students entering late in the term find difficulty in being classed promptly and making up the work already done by the class.

Students should not request exemptions not mentioned in the bulletin, as the school is without authority to grant such requests.

Diplomas, promotion cards, statements, etc., from schools not duly accredited should not be urged as exemptions from examination.

THE TRAINING SCHOOL.

In connection with the Normal School proper is conducted a school of nine grades. The purpose of this school is to afford the Normal students the opportunity of observing the organization, conduct, control, instruction, and other details of a model public school, and to give students actual practice and experience in teaching under expert direction.

The experience thus acquired is far more helpful and valuable to the teacher than that gained in the usual haphazard methods upon which the young teacher depends when he starts out for himself either in the grades or in the rural schools.

The completion of the work of the ninth grade in the Training School admits the students to the Freshman class of the College without examination.

Until a more commodious building and a greater number of teachers

can be provided by appropriation, each teacher, except that of the first grade, will have charge of two grades. All these are experienced and trained teachers. A technically trained and experienced director is in charge of the entire instruction.

The Training School is designed to give the students of the Normal College careful training in the art of teaching in the grades. Each student in the Normal School department is required to teach at least one term before graduation, under the supervision and instruction of the director and the training teachers.

The different members of the Normal School Faculty and the teachers in the Training School give "model" recitations with criticisms and discussions of the work in the different subjects.

In some cases the daily observation and criticism of classes followed by oral or written discussion, or both, may be substituted for a term of teaching by the student.

While actual teaching in the Training School is required only of members of the Senior class, members of the other classes are required to do observation work, prepare lesson plans, etc. Each student teacher is required to prepare lessons plans a week in advance of the work, which plans are examined, criticised, and, when necessary, revised by the director or training teachers. The conduct of recitations by the student teacher is observed by the training teacher, and helpful criticisms given in private.

Students of the Normal School department are also appointed to superintend the playground of the Training School during recess periods.

THE SUMMER TERM.

In the summer term of the North Texas State Normal two distinct schools are maintained, "The Summer School" and the "Summer Normal." Students of the different schools are taught in separate classes and do different classes of work. Students of the Summer School are applying for "credit" towards certificates or diplomas of the institution. Students of the Summer Normal review the subjects for examination for certificates issued by the State Superintendent of Public Instruction.

The general purpose of the summer session is to meet the demands and to reach the students that cannot be met during the regular session. There are in all sections of the State many teachers who, despite limited preparation, are doing good work in the cause of education. These teachers, barred by circumstances often from the advantages of college or normal schools, desire to broaden their scholarship, and increase their efficiency in school work. It is to this class that the summer session appeals. To these are offered the advantages of a large and competent faculty of specialists, the library, laboratories, apparatus, and equipments of the Normal College.

The Summer School Section.—The student registering in the summer school section does "credit work" towards a certificate or diploma

of the school. The work of a summer term corresponds practically to that of a term of the regular session. The first summer the student attends he takes the work as outlined for the first term of the regular session in the course he elects, and similarly for each subsequent term.

The work of the Senior (fourth year), the Junior (third year), and the Sophomore (second year), in all seven courses is planned regularly as in the regular session. The work of the Freshman (first year) class may be taken with the summer normal section and in classes organized for "conditioned" students so as to prepare for entrance to the Sophomore class.

At the close of the summer session examinations are given for entrance to all classes of the regular session.

The Summer Normal Section.--For those who register in the Summer Normal section is offered a review of subjects required for the different grades of State certificates. The work of this section is conducted in compliance with directions of the State Superintendent of Public Instruction, and the summer normal examinations for certificates conducted at such times as he designates.

The advantages offered teachers during the summer have been realized and appreciated, as evidenced by the increased attendance from year to year. The summer session of 1917 enrolled 1768 students.

SUMMER SESSION 1919

June 10 to August 15.

ADMINISTRATIVE OFFICERS.

W. H. BRUCE.....	President
W. D. BUTLER.....	Dean
P. E. McDONALD.....	Conductor Summer Normal
MISS EDITH L. CLARK.....	Dean of Women
MISS CLARA M. PARKER.....	Associate Dean of Women
J. W. SMITH.....	Secretary-Treasurer
A. C. MCGINNIS.....	Registrar
WM. W. WRIGHT.....	Bookkeeper
MISS EVELYN WELLS.....	Secretary to President
MISS GERTRUDE WEAR.....	Assistant Secretary
MISS LILLIE MAE REEDER.....	Assistant Registrar
MISS MAE CARR.....	
MRS. PEARL C. MCCracken.....	Librarian
MISS HIXIE PITTMAN.....	Assistant Librarian
MISS OLIVE HALBERT (Waco).....	Assistant Librarian

FACULTY.

W. H. BRUCE, A. M., PH. D., LL. D.....	President

ROLL OF TRAINING SCHOOL STUDENTS, 1918-19

FIRST GRADE

Barns, Regina Mann	Harris, Robert B.	Simmons, Susan Jane
Bell, Ina Mae	Legett, Imogene	Smith, Miller
Blackburn, Clark	Legett, Mary	Swenson, Andrew
Burgoon, Mary Elizabeth	Mahan, Wilbur	Taylor, Willie Lee
Deavenport, Frances Mae	McCrary, Della Louise	Underwood, Mary
Dowell, Helen Margaret	Petty, Gladys	Wright, Berry Bell
Edwards, Mary Jane	Schweer, Catherine	Yerby, Elaine

SECOND GRADE

Anderson, Erwin	Hudspeth, Bill	Vitz, Elise
Barns, Gladys	Martin, Catherine	Walden, Herbert
Bellah, Miriam	Smith, Robert	Whitehead, Wendell
Burgoon, Claude	Stanley, Allie	Wilcoxon, Monia
Caldwell, Alice	Sullivan, Wilana	Wilkins, Frances
Grant, Irby	Taliaferro, Edra	Wright, Noble

THIRD GRADE

Barton, Velma	Davis, Rebecca	Smoot, Charles
Bellah, William	Fry, Margaret	Smoot, Homer Boone
Blewett, Joe Floyd	Jones, George	Speer, Catherine
Chrislip, Margaret	Kerfoot, C. W., Jr.	Sutton, William
Collins, Charleen	Klepper, Marguerite	Underwood, Wesley
Cunningham, Mattie Bell	Smith, Emory	Wright, Gober

FOURTH GRADE

Caddel, Marion	Hooper, Jewell Catherine	Marquis, Robert
Christal, Richard	Keith, Wendell	Nix, Pauline
Clement, Thelma	Legett, Jesse H., Jr.	Skaggs, Winnie
Evers, Lotta	Looney, Ruth	Smith, Dorothy
Fry, Jim Holloway	Mahan, Frank	Underwood, Lois
Goad, Alyne	Marquis, Richard	Wright, Helen Neely

FIFTH GRADE

Barrow, Cassie May	Graham, Verda	Rains, R. K., Jr.
Bates, Louise	Johnson, Cecil	Shepard, Harwell
Clayton, Ella Margaret	Marriott, Rhea	Stout, Myron
Craver, Willie Janelle	Myers, Maries	Taliaferro, Evelyn
Curtis, Boyd	Orr, Thelma	Wright, Eulallie
Drake, Bob E.	Poole, Laurence	Yerby, Weldon

SIXTH GRADE

Barrett, Mozelle	Davis, Lloyd	Speer, Lon A., Jr.
Bellah, Roswell	Edwards, William C., Jr.	Underwood, Frederick
Blair, Lora	Floyd, Dora Thelma	Watkins, Annie Bess
Blewett, Mary Margaret	Huffhines, Leah	Wilkins, Eugene
Cannon, Annie Laura	Lomax, Robert	Willis, Helen
Clement, Annie Bell	Jones, Owsley	Wright, Alleen

SEVENTH GRADE

Bailey, Helen	Hassell, Vera	Smoot, Elaine
Blair, Nina	Mahan, Hazel	Swinebroad, Arra
Caddel, Harry	Simmons, James	Wilkins, Charles
Chrislip, Mary	Sims, Beno	Williams, Julia
Christal, Nancy	Smith, Margaret	Woodward, Frances
Crawford, Jack	Smith, Ruth	

EIGHTH GRADE

Bellah, Louise	Keith, Lowell	Richardson, Louise
Blewett, Roberta	Lomax, Elizabeth	Smith, Willis
Cannon, Margaret	Long, Frances Mae	Terry, Florence
Crawford, Ruth	McGaughey, Lois	Tomkins, Lucius
Davis, Thomas	Peters, Cassa	Van Cleave, Merle
Jones, Arthur	Reynolds, Mary	Wright, Mary E.

NINTH GRADE—GRADUATES

Blewett, Gladys	Graham, Norma Woodie	Underwood, M. A.
Bradley, Mayme Jack	Pool, Christal	Wiley, Margaret L.
Cox, Carol	Smith, Julia	Williams, C. A.
Edwards, Virginia	Stout, Louise	
Fullingim, Vala	Underwood, Carl	

	Boys	Girls	Total
First Grade.....	5	16	21
Second Grade.....	8	10	18
Third Grade.....	10	8	18
Fourth Grade.....	7	11	18
Fifth Grade.....	8	10	18
Sixth Grade.....	8	10	18
Seventh Grade.....	5	12	17
Eighth Grade.....	6	12	18
Ninth Grade.....	2	11	13
Total.....	59	100	159

Aiken, Lucy Lee	Hood
Albright, James	Delta
Albright, W. F.	Navarro
Aldredge, Charles	Denton
Aldredge, Ruby	Denton
Alexander, Mrs. Edna	Tarrant
Alexander, Gladys	Hopkins
Allen, E. P.	Ward
Allen, Glen	Montague
Allen, O. F.	Van Zandt
Allen, Rose A.	Collin
Allen, S. T.	Van Zandt
Allgood, Muriel	Denton
Allison, Mamie	Hood
Allred, Elizabeth	Hill
Alston, Ruby Evans	Eastland
Alsup, Alma	Bosque
Alsup, Erna	Bosque
Alsup, Mrs. Freda	Bell
Alsup, J. D.	Bell
Amerson, Bertha Lea	Titus
Amerson, Letha Pearl	Titus
Amos, Charlcie	Denton
Amos, Minnie	Denton
Anderson, Evelyn Loraine	Navarro
Anderson, J. S.	Smith
Andrews, Ethel	Tarrant
Andrews, Hallie	Collin
Andrews, W. C.	Hunt
Armstrong, Marion	Montague
Arnold, Edna Milton	Coleman
Arrington, Ada	Bosque
Arthur, Christine	Denton
Arthur, Jodie	Dallas
Atkins, E. L.	Denton
Austin, Mary Avis	Ellis
Baggett, Winnie	Ellis
Bailey, Corrynne	Kaufman
Bailey, N. B. D.	Shelby
Bain, Vivian Opal	Navarro
Baird, Edna Mae	Denton
Baird, Ruth	Denton
Baker, Annie Belle	Anderson
Baker, Eris	Cooke
Baker, Mary Ellen	Tarrant
Baker, Ray N.	Denton
Ball, Bessie	Johnson
Ball, Essie	Denton
Ball, Fairy	Johnson

Name	County
Ball, Kate	Denton
Ball, Lola	Montague
Ball, Lorine Adell	Collin
Ballard, Eula May	Wood
Ballard, Loney	Denton
Bambuch, J. F.	Fayette
Barnes, Pauline	Navarro
Barnhardt, Almeda Lois	Hunt
Barrett, Maurine	Denton
Barrow, Mary Margaret	Denton
Barthold, Rosa Mae	Denton
Bartley, Ruth	Parker
Barton, Alma	Hill
Barton, Lillie	Hood
Bass, Coye	Camp
Bates, Rema	Clay
Batson, Ina	Leon
Bauer, Barbara Vater	Denton
Bauer, Sophia Mary	Grayson
Beale, Georgia	Denton
Bean, Carrie	Parker
Beard, Laura H.	McLennan
Beasley, Ethel	Johnson
Beatty, Amy	Hamilton
Beauchamp, Jewel	Johnson
Beck, Leona	Van Zandt
Bedford, F. G.	Parker
Bell, Thelma	Denton
Bell, Vivian	Red River
Bellows, Gladys	Collin
Benson, Cora	Limestone
Bentley, Connie	Navarro
Bentley, Lola	Cooke
Berry, Jewell	Upshur
Best, R. T.	Wise
Biggerstaff, Eunice	Bonham
Billington, Beulah	Tarrant
Blakely, W. T.	Denton
Blankenship, W. C.	Bynum
Blanks, Bob	Denton
Bledsoe, Lorena Douglas	Denton
Blewett, Willis	Denton
Blocker, Doda	Bowie
Boaz, Eva E.	Lamar
Bond, Elisebeth	Dallas
Bond, Mrs. Icy V.	Dallas
Boner, Mary Agnes	Denton
Boner, Murrel	Denton
Bonner, Margaret	Freestone
Bonner, Nettie Octavia	Navarro
Booker, Annie Roonie	Denton
Booker, Beulah	Denton
Booker, C. D.	Denton
Booker, H. G.	Denton
Booker, Louise Marie	Red River
Borden, L. D.	Denton
Boren, Sammie	Denton
Bouchett, Edna Mabel	Callahan
Bowling, Fannie P.	Oklahoma
Brackeen, A. H.	Van Zandt
Bradford, Ollie	Shackelford
Bradley, Mayme Jack	Denton
Bradley, Nannie	Hill
Bralley, F. M.	Denton

Name	County
Bralley, W. M.	Hale
Bray, Floy	Dallas
Breeding, Ollie J.	Hamilton
